ACADEMIC PROGRAMS

The academic programs at Fort Lewis College are offered through the Schools of Arts and Sciences, Business Administration, and Education.

Degrees Offered

Fort Lewis College offers a number of programs leading to the bachelor's degree. The Bachelor of Science degree is offered in biology, chemistry, geology, general science and physics; the Bachelor of Arts degree is granted in all other four-year programs. In addition, the College offers a program leading to the Associate of Arts degree in agricultural science.

The Fort Lewis College teacher education programs have been approved by the Colorado Department of Education. Licensing programs are offered for the following: early childhood (pre-school, K-2), middle childhood (elementary), young adult (secondary) and K-12 (art, music, PE) education.

School of Arts and Sciences

Courses in agriculture, anthropology, art, biology, chemistry, communications, computer science, engineering, English, environmental policy, forestry, French, geology, general science, German, health careers, history, Japanese, Latin, mathematics, music, Navajo, philosophy, physics, political science, sociology, Spanish, statistics, and theatre, as well as interdisciplinary work in a number of areas (such as international studies, religious studies, southwest studies, and women's studies) are offered in the School of Arts and Sciences.

School of Business Administration

The School of Business Administration is an AACSB Accredited professional school offering instruction in accounting, agricultural business, business administration, engineering management, finance, international business, management, marketing, operations management, tourism and resort management, and economics.

School of Education

The School of Education prepares students for licensure at the early childhood (pre-school, K-2), middle childhood (elementary), young adult (secondary) and K-12 (art, music, PE) levels. Major programs of study in English, exercise science (PE) and music education are also available. Students can add-on endorsements in bilingual, English as a second language, early childhood (pre-school, K-2) and early adolescent (middle school) education to various licenses.

Student-Constructed Major

The College has established the student-constructed major to meet particular needs and purposes. Such a major is usually interdisciplinary, always designed to meet the special needs and talents of individual students, and generally differs substantially from course combinations and emphases that are available through majors, minors, and electives in the established curriculum. Among recent student-constructed majors have been ones in criminal justice, international studies, agricultural economics, commercial art and southwestern peoples. The major may be related to any school or include course offerings from more than one school. Student-constructed major contract forms and requirements are available in the Records Office.

[Return to Top](#)

REQUIREMENTS FOR GRADUATION

General Requirements

Each candidate for graduation must complete a minimum of 128 credits, with at least a minimum cumulative grade point average of 2.0 and a minimum grade point average of 2.0 for those courses accepted to meet the requirements for the major course of study. Of the 128 credits required for graduation, each student is required to complete a minimum of 50 credits outside the discipline in which he or she is majoring. It is the responsibility of the student to know and complete all graduation requirements.

Candidates for bachelor's degrees must complete three elements in their academic programs: general studies, a major and electives. Each candidate must complete a minimum of 44 credits in the general studies program to be chosen as outlined below and a minimum of 30 credits in a field of specialization, called the major. The balance of the 128 credits required for graduation are called electives. The student has wide latitude in selecting these, although some of them may be specified in certain programs as auxiliary to the major or for teacher licensing. Many students choose to use electives to complete the requirements for a minor.

A student must complete his or her final 28 credits in residence. Exceptions to this requirement include such programs as medical technology and engineering (3-2 program). Other exceptions may be made in unusual circumstances by the Vice President for Academic Affairs on recommendation of the appropriate school dean.

Among the 128 credits required for the degree, 50 credits must be upper-division courses. No more than 28 credits will be accepted for work completed by correspondence, extension or educational television.

A course offered in substitution for a required course or the request that a requirement be waived must have the approval of the student's faculty advisor, the school dean, and the Vice President for Academic Affairs or his designee. The student must complete the form "Request for Exception to Graduation Requirements."

Majors

Each student seeking a baccalaureate degree must select a major area of study for specialization. The College now offers majors in Accounting, Anthropology, Art, Biology, Business Administration, Chemistry, Computer Science Information Systems, Economics, English, Exercise

Science, Geology, History, Humanities, Mathematics, Music, Philosophy, Physics, Political Science, Psychology, Sociology/Human Services, Southwest Studies, Spanish and Theatre. In addition to these regular majors, the College has established a procedure whereby a student with a special purpose may construct his/her own major. Ordinarily, this major should be of an interdisciplinary character and be submitted for approval not later than the end of the first term of the junior year. The student-constructed major contract must be approved by the advisor, the appropriate school dean, a representative of the Curriculum Committee and the Vice President for Academic Affairs.

Students may elect to complete concurrently the requirements for two majors. The "Petition for Candidacy for a Degree," which can be obtained from the Records Office, must be completed with both majors listed, and submitted to the Records Office. Any major or minor additions or changes after submission of the original "Petition for Candidacy for a Degree" must be made on the original form in the Records Office.

Courses meeting auxiliary requirements may count in meeting curriculum requirements for both majors. Courses taken to fulfill requirements in either major field generally will not apply towards General Studies groups A, B, C, D, or E. All requirements for both majors must be completed prior to a degree being awarded.

As of January 1, 1989, the Colorado Department of Education no longer recognizes elementary education as a major for candidates seeking elementary teacher licensing. Students seeking elementary teacher licensing must complete a degree with a subject major as well as the elementary teacher licensing program.

Associate of Arts degree is offered in agricultural science.

Minors

Minors, even though not required for graduation, are offered by most departments. Requirements for a minor are described under the program of study for each department or can be obtained from the department. General Studies requirements and minor requirements may overlap. For additional information regarding a minor, consult the department chair.

Electives

The third part of a student's program of study consists of additional courses called "electives," selected in accordance with his or her ability,

interest and purpose. The courses permit students to become acquainted with other areas of knowledge to broaden their education, to supplement their major areas of concentration, to meet specific requirements of a graduate school, to take professional teacher certification courses, or to add a second teaching field.

Second Bachelor's Degree

A student who for special reasons desires to secure a second bachelor's degree must complete a minimum of 28 credits in addition to the total number of credits required for the first degree. The student is required to complete all requirements for the second degree, including general graduation requirements and specific requirements for the major selected. No honors are awarded upon the receipt of a second bachelor's degree. If a student receives the first bachelor's degree from another accredited college, the additional 28 credits must be in residence to fulfill the requirements for the second bachelor's degree. The additional credits required for the second degree may be completed concurrently with those credits applying to the first degree and the two degrees may be granted simultaneously, providing all requirements have been completed for both degrees.

Petitioning to Graduate

Once a degree seeking student reaches 80 earned credit hours, the Records Office will automatically send the student a "Petition to Graduate". The petition will request verification of academic information such as degree type, major, minor, concentration and anticipated date of graduation. Students have thirty days to submit corrections or changes to their petition. An initial graduation check will be sent to the student within three weeks or within three weeks of receiving a corrected petition. At the same time your account will be charged a \$15.00 graduation fee. The student will receive an initial graduation check as well as a graduation check the term prior to their term of anticipated graduation.

[Return to Top](#)

THE CURRICULUM

Interpreting the Catalog

The figures after each course [i.e. (3-2) 4] have the following meanings: the first figure in the parentheses refers to hours spent in lecture or seminar sessions and the second number refers to hours in laboratory each week. The figure outside the parentheses refers to semester credits.

The course numbering system is described in the following table:

Course Number	Intended for:	Instructor Permission	
		Open to:	Required for:
Below 100	Open only to students with demonstrated need.		
100-199	Fr	So	Jr, Sr
200-299	So	Fr, Jr	Sr
300-399	Jr	So, Sr	Fr
400-499	Sr	Jr	So

Entry to all courses is limited to students who have completed published prerequisites or to those with instructor permission. Courses numbered below 100 do not count toward graduation. Courses numbered below 300 are called lower-division courses, while those 300 or above are upper-division courses.

General Studies

Fort Lewis requires a broad background in general studies of all candidates for the bachelor's degree. Students have a variety of choices, but they are specified by general categories in order to assure breadth of education in addition to the specialization required in the major. Each student will be aided by a faculty advisor in choosing a general studies program best suited to the student's own needs and interests.

I. Composition

Students will complete the academic writing requirement by taking one course, Comp 150:Reading and Writing in College, or two courses, Comp 125-Comp 126, Reading in College(Intensive) and Writing in College(Intensive). Exemptions to this requirement are granted to students who earn a score of 650 or above on the SAT II Writing Test, score of 4 or 5 on the Advanced Placement Test for English Composition/Literature, or score a 4 or above on the English Exam of the International Baccalaureate Program.

LIB 150 Information Literacy (1-0) 1

This course examines the role information plays in daily life, how information is generated, and how it is organized. Emphasis will be on

accessing and critically evaluating information, especially within the context of conducting research in an academic library.

II. Distribution Requirements

The outline below indicates the number of courses required in each group. Courses taken in the major field will not apply toward groups A, B, C, D or E except for the broad majors of humanities and Southwest Studies. However, courses required for a major that are under "Auxiliary Requirements from Other Departments" may apply toward General Distribution Requirements. Courses identified with more than one group letter can be used to satisfy only one group requirement (e.g. Hist 170CE can satisfy C or E but not both).

Group A. LANGUAGE AND THE ARTS - 9 Credits

Purpose: To provide an understanding of human expression through literature, the fine arts and the performing arts, with special emphasis on developing aesthetic sensitivity and creativity. Nine credit hours must be chosen - at least one course from each subgroup.

1. Literature or language courses with A1 after the course number (or suffix) will satisfy this requirement. Examples are Ed 327A1 Children's Literature, Engl 221A1 Classical Literature, ML 148A1 Elementary French II.

2. Fine arts and performing arts courses with A2 after the course number will satisfy this requirement. Examples are Art 162A2 Art in the Humanities, Mu 101A2 The Musical Experience, SW 154A2 Indian Arts and Crafts and Thea 101A2 Introduction to Theatre. Three consecutive trimesters (e.g., fall, winter, fall) in any large music ensemble (Choir Mu 105A2/305A2, Band Mu 110A2/310A2, Orchestra Mu 117A2/317A2) will also equal one course from this subgroup.

3. One course from subgroup 1 or 2.

Group B. QUANTITATIVE AND NATURAL SCIENCES - 10 Credits

Purpose: To provide an understanding of the physical world and the formal, theoretical and empirical methods by which it is studied. Ten credit hours - at least one course must be a natural science course with associated laboratory; the courses must be from at least two different fields.

Courses with a B after the course number will satisfy this requirement. Many group B courses are available in these fields: Agriculture, Biology, Chemistry, Computer Science Information Systems, General Science, Geography, Geology, Physics and Mathematics. Courses in Business, Philosophy and Psychology with a B after the course number will also satisfy this requirement.

Group C. FOUNDATIONS OF CULTURE - 6 Credits

Purpose: To provide an understanding of fundamental values and world views through the study of human society's past, its formative ideas, and its alternative cultural expressions. Courses with a C after the course number will satisfy this requirement. Courses in this group are available in the fields of Anthropology, Business Administration, Economics, History, Philosophy and Southwest Studies.

Group D. SOCIAL STRUCTURE AND BEHAVIOR -6 Credits

Purpose: To provide an understanding of human beings, both as individuals and as socially, politically and economically related groups. Courses with a D after the course number will satisfy this requirement. Courses in this group are available in the fields of Business Administration, Economics, Geography, Political Science, Psychology and Sociology.

Group E. NON-WESTERN STUDIES - 3 Credits

Purpose: To provide an understanding of a cultural view quite different from the students' own, which is generally North American and European, in order to broaden their horizons of thought and their understanding of the world's peoples; to promote peace and understanding; and to help students have more objectivity toward and appreciation of their own culture as seen from another perspective.

At least three credits must be taken in Non-Western Studies. These courses are culturally rather than geographically defined and focus on Latin America, Asia, Africa, Eastern Europe, the Islamic World, and Native American cultures. Courses meeting this requirement will have an E after the course number.

Group W. WRITING - 3 Credits

Purpose: To provide an understanding of the writing, reading, and thinking practices of the academic community, both at a general level and at a more specific, disciplinary level.

Every student must take either Comp 125-126 "Reading in College (Intensive) and "Writing in College (Intensive)" or Comp 150 "Reading and Writing in College" and Lib 150 "Information Literacy." After these courses have been completed, students must take a writing course (identified with a W) within their major discipline. These disciplinary Group W courses may also be counted toward departmental requirements.

III. Physical Education

Three courses of 1 credit each are required; one in skills, one in an activity, and ES 100 Fitness and Wellness.

Repeatable Courses

Certain courses are repeatable but have limits on the number of credits that can be counted toward graduation. Art courses may be repeated once for a total of 6 credits in the following: Art 201, 227, 301, 313, 324, 326, 331, 343, 350, 401, 413, 424, 425, 431, 443 and 450. The limit on physical activity courses is 6 credits in different physical activities or levels. Theatre 100, 200, 300, 366 and 400 are each repeatable for up to 12 credits. A maximum of 18 credits are allowable toward graduation in any combination of Engl 250, 251, 252, repeatable up to 6 credits; Engl 350, 351 and 352 repeatable up to 12 credits.

A combined maximum of 12 credits from large ensembles -- Mu 105A2, 110A2, 117A2, 305A2, 310A2, 317A2 -- is allowable toward graduation. A combined maximum of 12 credits from each small ensemble -- Mu 106/306, 111/311, 112/312, 113/313, 118/318, 119/319, and 300 -- is allowable toward graduation. Each applied music course -- Mu 109, 209, 309, 409 -- may be repeated for a maximum of 4 credits. A maximum of 16 credits in a single applied music area is allowable toward graduation. Mu 100 may be repeated for up to 4 credits allowable toward graduation. Mu 107, 207, and 407 are repeatable with limits.

[Return to Top](#)

Courses Common To All Programs

COMPOSITION

Comp 125 Reading in College(Intensive) (4-0)4

This course introduces students to the purposes and practices of scholarship, with an intensive emphasis on the interplay of reading and

writing in academic work. Students learn how to read scholarly articles from a rhetorical perspective and how to write in response to such readings. This course (and its companion, Comp 126) are designed for students who need a more closely guided and intensive introduction to academic reading and writing. Comp 125 and Comp 126 are college-level courses; students who need remedial instruction should complete TRST 91 before enrolling in Comp 125. Completion of Comp 125 and Comp 126 will fulfill the academic writing requirement; a student may not receive credit for Comp 150 if s/he has received credit for Comp 125 and Comp 126.

Prerequisite: Placement into Comp 125 or completion of TRST 91.

Comp 126 Writing in College(Intensive) (4-0)4

In this course students analyze a variety of academic texts in different research literatures and complete an intensive series of writing assignments to teach them how to interpret arguments, identify constraints and bias, organize and present evidence and compose their own contributions to intellectual dialogues. This course (and its companion, Comp 125) are designed for students who need a more closely guided and intensive introduction to academic writing. Completion of Comp 125 and Comp 126 will fulfill the academic writing requirement; a student may not receive credit for Comp 150 if s/he has received credit for Comp 125 and Comp 126.

Prerequisite: Comp 125.

Comp 150 Reading and Writing in College (4-0) 4

This course emphasizes the interplay of reading and writing in an academic environment. Students will analyze a variety of academic texts and complete a series of writing assignments designed to teach them how to interpret arguments, identify constraints and bias, organize and present evidence, and compose their own contribution to intellectual dialogues.

Prerequisite: Placement in Comp 150.

LIB 150 Information Literacy (1-0) 1

This course examines the role information plays in daily life, how information is generated, and how it is organized. Emphasis will be on accessing and critically evaluating information, especially within the context of conducting research in an academic library.

Prerequisite: 12 hours of college credit. Must be taken in conjunction with Comp 150 Reading and Writing in College.

COOP ED 200 Cooperative Education 1-10

A first-time cooperative education work experience by underclassmen.

COOP ED 300 Cooperative Education 1-10

A cooperative education work experience by upperclassmen. A maximum number of credits is allowed toward a degree.

COOP ED 400 Cooperative Education 1-10

An advanced cooperative education work experience by upperclassmen who have completed one or more Co-op terms. A maximum number of credits is allowed toward a degree.

GENERAL STUDIES

General Studies courses are focused on topics that are from the perspective of more than one discipline. These courses do not fit an academic area represented by a single department or program.

GENERAL STUDIES 101 and 102 Human Heritage I and II (4-0) 4

This two-term course is a study of Western, Chinese and Native American intellectual traditions. The course is designed to help students understand how our cultural traditions influence our ways of looking at the world and how studying cultures other than our own expands and challenges our frame of reference. The course emphasizes intellectual, artistic, political, scientific, religious, and economic aspects of the three cultures from selected periods in history. Human Heritage II is a continuation of Human Heritage I. Students must complete both courses to fulfill designated distribution requirements (A1, C, and E). This course transfers to all Colorado colleges and universities in fulfillment of general education requirements.

GENERAL STUDIES 151 INTEGRATED LEARNING PROGRAM (14-11) 16

This course integrates the humanities, the social sciences, and the sciences around broad topics of scholarly interest. The particular categories of general education courses that this course satisfies are given below. Topics of individual components may differ each year.

Group A: Language and the Arts

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human expression through literature and language with special emphasis on developing aesthetic sensitivity and creativity. The works of literature considered will vary each year.

Group B: Quantitative and Natural Sciences

The Integrated Learning Program awards the equivalent of one course with lab which provides an understanding of the physical world and some of the formal, theoretical and empirical methods by which it is studied.

Group C: Foundations of Culture

The Integrated Learning Program awards the equivalent of one course which provides an understanding of fundamental values of world views through the study of human society's past, its formative ideas, and its alternative cultural expressions.

Group D: Social Structure and Behavior

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human beings, both as individuals and as socially, politically and economically related groups.

Lib 150: Information Literacy

The Integrated Learning Program awards credit for Lib 150, which examines the role information, plays in daily life, how information is generated, and how it is organized.

ES 100: Fitness and Wellness

The Integrated Learning Program awards one credit for ES 100, that examines the basic physiological principles of exercise and nutrition.

GENERAL STUDIES 495 Environmental Colloquium (4-0) 4

This course, which is a capstone course for the Environmental Policy Minor, involves conducting and reporting on an integrative project, in weekly meetings involving several faculty members from across the academic disciplines. The project can involve research, assessment or analysis of ongoing programs, policy or proposals for action. This

student-conducted project provides a Service Learning opportunity for students.

Prerequisite: Junior standing, Psych 241B or Math 201B or BA 253B and consent of instructor.

GENERAL STUDIES 496 Interdisciplinary Senior Seminar (2-4)

An interdisciplinary seminar for graduating seniors, this course provides a capstone experience of broad intellectual inquiry, including a focus on critical reading and thinking, problem solving, and the written expression of ideas.

Prerequisite: Senior standing.

SPECIAL TOPICS 190 1-6

This is not a fixed course but is a designation to take advantage of special opportunities and topics. It can be offered in any area with the consent of the school dean and the Vice President for Academic Affairs. This course may not be used to meet any general studies requirement. From 1 to 6 credits may be earned.

SPECIAL TOPICS 191 3-6

This is not a fixed course but is a designation to take advantage of special opportunities and topics which meet the purpose of one of the groups under the General Studies Program. It can be offered in any area with consent of the school dean, the Vice President for Academic Affairs, and curriculum committee. Credit may vary from 3 to 6 credits.

SPECIAL TOPICS 390 1-6

Same as Special Topics 190 except that this course is taught at the upper-division level. This course may not be used to meet any general studies requirement.

SPECIAL TOPICS 391 3-6

Same as Special Topics 191 except that this course is taught at the upper-division level.

INDIVIDUALIZED STUDY 299 1-3

Independent study for lower-division or non-major students. Available in most disciplines.

INDEPENDENT STUDY 499 1-3

All major fields require either independent study or a seminar at the senior level. Independent study may be undertaken in a field other than the student's major. To do so, the student must have the approval of his or her advisor, department chair, the department chair in whose area the study will be made, and the professor who will supervise the study. However, independent study in the field outside the student's major cannot be substituted for the requirement of independent study or seminar in his or her major field.

[Return to Top](#)

TRST - TRANSITIONAL STUDIES

As the title implies, Transitional Studies courses are designed to assist students in their transition from high school to college. The classes, taught by the staff of the Learning Assistance Center, do not give students credit towards graduation, but do carry credit which can be applied to financial aid and housing requirements. Students receive a grade of S (Satisfactory) or NC (No Credit).

TRST 91 The Writing Process (3-0) 0

Designed to improve the composition skills of students who have weak backgrounds in writing. The course focuses upon pre-writing, logic, paragraph organization, and essay structure, and includes frequent one-on-one critique sessions with the instructor.

TRST 92 Intermediate Algebra (2-1) 0

Designed to provide review and instruction in college preparatory mathematics for students with deficiencies in or apprehensions about required entrance level mathematics courses. The course will cover such topics as algebraic expressions, manipulation of signed numbers, solving equations and inequalities, algebraic fractions, polynomials, exponents, radical expression and graphing. Students who wish to enroll in this course should have successfully completed at least the equivalent of Algebra I.

[Return to Top](#)

John F. Reed Honors Program

For students of outstanding ability, the College offers the John F. Reed Honors Program, named for John F. Reed, President of Fort Lewis College from 1962 to 1969. Students who complete the Honors Program will receive special recognition at graduation and on their transcripts.

The Honors Program offers an enriched educational opportunity to students who enjoy working in small groups. Each Honors course draws on the scholarship and insights of more than one academic discipline and is conducted in the small group, participatory setting of a seminar. Students admitted to the program are automatically accepted into any Honors course; students who are not enrolled in the program may take Honors courses with the consent of the instructors.

Students usually apply to enter the program at the end of the first term of their freshman year or at the beginning of the first term of their sophomore year. Admission to the program is based on an assessment of the student's Fort Lewis College academic achievement, faculty recommendations, and demonstrated interest. Application for admission to the program should be made to the Honors Coordinator. Reed Scholars are expected to maintain a minimum cumulative grade point average of 3.4.

The John F. Reed Honors Program consists of the following core courses and additional requirements:

I. The Honors Core:

1. A minimum of four Honors Forum courses (Hon 220/420), at least two of which are at the 420 level.....Credits 4
2. Formal thinking course: either Logic (Phil 271B) or Statistics (Math 201B, BA 253B, or Psych 241B).....Credits 4
3. Honors Thesis: first term, senior year (Hon 499).....Credits 1
Honors Thesis: second term, senior year (Hon 499).....Credits 1-2

II. Additional Requirements:

1. Completion of General Distribution requirements
2. Proficiency in a foreign language through the intermediate level (equivalent to the second term of the second year).
3. Cumulative grade point average of at least 3.4.

HONORS 220 HONORS FORUM (1-0) 1

The purpose of this course is to facilitate critical evaluation and discussion of selected works having broad intellectual importance and accessibility to students of varied academic interests and backgrounds. Grading is on a pass-fail basis. Course is repeatable for credit for freshman and sophomore level students.

Prerequisites: Prior acceptance into Honors Program, Comp 150, Lib 150 and consent of instructor.

HONORS 420 HONORS FORUM (1-0) 1

This course continues the series of Honors Forums required for John F. Reed Honors students. Grading is on a pass-fail basis. Course is repeatable for credit for junior and senior level students.

Prerequisites: Prior acceptance into Honors Program, Comp 150, Lib 150 and consent of instructor.

HONORS 499 HONORS THESIS 1-2

The Honors Thesis is the result of an independent study project undertaken during the senior year. The topic of the thesis must draw significantly on at least two academic disciplines. The student should choose a topic for the thesis in consultation with a faculty advisor, a reader from the second discipline, and the Honors Coordinator. At the end of the first term, the student must submit evidence of substantial work accomplished. During the second term, the student will complete the thesis and make a public presentation of the results.

[Return to Top](#)

SPECIAL ACADEMIC PROGRAMS

Cooperative Education Program

Cooperative Education is an academic unit of the College that grants elective credit. The Cooperative Education Program (Co-op) is designed to assist students in applying valuable classroom knowledge to practical work and internship experiences. It also provides an opportunity for career exploration. Co-op at Fort Lewis was established in 1970 as the first college-level co-op program in the state of Colorado. More than 200 Fort Lewis students per calendar year participate in the program.

Generally, students are eligible to participate in Co-op after they have completed their freshman year with a minimum 2.5 cumulative grade point average. Plans for enrollment should be initiated with the Co-op Director and the student's advisor in the semester prior to the experience. The Co-op work experience normally corresponds to the academic trimester. No adding of Co-op credits will be permitted after the deadline for adding classes (census date).

The first step involves an interview with the Co-op Director during which a written essay is submitted on the student's learning objectives for the Co-op experience. The decision to admit a student into Co-op and to award final credit reside with the Director of Cooperative Education.

The Director assists students in defining career goals and locating appropriate placements. Student initiative is also supported and encouraged in designing internships and in contacting prospective employers. Students may work with private or public employers throughout the United States.

Cooperative Education credits are counted as general electives. They can be earned under the headings of Co-op 200, 300 or 400. The level and amount of credit depend on a variety of factors. The nature of the work experience is evaluated in the context of the student's course background, and career and personal goals, before a final determination is made on an individual basis for both the level and amount of Co-op credit.

The general criteria for a 200-level experience are that the student will be undertaking career exploration or is beginning an entry-level position that is related to the major. First-time Co-op experiences are typically 200-level, particularly for students with lower-division standing.

A 300-level Co-op experience typically applies to upper-division students who bring a significant degree of appropriate course work into the workplace. Such students may qualify for 300-level credit in their first Co-op placement.

A 400-level experience is for seniors in their second or third placement where they have obtained a promotion to higher responsibilities than in their previous 300-level placement.

The guideline for awarding credit is that one semester hour of Co-op general elective credit may be earned in a trimester for each 50 contact hours on the job. The student's major requirements and limits imposed

by the major on general elective credits are taken into account.

Co-op students have represented all majors at Fort Lewis; however, departments and schools vary in the number of elective hours accepted toward graduation. It is possible to apply up to 12 Co-op elective credits toward graduation in some programs. The School of Business Administration allows a maximum of 10 Co-op credits to apply toward graduation. It is the student's responsibility to verify the number of elective credits available in his/her degree program. In addition, the student should have the Co-op plan evaluated by his or her academic advisor.

Cooperative Education students analyze their work experience in the form of a daily work journal and a formal typed paper at the end of the trimester. These written materials are evaluated by the Co-op Director. This is done in cooperation with other faculty members whenever appropriate. Grading is on a credit (S) or no-credit (NC) basis.

At the beginning of the work experience an on-the-job supervisor is identified for each student. The supervisor submits a written performance evaluation at the end of the trimester to the Co-op Director. This document becomes part of the overall evaluation process.

The Cooperative Education Program operates through the calendar year and enrolls students for the fall, winter and summer trimesters. Each student receives a complete program information packet which includes instructions, policies, a listing of due dates, a job description form, a learning objectives statement, guidelines for journals and final papers, and a publication from the National Commission for Cooperative Education, of which Fort Lewis College is a member. Students who are based in Durango pay regular tuition and fees. Students who work outside a 20-mile radius of the college pay regular tuition and reduced fees.

The Director of Cooperative Education at Fort Lewis assists all students without discrimination.

Extended Studies

Fort Lewis College Extended Studies extends the resources of the campus to the community to satisfy personal and professional needs for lifelong learning. The non-credit program emphasizes professional development, Southwest culture, liberal arts, recreational learning and travel. You can find descriptions of current offerings on the web at www.fortlewis.edu/extstudy.

Specialized college credit courses designed for professional enhancement and scheduled for the convenience of adults are also offered. (Regular FLC classes are also open to the community if space is available; contact the Admission Office for information on unclassified student applications.)

The Extended Studies program will develop and support on- and off-campus courses geared to specific audiences and specialized needs. Currently active are off-campus degree-completion and teacher certification programs. Address your inquiries to the Director of Extended Studies.

English As A Second Language Programs (ESL)

Fort Lewis College offers a 10 and 13 week Intensive English program each summer for international students. The program which runs June to August is designed to prepare non-English speaking students linguistically and academically for college-level work in the U.S. Only advanced intermediate to advanced students are accepted (at least Test of English as a Foreign Language, TOEFL 425).

The program emphasizes academic reading, academic writing including essays and research papers, college skills such as using the library for research and using the computer system, daily small discussion groups as well as culturally oriented field trips, excursions and activities. Successful completion of the Intensive English Program is accepted by FLC in place of TOEFL 500.

For further information contact Laura Godfrey, director, at e-mail: godfrey_1@fortlewis.edu. Phone 970-247-7615 or write to 89 Reed Library, Fort Lewis College, 1000 Rim Drive. Durango, CO 81301.

Programs in Mexico

Fort Lewis College has encouraged a number of Study Abroad opportunities in Mexico. The main purpose of these programs is to develop fluency in the use of the Spanish language and to acquire an in-depth knowledge of the culture of Spanish-speaking people by immersion and by studying specific courses in the social sciences and arts oriented toward this goal. The normal duration of this experience is one or two trimesters. Most opportunities to study in Mexico require a good background in the language at least equivalent to one year of college-level Spanish. Students are strongly encouraged to live with a Mexican family. Students interested in a Study Abroad experience in Mexico must discuss various opportunities with members of the Modern

Language or Sociology Department and the Records Office.

School of Business Administration Trimesters Abroad in Europe

The School of Business Administration conducts trimester programs at sites in Europe, with the courses taught in English by FLC faculty. Because there is no additional tuition for this program, it turns out to be quite inexpensive compared to many Semester Abroad Programs offered by other colleges and universities. While the program of courses is directed primarily at Business School students in their Junior year, it is open to all FLC students with junior standing and have completed the appropriate prerequisite courses.

Students interested in this program should see the more detailed description under the Business Administration section of the Catalog and contact the Assistant Dean of the School of Business Administration.

International Student Exchange

The College has exchange agreements with École Supérieure de Commerce de La Rochelle (SupDeCo), Amsterdam School of Business (HES), Ecole Supérieure des Sciences Commercial (ESSCA), Fachhochschule Regensburg (FSR), and the Norwegian School of Management (BI), University of Örebro (Sweden), University of Northumbria (Newcastle, England), University of Southern Denmark, University of Savoie (Chambery, France), and Universidad de Córdoba (Spain). Programs in France, Spain and Germany require second-year language fluency. The remainder are in English. These programs are open to all students; business schools in Europe usually teach an array of liberal arts courses.

Students interested in schools in countries other than those mentioned should check with the International Programs Coordinator since the College is actively expanding its exchange partnerships. In addition, other study abroad programs are accessible through the National Student Exchange and other consortial arrangements.

With the exception of the English as a Second Language and Mexico programs, and the SOBA's Trimesters Abroad, students interested in study abroad should contact the International Programs Coordinator.

International Dual Degree Program

Through partnership with École Supérieure de Commerce de La

Rochelle (France), students can earn degrees from both that school and Fort Lewis by spending two years at each school.

National Student Exchange

National Student Exchange gives FLC students the opportunity to enhance their education by studying for one or two semesters on another campus in the NSE network of nearly 160 colleges and universities in the United States. FLC students pay FLC tuition and fees or resident tuition and fees at the host campus. Applications are due during February for the next academic year.

Credits and grades earned on exchange are incorporated into the student's FLC record and grade-point average. Financial aid normally can be arranged as usual.

To qualify for participation in NSE, a student should: (1) be a full-time FLC student; (2) be a sophomore or junior at the time of exchange; (3) have a grade-point average of 2.5 or better; and (4) be an in-state resident student.

Information and applications may be obtained from the International Program Coordinator in Hesperus 133.

SUMMER PROGRAMS

The summer programs at Fort Lewis College offer a rich variety of courses from the regular curriculum for students who wish to graduate in fewer than four years.

Innovative Months

Each year a selection of "innovative month" courses offers focused and in-depth study. These are typically six-credit courses which include travel, either regional or international, and immersion in other cultures. Travel classes are an increasingly important part of a complete education for the growing interactions of world cultures and markets. Whether a student's interest is business, education, government or social commitments, these opportunities for travel study may be an important part of a student's total educational program.

Recent courses have included a field study of environmental politics in the Southwest; a field study experience in animal behavior in Kenya; a

van tour of Mexico for immersion in MesoAmerica language and culture; travel to nations as divergent as Ladakh, France, Spain and Guatemala focusing on political, cultural and economic change. These courses are announced during the fall term for the coming summer. Check our web site at www.fortlewis.edu/extstudy.

2000 - 2001 ACADEMIC POLICIES

Grading

The quality of a student's work is appraised according to grade point averages. Fort Lewis uses the four-point system, which assesses grade points as follows:

A = 4 points	C = 2 points
A- = 3.75	C- = 1.75 points
B+ = 3.25 points	D+ = 1.25 points
B = 3 points	D = 1 point
B- = 2.75 points	D- = .75 point
C+ = 2.25	F = 0 points

The grade point average, carried to two decimal places, will be computed by dividing the total number of grade points by the total number of credits attempted. Grades of X, S, P, W, NC and NG do not affect the grade point average.

The grade of X means the student has passed a course by special examination, CLEP, AP, or credit based on ACT scores or military service. The grade of P means that the student has passed a course on a Pass-Fail basis. The student must request this option at the time of registration.

The grade of W signifies that the student has withdrawn from the course while passing. After census date, the instructor must assign a W or an F.

The grade of S (credit) means that the student has successfully completed the course.

The grade of NC (No Credit) means that the student did not complete the course. No credit is given nor is the grade figured in the grade point

average. Certain courses are designated by the college to be S or NC graded courses.

The grade of NG (No Grade) indicates that the instructor did not report a grade by the deadline for submission of final grades.

Incompletes. A grade of Incomplete (I) is a student-initiated grade which must have the instructor's approval. It is appropriate only under the following conditions:

1. The major part of the course requirements has been met.
2. The student is unable to complete the requirements in the term in which the course is taken for compelling and unforeseen reasons.
3. In the opinion of the instructor, the requirements can be completed by the student without repeating the course.

If the course requirements are not completed within one year after the end of the appropriate term, the incomplete grade will revert to an F. (See below for the single exception to this change.) The dean of the school in which the course is offered may waive for good reason the one-year deadline upon petition by the student. If, within the time allotted, the student completes the course requirements, the instructor will initiate the grade change by filing a Special Grade Report form.

When giving an Incomplete, the faculty member must file a Report of an Incomplete form with the dean and the Records Office, specifying in detail: (1) what work must be done in order to remove the Incomplete, and (2) the time deadline for completing the work. The student should sign this form at the time it is prepared. A copy of the form should be given to the student. An Incomplete cannot be removed by registering to repeat the course. When the student cannot complete the course material without repeating the course, he or she should not receive an Incomplete; W or F would be more appropriate.

A course for which a student has a grade of I at the time of graduation **cannot** be used to satisfy any graduation or major requirement and is not counted in units attempted or GPA. In the event that a student has graduated prior to removing the Incomplete, the I grade will remain permanently on the graduate's transcript.

Grade Replacement Policy. When a course is repeated, all grades for that course will remain on the student's record, but the credit will count only once. For the first 12 credits of repetition of courses in which the initial grade was C- or less, only the last grade earned will be counted in the grade point average. When a course for which the initial grade was

C or better is repeated, or when a student has already excluded 12 credits of C- or lower grades from his grade point average, there shall be no exclusion of grades from the grade point average. The student should notify the Records Office of what courses to use for these 12 credits.

Satisfactory - No Credit Option. Courses that primarily utilize field experience may, at the discretion of the sponsoring school, be graded either "satisfactory - no credit," or with the traditional "A through F" letter grade system.

Should the "satisfactory - no credit" option be used, the courses may still be applied to either the major or General Distribution Requirements.

Pass-Fail Electives. Students with a cumulative average of at least a C are permitted to take up to four pass-fail electives during their undergraduate career. The pass-fail basis is limited to elective courses only. Pass-fail may not apply to General Studies Requirements, Departmental Requirements or Teacher Education Requirements. Students may take no more than one pass-fail elective in any one trimester and no more than 18 credits may be taken during the term they are carrying the pass-fail elective. Freshmen may not choose a course on this basis before their second term. Students taking a pass-fail elective must fulfill all necessary prerequisites for that course. Changes to or from pass-fail status after the beginning of a term are limited to the normal period for adding courses.

Audit. Students may audit courses with the permission of the instructor if they desire to attend classes regularly but do not wish to receive grades and credit. Upon registration, the students must declare whether they wish to take a course for audit or for credit. Students may not change from audit or credit, or vice versa, after the closing date for adding classes in each trimester. When registering, students may take both audit and credit courses but the total should not exceed a normal load. Students auditing courses are required to pay fees at the same rate as if enrolled for credit.

Students who wish to audit a course and later wish to obtain credit for it may do so by special examination, which requires an additional fee.

Attendance

Regular class attendance is expected. Each instructor keeps a record of student absences and determines the extent to which absences affect

final grades.

Final Exams

The number and type of examinations in any particular course are determined by the instructor. Separate days are set aside for the final examinations at the close of each trimester. It is the student's responsibility to take all examinations or to arrange for exceptions directly with the instructor.

Academic Progress

Fort Lewis College students are generally given two trimesters to make proper academic adjustments to college, but anyone not doing satisfactory academic work may receive a probation or suspension notice at any time.

An overall grade point average of 2.0 is considered satisfactory progress toward a degree. A grade point average of less than 2.0 will result in a student being placed on probation, suspension or dismissal from college. A student who has been suspended is advised to take transferable college credit at an accredited community college or other accredited college and is eligible for readmission when the cumulative grade point average is at least 2.0. Student should apply for readmission through the Admission Office at least one month before school starts. Readmission is not guaranteed.

The Academic Standards Committee reviews students based on cumulative grade point average and trimester grade point average based on the students' class levels. Listed below are class levels and cumulative grade point averages or below that are subject to suspension or academic dismissal.

Class	Cumulative Grade Point Average
Freshman, first term	1.00
Freshman	1.50
Sophomore	1.60
Junior	1.85
Senior	1.95

Students whose term GPA falls below 1.00 are subject to suspension or dismissal from the college.

Academic Renewal

A transfer or returning Fort Lewis College student who has not attended any college for at least five years (60 consecutive months) may apply for "academic renewal." Academic renewal is defined as the elimination of the student's entire previous academic record, including credits earned and grade point average. A student requesting academic renewal normally applies during the first year of resumed studies at Fort Lewis. In some cases, students may request academic renewal at the time that their application materials are complete with the Admission Office. A student requesting academic renewal must submit a written petition to the Academic Standards Committee within a year of resumption of studies. If the petition is granted, the student's permanent record will denote "ACADEMIC RENEWAL APPROVED" with the date. Students granted academic renewal must make satisfactory academic progress, if not, the student is then subject to review.

Dean's List/Graduating with Honors

The Dean's List, published at the end of each trimester, honors students for high scholastic achievement. Students who attain a grade point average of 3.4 or better in not less than 14 hours of graded credit and who have completed all work for which they are registered by the end of the term will be listed for that term.

To graduate with honors, students must have earned in residence at Fort Lewis at least the same number of credit hours that are required for their major. No honors are awarded upon receipt of a second bachelor's degree. Grade point averages required for honors are as follows:

Summa cum laude	Grade point average of 3.8 to 4.0
Magna cum laude	Grade point average of 3.6 to 3.7
Cum laude	Grade point average of 3.4 to 3.5

Graduation with "honors" depends wholly on achieving a high grade point average. It should not be confused with participation in the [John F. Reed Honors Program](#).

[Return to Top](#)

ACADEMIC PROCEDURES

Registration

Fort Lewis College faculty and staff believe advising contributes to a

students success; therefore the college encourages all students to seek academic advising. Some students are required to see an advisor. They are:

1. First-time students at Fort Lewis College
2. Students with less than a 2.00 GPA
3. Students with less than 30 cumulative credit hours

Students in one of these categories must have an alternate pin number to register. Your advisor will provide an alternate pin number when advising is completed.

Faculty advisors are available for all students to answer questions about classes and programs; to review your past, current and proposed course work; to guide your educational planning; and to help you with academic and related problems.

Faculty advisors are available for all students to answer questions about classes and programs; to review your past, current and proposed course work; to guide your educational planning; and to help you with academic and related problems.

Course registration is done on-line through Web-OPUS. Access is limited to approved new and continuing students using their student identification number and a PIN number. Concerns related to registration should be referred to the Records Office, 970-247-7350.

Withdrawal Procedures

If you decide not to attend, it is your responsibility to cancel your registration with the College following the appropriate procedures outlined below. The same procedure is required if you attend any portion of the term and decide not to complete the term. You will be assessed tuition and fee charges according to the pro-rata schedule below if you officially withdraw after the first day of class.

Prior to the first day of class, you may cancel your registration by logon to WEBOPUS.

Beginning with the first day of class, you must officially withdraw from the term by contacting the Learning Assistance Center, 280 Noble Hall, (970) 247-7383. You will be asked to make an appointment to complete

an exit interview and sign the necessary documents to complete your withdrawal. If you are unable to make an appointment, you must submit, in writing, a request for your withdrawal, signed with your legal signature. You will be assessed tuition and fee charges according to the schedule below.

If you submit a written request for withdrawal, send to Kathy Wellborn, 280 Noble Hall, Fort Lewis College, 1000 Rim Drive, Durango, Colorado 81301-3999, or FAX to Kathy Wellborn, (970) 247-7070.

Census Date has no connection to the schedule of charges. You will owe a percentage of your total bill if you withdraw any time after the first day of class.

REFUND SCHEDULES

FALL AND WINTER

Date of Withdrawal	Amount of Tuition and Fees Refunded
Week 1	90%
Week 2	90%
Week 3	50%
Week 4	50%
Week 5	25%
Week 6	25%
Week 7	25%
Week 8	25%
Week 9	No Refund

SUMMER

Date of Withdrawal	Amount of Tuition and Fees Refunded
Week 1	90%
Week 2	50%
Week 3	25%
Week 4	No Refund
Week 5	No Refund

In addition to the exit interview at the Learning Assistance Center, you must complete an exit interview at the Financial Aid Office to cancel your aid, if you have a Stafford Loan. If you have ever had a Perkins Loan at Fort Lewis, you must complete an exit interview with Heather

Lundquist, 140 Berndt Hall.

If you have campus housing, you must check out of your housing with your RA or RD within 48 hours of the initiation of your withdrawal from the term. At the time of check out, you must turn in your keys and sign the check out sheet. Policies concerning refund of room and board charges are published in the Tuition and Fee Brochure available at the Cashier Window, Berndt Hall or at the Student Affairs Office, 170 Berndt Hall.

Students who receive financial aid and then withdraw may be required to repay all or a proportionate amount of aid received. Repayment amounts are determined in accordance with federal, state, and institutional regulations and policies. Refunds for all new transfer and first-time freshman students receiving Title IV financial aid will be calculated using the Title IV pro rata refund schedule. To be eligible to receive the refund according to these schedules, it is essential that the withdrawal process be completed prior to 5:00 p.m. on the Friday of the week indicated(4:30 p.m. during the summer).

Fall and Winter Trimesters

Early Registration for continuing students is held in mid-November for the winter trimester and in late March for the fall trimester. Students register on-line through the Web.

Freshmen early register through one of the Student Orientation Advising and Registration Programs (SOAR). Five of these programs are offered in the summer for the fall trimester and one is offered prior to the beginning of the term for the winter trimester.

Transfer students also early register through the Transfer Student Orientation Advising and Registration Program (SOAR).

Continuing, former, and unclassified students may early register for the fall trimester through the Web at any time following early registration.

Summer Sessions

Registration for students for any of the three five-week summer sessions can be done on the Web beginning in early April.

Dates and Additional Information

Dates for registration policies and procedures are published in the

Schedule of Courses for any term.

Students who initially register for the term after the first day of classes, will be assessed a late registration charge.

Classification

A regular student is one who has been admitted to the College and has declared an intention to pursue the requirements for the baccalaureate or associate degree.

Regular students are classified as follows according to semester credits completed:

Freshman	Fewer than 30 semester credits
Sophomore	30-59 semester credits
Junior	60-89 semester credits
Senior	90 or more semester credits

An unclassified student is one who has been permitted to enroll but who does not intend to work toward a degree.

Special Scheduling

In exceptional cases, a regularly offered course not scheduled during a term may be taken on a non-scheduled basis when approved by the instructor, department chair and the appropriate dean. The Schedule Modification for Non-Scheduled Courses form is available in the Records Office.

Academic Advising

Upon entering the College, each student is assigned an academic advisor. Students may also receive academic advising at the Academic Advising Center in Sage Hall. As the career and academic plans of the student evolve, he or she may select an advisor whose interests and specializations are consistent with the student's goals. Fort Lewis believes deeply in the importance of academic advising and encourages all students to make liberal use of the opportunity to meet and confer with their academic advisors.

Course Load

The normal student load in a given trimester is 16 semester credits. A 3-

credit course will customarily meet three hours per week, a 5-credit course, five hours per week. Students should plan to spend a minimum of two hours of outside preparation per week for every credit carried during the fall and winter trimesters.

Full-Time Load

Full-time load for enrollment certification for Veterans Benefit, athletics, loans, etc., is 12 credits per semester. Various agencies have different regulations for full-time loads during the three summer sessions. Full-time load for enrollment certification will vary depending on the agency concerned.

Program Changes

Once a student has registered and confirmed a given set of courses, records are established and no courses are dropped from or added to the student's official registration except on forms provided by the Records Office. Such changes are the responsibility of the individual student, who must make arrangements with the Records Office and the instructor(s) concerned. Dates, fees and other details are published in the Schedule of Courses for each term.

As of 4 p.m. on the Census Day for any trimester or five-week summer session, all courses for which a student has registered will appear on the student's permanent academic record. Up through this date, all courses dropped from a student's registration will not appear on the student's permanent academic record. Census Day is published in the Schedule of Courses for each term.

A student has the right to withdraw from a class. After census date, the instructor must assign a grade of W or F.

Effective Catalog

The academic policies and regulations are changed by the College from time to time. The set of regulations (as published in the catalog) apply to a given student is determined by the following rule: all students intending to graduate from Fort Lewis College must meet the course requirements for graduation set forth in the catalog in effect at the time of their matriculation or the one in effect by the time of their graduation. Students may choose between the catalogs but may not combine them. Regulations other than course requirements will apply according to the catalog in effect at the time of graduation except as new regulations have other effective, specifically fixed dates. However, no catalog more than 10 years old at the time of the student's graduation will be accepted

as the source of graduation requirements. A student who matriculated more than 10 years before graduation will meet the requirements of the catalog in effect at the time of graduation, or may petition the Vice President for Academic Affairs to be permitted to graduate under some intervening catalog not more than 10 years old. Any student who is not registered at Fort Lewis College for any continuous period of two calendar years or more forfeits his claim to the catalog under which he entered and comes under the catalog in effect at the time he next returns to Fort Lewis College as a student. Students also have the right of appeal to the Vice President for Academic Affairs for use of an earlier catalog.

The College reserves the right to cancel a class (for that trimester) if enrollment is not deemed sufficient.

Transcripts

Fort Lewis does not charge a fee for transcripts. However, all accounts with the college must be settled before a transcript may be issued. Transcripts are processed as rapidly as possible and are usually issued within three working days from the date of request. However, at the end of a term, it takes five to 10 working days to issue a transcript. Transcript requests must be made in writing and signed by the student. Requests are sent to the Records Office, Fort Lewis College, 1000 Rim Drive, Durango CO 81301-3999.

Family Educational Rights and Privacy Act (FERPA)

FERPA defines the requirements for access to, and release of, student education records. Student education records are defined as records that are directly related to a student and are maintained by an educational institution. Student education records include enrollment records and billing records. In general, the education records of a student may be disclosed only to the student, parents of dependent students, academic advisor, or to those faculty or staff members who must have access to the records to perform their duties unless the student provides prior written consent to disclose their records to other persons. The following student information is designated as public or directory information: name, addresses, telephone numbers, e-mail addresses, dates of attendance, registration status, classification, major field of study, awards, honors, degree(s) conferred, past and present activities in officially recognized sports and activities, and date and place of birth.

Under the Family Educational Rights and Privacy Act, students have the right to review their own records, to seek correction of information

contained in those records, and to limit disclosure of information. To review their records, students need to contact the appropriate administrative office and schedule an appointment. Academic records are housed in the Records Office, billing records are available in the Accounts Receivable Office. The administrative office will arrange to make the records available within three (3) working days. To withhold disclosure of directory information, students must submit a completed "Confidentiality" form available at the Records Office. Students may choose to complete a "FERPA Release" form, authorizing the college to release information to a specified third party. This form is also available at the Records Office.

[Return to Top](#)

ACADEMIC SUPPORT PROGRAMS

The Library

The John F. Reed Library and Center for Instructional Technology serve as a research center for the campus and the Four Corners Region. The Reed Library is a "teaching library" that promotes learning through research collaboration in a highly technical environment supported by knowledgeable, skilled professionals. The library is a catalyst for the intellectual life of the student. It acts as a gateway to research information in all formats: printed books and journals, Internet sources, multimedia CD-ROMs, videos, sound recordings and more. Fort Lewis College students learn to locate, analyze and use in research projects a full array of information technologies, preparing them for success in their careers, graduate studies or other aspects of their lives.

Faculty, librarians, instructional technology staff and students work together in the Reed Library's dynamic research environment. The library provides a setting which encourages intellectual curiosity supported by a variety of materials as well as access to electronic information available through the Internet. The library contains more than 185,000 books, 38,600 microforms and 900 magazine and journal subscriptions on-line as well as eclectic collections of videos, sound recordings and multimedia software.

Librarians and other Fort Lewis College faculty recognize the need for students to become knowledgeable users and producers of information in order to participate actively in academic life. Research has become increasingly rich and diverse due to the Internet and other electronic information and communication media. In order for students to thrive in a changing electronic environment, they need to master concepts and skills in the areas of computer technology, library database searching,

evaluation of information sources, Internet searching and more. Library faculty teach a required course, Information Literacy (LIB 150), which allows students to build a foundation of knowledge and skills in these areas.

The Center for Instructional Technology supports creative approaches to instruction and learning. The center assists students and faculty in producing a variety of nonprofit materials including color or black and white overhead transparencies, digitized images for use in creating electronic and print materials, videotaped or computerized presentations and more. The center also has, available for use by students and faculty, equipment which includes camcorders, laptop computers and LCD display panels or data projectors for use with presentation software, VCRs and TVs, CD and cassette tape players and more.

The Reed Library uses the INNOPAC online system as its on-line library catalog. This system offers a friendly yet powerful interface for searching the library's holdings, as well as collections at other libraries. The library is also a member of OCLC (On-line Computer Library Center). Students may search the 30 million plus holdings of this database via the First Search. The interlibrary loan service allows students to borrow from their libraries items not owned by the Reed Library.

A committed and friendly library and IT staff assists students during all hours of operation. The Reed Library is open 87 hours per week during the fall and winter trimesters. Subject area research instruction is available on request for individual classes. Librarians at the reference desk also offer point of need research instruction to library users. In 1996-97 over 19,500 reference questions were asked to the librarians.

The Reed Library and the Center for Instructional Technology provide a rich environment promoting research and production of high quality information products. Students are encouraged to use the facilities and services provided to achieve academic and personal growth.

Web site: <http://library.fortlewis.edu>

Center of Southwest Studies

Established in 1964 and located in the new Center of Southwest Studies, it serves the College and community as a museum, a research and teaching facility, and the physical focus for an interdisciplinary approach to the history and culture of the Southwest. The Colorado Commission on Higher Education has recognized the Southwest Studies

Center as a program of excellence in state-funded higher education.

The Center's goal is to facilitate understanding of the Southwest through acquiring, preserving, exhibiting and otherwise providing access to collection materials. Along with serving as the repository for the College Archives, the Center is a locus of research and teaching relating to the Four Corners Region and Native Americans of the Southwest. Primary-source research materials at the Center focus on the disciplines of anthropology, archaeology, archival/museum management, the arts, history, literature and sociology.

The Center's holdings, which focus on the Four Corners region, include more than 8,000 artifacts, more than 13,000 volumes cataloged in MARMOT along with Reed Library holdings, numerous periodicals (listed in the Reed Library periodicals holdings printouts), and nearly 400 special collections dating from prehistory to the present. These include more than 2,000 linear shelf feet of manuscripts and unbound printed materials, more than 7,000 rolls of microfilm, including about 3,000 rolls of historic Southwest region newspapers, more than 600 oral histories, and more than 35,000 photographs. Strengths in the Center's collections of artifacts, (which, with Anthropology Department holdings, amount to more than 4,000 linear shelf feet of objects), include more than 2,000 Ancestral Pueblo ceramic vessels, 150 Navajo textiles, 140 items of Southwestern basketry, numerous military objects from the days of the old Fort Lewis, and about 200 pieces of antique photographic equipment. Most of the materials in the Center's collections were donated, from more than 500 documented sources.

The Center's special collections holdings are strongest in the areas of:

Native Americans of the Southwest (especially their artifacts, artistic and ethnographic works, and government relations).

Local/regional affairs (including newspapers, community, business, politics and government of Durango and La Plata County).

Mining of coal and precious metals in the Four Corners region (including gold, silver, uranium and vanadium).

Water and water rights in the Four Corners region.

Electricity generation and transmission, and other energy issues of the Southwest.

Narrow gauge railroads of the San Juan Basin.

The Center of Southwest Studies cooperates with other museums and historical repositories and with city, county, state, federal and tribal agencies in the Four Corners region. Its outreach includes public lectures, symposia, an occasional papers series, an oral history program, and training in issues of archival and cultural resource management.

Office of Computing and Telecommunications

The Office of Computing and Telecommunications provides computing resources, voice and data communications systems, and technical support for the students, faculty, and staff of Fort Lewis College.

Eleven college-wide computer labs are available to the general student population. College labs are located in each of the main classroom buildings, including Berndt Hall, Noble Hall, Hesperus Hall, Sage Hall and Reed Library. Windows and Macintosh computers, printers, and a wide variety of software are available. All lab computers have full Internet connections, and every registered student receives an Internet account for electronic mail. College computer labs are typically available seven days a week except during holiday periods, and any registered student has access. In addition, about twenty special-purpose labs serve students in specific academic programs and residence halls. A modem pool provides students with access to College servers and the Internet from off-campus.

Telephones and voice-mail service are provided in on-campus housing. Students make long-distance calls using a personal credit card or by reversing the charges. Collect calls are not allowed. Students may not charge long-distance calls to their residence hall phone.

Learning Assistance Center

Most students during their college careers need help in achieving their educational goals. The Learning Assistance Center exists to provide academic support to any student who requests it. This support is supplied in a number of different forms.

Courses sponsored by the Center offer students the opportunity to improve their basic skills in writing, reading and mathematics. In addition, the learning skills classes aid entering freshmen in developing time-management skills, proficiency in note-taking, concentration, and test-taking skills. The Center also provides a peer tutorial program. Students needing assistance in a particular subject are assigned a free

tutor; students who serve as tutors receive elective credit.

To select appropriate curricula, students may benefit from diagnostic tests in reading, writing and/or mathematics. The Center's personnel can evaluate the examination results and recommend courses or individual student programs. Furthermore, the Center's staff is prepared to offer non-credit minicourses and workshops to help students overcome academic difficulties. Other available resources in the Learning Assistance Center include computerized review programs, course outline texts, handouts, individual academic counseling, and review for graduate record and teacher certification examinations.

Native American Center

The Native American Center's mission is to promote the academic success and personal development of Native American students as well as advance cultural appreciation on the Fort Lewis campus and within the Four Corners community.

Located in the Miller Student Center, the Native American Center provides a supportive environment to Native American students faced with the challenges of education within a multicultural society. The academic and personal development of Native American students is addressed through individual advising and counseling as well as group workshops.

Faculty members from various college departments hold office hours at the Native American Center to provide academic assistance to students. Computers are available to assist students in research or paper writing. Many Native American student clubs and organizations also convene at the Native American Center to host social, cultural, and academic events as well as their regular meetings. These student organizations serve to promote cultural appreciation within the Fort Lewis College community as well as provide social support to students.

The Native American Center is a gathering place where Native American students from all over can explore their own and other Native American cultures.

"El Centro" Latino Student Center

"El Centro" is located in #3 North Complex. It is the home of organizations and activities which serve the needs of Latino students and students who are interested in Spanish and Latin American culture. Information is available on scholarships, academic assistance and

graduate opportunities. Comfortable space to study and socialize, as well as a kitchen, are available. The center hosts a growing collection of academic and cultural resources. Everyone is welcomed. Opportunities are provided to practice Spanish.

The goals of "El Centro" are to provide the support needed to make school life more relevant, to increase enrollment and graduation of all minority students, and broaden knowledge of Hispano heritage.

Program for Academic Advancement

The Program for Academic Advancement (a federally funded TRIO program) is the place on campus where students can get the guidance and help they need to succeed at Fort Lewis College. PAA offers these individualized services to program participants:

individual or group tutoring in any subject;

financial aid advice and assistance in completing applications for federal, state, local and private sources of financial aid;

guidance in course selection and in developing an individualized academic plan;

peer mentors who offer personal advising, assistance and support;

a private computer lab networked to the college system and software for individual tutorials in biology, math, calculus, English, reading, writing, typing, and GRE preparation (new software is added constantly);

a lending library;

academic and college survival workshops in math and writing skills, note taking, dealing with test anxiety, test taking, budgeting money, time management, using e-mail and the World Wide Web and all aspects of graduate school preparation;

personal and career planning;

field trips to regional graduate schools twice each year for juniors and seniors;

monitored study halls, mid-term "study fests" and finals review

sessions;

a fall picnic, a holiday party and a spring recognition banquet;

a variety of cultural programs and activities.

Tutoring and Peer Mentoring

PAA's tutoring program is nationally certified by the College Reading and Learning Association. All program tutors are upper-division Fort Lewis College students who have excelled in the courses in which they are tutoring and who have completed a tutor training program through PAA.

Peer mentors are PAA participants who have demonstrated leadership and academic success and a commitment to helping other PAA participants succeed at Fort Lewis College. They act as guides and friends to new PAA participants providing support, advice and assistance with the adjustment to college life.

Eligibility

To be eligible for PAA, a student must meet one or more of the following requirements as established by the U.S. Department of Education:

Be a low income individual (qualify for Federal student financial aid);

Be a first generation college student (neither parent has completed a four-year college degree before the student is 18 years old);

Be a student with a documented disability;

Be enrolled or accepted for enrollment as a degree-seeking student at FLC;

Be a U.S. citizen or national or meet the requirements for Federal student financial assistance.

Have a need for academic support to be able to succeed in college.

Application Process

A simple application process is required to document eligibility and to identify the academic and other needs of the student. After being admitted into PAA, each new participant meets with the program advisor to design an academic plan. Participant academic progress is monitored and help is available if needed at every step of the way.

PAA offers a variety of workshops to help participants improve their study habits and math and writing skills. Workshops that teach participants how to budget money and manage time more effectively are also available. Monitored study halls, mid-term study "fests" and finals review sessions are held so participants can study with others during the year. PAA will assist participants with personal concerns that may be affecting their ability to do their best at Fort Lewis College. All PAA services are free to program participants.

Financial Aid

The PAA staff is trained to answer participant questions and provide assistance with Federal financial aid application forms. They can also help participants locate scholarships, grants and other forms of financial aid through private sources. A software search program is available for participants to identify all types of assistance for which they may qualify. The PAA lending library is well-stocked with current literature on thousands of sources of financial aid.

The Fort Lewis College Financial Aid Administrator provides a workshop on applying for financial aid twice each year specifically for PAA participants. PAA staff work closely with the Fort Lewis College Financial Aid office to assist participants with any questions or concerns about their financial aid package.

Student Responsibilities to PAA

PAA participants are expected to be dedicated to the goal of academic success at Fort Lewis College. PAA offers extensive, individualized assistance and support to its participants who, in turn, are expected to attend classes as scheduled, to meet regularly with their tutors, to attend program workshops and events and to meet regularly with the program advisor.

Center for Service Learning

The Center for Service Learning was established to support faculty and students in their efforts to integrate academic study with responsible service and activism in local and regional communities. Focusing

academic resources on pressing social, environmental, economic and civic issues links campuses to communities in a dynamic partnership that both enhances students' educational experience and assists community-based groups in their vital work.

Service learning is a way for students to learn through hands-on service activities that are coordinated between campus and community. Student service is integrated into the academic curriculum to foster learning about the larger social and policy issues behind the human needs to which they are responding. Academic skills and applied knowledge are acquired within a service context that simultaneously fosters a sense of concern for others, the acceptance of civic responsibility and prepares students for involvement in their own communities.

The Center supports Fort Lewis faculty and students in three basic ways:

1. **Curriculum Integration and Development:** The Center works with the college's academic departments to integrate relevant service placements and projects with existing courses. Additionally, the center works to facilitate course development and interdepartmental cooperation around important local and regional issues.
2. **Campus-Based Service Projects:** The center works closely with community agencies and groups throughout the Four Corners Region in structuring service opportunities that enhance the student volunteer's educational experience and contribute to the work of the community group. Many projects, such as the Mentoring Project, are ongoing, campus-based projects which provide students and faculty with the opportunity for involvement throughout the academic year. Other projects are developed and expanded as interest and need dictate. Academic credit is often available through these projects.
3. **Volunteer Opportunities:** Due to its relationship with the community, the Center is able to serve as a campus-based clearinghouse for service opportunities throughout the region. Students interested in short- or long-term volunteer, service opportunities may find placement assistance through the Center. The Center also recruits students to assist with occasional and/or urgent needs that arise within the community.

Office of Community Services

The Office of Community Services has been established to offer technical assistance to a five-county area surrounding Fort Lewis College (Archuleta, La Plata, San Juan, Montezuma, Dolores). The Office has three purposes: to increase the opportunities for students and faculty to actively participate in public service projects in this region; to

assist local communities with significant policy issues having to do with human service programs, natural resource management, community and economic development; and to ensure an educational partnership between students, faculty and citizens by establishing a community service learning process supported by Fort Lewis College curriculum resources. The Office of Community Services contributes to the accomplishment of the College's mission in regard to public service by offering students an opportunity to gain valuable experience in direct community involvement.

The Office of Community Services has developed research activities in the areas of community studies, ethnography and public policy analysis. Projects have been established that offer students and faculty a variety of opportunities to conduct applied research on public interest issues, concerning community and social development.

Each public service project is initiated by a community request; linkages to the community are established through a local task force of appointed leaders. Students and faculty provide assistance to the community task force in setting its goals, collecting needed research data, and identifying alternative policy, planning and physical design solutions. Each project establishes a problem-oriented learning process for both the students and the community, guided by Office of Community Services staff and Fort Lewis College faculty members.

M.L.S., University of Denver, 1965

BEELMAN, CLARE ANN, Assistant Professor of Biology (1999)
B.A., Knox College, 1991
Ph.D., University of Arizona, 1996

BELL, GREGORY W., Professor of Mathematics and Assistant Vice
President for Academic Affairs (1978)
B.A., University of Utah, 1969
M.A., University of Michigan, 1972
Ph.D., University of Michigan, 1976

BERRETTINI, MARK LOUIS, Assistant Professor of English (1999)
B.A., University of Notre Dame, 1994
M.A. University of Rochester, 1997

BERRIER, DEBORAH LANE, Associate Professor of Mathematics
(1989)
B.S., New Mexico State University, 1977
M.S., Virginia Polytechnic Institute, 1980
M.S., Clemson University, 1986
Ph.D., Medical University of South Carolina, 1989

BLANCHARD, KENDALL A. President and Professor of
Anthropology (1999) B.A., Olivet Nazarene College, 1964
M.Div., Vanderbilt University, 1968
M.A., Southern Methodist University, 1970
Ph.D., Southern Methodist University, 1971

BROWN, ALANE SUSAN, Associate Professor of Psychology and
Women's Studies (1990)
B.A., Brandeis University, 1981
M.A., Princeton University, 1988
Ph.D., Princeton University, 1990

BUNCH, KENYON DALE, Associate Professor of Political Science
(1993)
B.S.E., Central Missouri State University, 1970
M.A., Lincoln University, 1977
Ph.D., University of Missouri/Columbia, 1985

BUNTING, ROBERT REED, Assistant Professor of History (1994)
B.S., Eastern Oregon State College, 1969
M.A., Wichita State University, 1971

Ph.D., University of California, 1993

BURNS, SAMUEL A., Research Director, Office of Community Services and Professor of Sociology/Human Services (1972)

B.A., University of San Francisco, 1963

Ph.D., University of Colorado, 1985

BYRD, JOHN WILLIAM, Associate Professor of Biology (1997)

B.A., Fort Lewis College, 1977

M.P.P.M., Yale University, 1979

Ph.D., University of Oregon, 1988

BYRD, SHERELL KUSS, Associate Professor of Biology (1992)

B.A., Western State College, 1980

M.S., University of Oregon, 1983

Ph.D., University of Oregon, 1987

CARRASCO, LOURDES M., Professor of Modern Language (1983)

B.A., University of California/Santa Barbara, 1968

M.A., University of California/Santa Barbara, 1970

Ph.D., Michigan State University, 1979

CASON, MAGGIE AGNES, Assistant Professor of Teacher Education (1999)

B.S., Missouri Western State College, 1978

M.S., University of Wyoming, 1988

CAVE, JOHN E., Dean, School of Business Administration and Professor of Business Administration (1990)

B.S., University of Minnesota, 1966

M.S., University of Minnesota, 1970

Ph.D., University of Minnesota, 1975

CHEESEWRIGHT, GORDON PAUL, Professor of English (1988)

B.A., Principia College, 1964

M.A., University of California/Los Angeles, 1969

Ph.D., University of California/Los Angeles, 1972

CHEW, BEVERLY R., Professor of Psychology (1989)

A.B., Bryn Mawr College, 1974

A.M., Harvard University, 1980

Ph.D., Harvard University, 1983

CLAY, CHERYL DUDTE, Associate Professor of Teacher Education (1994)

B.A., Kansas State University, 1969

M.A., Kansas State University, 1974

Ph.D., University of Denver, 1995

CLAY, JAMES P., Professor of Business Administration/Economics
(1982)

B.A., University of Colorado, 1966

M.A., Kansas State University, 1968

Ph.D., Kansas State University, 1974

C.M.A., 1982

COLEMAN, JEREMY J., Professor of Business Administration (1983)

B.S., Princeton University, 1963

M.P.A., Harvard University, 1968

D.B.A., George Washington University, 1974

COLLIER, JAMES D., Associate Professor of Geology (1982)

B.A., Carleton College, 1976

Ph.D., Colorado School of Mines, 1982

CONDIE, JOHN MacPHERSON, Associate Professor of Biology
(1989)

B.S., Northeast Missouri State University, 1974

Ph.D., University of Minnesota, 1984

COOK, ROY ALLEN, Assistant Dean, School of Business
Administration; Professor of Business Administration (1989)

B.B.A., Southwest Texas State, 1971

M.B.A., Sam Houston State University, 1972

D.B.A., Mississippi State University, 1989

COOPER, ANNETTE J., Professor of Mathematics (1986)

B.S., Southwestern State College, 1963

M.N.S., Oklahoma University, 1970

Ed.D., Oklahoma State University, 1977

CORMAN, LAWRENCE S., Professor of Business Administration
(1982)

B.A., Texas Tech University, 1976

M.S., Texas Tech University, 1977

Ph.D., University of North Texas, 1989

COSTELLO, JAMES M., Professor of Physics (1985)

B.A., Doane College, 1959

M.S., University of Nebraska, 1963

Ph.D., University of Nebraska, 1967

CRAWFORD, GERALD, Professor of Physics (1986)

B.A., Gustavus Adolphus College, 1979

M.S., University of Oregon, 1980
Ph.D., University of Oregon, 1983

CRIDLAND, SEAN ERIC, Assistant Professor of Political Science/
Philosophy (1997)
B.A., Fort Lewis College, 1992
M.A., University of Hawaii/Manoa, 1993
Ph.D., University of Hawaii/Manoa, 1997

CROSS, JAMES S., Assistant Professor of Exercise Science (1988)
B.S., Springfield College, 1974
M.S., Queens College, 1983

CROWDER, JOHN, Librarian and Professor (1973)
B.A., University of Colorado, 1969
M.A., University of Denver, 1973

DARE, BYRON, Professor of Political Science (1984)
B.A., University of Southern California, 1973
M.A., University of Southern California, 1974
Ph.D., University of Southern California, 1983

DAVIS, GINNY ANN, Assistant Professor of Theatre (1999)
B.F.A., University of Texas, Austin, 1986
M.F.A., University of Houston, 1991
Ph.D., Texas Tech University, 1996

DEAR, JENNIE CYRENE, Assistant Professor of English (1996)
B.A., Williams College, 1983
M.A., University of New Mexico, 1991
Ph.D., University of New Mexico, 1996

deGRAW, THERESA JANE., Associate Professor of Teacher
Education (1990)
B.S., Indiana State University, 1969
M.S., Indiana State University, 1984
Ph.D., Indiana State University, 1990

DELGADO, VIVIAN, Assistant Professor of Teacher Education (1997)
B.S., University of South Dakota, 1987
M.Ed., University of Mary, 1989
Ph.D., University of North Dakota, 1997

DODDS, WILLIAM B., Professor of Marketing (1992)
B.S., Clarkson University, 1970
M.S., Clarkson University, 1971
Ph.D., Virginia Polytechnic Institute, 1985

DOLPHIN, ROBERT, JR., Vice President for Business and Finance and Professor of Finance (1984)

B.S., Indiana University, 1960

M.B.A., Indiana University, 1961

D.B.A., Michigan State University, 1964

DORR, BETTY JEAN, Associate Professor of Psychology (1991)

B.A., Arkansas Tech University, 1984

M.A., University of Nebraska/Omaha, 1988

Ph.D., University of Nebraska, 1993

DUKE, PHILIP G., Professor of Anthropology (1980)

B.A., Cambridge, England, 1976

M.A., University of Calgary, Canada, 1978

M.A., Cambridge, England, 1982

Ph.D., University of Calgary, Canada, 1982

EL-HAKIM, OMNIA I., Professor of Engineering (1984)

B.S., Ein Shams University, Egypt, 1966

M.S., Cairo University, 1977

Ph.D., Colorado State University, 1984

ELLIS, RICHARD N., Professor of Southwest Studies (1987)

B.A., University of Colorado, 1961

M.A., University of Colorado, 1963

Ph.D., University of Colorado, 1967

ELLISON, J. TODD, Archivist and Associate Professor (1991)

B.A., Middlebury College, 1977

M.A., University of Maryland, 1986

M.L.S., University of Maryland, 1986

ENGMAN, VIRGINIA A., Dean of Education and Professor of Education (1978)

B.A., SUNY, Oswego, 1972

M.S., SUNY, Oswego, 1973

Ph.D., Arizona State University, 1978

ERICKSON, MARY ANN, Assistant Professor of Exercise Science (1998)

B.S., Ithaca College, 1978

M.S., Indiana State University, 1980

Ph.D., University of New Mexico, 1998

ESTLER, RON C., Professor of Chemistry (1982)

B.A., Drew University, 1972

M.A., Johns Hopkins University, 1974

Ph.D., John Hopkins University, 1976

FARRELL, TIMOTHY PETER, Assistant Professor of Music (1999)

B.M.A., Pacific Lutheran University, 1990

M.M., Northwestern University, 1991

FINE-DARE, KATHLEEN S., Professor of Anthropology and Women's Studies (1983)

B.A., DePauw University, 1974

M.A., University of Illinois, 1980

Ph.D., University of Illinois, 1986

FITZGERALD, JAMES, Professor of Sociology/Human Services and Modern Language (1971-75, 1988)

B.A., University of Notre Dame, 1961

M.A., University of Wyoming, 1966

Ph.D., University of Colorado, 1983

FITZGERALD, JANINE MARIE, Assistant Professor of Sociology/Human Services and Women's Studies (1994)

B.A., University of Colorado, 1987

M.A., University of New Mexico, 1990

Ph.D., University of New Mexico, 1996

FREEMAN, MICHAEL RUSSELL, Instructor of Art (1998)

B.A., University of Oregon, 1990

M.A., Indiana University, 1995

FRISBIE, JEFFREY LYNN, Librarian and Assistant Professor (1994)

B.S., Northern Michigan University, 1979

M.L.S., University of Arizona, 1994

FRY, MICHAEL FORREST, Associate Professor of History (1990)

B.A., Westminster College, 1977

M.A., Tulane University, 1980

Ph.D., Tulane University, 1988

GARCÍA, REYES ROBERTO, Professor of Philosophy (1988)

B.A., University of Colorado, 1974

Ph.D., University of Colorado, 1988

GEHRMAN, JENNIFER ANN, Assistant Professor of English and Women's Studies (1996)

B.A., University of Wisconsin, 1988

M.A., Indiana University of Pennsylvania, 1991

Ph.D., Indiana University of Pennsylvania, 1996

GIANNINY, GARY LEE, Assistant Professor of Geology (1999)
B.A., Colorado College, 1983
M.S., University of Wisconsin/Madison, 1990
Ph.D., University of Wisconsin/Madison, 1995

GOHDES, JOEL W., Assistant Professor of Chemistry (1996)
B.A., Carleton College, 1985
Ph.D., University of California/Berkeley, 1991

GONZALES, DAVID ALAN, Assistant Professor of Geology (1998)
B.S., Fort Lewis College, 1982
M.S., Northern Arizona University, 1988
Ph.D., The University of Kansas, 1997

GORDON, DONALD R., Professor of Anthropology (1975)
B.A., California State University/San Francisco, 1964
M.S., University of Oregon, 1969
Ph.D., University of Oregon, 1974

GREENWOOD, TINA EVANS, Librarian and Assistant Professor (1996)
B.A., University of Arizona, 1987
M.A., Tulane University, 1990
M.L.S., University of Arizona, 1993

GRIGG, KALIN LYNN, Assistant Professor of Sociology/Human Services and Director of Center for Service Learning (1994)
B.A., Fort Lewis College, 1977
M.A., Denver Conservative Baptist Seminary, 1986

GULLIFORD, ANDREW JELLIS, Director, Center of Southwest Studies; Professor of History and Southwest Studies (2000)
B.A., The Colorado College, 1975
M.A.T., The Colorado College, 1976
Ph.D., Bowling Green State University, 1986

HAI, WEN, Associate Professor of Economics (1992)
B.A., Peking (Beijing) University, 1982
M.A., University of California/Davis, 1989
Ph.D., University of California/Davis, 1991

HAMILTON, RODNEY D., Professor of Chemistry (1969)
B.S., Marietta College, 1960
Ph.D., Indiana University, 1964

HANNULA, KIMBERLY ANN, Assistant Professor of Geology (2000)
B.A., Carleton College, 1989
Ph.D., Stanford University, 1993

HARRINGTON, ROBERT P., Associate Professor of Accounting
(1990)
B.S., University of Florida, 1967
M.B.A., Old Dominion University, 1978
Ph.D., Virginia Polytechnic Institute and State University, 1985

HARTSFIELD, LARRY K., Professor of English (1984)
B.A., Abilene Christian University, 1974
M.A., Southern Illinois University, 1976
Ph.D., University of Texas, 1982

HAYES, WILLIAM E., Assistant Professor of Exercise Science (1971)
B.S., University of New Mexico, 1962
M.A., University of New Mexico, 1968

HOSSAIN, ZIARAT, Associate Professor of Psychology (1994)
B.S., Jahangirnagar University, 1981
M.S., Jahangirnagar University, 1984
M.A., University of Manitoba, 1989
Ph.D., Syracuse University, 1992

HUNT, DAVID J., Associate Professor of Art (1978)
B.A., Brigham Young University, 1967
M.A., Brigham Young University, 1969

HUNT, KENNETH ALLEN, Associate Professor of Marketing (1999)
B.S., Concord College, 1977
M.B.A., Virginia Polytechnic Institute and State University, 1978
Ph.D., Virginia Polytechnic Institute and State University, 1984

HUNTER, DOREEN, Professor of History and Women's Studies (1980)
B.A., Stanford University, 1960
M.A., University of California/Berkeley, 1961
Ph.D., University of California/Berkeley, 1969

IVERSON, MARTHA SUSAN, Associate Professor of Physics (1992)
B.A., University of Colorado, 1971
Ph.D., University of Colorado, 1976

JAMIESON, DAVID W., Professor of Biology (1978)
A.B., Humboldt State University, 1966
M.A., Humboldt State University, 1969
Ph.D., University of British Columbia, 1976

JONES, JANET LEE, Professor of Psychology (1990)
B.A., Pomona College, 1984
M.A., University of California/Los Angeles, 1985
Ph.D., University of California/Los Angeles, 1989

JUNG, MARCELYN BETH, Assistant Professor of Exercise Science (1990)
B.A., Fort Lewis College, 1981
M.S., Illinois Benedictine College, 1990

KAPADIA, PARMITA, Assistant Professor of English (1997)
B.A., Rutgers College, 1989
M.A., University of Massachusetts, 1993
Ph.D., University of Massachusetts, 1996

KELLY, REECE, C., Professor of History (1971)
B.A., Eastern Washington State College, 1964
M.A., University of Washington, 1967
Ph.D., University of Washington, 1973

KENDALL, DEBORAH MARIE, Associate Professor of Biology (1987)
B.S., Colorado State University, 1975
M.S., University of Colorado, 1981
Ph.D., Colorado State University, 1987

KHANNA, MUKTI, Associate Professor of Psychology (1991)
B.A., Stanford University, 1983
Ph.D., University of Tennessee, 1989

KNIGHT-MALONEY, MELISSA A., Assistant Professor of Exercise Science (1997)
B.A., Fort Lewis College, 1989
M.A., University of New Mexico, 1993
Ph.D., University of New Mexico, 1999

KOZAK, DAVID LEE, Associate Professor of Anthropology (1994)
B.A., Fort Lewis College, 1986
B.A., Fort Lewis College, 1987
M.A., Arizona State University, 1990
Ph.D., Arizona State University, 1994

LANDRUM, MARGARET COZINE, Director of Library and Associate Professor (1994)
B.A., Louisiana State University, 1970
M.L.S., University of Mississippi, 1975

M.L.S., Vanderbilt University, 1979

LEAVITT, DINAH L., Professor (1978)

B.A., University of Mississippi, 1969

M.A., University of Mississippi, 1970

Ph.D., University of Colorado, 1978

LEFTWICH, MARILYN STACEY, Associate Professor of Psychology (1991)

B.S., University of Alabama, 1964

M.S., Florida State University, 1970

Ph.D., Florida State University, 1973

LEHMAN, DALE E., Associate Professor of Economics (1983)

B.A., State University of New York at Stony Brook, 1972

M.A., University of Rochester, 1975

Ph.D., University of Rochester, 1981

LEYERLE, BETTY J., Professor of Sociology/Human Services and Women's Studies (1984)

B.A., Brooklyn College, 1970

M.A., Brooklyn College, 1975

Ph.D., City University of New York, 1981

LINDSEY, J. PAGE, Professor of Biology (1978)

B.A., Hendrix College, 1970

M.S., University of Arizona, 1972

Ph.D., University of Arizona, 1975

LIU, YING YING, Assistant Professor of Music (1995)

B.A., The Central Philharmonic Society Conservatory of Music, Beijing China, 1986

M.M., The Cleveland Institute of Music, 1988

LOUNGE, JOE, Assistant Professor of Teacher Education (1996)

B.A., Colorado State University, 1971

M.A., Colorado State University, 1979

Ph.D., University of Northern Colorado, 1986

LUM, DENNIS W., Associate Professor of Sociology/Human Services (1975)

B.A., University of Nevada/Reno, 1966

M.A., University of Nevada/Reno, 1971

M.A., University of California/San Diego, 1973

LYNCH, VERNON E., JR., Professor of Economics (1972)

B.A., University of Texas/Austin, 1965

M.A., University of Texas/Austin, 1967
Ph.D., University of Arizona, 1976
C.P.A., Colorado, 1988

MACK, LINDA S., Assistant Dean, School of Arts & Sciences, and
Professor of Music (1982)
B.M.E., Illinois State University, 1975
M.S., University of Illinois, 1980
Ed.D., University of Illinois, 1982

MALACH, MICHELE MARIE, Assistant Professor of English and
Women's Studies (1994)
B.A., Auburn University, 1986
M.A., Auburn University, 1988

MANN, ROCHELLE G., Professor of Music (1987)
B.M.E., Indiana University, 1975
M.S., Indiana University, 1980
D.M.A., Arizona State University, 1991

MAY, DONALD R., Professor of Engineering (1984)
B.S., Colorado State University, 1978
M.S., Colorado State University, 1982
Ph.D., Colorado State University, 1993

McHUGH, NEIL, Associate Professor of History (1984)
B.A., University of Kentucky, 1972
M.A., Indiana University, 1974
Ph.D., Northwestern University, 1986

McKINNEY, ALICE LOUISE, Librarian and Associate Professor
(1990)
B.S., Northern Arizona University, 1976
M.L.S., Louisiana State University, 1985

McKNIGHT, REED, Professor of Accounting (1981)
B.S., University of Idaho, 1969
M.B.A., Washington State University, 1971
Ph.D., University of Oregon, 1981
C.P.A., Montana, 1974

MEMON, IQBAL A., Professor of Business Administration (1988)
B. Com., University of SIND, 1971
M. Com., University of SIND, 1973
M. Phil., University of SIND, 1979
M.B.A., Illinois State University, 1979
D.B.A., Mississippi State University, 1984

MILLS, JAMES W., Professor of Chemistry (1973) A.B., Earlham College, 1963
Ph.D., Brown University, 1967

MILOFSKY, ROBERT ERIC, Associate Professor of Chemistry (1992)
B.S., Bates College, 1987
Ph.D., University of Colorado, 1991

MOLLER, KATHRYN SARELL, Associate Professor of Theatre and Women's Studies (1994)
B.A., Mary Washington College, 1981
M.S., James Madison University, 1983
Ph.D., University of Colorado, 1993

MOSELEY, MARY JEAN, Professor of English and Southwest Studies (1973)
B.A., University of New Mexico, 1964
M.A., University of New Mexico, 1970
Ph.D., University of North Dakota, 1985

MOSS, SUSAN MARGARET, Associate Professor of Art (1991)
B.A., University of Iowa, 1979
M.S., University of Missouri/Columbia, 1983
M.F.A., University of Nebraska/Lincoln, 1991

MULL, FREDERICK HOBERT, Assistant Professor of Finance, (1994)
B.A., Texas A&I University, 1977
M.B.A., Texas A&I University, 1982
Ph.D., University of Georgia, 1990

NINNEMANN, JOHN LOUIS, Dean of Arts and Sciences and Professor of Biology (2000)
B.A., Saint Olaf College, 1966
M.S., North Dakota State University, 1968
Ph.D., Colorado State University, 1971

NORTON, TOM D., Professor of Physics and Engineering (1973)
B.S., University of Oklahoma, 1966
M.S., University of Oklahoma, 1967
Ph.D., University of Oklahoma, 1972

OPPENHEIM, NANCY ANN, Assistant Professor of Business Law (1997)
B.A., Claremont McKenna College, 1983
J.D., University of California/Los Angeles, 1986
M.A., University of Hawaii/Manoa, 1993

Ph.D., University of Texas/Austin, 1996

ORR, DELILAH GAYLE, Assistant Professor of English (1991)

B.A., Fort Lewis College, 1971

M.Ed., Harvard University, 1975

Ph.D., Arizona State University, 1999

ORTEGA, CATHERINE P., Assistant Professor of Biology (1997)

B.A., University of Colorado, 1987

Ph.D., University of Colorado, 1991

ORTEGA, JOSEPH C., Associate Professor of Biology (1991)

B.A., University of California/Los Angeles, 1980

Ph.D., University of Colorado, 1988

OWEN, DUGALD LEE, Associate Professor of Philosophy (1990)

A.B., Stanford University, 1974

M.A., University of California/Berkeley, 1982

Ph.D., University of California/Berkeley, 1991

OWINGS, STEPHANIE JANE, Assistant Professor of Economics
(2000)

B.A., University of Southern California, 1985

M.A., University of California, Los Angeles, 1988

Ph.D., George Mason University, 1996

PAVICH, PAUL N., Professor of English (1978)

B.A., Walsh College, 1967

M.A., Colorado State University, 1968

Ph.D., University of New Mexico, 1973

PENNINGTON, JOHN CHARLES, Associate Professor of Music
(1993)

B.A., University of Arizona, 1986

M.M., University of Michigan, 1988

D.M.A., Arizona State University, 1996

PETERS, ROGER, Professor of Psychology (1975)

B.A., University of Chicago, 1965

Ph.D., University of Michigan, 1974

PETERSEN, PAUL W., Associate Professor of Exercise Science (1984)

B.A., University of Northern Iowa, 1972

M.A., University of Nebraska, 1976

Ph.D., University of New Mexico, 1995

PODLESNIK, RICHARD A., Professor of Business Administration

(1979)

B.S., Illinois Institute of Technology, 1971

M.S., Illinois Institute of Technology, 1971

Ph.D., Northwestern University, 1977

RAMALEY, WILLIAM C., Professor of Mathematics (1973)

B.S., Ohio State University, 1961

M.A., University of Colorado, 1963

Ph.D., University of Colorado, 1969

RATHBUN, PAUL ROLAND, Assistant Professor of Theatre (1997)

B.A., University of Puget Sound, 1985

M.A., University of Wisconsin/Madison, 1990

Ph.D., University of Wisconsin/Madison, 1996

REBER, MICK, Professor of Art (1968-76, 1981)

B.F.A., Brigham Young University, 1966

M.F.A., Brigham Young University, 1968

RICHERS, SUSAN M., Professor of Anthropology (1971)

B.A., Eastern New Mexico University, 1964

M.A., University of Wisconsin/Madison, 1970

Ph.D., University of Wisconsin/Madison, 1976

RODERICK, STEPHEN A., Vice President for Academic Affairs and
Professor of Education (1980)

A.B., MacMurray College, 1966

M.A., University of Iowa, 1970

Ph.D., University of Iowa, 1973

ROMME, WILLIAM H., Professor of Biology (1982)

B.A., University of New Mexico, 1970

M.S., University of Wyoming, 1977

Ph.D., University of Wyoming, 1979

RYAN, INGRID W., Professor of Modern Language (1981)

Diplom-Dolmetsch, University of Vienna, 1961

M.A., Indiana University, 1965

Ph.D., University of Oregon, 1980

SALLINGER-McBRIDE, JAN ELIZABETH, Assistant Professor of
Political Science and Women's Studies (1997)

B.A., University of Nebraska-Lincoln, 1984

M.A., University of California/Santa Barbara, 1987

Ph.D., University of California/Santa Barbara, 1995

SALMON, ENRIQUE, Assistant Professor of Anthropology (1998)

B.A., Western New Mexico University, 1984

M.A., The Colorado College, 1990

Ph.D., Arizona State University, 1999

SCHAUB, JOSEPH CHRISTOPHER, Assistant Professor of English (1999)

B.A., University of Baltimore, 1987

M.L.A., Johns Hopkins University, 1991

SCOTT, FARON LESLIE, Associate Professor of English (1992)

B.A., Southern Illinois University-Carbondale, 1984

M.A., University of Missouri-Columbia, 1986

Ph.D., University of Missouri-Columbia, 1992

SEALE, CAROL M., Associate Professor of Exercise Science (1969)

B.A., Carroll College, 1962

M.A. University of Northern Colorado, 1968

SEIS, MARK CHARLES, Assistant Professor of Sociology (1997)

B.A., University of Wisconsin-Green Bay, 1987

M.S. University of Wisconsin-Milwaukee, 1989

Ph.D., Indiana University of Pennsylvania, 1996

SELLERS, KEITH FRAY, Associate Professor of Accounting (2000)

B.S., University of Tennessee, Knoxville, 1980

D.B.A., Memphis State University, 1989

SELLERS, MINNA DENT, Librarian and Assistant Professor (1995)

B.A., University of New Mexico, 1979

M.A., University of Chicago, 1987

SHULER, PHILIP EPPS, Associate Professor of Agriculture (1991)

B.S., University of Delaware, 1977

M.S. University of Kentucky, 1980

Ph.D., Oregon State University, 1991

SHULTZ, ASHLEY, Assistant Professor of Physics (1996)

B.A., Hastings College, 1990

M.S. Oregon State University, 1993

Ph.D., Oregon State University, 1996

SHULTZ-LOCKYEAR, LORANELLE LOUISE, Assistant Professor of Chemistry (1999)

B.S., University of Evansville, 1991

Ph.D., University of Illinois, 1997

SIMBECK, CATHY L., Assistant Professor of Exercise Science (1984)

B.A., University of California/Santa Barbara, 1975
M.A., California State University/Northridge, 1983

SIMMONS, LINDA LOUISE, Associate Professor of Teacher Education (1990)

B.A., New Mexico Highlands University, 1970
M.A., University of New Mexico, 1980
Ph.D., University of New Mexico, 1999

SKURKY, THOMAS A., Professor of Psychology (1984)

A.B., University of California/Los Angeles, 1971
C. Phil., University of California/Santa Barbara, 1977
Ph.D., University of California/Santa Barbara, 1980

SLUSS, THOMAS P., Professor of Biology (1980)

B.A., Western Reserve University, 1963
M.A., Kent State University, 1972
Ph.D., University of Arizona, 1977

SMITH, CAROL LYNN, Associate Professor of Management/Communications and Women's Studies (1993)

B.A., University of South Florida, 1983
M.A., University of Wyoming, 1985
M.B.A., University of Kentucky, 1993
Ph.D., University of Iowa, 1990

SMITH, DUANE A., Professor of History (1964)

B.A., University of Colorado, 1959
M.A., University of Colorado, 1961
Ph.D., University of Colorado, 1964

SMITH, PAMELA KAREN MAUREEN, Assistant Professor of Mathematics (1998)

B.S., Brown University, 1983
M.A., Wheeling Jesuit University, 1989

SNYDER, HERBERT, Assistant Professor of Management (1999)

B.S. Babson College, 1981
Ph.D., Syracuse University, 1994

SOIGNIER, JOANN, Assistant Professor of Exercise Science and Director of Intramurals (1986)

B.A., Fort Lewis College, 1984
M.A., Adams State College, 1987

SOMERS, LEE PRESTON, Professor of Biology (1969)

B.S., Wake Forest University, 1967

M.A. University of Colorado 1969
Ph.D., University of Colorado, 1971

SOMMERVILLE, LESLIE EUGENE, Associate Professor of
Chemistry (1991)
B.S., Fort Lewis College, 1980
Ph.D., University of Minnesota, 1985

SPEAR, KAREN ISABEL, Professor of English (1990)
B.A., University of Maryland, 1972
Ph.D., The American University, 1976

SZUECS, LASZLO, Professor of Mathematics and Computer Science
(1984)
B.A., Phillips University, 1963
Ph.D., Johns Hopkins University, 1969
M.S., University of Colorado, 1984

TAYLOR, RONALD GENE, Associate Professor of Teacher Education
(1994)
B.A., Southern Colorado State College, 1970
M.Ed., Central State University, 1971
Ed.D., University of Oklahoma, 1979

TISCHHAUSER, KATHERINE DAWN JETTER, Assistant Professor
of Music (1997)
B.M., East Carolina University, 1991
M.M., Florida State University, 1993

TUSTIN, CHARLES O., Associate Professor of Business
Administration (1986)
B.S., Colorado State University, 1964
M.B.A., Arizona State University, 1981
Ph.D., Arizona State University, 1992

VICENTI, CAREY NORLAND, Assistant Professor of Sociology
(1999)
B.S., Oregon State University, 1983
J.D., University of New Mexico, 1985

VOGL, LAUREL C., Professor of Art (1976)
B.F.A., University of Southern California, 1964
M.F.A., Claremont Graduate School, 1968

WAGNER, BRADLEY WADE, Assistant Professor of Management
(1997)
B.S., University of Northern Colorado, 1980

M.B.A., University of Northern Colorado, 1983
Ph.D., University of Nebraska/Lincoln, 1994

WALKER, CHARLES H., Professor of Exercise Science (1972)
B.S., University of Nevada, 1960
M.Ed., University of Nevada, 1964
Ph.D., University of Utah, 1972

WALKER, RICHARD C., Associate Professor of Mathematics (1984)
B.S., Colorado School of Mines, 1969
M.S., Colorado School of Mines, 1975
Ph.D., Colorado School of Mines, 1979

WALSTEDTER, ELAYNE SMITH, Librarian and Assistant Professor (1996)
B.A., Fort Lewis College, 1987
M.L.S., Emporia State University, 1995

WALTERS, MARK ALAN, Assistant Professor of Music (1997)
B.M.E., Henderson State University, 1980
M.M., University of Central Arkansas, 1991
D.M.A., Arizona State University, 1997

WELLS, C. GERALD, Professor of Art (1970)
B.A., University of Mississippi, 1959
M.F.A., University of Mississippi, 1964

WHEELOCK, RICHARD M., Associate Professor of Southwest Studies (1985)
B.A., Fort Lewis College, 1972
M.A., University of Arizona, 1984
Ph.D., University of New Mexico, 1995

WHITE, WILLIAM SCOTT, Assistant Professor of Geology (1999)
B.S., Tennessee Technological University, 1987
M.S., Texas Christian University, 1991

WILLIAMS, CARLA C., Professor of Engineering (1984)
B.S.S.E., John Brown University, 1969
M.A., University of New Mexico, 1973
Ph.D., University of New Mexico, 1991

WIXOM, JAMES A., Associate Professor of Mathematics and Computer Science (1983)
B.S., University of Utah, 1964
Ph.D., University of Utah, 1971

YOUNG, CRAIG E., Director of Computing and Telecommunications
and Assistant Professor (1983)
B.S., Fort Lewis College, 1975
M.S., Arizona State University, 1977

Faculty Emeriti

ANDERSON, BERNARD E. Professor of Business Administration
Emeritus
B.S., Arizona State University
M.A., University of Arizona
Ph.D., Ohio State University

ATENCIO, LEONARD D., Professor of Economics Emeritus
B.A., Fort Lewis College
Ph.D., Kansas State University

Agriculture

[Course listings](#)

Associate Professor Philip E. Shuler;

Assistant Professor John W. Byrd

Several programs of study in Agriculture are available for students at Fort Lewis College.

As a cooperative effort between the Agriculture Program and the School of Business Administration, a four-year degree program is available for those students who are interested in professional careers in the agribusiness sector. See the School of Business Administration "Agricultural Business option" section of this catalog for more information.

Within Agriculture itself, four program options are available. A Guaranteed Transfer Program with Colorado State University is available for students interested in pursuing a four-year bachelor's degree. Through this program a student can complete a prescribed sequence of coursework at Fort Lewis during the freshman and sophomore years and, with a minimum grade point average, be qualified for full transfer to Colorado State with junior standing. Major areas of study offered through the transfer program include: Agricultural Business, Agronomy (production management, crop science, soil science, soil resources and conservation, and international concentrations), and Animal Sciences (industry and science

concentrations).

A second agricultural option is a two-year program at Fort Lewis College leading to an Associate of Arts degree in Agricultural Science. This program is designed to fill the needs of those students pursuing an agricultural career on a farm, ranch or other agriculture-oriented business. Students may decide to concentrate in animal science, agricultural business or agronomy.

Students also have the option of developing a student-constructed major. This option is for students who plan to continue in a four-year program and combine agriculture with a second field of study, such as economics or chemistry, which would lead to a degree in Agricultural Economics or Agricultural Chemistry.

A minor in agriculture is available for students majoring in other disciplines. Requirements for a minor in agriculture are listed at the end of this section.

REQUIREMENTS FOR AN ASSOCIATE OF ARTS DEGREE IN AGRICULTURAL SCIENCE:

Credits

General Studies.....23-28

Comp 150 Reading and Writing in College.....4

LIB 150 Information Literacy.....1

Approved math course (Math 110B or above, not Math 130B).....4-5
(The above math requirement does not fulfill the Group B General Distribution Requirement, although a second math course could be used.)

Four courses to be selected from the General Distribution groups A-D, one from each group.....12-16

Physical Education Activity.....2

Specific Agricultural Science Requirements:

Ag 101B Introductory Animal Science.....4

Ag 102B Principles of Crop Production.....4

Ag 150 Farm Records and Accounts.....3

Ag 380W/Bio 380W Issues in Evolution and Biological Thought.....4

Total.....15

Required Writing Course Within Discipline:

Included in Specific Agricultural Science Requirements above.

Agricultural Science Electives (at least five courses selected from the following):

Ag 180 Sustainable Agriculture

Ag 202 Integrated Pest Management/ Weed Control.....4

Ag 204 Forage Production and Management.....3

Ag 235 Soils and Soil Fertility.....4

Ag 240 Principles of Animal Nutrition.....4

Ag 300D Agricultural Issues in Society.....3

Ag 301 Range Management.....4

Ag 325 Beef Science.....3

Ag 346 Agricultural Marketing.....3

Ag 370 Internship in Agriculture.....3

Ag 390 Special Topics (as offered).....3-4

Total.....minimum 15

Suggested Electives:

Engr 103 Computer Aided Drafting

Engr 205 Surveying I

Computer Science, Economics, Chemistry, Biology, Business
Administration

TOTAL REQUIRED FOR GRADUATION.....64*

*Agriculture Experience: A student is required to have a minimum of 15 weeks of work experience on a farm, ranch or other acceptable agricultural business prior to the awarding of the Associate of Arts degree in Agricultural Science.

PROGRAM OF STUDY FOR GUARANTEED TRANSFER
PROGRAM:

Students participating in the guaranteed transfer program will select courses in consultation with their academic advisor. The specific courses required will depend on which concentration is selected.

REQUIREMENTS FOR A MINOR IN AGRICULTURE:

One or both of the following:

Ag 101B Introductory Animal Science.....	4
Ag 102B Principles of Crop Production.....	4

Additional courses (select three to five of the following):

Ag 150 Farm Records and Accounts.....	3
Ag 202 Integrated Pest Management/ Weed Control.....	4
Ag 204 Forage Production and Management.....	3
Ag 235 Soils and Soil Fertility.....	4
Ag 240 Principles of Animal Nutrition.....	4
Ag 300D Agricultural Issues in Society.....	3
Ag 301 Range Management.....	4
Ag 325 Beef Science.....	3
Ag 346 Agricultural Marketing.....	3
Ag 350 Agricultural Law.....	3
Ag 370 Internship in Agriculture.....	3
Ag 390 Special Topics.....	3-4

Total 20*

*A minimum of 20 credits is required, six of which must be 300 level or above. Students may concentrate in such areas as: General Agriculture, Animal Science, Agronomy or Agricultural Business.

[Return to List](#)

Anthropology

[Course listings](#)

Professors Philip G. Duke, Kathleen S. Fine-Dare, Donald R. Gordon,
and Susan M. Riches;

Associate Professor David L. Kozak;

Assistant Professor Enrique Salmon

Fort Lewis College offers a program of courses leading to the Bachelor of Arts degree with a major in Anthropology. A variety of courses is offered to serve the interests of all students. Courses within the department are suitable as electives in the broad liberal arts tradition and also are designed to fulfill the requirements of those who wish to

continue their studies in one of the subfields of the discipline.

The department also offers an archaeological field school program and occasional archaeological and ethnographic innovative month trips, both on this continent and in Europe.

Students majoring in anthropology may be certified to teach in the broad area of social studies at the secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

The Department of Anthropology offers two minors for students majoring in other disciplines. Requirements for these minors are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN ANTHROPOLOGY:

Credits

General Studies (not satisfied below under auxiliary requirements).....37-38

Specific Departmental Requirements:

Anth 201C Introduction to Archaeology.....4
 Anth 210C Introduction to Sociocultural Anthropology.....4
 Anth 301 Biological Anthropology.....4
 Anth 303W Anthropological Debates.....4
 Anth 395C History of Anthropological Thought.....4
 Anth 300 Proseminar in Anthropology.....2
 Anth 496 Senior Capstone Seminar in Anthropology.....2

Total.....24

Writing Course Within Discipline:

Included in Specific Departmental Requirements above.

Other Departmental Requirements:

Two additional courses in ethnology, one of which must be numbered 300 or above (choose from Anth 213CE, 215CE, 217C, 350CE, 351CE, 355C, 356C, 357CE, 361CE, 371CE, 388CE, approved *390 or 391).....6-8

Two additional courses in archaeology, one of which must be non-New

World oriented (choose from Anth 220C, 259, 306C, 330C, 348C, 360C, 402, 403, 430, or approved *390 or 391 for a general or New World course; choose from Anth 308C, 309C, 340C, 341C, or approved *390 or 391 for a non-New World course).....6-8

One research-based course in anthropology (choose from Anth 306C, 356C, 357CE, 402, 403, 406, 430, 450, 455; or specifically indicated sections of 390/391 or 499s. The 390 391 or 499s will carry the specific notation that "this course fulfills the requirement for research-base."

NOTE: One of these courses may count for two purposes, i.e., ethnology and research, or archaeology and research if it is also listed directly above).....2-4

Total.....14-20

Auxiliary Requirement from another department (one of the following):

Statistics (e.g., Math 201B, Psych 241B, BA 253B).....4

or

Linguistics (Engl 462A1).....3

Total.....3-4

Electives.....42-50

TOTAL REQUIRED FOR GRADUATION.....128

Strongly recommended for students going to graduate school:

At least four trimesters of a foreign language (other than English)

Computing expertise

More than one research-based course

REQUIREMENTS FOR A MINOR IN SOCIOCULTURAL ANTHROPOLOGY OR ARCHAEOLOGY:

Sociocultural Anthropology

Anth 210C Introduction to Sociocultural Anthropology.....4

Anth 201C Introduction to Archaeology *or*

Anth 301 Biological Anthropology.....4

Two additional courses in sociocultural anthropology, one of which must be upper-division.....6-8

Anthropology electives.....6-8

Total.....20-24

Archaeology

Anth 201C Introduction to Archaeology.....4

Anth 210C Introduction to Sociocultural Anthropology

or

Anth 301 Biological Anthropology.....4

Two additional courses in archaeology, one of which must be upper-division.....6-8

Anthropology electives.....6-8

Total.....20-24

Important: No grade of less than C will be accepted for the minor and major.

*Anth 390 and 391 are special topics courses announced each trimester.

[Return to List](#)

Art

[*Course listings*](#)

Professors Mick Reber, Laurel C. Vogl and C. Gerald Wells;

Associate Professors David J. Hunt and Susan Moss;

Assistant Professor Michael R. Freeman

The art program is designed to increase the student's awareness and understanding of art and its relationship to society within a broad liberal arts background. The art major prepares the student to be a practicing artist, to enter graduate school for further professional schooling, or to teach on either the elementary or secondary level. The program also seeks to provide art experiences for application to problem solving, the use of leisure time, as well as a fuller and richer visual life. Students, faculty members and other art professionals, have the opportunity to display their works in the Art Gallery on the Fort Lewis campus.

A minor in art is available for students majoring in other disciplines. Requirements for a minor in art are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN ART:

Credits

General Studies.....41

Specific Departmental Requirements:

Art 101A2 Drawing.....4

Art 109A2 Basic Design.....4

Art 262A2 Art History to the Renaissance.....4

Art 263A2 Art History from the Renaissance.....4

Art 385W Contemporary Art Process, Theory and Criticism: Reading, Writing and Making.....4

Art 496 Senior Seminar.....3

Total.....23

Writing Course Within Discipline:

Included in Specific Departmental Requirements above.

Other Departmental Requirements:

15 credits from the remainder of Art offerings with the exception of Art 273 Art for Elementary Teachers.....15

Electives.....49

TOTAL REQUIRED FOR GRADUATION.....128

Students seeking secondary certification must complete, in addition to the specific requirements of the art major, the following courses:

Art 154A2 Indian Arts/Crafts I.....3

Art 213 Basic Sculpture.....3

Art 224 Basic Painting.....3

Art 231A2 Introduction to Printmaking.....3

Art 243A2 Basic Photography.....3

Art 250A2 Ceramics.....3

(Recommended courses are Art 201 Drawing; and Art 273 Art for Elementary Teachers.)

REQUIREMENTS FOR A MINOR IN ART:

Students must complete 22 credits, including Art 101A2, 109A2 and an art history course, and have the approval of the department chair.

[Return to List](#)

Biology

[Course listings](#)

Professors David W. Jamieson, J. Page Lindsey, William H. Romme,
Thomas P. Sluss and L. Preston Somers;

Associate Professors Sherell Kuss Byrd, John M. Condie, Deborah M.
Kendall, Joseph C. Ortega;

Assistant Professors Clare A. Beelman, John W. Byrd and Catherine P.
Ortega

The various biology curricula are designed to meet the different needs of students considering the broad field of biology. Although all of these curricula lead to a Bachelor of Science degree in Biology, there are three options available: General Biology, Environmental Biology, and Cellular and Molecular Biology.

The General Biology option provides exposure to all the major conceptual areas of biology. It is intended for students wishing to pursue teaching and professional careers or graduate school. It is also recommended for those students who are undecided about specific career goals in biology.

The Environmental Biology option provides a broad exposure to the principles and practices of ecology, environmental conservation and management of natural resources. Thus, this option is particularly valuable for those students who plan to work for the many private firms and state and federal government agencies concerned with natural resource management and environmental impact assessment. This curriculum also provides appropriate preparation for students interested in teaching biology at the secondary school level, as well as for those interested in graduate study in ecology and environmental science.

The Cellular and Molecular Biology option is designed to prepare students for graduate study in either molecular or cellular biology or to find employment as laboratory technicians in those areas.

Both government and industry have considerable demand for people trained in the biological sciences and for which a bachelor's degree is sufficient. Administrative and professional careers may be found in government service and with a variety of conservation and recreation agencies at both state and federal levels. Laboratory and technical work is available with industry and with several government agencies. Some sales positions, especially with pharmaceutical houses, require a biology background. Many positions for biologists require a graduate degree for which a liberal arts biology major is an excellent background.

Students majoring in biology may be certified to teach science at the secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

A minor in biology is available for students majoring in other disciplines. Requirements for a minor in biology are listed at the end of this section. All minors must be arranged in consultation with the student's biology advisor.

REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE WITH A MAJOR IN BIOLOGY:

The General Biology Option:

Credits

General Studies (not satisfied below.....)31

Specific Departmental Requirements:

Bio 112B Introductory Biology I.....4

Bio 113B Introductory Biology II.....4

Bio 206 General Botany.....4

Bio 207 General Zoology.....4

Bio 220 Fundamentals of Ecology.....4

Bio 321 General Physiology.....4

Bio 370 Genetics Laboratory.....1

Bio 371 General Genetics.....2

Bio 372 Evolutionary Genetics

or

Bio 373 Molecular Genetics.....1

Bio 380W/Ag 380W Issues in Evolution and Biological Thought.....4

Other biology courses, excluding cooperative education.....11

Bio 496 Senior Seminar.....2

Bio 497 Senior Seminar.....2

Total.....47

Writing Course Within Discipline:

Included in Specific Departmental Requirements above.

Auxiliary Requirements from Other Departments:

Chem 150B-151 Fundamentals of Chemistry.....11

Chem 303-304 Organic Chemistry.....10

Math 221B Calculus I

or

Math 210B Calculus for Business and Biological Science.....4

Psych 241B Basic Statistics for Psychologists

or

Math 201B Elementary Statistics

or

BA 253B Business Statistics.....4

Total.....29

Recommended Courses (suggested for those students anticipating graduate school):

Math 222 Calculus II

Phys 201B, 202B College Physics I

CSIS 120B Introduction to Programming (BASIC)

Chem 311 General Biochemistry I

Foreign Language (French or German recommended)

Electives.....20

TOTAL REQUIRED FOR GRADUATION.....128

The Environmental Biology Option:

Credits

General Studies (not satisfied below).....31

Specific Departmental Requirements:

Bio 112B Introductory Biology I.....4

Bio 113B Introductory Biology II.....4

Bio 206 General Botany.....4

Bio 207 General Zoology.....4

Bio 220 Fundamentals of Ecology.....	4
Bio 302 Systematic Botany.....	4
Bio 304 Field Zoology.....	5
Bio 371 General Genetics.....	2
Bio 372 Evolutionary Genetics.....	1
Bio 380W/Ag 380W Issues in Evolution and Biological Thought.....	4
Bio 471 Field Ecology.....	5
Other biology courses (in the 300or 400-series).....	3
Bio 496 Senior Seminar.....	2
Bio 497 Senior Seminar.....	2

Total.....48

Writing Course Within Discipline:
Included in Specific Departmental Requirements above.

Auxiliary Requirements from Other Departments:

Chem 150B-151 Fundamentals of Chemistry.....	11
Chem 303 Organic Chemistry.....	5
Chem 365 Analytical Chemistry.....	4
Math 221B Calculus I	
<i>or</i>	
Math 210B Calculus for Business and Biological Science.....	4
Math 201B Elementary Statistics,	
<i>or</i>	
Psych 241B Basic Statistics for Psychologists.....	4
Ag 301 Range Management.....	4
Ag 235 Soils and Soil Fertility.....	4

Total.....36

Recommended electives (to be selected in consultation with student's advisor):

Math 222 Calculus II
Math 360B Introduction to Operations Research
Engr 205 Surveying I
Geol 113B Physical Geology
CSIS 150B Introduction to Programming
Econ 266D Principles of Economics
Engl 363 Advanced Composition
Chem 304 Organic Chemistry
Chem 465 Instrumental Analytical Chemistry
Phys 201B, 202B College Phys I

Total Electives.....12

TOTAL REQUIRED FOR GRADUATION.....128

The Cellular and Molecular Biology Option:

Credits

General Studies (not satisfied below).....31

Specific Departmental Requirements:

Bio 112B Introductory Biology I.....4

Bio 113B Introductory Biology II.....4

Bio 206 General Botany.....4

Bio 207 General Zoology.....4

Bio 321 General Physiology.....4

Bio 331 Microbiology

or

Bio 400 Plant Physiology.....4

Bio 380W/Ag 380W Issues in Evolution and Biological
Thought.....4

Bio 342 Embryology & Developmental Biology of Vertebrates *or*

Bio 456 Cell Physiology.....4

Bio 370 Genetics Laboratory.....1

Bio 371 General Genetics.....2

Bio 373 Molecular Genetics.....1

Bio 433 Bacterial Physiology

or

Bio 455 Cell & Molecular Biology

or

Bio 322 Radiation Biology.....4

Bio 496 Senior Seminar.....2

Bio 497 Senior Seminar.....2

Total.....44

Writing Course Within Discipline:

Included in Specific Departmental Requirements above.

Auxiliary Requirements from Other Departments:

Chem 150B-151 Fundamentals of Chemistry.....11

Chem 303-304 Organic Chemistry.....10

Math 221B Calculus I

or

Math 210B Calculus for Business and Biological Science.....4

Psych 241B Basic Statistics for Psychologists

or

Math 201B Elementary Statistics

or

BA 253B Business Statistics.....4

Total.....29

Electives.....23

TOTAL REQUIRED FOR GRADUATION.....128

REQUIREMENTS FOR A MINOR IN BIOLOGY:

Bio 111B Biology of the Cell.....4

Bio 206 General Botany

or

Bio 207 General Zoology.....4

Three additional biology courses, and two must be upper-
division.....9-12

Total.....17-20

Chemistry

Course listings

Professors William R. Bartlett, Ron C. Estler, Rodney D. Hamilton, and
James W. Mills;

Associate Professors Robert E. Milofsky and Leslie E. Sommerville;

Assistant Professors Joel W. Gohdes and Loranelle L. Shultz-Lockyear

The chemistry curriculum provides modern chemical skills and knowledge for students preparing for careers in areas such as environmental analysis, biotechnology, teaching, medicine, pollution control and engineering. Many students continue their studies in

professional or graduate programs while others start technical careers immediately after graduation.

The **chemistry option** prepares students for professional work in various areas of applied chemistry, for admission to graduate programs in chemistry, or for interdisciplinary careers in the environmental or medical fields. The **biochemistry option** prepares students for graduate programs in biochemistry or for employment in the rapidly expanding biotechnology field. Both options are appropriate preparations for health careers.

The Chemistry Department offers certification by the American Chemical Society to students completing the ACS-certified curriculum. Preparation for graduate school often involves advanced elective coursework. Students planning on professional studies in pharmacy, medicine, dentistry, physical therapy, nursing, or veterinary medicine should consult with the chemistry faculty and the Pre-Health Committee when planning their studies. (See Health Careers Preparatory Programs section of this catalog.)

Chemists are concerned with the structure, composition, energy relationships, chemical conversions and other properties of substances. The various areas of chemical and biochemical technology offer the largest field of employment in the physical sciences. Chemists are employed in fields such as environmental analysis, biotechnology, material science, semiconductors, waste management, pollution control, energy research and production, forensic science and pharmaceuticals. Chemistry graduates will find many applications for their training in the fields of education, business, industry, law, government and medicine.

A minor in chemistry is available for students majoring in other disciplines. Requirements for a minor in chemistry are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE WITH A MAJOR IN CHEMISTRY CHEMISTRY OPTION:

Credits

General Studies (not satisfied below).....31

Specific Departmental Requirements:

THE ACS-CERTIFIED BACHELOR OF SCIENCE DEGREE

Chemistry majors may qualify for certification by the American Chemical Society (ACS) upon graduation by successfully completing a core of specified courses in chemistry and related fields. This program is particularly recommended for students planning to seek employment in industry. The ACS certification of the Fort Lewis degree requires an extension of the degree requirements given above. Students will need to consult with their advisor to carefully plan their schedules to meet these requirements.

Students planning to earn an advanced degree in chemistry, engineering,

medicine or other science-based postgraduate program

for the purpose of teaching or research are encouraged to extend the basic chemistry major by including three or four additional courses in biology, chemistry, mathematics or physics. These courses should be selected in consultation with the chemistry faculty.

Chemistry majors are also encouraged to study a foreign language.

CHEMISTRY MAJOR FOR CAREERS IN THE HEALTH PROFESSIONS

Chemistry majors are well-prepared to seek admission to professional programs in law, medicine, veterinary medicine, dentistry, physical therapy, medical technology and pharmacy. For assistance in planning their curricula, students interested in these programs should consult with members of the chemistry faculty who are members of the PreProfessional Advisory Committee. (See Health Careers Preparatory Programs section of this catalog.)

TEACHING IN CHEMISTRY

Students majoring in chemistry may be certified to teach science at either the secondary or elementary levels. To obtain requirements for teacher certification, students should contact the Department of Teacher Education and the Chemistry Department chair.

Computer Science Information Systems (CSIS)

[Course listings](#)

Professors Evans J. Adams, Gregory W. Bell, Roger P. Peters, Laszlo Szuecs and Carla C. Williams;

Associate Professors Lawrence S. Corman and James A. Wixom;

Assistant Professor Craig E. Young

The interdisciplinary major leading to the Bachelor of Arts degree in Computer Science Information Systems (CSIS) combines the fields of computer science (the science of creating computer software) and information systems (the application of computer software). The program emphasizes breadth of knowledge and the development of written and oral communication skills, which are trademarks of a liberal arts education, combined with professional competence in computer science and/or information systems. The student may specialize in these fields by choosing the Computer Science Option or the Information Systems Option described below.

The primary objectives of the curriculum are to ensure that every graduate is thoroughly familiar with the fundamental principles of modern computer science and information systems; understands how these principles relate to software, hardware and systems design; and is familiar with at least one significant area of applications of computers. Other major objectives include: providing graduates with the ability to understand a variety of problem-solving algorithms; familiarity with several programming languages for implementing these algorithms; understanding of hardware and/or software systems; the ability to make informed choices of software and hardware for a variety of problems; and an understanding of the role that human factors play in implementing computer-based systems.

Computer Science generally refers to the application of scientific and engineering principles to the development of software products. Students choosing the Computer Science Option will receive training far beyond the ability to write programs that work. Software engineers must construct program systems that work efficiently and are comprehensible so that modification can be performed effectively when required. Software maintenance is as much a part of software

engineering as the creation of new software.

Selection of the Information Systems Option generally leads to a career as a systems analyst, information system manager or software project manager. These positions are responsible for choosing the right hardware and software for a particular data-processing problem and for organizing the database in a suitable form. A significant portion of the courses for this option also will address the concepts of software engineering and software project management as they apply to the development of large-scale software systems. A growing number of systems analysts also design and maintain computer networks.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN COMPUTER SCIENCE INFORMATION SYSTEMS (CSIS):

The Computer Science Option:

Credits

General Distribution Requirements.....41

Required CSIS Courses:

CSIS 110B Introduction to Programming (C++).....4

CSIS 230 Object-Oriented Programming in C++.....4

CSIS 310 Data Structures.....4

CSIS 320 Assembly Language Programming.....4

CSIS 321 Computer Architecture and Organization.....4

CSIS 496 Senior Seminar.....2

Choose any two of the following three courses:

CSIS 421 Operating Systems

or

CSIS 450 Parallel Programming

or

CSIS 430 Data Communications.....8

Writing Course Within Discipline:

CSIS 361W Computers and Human Issues.....4

CSIS Electives:

Eight additional hours of CSIS courses numbered over 300 (except 495), chosen with the approval of CSIS faculty.....8

Total.....42

Auxiliary Course Requirements:

Math 201B Elementary Statistics.....4

Math 221B Calculus I.....4

Math 305B Discrete Mathematical Structures.....4

Math 320 Numerical Analysis

or

Math 360B Introduction to Operations Research.....3-4

Total.....15-16

General Electives.....29-30

TOTAL REQUIRED FOR GRADUATION.....128

The Information Systems Option:

Credits

General Distribution Requirements.....41

Required CSIS Courses:

CSIS 105 The Computer As A Tool.....4

CSIS 106B Introduction to Programming in Visual Basic.....4

CSIS 110B Introduction to Programming (C++).....4

CSIS 240 Advanced Programming (COBOL).....4

CSIS 350 Database Management Systems.....4

CSIS 360 Software Engineering I: Systems Analysis.....4

CSIS 370 Software Engineering II: Systems Design and

Implementation.....4

CSIS 496 Senior Seminar.....2

Writing Course Within Discipline:

CSIS 361W Computers and Human Issues.....4

CSIS Electives

Eight additional hours of CSIS courses, numbered over 300 (except CSIS 495), chosen with the approval of CSIS faculty.....8

Total.....42

Auxiliary Course Requirements:

Math 201B Elementary Statistics

or

BA 253B Business Statistics.....4

Math 210B Calculus for Business.....4

BA 353 Operations Management

or

Math 360B Introduction to Operations Research.....4

Total.....12

General Electives.....33

TOTAL REQUIRED FOR GRADUATION.....128

As part of the General Electives requirement for graduation, students majoring in CSIS are strongly encouraged to complete a minor (or the equivalent of a minor) in any field of study offered at the college. By doing so, the student will (a) solidify his/her liberal arts education and (b) be prompted to pay close attention to career planning during the last two years of study. The choice of the minor should be discussed with the student's CSIS advisor.

REQUIREMENTS FOR A MINOR IN COMPUTER SCIENCE INFORMATION SYSTEMS:

CSIS 110B Introduction to Programming (C++).....4

and

CSIS 230 Object-Oriented Programming in C++.....4

or

CSIS 240 Advanced Programming
(COBOL).....4

Three additional CSIS courses (except CSIS 495), at least 2 of which
are numbered above 300.....12

Total.....20

Professors Omnia I. El-Hakim, Tom D. Norton, Carla C. Williams;

Associate Professor Donald R. May

The engineering program at Fort Lewis College is designed to meet the needs of those students who are interested in obtaining an engineering degree, but prefer to complete their first two years of study at a small college with a liberal arts emphasis. After completing a requisite block of courses which includes courses in engineering, mathematics, the sciences, and the humanities, students are eligible for full junior standing at one of the institutions with which Fort Lewis maintains a transfer agreement. Or the student may choose to apply to any other degree granting engineering program as a normal transfer student.

Fort Lewis College participates in formal engineering transfer agreement programs with Colorado State University (CSU) at Fort Collins, Colorado School of Mines (CSM) at Golden, the University of Colorado (CU) at Boulder, the University of Southern Colorado (USC) at Pueblo, the University of New Mexico (UNM) at Albuquerque, and New Mexico State University (NMSU) at Las Cruces.

Under these block transfer agreements the student completes the prescribed sequence of courses, listed below, in residence at Fort Lewis.

Successful completion of this sequence with the required minimum GPA is sufficient for the collective transfer of these courses to the cooperating institution with full junior standing. For those students who can take calculus their first term, the block transfer sequence may be completed in two years of residence at Fort Lewis. For detailed information on specific agreements and programs students should consult with an engineering advisor.

Required minimum grade point averages by school:

Colorado State University - 2.5

Colorado School of Mines - 2.5

University of Colorado - 2.75

University of Southern Colorado - 2.5 (Industrial Engineering only)

University of New Mexico - 2.25 (Completion of an additional 18 technical hours with a grade point of at least 2.5 is required.)

New Mexico State University - 2.75 (Regular admission. 2.0-2.75 Provisional admission - must establish a minimum GPA at NMSU, depending on the major.) (Note that only those courses in which a student received a C or higher will transfer.)

Although the above plans pertain specifically to the agreements with the schools listed above, the courses offered are ordinarily accepted for credit for comparable courses at other degree-granting engineering institutions. In addition, the engineering courses are often used by students in planning student-constructed majors at Fort Lewis College. Student-constructed majors using the engineering courses are available in conjunction with physics, geology, mathematics and other disciplines. The student should consult with his or her advisor if interested in a student-constructed major.

As a cooperative effort between the engineering program and the School of Business Administration, a four-year degree program is available in Engineering Management. For more information, please see the School of Business Administration section of this catalog.

Students who are interested in obtaining a mathematics degree in addition to an engineering degree may wish to pursue a 3-2 program. The student attends Fort Lewis College for six terms (equivalent to three academic years) and the cooperating institution for two academic years. During residence at Fort Lewis, the student completes the requirements for the basic engineering core and most of the requirements for a mathematics major. At the cooperating institution the student completes the remaining requirements for a Bachelor of Arts degree in Mathematics, awarded by Fort Lewis College, and the requirements for an engineering degree from the cooperating institution.

A minor in engineering is available for students majoring in other disciplines. Requirements for an engineering minor are listed at the end of this section.

The Engineering program is supported by the college's modern computer facilities. Registered students may use any of the student computing labs which are generally open seven days a week. These facilities include PC microcomputers, Macintoshes and laser printers. Internet connectivity is provided through the campus network; modem access is also available.

[Course listings](#)

Professors Gordon P. Cheesewright, Larry K. Hartsfield, Mary Jean Moseley, Paul N. Pavich, Karen I. Spear and Shaila Van Sickle;

Associate Professor Faron L. Scott;

Assistant Professors Mark L. Berrettini, Jennie C. Dear, Jennifer A . Gehrman, Parmita Kapadia, Michele M. Malach, Delilah G. Orr, Joseph C. Schaub and Katherine Wolfe

The work offered in English deals with several aspects of liberal education: the linguistic and literary history of Western culture; selected studies in non-Western literature in translation; human values; the relationships among cultures in the Southwest; and written and oral communication, both utilitarian and creative.

Students with other majors find the courses in English valuable for their general educational development. In addition, the English Department offers supporting courses for the Southwest Studies major, the Humanities major and the Division of Intercultural Studies.

English advisors can help students plan courses of study preparing them for graduate or professional school; careers in business, industry or government; careers in communications, theatre or teaching.

The English major has three options:

The General Option: A traditional English major; preparation for graduate or professional school.

The Communications Option: An English major with an emphasis on mass media theory and practice; preparation for graduate school or industry.

The English Education Option: Preparation for secondary school teaching.

Minors in literature, writing and communications are available for students majoring in other disciplines. Requirements for these minors are described below.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN ENGLISH:

The Communications Option:

Credits

General Studies (not satisfied below).....41

Specific Departmental Requirements:

Engl 116A1 Introduction to Mass Communications.....4

Engl 173E 20th Century Asian and African Literature *or*

Engl 174A1 African-American Literature *or*

Engl 175A1 Women's Literature *or*

Engl 280A1 Literature of the Southwest.....4

Engl 215 News Media Writing.....4

Engl 230A1 Survey of British Literature *or*

Engl 240A1 Survey of American Literature.....4

Engl 268W Reading Texts/Writing Texts.....4

Engl 304 Video Production *or*

Engl 306 Radio Broadcasting.....4

Engl 315 Media Writing: Topics *or*

Engl 363 Advanced Composition *or*

Engl 464A1 Creative Writing.....4

Engl 416A1 Media Theory and Criticism.....4

Choose two Topics courses from the following:

Engl 315 (excluding Engl 315 if used to satisfy other major requirements) 317, 320A1, 330A1, 336, 337, 340, 345, 346, 380E, 417, 420E, 423, 430, 477, Theatre 340W, 381A2.....8

Engl 496 Senior Seminar.....4

(Engl 499 cannot replace Engl 496.)

At least 4 credits from:

Engl 250/350 Practicum -- Newspaper

Engl 251/351 Practicum -- Radio

Engl 252/352 Practicum --Television.....4

(Students are allowed a maximum of 18 credits toward graduation in practicum courses in any combination of the following: Engl 250/251/252 up to 6 credits and Engl 350/351/352 up to 12 credits.)

Total Departmental Requirements.....48

Writing Course Within Discipline:

Included in Specific Departmental Requirements above.

Electives.....39

(English advisors can help students select courses which will further strengthen their individual career goals.)

TOTAL REQUIRED FOR GRADUATION.....128

The English Education Option:

The English Education Option gives high-quality academic preparation to students who wish to become secondary teachers of English. This option recognizes that secondary education teachers must be able to teach in all standard areas of literature, language and composition, and frequently must also engage in teaching more specialized areas, such as reading, drama and/or journalism. Therefore, this option is extremely demanding and requires careful planning and advising. Students choosing this option should consult the English Education Advisor as early as possible in their college careers.

Credits

General Studies (not satisfied below).....37

Specific Departmental Requirements:

Engl 116A1 Introduction to Mass Communications.....4

Choose one Literature course from the following:

Engl 173E, 174A1, 175A1, 221A1, 280A1.....4

Engl 230A1 Survey of British Literature.....4

Engl 240A1 Survey of American Literature.....4

Engl 268W Reading Texts/Writing Texts.....4

Engl 366 Teaching Writing.....4

Choose one Topics course from the following:

Engl 317, 320A1, 330A1, 336, 337, 340, 345, 346, 380E, 417, 420E, 423, 430, 477*.....4

Engl 378A1 Young Adult Literature.....4

Engl 432A1 Shakespeare.....4

Engl 461A1 History of the English Language.....3

Engl 462A1 Linguistics.....3

Engl 483 Materials of Instruction in Teaching High School English.....4
 Engl 496 Senior Seminar*.....4
 (Engl 499 cannot replace Engl 496.) **PREREQUISITE:** One Survey course and one Topics course.

Total Departmental Requirements.....50 minimum

Writing Course Within Discipline:
 Included in Specific Departmental Requirements above.

Auxiliary Requirement:
 Two trimesters of one college-level modern language*.....6-8

*A teacher-candidate who holds a Bachelor of Arts or a Bachelor of Science degree from any institution other than Fort Lewis College is exempt from the requirements marked with an asterisk. Also, these students do not have to meet the two-trimester requirement in a modern language.

Electives.....33-35

Refer to Teacher Education Section for specific Secondary License Requirements which students must complete.

TOTAL REQUIRED FOR GRADUATION.....128

REQUIREMENTS FOR MINORS IN LITERATURE, WRITING AND COMMUNICATIONS:

The Minor in Literature:

This minor requires 20 credit hours. The following courses are required:

Engl 230A1 Survey of British Literature.....4
 Engl 240A1 Survey of American Literature.....4
 Engl 432A1 Shakespeare.....4

Two upper-division literature courses selected from:

Engl 320A1 The Novel
 Engl 330A1 Continental Literature: Topics
 Engl 336 British Renaissance Literature: Topics
 Engl 337 18th Century British Literature: Topics
 Engl 340 19th Century British Literature: Topics
 Engl 345 American Literature: Topics I
 Engl 346 American Literature: Topics II
 Engl 380E Native American Literature: Topics
 Engl 420E World Literary Traditions: Topics

Engl 423 Genres: Topics	
Engl 430 Medieval Literature and Chaucer: Topics	
Engl 477 20th Century Literature: Topics.....	8
Total.....	20

The Minor in Writing:

This minor requires 16 credit hours. The following courses are required:

Engl 267A1 Persuasion: History, Theory & Practice.....	4
--	---

Three writing courses selected from:

Engl 215 News Media Writing	
Engl 315 Media Writing: Topics	
Engl 363 Advanced Composition	
Engl 366 Teaching Writing	
Engl 464A1 Creative Writing.....	12

Total.....	16

Environmental Policy Minor

Coordinators

Robert R. Bunting, William H. Romme

Advisors

John W. Byrd, Biology, Robert R. Bunting, History; Reyes R. García,
Philosophy;

Donald R. Gordon, Anthropology; Marilyn S. Leftwich, Psychology;
Dale E. Lehman, Economics;

William H. Romme, Biology; Mark Seis, Sociology/Human Services
and Leslie E. Sommerville, Chemistry

Environmental Policy takes a transdisciplinary approach to the study of broad based environmental issues, from the point of view of the sciences and areas of humanities, social sciences and policy. Students of any major can complement their course of study and demonstrate their commitment to environmental concerns by completing this minor. Additional goals for the Environmental Policy minor include providing information to students who may desire post-graduate training in an area of environmental concern, and advising by Environmental Policy area advisors about career and graduate school opportunities. Courses in the science area or courses which could fulfill general requirements are recommended to the student who wishes to pursue this minor. It is the spirit of this minor to provide students with a breadth of experience across various departments. Students are strongly recommended to work closely with their advisor to choose courses that complement their major area of specialization.

There are three components to the minor.

Students select 18 hours from a list of existing courses representing the spectrum of perspectives on environmental issues (see below).

Students must also take a statistics course and at least two lab science courses; these are listed as auxiliary requirements (see below), and may be used to meet group B or major requirements as well as the minor.

Finally there is an integrative capstone course taken in the junior or senior year in which students and faculty of varied backgrounds come together to work on joint projects related to local, regional or national environmental concerns.

REQUIREMENTS FOR THE ENVIRONMENTAL POLICY MINOR:

Specific Requirements:

1. GS 495 Environmental Colloquium.....4

18 hours of additional credit, chosen from the list below, at least nine hours of which must be upper-division credit. It is the spirit of this minor to provide students with a breadth of experience across various departments. Students are strongly recommended to work closely with their advisor to choose courses that complement their major area of specialization. NOTE: NO MORE THAN ONE COURSE FROM YOUR MAJOR DEPARTMENT WILL COUNT TOWARD THIS MINOR.

List of possible courses for the minor:

(The prerequisites for each selected course must also be taken.)

Agriculture:

Ag 300D Agricultural Issues in Society.....3

Ag 301 Range Management.....4

Anthropology:

Anth 356C Ecological Anthropology.....4

Biology:

Bio 120B Environmental Conservation.....3

Bio 220 Fundamentals of Ecology.....4

Bio 471 Field Ecology.....5

Chemistry:

Chem 123B/323B Chemistry for consumers.....3

Economics:

Econ 335D Environmental Economics.....4

(TRST 92 or better)

Engineering:

Engr 205 Surveying I.....4

Geography:

Geog 271D World Geography.....3

Geog 320B Natural Regions of North America.....3

Geology:

Geol 110B Earth Science.....3

Geol 325 Introduction to Remote Sensing.....3

Geol 401B Natural Resources and the Environment.....3

History:

Hist 181C U.S. Environmental History.....3

Philosophy:

Phil 252C Environmental Ethics.....4

Physics:

Phys 400 Science and Human Values.....2

Political Science:

PS 305DE Environmental Politics.....3

Sociology:

Soc 310D Ecology and Society.....4

Relevant courses from a variety of disciplines may also be offered as 190, 390, 191 or 391 courses. See the Environmental Policy coordinators and/or advisors about current offerings that could be applied toward a minor in Environmental Policy. **PRIOR APPROVAL FROM COORDINATORS OF THE ENVIRONMENTAL POLICY MINOR MUST BE OBTAINED IN ORDER TO HAVE THESE COURSES INCLUDED AS PART OF THE MINOR.** Additional courses may be added to this list from time to time; consult environmental policy advisors for current listings.

Auxiliary Requirements:

These can all be counted as General Distribution requirements:

1. One course in statistics (choose from Psych 241B, Math 201B, BA 253B)
2. Two laboratory science courses, which may be chosen from any of the following:

Group B general distribution requirements

Course(s) taken as part of the major

NOTE: Satisfaction of this auxiliary requirement may be accomplished by selecting lab courses for two of the three Group B General Distribution requirements.

[Return to List](#)

Forestry

[*Course listings*](#)

Fort Lewis College has formal transfer agreements with Colorado State University and Northern Arizona University whereby students can complete the first two years of study at Fort Lewis College and then transfer to the other institution for the last two years of professional training. Students then receive a bachelor of science degree in forestry or a related natural resources field from Colorado State University or from Northern Arizona University.

Students who transfer to Colorado State University can complete a degree in any of the 12 majors/concentrations areas listed at the end of this section. Northern Arizona University offers a single degree program in Forestry - concentration in Multiresource Management. It is an integrated, team-taught curriculum emphasizing multiresource management. Students learn to address the impacts of land management decisions on all resources including timber, wildlife, range, water, recreation and scenic beauty.

To transfer to Colorado State University, a student must:

1. Be enrolled in the forestry program at Fort Lewis College for two years.
2. Have an overall grade point average of at least 2.00 (2.50 for international students).
3. Complete at least 60 credits in the forestry program at Fort Lewis College.
4. Qualify otherwise for admission to the College of Forestry and Natural Resources.

To transfer to Northern Arizona University, a student must:

1. Be enrolled in the forestry program at Fort Lewis College for at least one semester.
2. Have an overall grade point average of at least 2.5 (for early and automatic acceptance by NAU) or 2.0 for possible acceptance).
3. Complete at least 61.5 credits in the forestry program at Fort Lewis College.

Students interested in transferring to either Colorado State University or Northern Arizona University should consult with a member of the biology faculty early in their careers at Fort Lewis College to obtain specific course requirements and other information.

Majors and concentrations to complete a degree at Colorado State University:

Watershed Sciences
Forestry - Concentrations in Forest Management and Forest Fire Science
Forestry - Concentration in Forestry Business
Forestry - Concentration in Forest Biology
Forestry - Concentration in Wood Science and Technology
Natural Resources Management
Range and Forest Management
Range Ecology - Concentrations in Land Rehabilitation and Range Ecology
Fishery Biology
Wildlife Biology
Recreational Resources Management Concentrations in:
Recreation Resource Administration and Resource Interpretation
Recreation Resources Management - Concentration in Commercial Recreation and Tourism

Geographic Information Systems (GIS) Minor

Program Coordinator - W. Scott White

Advisors

Robert W. Blair, Jr., Geology; David A. Gonzales, Geology; James W. Judge, Anthropology; Donald R. May, Engineering; William H. Romme, Biology, W. Scott White, Geology

Geographic Information Science (GIS) is a map-based computer

decision support system. The field of geographic information science merges theoretical aspects of GIS and applications of the systems across many different disciplines, such as archaeology, biology, engineering, geology, as well as geography. These skills are also applicable to the physical and social sciences, business and education. A GIS is used to build map databases, create attributes for map information, analyze spatial relationships in the mapped information, and provide a means of geographic visualization that has not been traditionally present in manual mapping procedures. Completion of the minor will provide the student with skills and experience that are in great demand in today's workplace.

REQUIREMENTS FOR A MINOR IN GEOGRAPHIC INFORMATION SYSTEMS (GIS):

1. GIS Courses:

Geog 250 Cartography.....	4
Geog 300 Introduction to GIS.....	3
Geog 400 Advanced GIS.....	4
Geog 495 GIS Colloquium/Seminar.....	2

Total.....14

2. Surveying courses:

Engr 205 Surveying I.....	4
Engr 305 Surveying II.....	4

Total.....8

3. Computer courses:

CSIS 110B Introduction Programming (C++).....	4
<i>or</i>	
ENGR 104B Computer Programming for Scientists and Engineers.....	3-4

Total.....3-4

Total hours for the minor: 24-25

Additional courses recommended as good electives but not counting towards the minor:

Geol 113B Physical Geology.....	4
Geol 325 Introduction to Remote Sensing.....	3
CSIS 230 Object-Oriented Programming in C++.....	4
CSIS 350 Database Management Systems.....	3
Math 201B, BA 253B or Psych 241B Statistics.....	4

Engr 103 Computer Aided Drafting.....	3
CSIS 106B Intro to Programming in Visual Basic.....	4

Geology

[Course listings](#)

Professor Robert W. Blair, Jr.;

Associate Professors James D. Collier

Assistant Professors Gary L. Gianniny, David A. Gonzales and W. Scott White

The department offers a Bachelor of Science degree in Geology with three different options: Geology, Environmental Geology and Geology for Liberal Arts. The Geology option is designed to meet the needs of students wishing to continue their education in graduate school or to work as professional geologists. The Environmental Geology option is designed for students planning to work in the areas of natural resource management and environmental impact assessment and remediation. The Geology for Liberal Arts option is designed for students interested in learning about geology but without specific career goals in geology. All three options offer appropriate preparation for students interested in teaching geology at the secondary school level.

The study of geology at Fort Lewis College is strengthened by the College's proximity to the remarkable natural geological laboratory in the Southern Rocky Mountains and adjacent areas of the Southwest. The Grand Canyon, Monument Valley, Shiprock, and the San Juan volcanic field and mining district are representative of classical geological localities nearby. The numerous outcrops and mine and oil field workings are sources of excellent real-world experiences for students. Also, the sequence of rocks in the Animas River Valley

represents literally hundreds of millions of years of Earth history. Laboratory and field equipment and geological holdings in the college library are available for research and reading.

Advanced graduate work in geology is required for positions in state and federal surveys, petroleum and mining companies, and college teaching. Employment with engineering firms, governmental agencies, mining companies, and environmental consulting organizations, among others, is available for persons with bachelors degrees in geology and environmental geology.

Students majoring in geology may be certified to teach science at the secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

A minor in geology is available for students majoring in other disciplines. Requirements for a minor in geology are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE WITH A MAJOR IN GEOLOGY:

Geology Option

Health Careers Preparatory Programs

Students considering careers in health professions should carefully plan their academic program very early in their undergraduate education. To assist the prospective pre-health professions student in selecting curricula which will satisfy the academic requirements of specific professional schools, Fort Lewis College has established a Pre-Health Advisory Committee. It is strongly recommended that the pre-health professions student, in addition to consulting his or her major advisor, select a member of this committee to serve as a personal academic advisor. Contact the biology or chemistry department chair for information on membership of this committee.

Specific preprofessional course requirements vary significantly depending upon the health field chosen. All professional schools, however, prefer those students who have had a broad undergraduate education, a solid foundation in the natural sciences who possess well-developed communication skills, and have had some experience (either volunteer or paid) in the health related profession of their choice. Hence, the pre-health professions student should anticipate securing a thorough understanding in biology, chemistry, mathematics, physics and English. Although most pre-health professions students have majored in biology or chemistry, most professional schools will consider graduates in other major fields who have met the basic requirements for admission.

Students may pursue courses at Fort Lewis College which lead to a variety of health careers. Over the years, the Pre-Health Advisory Committee and Fort Lewis College have developed a very favorable rapport with the professional schools in Colorado, Arizona, New

Mexico and Utah. Many of our students have chosen to attend schools in the Four Corners states; many also have attended professional schools throughout the nation.

The most popular preprofessional programs at Fort Lewis College have been those in dentistry, medicine, medical technology, physical therapy and veterinary medicine, but advising and academic planning also are available for programs in other allied health fields.

The purpose of the Pre-Health Advisory Committee is to guide and counsel all students in the health careers preparatory programs. This committee has prepared a Preprofessional Student Handbook containing examples of suggested course schedules and curricula. Interested students may obtain a copy of the handbook by contacting any member of the Pre-Health Advisory Committee.

In addition to advising students in their preparatory programs, the committee assists students with application procedures and in preparing for professional school admissions interviews. The committee will, upon student request, provide recommendation documents to professional schools in accordance with the student's qualifications.

History

[Course listings](#)

Professors Doreen Hunter, Reece C. Kelly and Duane A. Smith;

Associate Professors James K. Ash, Neil McHugh and Michael F. Fry;

Assistant Professors Robert R. Bunting

The Department of History offers a wide variety of courses which enhance students' understanding and appreciation of the human past. The study of history promotes tolerance between peoples and helps make the world and our lives more intelligible. We are the wiser for knowing that our belief systems, institutions and conflicts have their roots in the past. Courses in the history of Africa, East Asia, Latin America and the Middle East introduce the creative achievements of other civilizations. Through the exploration of our own national experience and the history of western civilization, students gain a deeper understanding of the historic foundations underlying the

challenges we face in our own time.

Students of history learn to collect and interpret data, develop logical and convincing arguments, and to write with clarity and economy. A degree in history provides a solid foundation for students seeking careers in teaching, archival management, library science, law, politics, international affairs and government, as well as the training needed for success in graduate school.

Courses numbered 100 are broad topical courses designed for students seeking to meet their general education requirements. 200-level courses are "survey" courses providing overviews of the history of regions and periods. These are the foundation courses for history majors and ideal courses for those seeking to meet their general education requirements. Courses designated 300 explore more specialized topics and assume background in lower-division history courses. 400-level courses are conducted as seminars and provide the advanced instruction required for the Senior Research Seminar.

The courses described are those offered on a regular basis. From time to time the department offers new courses. Students should check the full list of courses published by the department at the time of registration.

History majors are required to take 14 history courses totaling 44-48 credits. Majors must concentrate in one of the areas listed below. Under special circumstances, a student may propose a student-constructed concentration. This special option requires the approval of the department chair.

Students majoring in history may be certified to teach social studies at the secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

Goals and Objectives:

1. Familiarize students with the history of human experience in at least three regions of the world.
2. Provide students with particular competence in their area of concentration including a factual base of information, familiarity with the important historiographical and interpretive concerns of historians of that area, and an ability to synthesize their understanding around recurrent historical themes.
3. Encourage an understanding of how different societies in different times and places have constructed class, race and gender.

4. Develop critical thinking -- rigorous, fair-minded, nuanced.

5. Foster the research and writing skills that enable students to define a suitable topic, conduct thorough and resourceful searches for relevant information, and write up their findings in a clear, persuasive and interesting fashion.

6. Cultivate in students an understanding of the complex epistemological challenges involved in doing history.

7. Help students appreciate that a historical understanding of the human experience can contribute in vital ways to a responsible and reflective life.

Areas of Concentration

African and Middle Eastern History

Choose from among:

Hist 140CE Survey of African History I

Hist 141CE Survey of African History II

Hist 305CE Mesopotamian Myth/Religion

Student-Constructed Concentration

Approval of a History Faculty Advisor and the Department Chair

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN HISTORY:

Credits

General Studies.....41

Lower-division History Requirements:

Survey sequence in the area of concentration.....6

Three additional survey courses.....9

Non-U.S. history majors must take at least one U.S. history survey course.

U.S. history majors must take three non-U.S. history survey courses.

Upper-Division History Requirements:

Four courses at the 300- or 400-level in the area of concentration, at least one of which must be at the 400-level, other than Hist 496.

Three additional 300- or 400-level courses taken outside the concentration in at least two areas.

Hist 396W, The Philosophy and Methods (4 credits). This course should be taken in the last term of the sophomore year or during the junior year.

Hist 496 Research Senior Seminar

Total.....44-48

Writing Course Within Discipline:

Included in Departmental Requirements above.

Auxiliary Requirements:

Two courses in one modern language (6-8)

Five courses selected among three of the following disciplines:

Anthropology (except Anth 301, 350CE, 496 and 499)

Art 162A2, 262A2, 263A2, 265A2 and 365A2E

Economics (except Econ 201)

English 173E, 174A1, 175A1, 221A1, 230A1, 240A1, 280A1, 320A1,
336, 337, 345, 346, 370A1, 380E, 430, 432A1, 461A1,

Geography 271D

Philosophy (except Phil 496 and 499)

Political Science (except PS 350, 450, 496 and 499)

Psychology 157D, 387, 425 and 499

Sociology (except Soc 353D, 496 and 499)

Total.....21-28

Electives.....8-18

TOTAL REQUIRED FOR GRADUATION.....128

REQUIREMENTS FOR A MINOR IN HISTORY:

A total of 6 courses is required from at least two different instructors.

Three courses (9 credits) should be lower-division and three courses (10-12 credits) should be upper-division. See the department chair for further information.

Humanities

Coordinators

Associate Professor Michael C. Anziano and Assistant Professor
Jennifer A. Gehrman

Humanities Advisors

Professor Susan M. Riches, Anthropology; Professor Laurel C. Vogl or
Associate Professor Susan M. Moss, Art; Professor Vernon E. Lynch,
Jr., Economics; Professor Larry K. Hartsfield; Professor Paul N. Pavich
or Assistant Professor Jennifer A. Gehrman, English; Professor Reece
C. Kelly, History; Professor Reinaldo M. Alcazar, Modern Language;
Professor Rochelle G. Mann, Music; Associate Professor Dugald L.
Owen, Philosophy; Professor Byron Dare, Political Science; Professor

Thomas A. Skurky or Associate Professor Michael C. Anziano,
Psychology; Associate Professor Dennis W. Lum, Sociology; Professor
Dinah L. Leavitt

The humanities major consists of a primary concentration of 30 credits in one of the disciplines listed below and two secondary concentrations of 12 credits each in two other of these disciplines. **At least half of the credits constituting the primary concentration, and half of the total credits in the secondary concentrations, must be for upper division courses.** Students majoring in humanities must choose advisors from the disciplines of their primary concentrations. Humanities majors seeking Elementary Teaching Certification should also choose an advisor in the Teacher Education Department. Humanities majors choosing to take the senior seminar within their primary concentration should consult carefully with their advisors to be sure they complete the departmental prerequisites for that course. As an alternative, students may choose to take an interdisciplinary senior seminar (GS 496). Students may not count courses used in their primary concentrations toward second majors in the disciplines of their primary concentrations. Courses used in a primary or secondary concentration **may** count toward both the Humanities Major and the General Studies Requirements. The disciplines from which students may choose concentrations within the humanities major are listed below: **Please note any restrictions, requirements, or exceptions indicated for each discipline.**

Anthropology - Anth 301 does not count

Art - Two history courses and two studio courses required

Economics -Econ 201 does not count

English - Engl 215, 250, 251, 252, 304, 306, 350, 351, 352, 450, 451, 452, 453, and 483 do not count

History

Modern Language - Ed 333 is allowed

Music - **Allowed as a secondary concentration only.** Mu 331A2 and 332A required; all additional credits must be chosen from among Mu 120A2, 128A2, 129A2, 228, 229, or 337A2E

Philosophy

Political Science - PS 301, 350, and 450 do not count

Psychology - No more than a total of six Psychology credits of off-campus coursework, innovative month or independent study combined may be counted towards a primary or secondary concentration

Sociology

Southwest Studies - Courses for primary or secondary concentrations are to be selected from the list of "[Approved Courses for Southwest Studies](#)."

Theatre - Thea 101, 121, and 210 do not count; only nine credits allowed from among Thea 100, 200, 300, and 400 (four credits for secondary concentration)

Two Secondary Concentrations (12 credits each).....24

Auxiliary Requirements:

Two trimesters of one college-level modern language.....6-8

Electives.....33-46

TOTAL REQUIRED FOR GRADUATION.....128

[Return to List](#)

International Studies Program

Coordinator

Professor Edward L. Angus

The intent of this curricular program is to offer the student an interdisciplinary introduction to the multifaceted nature of international and inter-state relations. Students wishing this major must follow the format for a student-constructed major. (See Page 37.) Shown below is a suggested model program but it can be modified to meet individual needs. The core courses in the student-constructed international studies major are appropriate courses in history, political science and anthropology of a given region or several geographical regions. In addition, courses proposed for the major should reflect sufficient exposure to contemporary cultures and societies from the viewpoints of language, business, economics and sociology. Typically, the student is expected to either stipulate a geographical region of concentration having a coherence in terms of specific course selection from those disciplines that offer courses relevant to the geographical orientation (for example a European concentration will have appropriate courses from history, modern language, political science, etc.), or design a broader, non-region specific, worldview emphasis. Successful completion of a well designed international studies major will give the student a broader, more analytical understanding of the international community in terms of bilateral and multilateral relations which affect the decisions of the individual and their governments.

EXPECTATIONS

Regardless of the specific orientation, each student is expected to choose courses from among the following disciplines.

Language

Listed below are the possible geographical designations with the appropriate language courses. The language section includes a total of 12 or 14 hours of intermediate and advanced work in a single language. There is an exception in the Asian field because of limited course offerings.

Europe:

6 hours of intermediate French, German or 8 hours of Spanish
6 hours of upper-level French, German or 8 hours of Spanish

Latin America:

8 hours of intermediate Spanish
8 hours of upper-level Spanish

Asia:

6 hours of beginning Japanese

6 hours of cultural Japanese

Africa:

6 hours of intermediate French

6 hours of upper-division French

Total.....12 or 14

Geography

Each student in International Studies should take:

Geog 271 World Geography.....3

History

The listing of courses for the history department is by geographical area and course title. The student is encouraged to select the appropriate courses relating to the specific focus of the major. Moreover, it is understood that the courses selected from this discipline are contemporary in scope. Each student should select two or more courses from among those listed below in order to satisfy this component of the major. This applies to all students in the program.

Hist 340CE Contemporary Africa.....4

Hist 342CE West Africa.....4

Hist 344CE Northeast Africa.....4

Hist 346CE South Africa.....4

Hist 349CE Islam in History.....4

Hist 351CE U.S.-East Asian Relations.....4

Hist 352CE Modern China.....3

Hist 362CE Soviet Union: Stalin to Gorbachev.....4

Hist 363CE Collapse of the Soviet Union.....3

Hist 365C Germany, 1919 to Present.....4

Hist 371CE History of Central America.....4

Hist 372CE United States-Latin American Relations.....4

Hist 373CE History of Mexico.....4

Hist 440CE Advanced Studies in African History.....3

Hist 450CE Advanced Studies in East Asian History.....3

Hist 465C Advanced Studies in European History.....3

Hist 475CE Advanced Studies in Latin American History.....3

Total.....6-8

Political Science

Each student should select at least three courses from the political science area regardless of geographical designation. All students are strongly urged to take PS 280DE and PS 320D.

PS 280DE Introduction to Comparative Politics.....	4
PS 300DE Religion and Politics.....	3
PS 305DE Environmental Politics.....	3
PS 320D International Politics.....	3
PS 322DE International Political Economy.....	3
PS 325DE Middle East Politics.....	3
PS 337D U.S. Foreign Policy.....	3
PS 360DE Revolution and the Modern World.....	3
PS 365DE Women and Development.....	3
PS 370DE Latin American Politics.....	3
PS 372DE African Politics and Development.....	3
PS 374DE Pacific Rim Politics and Issues.....	3
PS 380DE Comparative Communist Systems.....	3
PS 385CD Twentieth-Century Socialism.....	3
 Total.....	10

Business

Each student is urged to take one of the following as part of the program in international Studies.

BA 309W International Management.....	3
BA 349W Global Marketing.....	4
BA 271 Principles of International Business.....	2
BA 389 International Finance.....	4
 BA 375 Studies in European Business.....	3-18
 Total.....	2-4

Economics

Each student, regardless of specific area of focus, is urged to select from the following courses offered by the Department of Economics.

Econ 370 Topics in International Economics.....	1-6
Econ 371D International Economics.....	4
Econ 410 D Economics, A Radical Perspective.....	4
 Total.....	8

Anthropology

Each student in International Studies should take Anthropology 210C and Anth 217C, regardless of geographical area of concentration.

Anth 210C Introduction to Cultural and Social
 Anthropology.....4
 Anth 217C Cultural Images of Women and Men.....4

Each student is urged to select one of the following, and where appropriate, the course should be in accord with the area of concentration selected:

Anth 350CE Ethnology of Mesoamerica.....4
 Anth 351CE Ethnology of Andean South America.....4
 Anth 353CE Ethnology of India.....4
 Anth 355C Anthropology of Gender.....4
 Anth 356C Ecological Anthropology.....4
 Anth 371CE Ethnology of Amazonian South America.....4

Total.....12

Sociology/Human Services

Each student, regardless of geographical area of concentration is urged to take the following courses in Sociology/Human Services.

Soc 301DE Comparative Societies.....4
 Soc 376D Language and Social Behavior.....4

Total.....8

Writing Course:

Writing Course in appropriate discipline/department.....3-4

Independent Study or Senior Seminar in appropriate discipline/

Assistant Professor Pamela K. Smith

MATHEMATICS MAJOR

Society is increasingly dependent upon solving complex problems of a numerical, quantitative and statistical nature. These all require logical thought. The Mathematics Department major is a solid introduction to all aspects of mathematics. It helps students prepare for the exciting challenges of today and tomorrow.

Many graduates have chosen to be teachers in the public schools. Others have chosen graduate study or careers in such fields as : computer science, statistics, engineering, business, biometrics, the actuarial sciences and other areas involving mathematics. Additionally, for those students who are undecided about a career, a mathematics major provides an excellent background in critical thinking and problem-solving.

TEACHER EDUCATION

Those student seeking certification to teach in a senior high school must complete all the general requirements for the math major, while including the following specific courses: Math 310, 325B, and 342.

To obtain all the requirements for teaching licensing, please contact the Department of Teacher Education.

MATHEMATICS MINORS

Minors are available in mathematics and in probability and statistics. Requirements for these are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN MATHEMATICS:

Credits

General Studies (not satisfied below).....41

Specific Departmental Requirements:

Math 201B Elementary Statistics.....4

Math 221B, 222, 223 Calculus I, II, III.....12

Math 301B Foundations for Advanced Mathematics.....4

Math 387 Algebraic Structures.....4

Math 424 Advanced Calculus.....4

Math 311B Matrices and Linear Algebra 4

or

Math 430 Complex Variables.....3

Total.....31-32

Writing Course Within Discipline:

Math 300W Writing in Mathematics.....3

Other Departmental Requirements:

Three additional mathematics classes numbered above Math 300 (except Math 310, 315B, 318B).....9-12

Math 496 or Math 497 Senior Seminar.....3

Total.....12-15

Auxiliary Requirements:

(should be taken first year at Fort Lewis)

CSIS 106B Introduction to Programming in Visual Basic

or

CSIS 110B Introduction to Programing (C++).....4

Electives.....33-37

TOTAL REQUIRED FOR GRADUATION.....128

Actuarial Science Preparation

Fort Lewis has no major in actuarial science. The following information is provided for students wishing certification from the Society of Actuaries, which lists five basic courses. Their Fort Lewis equivalents are the following:

S.A. 100 (Calculus and Linear Algebra) - all of FLC Math 221B, 222, 223 (Calculus I, II, III) and Math 311B (Matrices and Linear Algebra)

S.A. 110 (Probability and Statistics) - FLC Math 201B (Elementary Statistics) and Math 403 (Probability and Statistics)

S.A. 120 (Applied Statistical Methods) - FLC Math 345B (Data Analysis)

S.A. 130 (Operations Research) - FLC Math 360B (Operations Research)

S.A. 135 (Numerical Methods) - FLC Math 320 (Numerical Analysis)

The Society recommends that a student interested in actuarial science take courses which emphasize communication skills, both written and oral, and business courses that provide background in finance, accounting, economics and insurance. For More information, contact the Society or the Chair of the Department of Mathematics.

REQUIREMENTS FOR MINORS IN MATHEMATICS AND PROBABILITY AND STATISTICS:

Credits

Mathematics:

Math 221B, 222) Calculus I, II.....8

Three additional mathematics courses at upper- division level. One course must emphasize the concept of proof (e.g., Math 310B, 305B, or 316B).....10-12

Total.....18-20

Probability and Statistics:

Math 201B Elementary Statistics.....4

CSIS 106B Introduction to Programming in Visual Basic.....4

A minimum of 12 credits in upper-division statistics courses such as Math 403, 345B, 360B, or BA 353.

BA 253B may be substituted for Math 201B.

CSIS 150B or CSIS 110B may be substituted for CSIS 106B.

Upper-division courses may be substituted for lower-division requirements.

Total.....20

[Return to List](#)

Modern Languages

Courses are listed alphabetically according to language in the [course listings](#) section.

Professors Reinaldo M. Alcazar, Lourdes M. Carrasco, James Fitzgerald
(jointly with /Human Services) Deborah A. MacKeefe, Nicole M.
Mosher and Ingrid W. Ryan

The Department of Modern Languages offers work in French, German, Japanese, Latin, Navajo and Spanish as an important element of a well-rounded liberal arts education (see Course Listings). Occasionally other modern languages are taught under Special Topics. A Bachelor of Arts degree with a major in Spanish is offered. (See statement under SPANISH below.)

GUIDELINES FOR GRANTING CREDIT FOR FOREIGN LANGUAGE COMPETENCE

Fort Lewis College has two methods of granting credit for foreign language competence. One method is based upon the student's satisfactory transfer of college credits from a fully accredited college or university. The second method is by appropriate examinations. A student may pass subject examinations of the College Level Examination Program (CLEP) or Advanced Placement (AP). Also, a

student may challenge a foreign language course for credit through the Credit by Examination procedure, provided the challenged course is not more than one step below the student's present level. Except for transfer credits, credit will be granted for competence in a foreign language only for courses taught at Fort Lewis College.

Further information concerning foreign language competence is available through the Modern Languages Department or the Records Office.

Minors are available in Spanish, French and German for students majoring in other disciplines. A minor in French or German requires at least 23 credits or equivalent knowledge in the appropriate language, nine credits of which must be 300- or 400-level courses. A minor in Spanish requires 24 credits, nine credits of which must be 300- or 400-level courses.

REQUIREMENTS FOR A MINOR IN SPANISH, FRENCH AND GERMAN:

Credits

Spanish:

ML 215A1 Intermediate Spanish I.....	4
ML 216A1 Intermediate Spanish II.....	4
ML 319A1 Advanced Spanish Conversation and Composition I.....	4
ML 320W Advanced Spanish Conversation and Composition II.....	4
ML 336A1 Survey of Spanish Literature	
<i>or</i>	
ML 337A1E Survey of Spanish American Literature.....	4
ML 345A1 Hispanic Culture and Civilization I: Spain.....	4
ML 346A1E Hispanic Culture and Civilization II: Latin America.....	4
Total.....	28

French:

ML 147 Elementary French I.....	4
ML 148A1 Elementary French II.....	4
ML 247A1 Intermediate French I.....	3
ML 248A1 Intermediate French II.....	3
300- or 400-level courses.....	9

Total.....23

German:

ML 123 Elementary German I.....4
 ML 124A1 Elementary German II.....4
 ML 223A1 Intermediate German I.....3
 ML 224A1 Intermediate German II.....3
 300- or 400-level courses.....9

Total.....23

When planning a minor in Spanish, French or German, students should consult with an appropriate faculty member in the Department of Modern Languages.

Students can also pursue a student-constructed major in French or German under the supervision of the appropriate faculty member (See [Academic Programs](#).).

Spanish

Course listings

To earn a major in Spanish, a student is required to complete the equivalent of 40 credits of coursework in the language. 100-level courses do not count toward the major. A student with previous study may be placed on the appropriate level. Please refer to the department web page for additional information.

A student electing Spanish as a major will devise a plan of study in consultation with a member of the Spanish faculty. Students intending to acquire a teaching credential at the elementary or secondary level should consult with an advisor in the School of Education. At the elementary level, a bilingual/bicultural concentration is offered.

Students desiring to pursue a major in Southwest Studies requiring courses in Spanish should consult with the Chair of the Department of Southwest Studies, and the chair of the Department of Modern Languages.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN SPANISH:

Music

[Course listings](#)

Professors Linda S. Mack, Rochelle G. Mann and Richard G. Strawn;

Associate Professor John C. Pennington;

Assistant Professors Timothy P. Farrell, Ying Ying Liu, Katherine D.
Jetter Tischhauser and Mark A. Walters

In today's complex society, the need persists for the educated person to

be aware of the important role played by the arts. The Fort Lewis College Music Department, an accredited member of the National Association of Schools of Music, provides an opportunity for all students to be actively involved in the expansion of their understanding of music. The discipline and sensitivity developed by the study of music provides an excellent background for many and varied careers. The Music Department awards both majors and minors in music.

For the student interested in majoring in music, the department offers a comprehensive curriculum. Three different courses of study, each leading to the Bachelor of Arts degree in Music, allow concentrations in General Music Studies, Performance or Music Education.

General Music Studies

Designed for students interested in a liberal arts education with an emphasis in music.

Music Performance

Designed for students who have demonstrated a strong commitment to music performance and who wish to use some of their elective hours to further concentrate in this area. The performance concentrations are limited to the areas of expertise represented by the music faculty. The areas of concentration are: Piano, Voice, Brass, Woodwinds, Percussion and Strings. A specific instrument must be chosen from within the brass, woodwinds and strings.

Music Education

Designed for students planning to teach music in the public schools.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN MUSIC:

All music majors must satisfy the following Special Departmental Requirements as well as the listed Common Requirements.

Special Departmental Requirements:

Piano Proficiency Requirement:

All music majors must satisfy a piano proficiency requirement before taking Mu 349 Conducting I or Mu 423 Orchestration. The requirement includes sight reading, harmonization of a simple melody, and demonstrated ability to perform easier piano compositions (such as Clementi: Sonatina Op. 36 #1; Bach: Two Part Invention.) Students

with adequate skills may petition to take the examination and may receive credit for the appropriate courses. (See Credit for Prior Work and Credit by Examination, Page 21.) Those with less background must take a piano placement test and, in their freshman year, enroll in the proper course in the Piano Class sequence 103, 104, 203 and 204. Successful completion, with a grade of A or B, of this sequence also satisfies the piano proficiency requirement.

Music Literature Requirement:

Concert Attendance. Attendance at scheduled recitals and concerts and at regularly scheduled listening labs required each trimester.

Major Ensemble Requirement:

At least 6 credits from the following: Mu 105A2, 110A2, 117A2, 305A2, 310A2, 317A2, are required with a maximum of 12 credits allowable toward graduation in any combination of these courses. Students will be assigned to the appropriate major ensemble by the applied music instructor(s). At least one of the above is required each trimester of residency with the exception contained within the following:

Music Education Concentration - A Major Ensemble is not required during the trimester of student teaching. Mu 110A2, 117A2, 310A2 or 317A2 is required for the instrumental specialization, and Mu 105A2 or 305A2 for the choral specialization.

Applied Music Requirement:

One applied course is required each trimester of residency except during the trimester of student teaching (Music Education Concentration). The following guidelines pertain to the Performance Concentration: Students must obtain music faculty approval before declaring the Performance Concentration and subsequently register for 2 credits of applied music on their major instrument each trimester of residency. A maximum of 16 credits in a single applied music area is allowable toward graduation.

Foreign Language Requirement:

Two trimesters of foreign language, either German or French, are strongly recommended for the General Music Studies and for the Instrumental Performance Concentration. The voice specialization within the Performance Concentration requires three trimesters of German or French, including at least one trimester of each language.

Common Requirements:***Credits***

Philosophy

[Course listings](#)

Professors William Coe and Reyes R. García;

Associate Professor Dugald L. Owen;

Assistant Professor Sean E. Cridland

The purpose of the philosophy curriculum at Fort Lewis College is not only the study of traditional and contemporary philosophical issues and positions for their intrinsic interest and importance, but also the demonstration that these age-old but continuing efforts to understand ourselves and our relation to the world are important to everyone. It is the mark of a liberally educated person to understand the conclusions of the specialized sciences in terms of their basic assumptions, to think seriously about the nature of such assumptions, and to be aware of the way in which our views of reality are influenced by our cultural heritages and by the very structures of our languages. Perhaps the most important function of philosophy as a part of the liberal education is the destruction or at least the recognition of the complacency and provincialism of much of our thinking.

A major in philosophy will provide a sound foundation for graduate studies in philosophy and will also serve as an excellent preparation for law school or for theological studies. For its majors, as well as for those majoring in other disciplines and minoring in philosophy and for those

taking several philosophy courses as electives, the program is designed to provide a systematic acquaintance with mankind's most fundamental attempts at self-knowledge and a concomitant basis from which students can formulate their own views of themselves and the world.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN PHILOSOPHY:

Physics

[*Course listings*](#)

Professors James M. Costello and Tom D. Norton;

Associate Professors Gerald Crawford and Martha S. Iverson;

Assistant Professor Ashley Shultz

The Bachelor of Science degree in Physics is designed to allow students to attain their professional goal of entering graduate work in physics or astrophysics; to obtain technical positions in industry in such areas as energy science, engineering and electronics; or to obtain preparation for secondary certification in teaching physics in public schools. The geologist, engineer, chemist and biologist all deal with matter and energy in their various forms. Since physicists probe the physical laws underlying all physical processes, the study of physics becomes the cornerstone for all the natural sciences.

The physics curriculum is predicated upon the role physicists play in a modern, technological world society that is currently experiencing shortages of trained personnel in various scientific areas and in science education. Coursework in physics will provide the student pursuing entrance to graduate school in physics or astronomy with a strong grounding in mathematics and physics, while being immersed in an atmosphere of a broad, liberal education in the humanities and social sciences. This curriculum also will enable a student to enter applied technical fields in industry such as electronics, optics and aerospace, where there is currently a high demand. Students seeking a degree in physics should consult early in their college career with staff members of the Physics Department.

A minor in physics is available for students majoring in other disciplines. Requirements for a minor in physics are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE IN PHYSICS:

Credits

General Studies (not satisfied below).....31

All courses listed under Specific Departmental Requirements, Additional Departmental Requirements and Auxiliary Requirements from other departments must be passed with a grade of C- or higher.

Specific Departmental Requirements:

Phys 217B, 218B, Physics for Science and Engineering I, II.....10
 Phys 320 Modern Physics.....3
 Phys 354 Theoretical Mechanics.....3
 Phys 361 Principles of Electricity and Magnetism.....4
 Phys 380 Advanced Lab I.....1
 Phys 381 Advanced Lab II.....1
 Phys 400 Science and Human Values.....2
 Phys 420 Introductory Quantum Mechanics I.....3
 Phys 496 Senior Seminar
 or
 Phys 499 Independent Study.....2
 Total.....29

Writing Course Within Discipline: Phys 395W & Phys 495W
 Writing Techniques in Physics I & II.....4

Additional Departmental Requirements:

Additional physics courses numbered above 300 to be chosen from:

Phys 301 Introduction to Electronics.....3
 Phys 340 Optics.....4
 Phys 370 Heat and Thermodynamics.....3
 Phys 421 Quantum Mechanics II.....3
 Phys 454 Advanced Topics in Physics.....1-4

Total.....6

Auxiliary Requirements from Other Departments:

Political Science

Course listings

Professors Edward L. Angus and Byron Dare;

Associate Professor Kenyon D. Bunch;

Assistant Professors Sean E. Cridland and Jan E. Sallinger-McBride

The study of political science is concerned with the relationship between the governed and the government, the nature of the political process and the role of the citizen in a democratic society.

The political science major provides excellent training for the person who: (1) plans a career in law, journalism or government; (2) hopes to work abroad; (3) plans to enter graduate school and later teach or serve as an administrator at the college level; or (4) expects to enter politics, either as a candidate or as an administrative aide to a public official.

Political science course offerings are available also to the student who is majoring in another area but who wants to learn something about politics and government.

Students majoring in political science may be certified to teach in the broad area of social studies at the secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

A minor in political science is available for students majoring in other disciplines. Requirements for a minor in political science are listed at the end of this section.

Religious Studies Minor

Course listings

Director, James K. Ash

Professor Emeritus Leonard G. Bird;

Professors Mary Jean Moseley and Paul N. Pavich;

Associate Professors James K. Ash, Alane Brown, Reyes R. García,
David L. Kozak, Neil McHugh, Dugald L. Owen, Richard M.
Wheelock;

Assistant Professors Robert R. Bunting, Sean E. Cridland and Kalin L.
Grigg

Religion is one of the most powerful influences on both individual and collective human behavior throughout history yet it is often neglected as a unified area of critical study in higher education. The minor in Religious Studies is an interdisciplinary approach to the study of

various religious traditions and their impact on modern society. This minor examines religious experience within a framework of economic, political, gender, historical, class and ethnic concerns. Coursework in Religious Studies may be used in practical applications such as faith-based service in a church, synagogue or mosque as well as involvement with activist, social justice initiatives. This program will also provide a foundation for those students who wish to proceed to more advanced studies in seminaries and graduate schools.

REQUIREMENTS FOR THE MINOR IN RELIGIOUS STUDIES:

1) At least 18 hours of coursework from the listing below, at least nine of which must be in upper-division courses.

2) Coursework for the minor must represent at least four\ different disciplines.

Possible course choices for the minor:

Credits

Anthropology

Anth 215CE Magic and Religion.....3

English

Engl 221A1 Classical Literature.....4

Engl 380E Native American Literature: Topics.....4

Engl 126A1 Bible as Literature (Hebrew Bible).....2

Sociology/Human Services

Course listings

Professors Samuel A. Burns, James Fitzgerald (jointly with Modern Language), Betty J. Leyerle;

Associate Professor Dennis W. Lum;

Assistant Professors Janine M. Fitzgerald, Kalin L. Grigg, Mark C. Seis and Carey N. Vicenti

Sociology seeks to explore how our individual and collective biographies intersect history within society. The relationships between social structure and individual consciousness, historical processes and everyday life, and collective interests and individual prerogatives provide the sociological substance by which we become self-conscious. It is through the study of sociology that we become aware of the meaning of our everyday lives and recognize the extent to which we participate in the construction of social formations.

The sociological task of comprehending the relationships among individuals and groups is a significant part of any student's educational experience. Extensive work in sociology is recommended for students

planning careers in human services. Health services administration, family case work, community planning and development, and criminal justice work are typical human service careers. Moreover, an emphasis in sociology provides foundational preparation for graduate work in sociology, social work, public administration, law, journalism and other fields.

In order to cultivate critical consciousness and active participation in processes of development and change in society, the Sociology and Human Services curriculum is organized to facilitate the integration of theory (reflection) and practice (action). While participation in the human service and practicum courses form the nucleus of the praxis experience, the Block Internship, Latin American, Community Services and Service Learning programs all provide further opportunities for engaging field experience.

A minor in sociology and human services is available for students majoring in other disciplines. Requirements for a minor in sociology/human services are listed at the end of this section.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN SOCIOLOGY/ HUMAN SERVICES:

Southwest Studies

Course listings

Professors Richard N. Ellis, Mary Jean Moseley and Duane A. Smith;

Associate Professor Richard M. Wheelock

The Southwest Studies major is designed to be a truly inter-disciplinary program that introduces students to a variety of aca-demic disciplines. The interdisciplinary nature of the program permits it to be tailored to the needs of individual students. Students are required to take approved coursework in a minimum of four different departments. Coursework applicable to the South-west major and minor must be approved by the department chair.

A major in Southwest Studies will consist of 45 hours of coursework with at least 27 credit hours at the 300- and 400-levels. Courses on the Southwest must be taken in at least four different subject areas such as anthropology, art, history, language, literature, sociology, economics, geology and Southwest Studies. At least 18 credit hours must have a Southwest prefix. Students will also take a three-hour senior seminar in Southwest Studies.

All majors are required to take at least one year of Spanish or one year of a southwestern Indian language.

A major in Southwest Studies prepares students for careers in state and local governments, museum work, and other occupations as well as admission to graduate school. Students majoring in Southwest Studies may be certified to teach in the broad area of social studies at the

secondary level. To obtain requirements for teacher certification, please contact the Department of Teacher Education.

A minor in Southwest Studies will consist of 18 hours of coursework on the Southwest in at least three subject areas. At least nine hours will be upper division.

Theatre

[Course listings](#)

Associate Professor Kathryn S. Moller;

Assistant Professors Ginny A. Davis and Paul R. Rathbun

The Theatre major at Fort Lewis College enables students to fully

explore their potential as literate, articulate and humane members of society through a close study of the theory and practice of theatre. Students so trained are able to bring highly developed communication skills, flexibility and creativity to a wide range of career opportunities.

All courses are suitable for majors and non-majors with an interest in the arts.

The academic program is supported by a strong production program which is the cornerstone of our work. Performing, technical theatre and administrative opportunities are open to all students. Many of our productions are student generated through Fourth Wall Student Productions. Auditions for the theatre season are held at the beginning of each term. Student involvement in FLC theatre productions is considered an academic endeavor with course credit available.

Requirements for a minor in theatre are listed at the end of this section.

Women's Studies

Course listings

Jennifer A. Gehrman, Coordinator

Professors Kathleen S. Fine-Dare, Doreen Hunter and Betty J. Leyerle;

Associate Professors James K. Ash, Alane S. Brown, Kathryn S. Moller
and Carol L. Smith;

Assistant Professors Janine M. Fitzgerald, Jennifer A. Gehrman,
Michele M. Malach and Jan E. Sallinger-McBride;

Visiting Instructor Terra L. Anderson

Women's Studies takes an interdisciplinary approach to the study of women, sex and gender. Informed by theories of feminism, Women's Studies addresses a variety of issues including a respect for sociocultural diversity; an understanding of systematic and historical forms of inequality; a concern for building social equality and justice; and the rethinking of methodological and pedagogical concerns while conducting research and teaching in any discipline. Women's Studies is committed to an honest and critical discussion about the ways that the individual, society and culture intersect, and to exploring views about sex role and gender issues from a variety of disciplinary perspectives.

Students may therefore select from a variety of courses in Women's Studies and in several other disciplines to create a minor in Women's Studies that will complement and enhance their chosen major and/or their future career goals.

Students who plan to complete a minor in Women's Studies should

consult with their regular faculty advisor and a member of the Women's Studies faculty, listed above.

REQUIREMENTS FOR A MINOR IN WOMEN'S STUDIES:

I. CORE COURSES (10 credit hours)

WS 101D Introduction to Women's Studies.....4

WS 301 Feminist Studies: Theories and Methods

or

Writing Program

Carol L. Smith, Director

Professors Dinah Leavitt and Karen I. Spear;

Associate Professors Beverly R. Chew, Neil McHugh and Carol L. Smith;

Assistant Professors Delilah G. Orr, Enrique Salmon and Katherine J. Wolfe;

Visiting Assistant Professors Thomas L. Compton and Julianne E. Freeman

Visiting Instructors Molly C. Costello, Ann Hartney and Bridget Irish

At Fort Lewis College, writing is a liberal art. In the Writing Program, we consider ourselves one of the heirs of the ancient liberal art of rhetoric. The study of rhetoric began as the study of how to speak persuasively, but with the increasing importance of writing in the modern era, expanded to look at the features of writing that make it persuasive. What is effective writing is highly situational, and an educated person must know how to adapt. Although the Writing Program's emphasis is on teaching students to be effective academic writers, we also provide opportunities for students to learn to be effective writers in the situations that lay beyond the academy, in civic life and in the professions.

FIRST-YEAR ACADEMIC WRITING REQUIREMENT

Scholarly discourse is a new term for most college students, but it refers to the intellectual work of becoming educated: the range of reading, writing, speaking and thinking practices through which knowledge is created and disseminated among members of the academic community.

--Karen Spear,

*"Roadmaps and Destinations: A Traveler's Guide to Comp 150,"
The Rhetorical Stance of College Reading and Writing.*

Participating in scholarly discourse is a central activity in a liberal arts education. For this reason, Fort Lewis College faculty require students to fulfill an academic reading and writing requirement in their first two years of study. In the course or sequence of courses students take to fulfill this requirement, students will be asked to read scholarly texts in sophisticated and nuanced ways, to identify intellectual problems, and to write for the purpose of making an intellectual contribution.

Writing placement, a key activity at Summer Orientation, Advising and Registration (SOAR), determines whether students will complete the academic writing requirement by taking one course, Comp 150: Reading and Writing in College, or two courses, Comp 125-Comp 126 Reading in College (Intensive) and Writing in College (Intensive). Exemptions to this requirement are granted to students who earn a score of 650 or above on the SAT II Writing Test, score a 4 or 5 on the Advanced Placement Test for English Composition/Literature, or score a 4 or above on the English Exam of the International Baccalaureate Program.

MAJOR FIELD WRITING REQUIREMENT ("W" Courses)

In addition to completing Comp 150, each student is required to take the designated "W" course in his or her major field. These courses are taught by the departments, not the Writing Program. Students should check the departmental requirements to identify the designated "W" course for a specific major. "W" courses introduce students to the specialized reading and writing practices in the major, and, in many cases, also cover significant conceptual content. Students may elect to take "W" courses out of their major fields of study, but they are recommended to contact the instructor first to discuss the way reading and writing instruction is incorporated in the course and to check the course descriptions for the prerequisites.

Here is a listing of the "W" courses offered by departments:

Credits

WRITING PROGRAM ELECTIVES

The Writing Program offers a limited number of experimental elective courses under the Comp 190/390 numbers. For a current listing of elective offerings see the course schedule under "COMP." Recent offerings have included "Writing as Environmental Action," "Writing as Witness," "Writing as Community Action," "Weird Texts," and "Polishing Your Writing."

WRITING ELECTIVES OFFERED BY DEPARTMENTS

A number of departments offer writing electives that students may wish

to take to broaden their exposure to different writing practices. Students should consult the catalog description to determine prerequisites. Here is a listing of writing electives offered by departments:

Credits

BA 221 Writing in the Business World.....	3
BA 348 Public Relations.....	3
Engl 215 News Media Writing.....	3
Engl 315 Media Writing: Topics.....	3
Engl 363 Advanced Composition.....	4
Engl 464A1 Creative Writing.....	4

Thea 369A2 Playwriting.....	4

THE WRITING CENTER

The Writing Center is a place students can go for help with any writing assignment or project at any stage in the writing process (from generating ideas, to establishing an organizational structure, to polishing a final draft). The Writing Center, located at Sage 105B, is staffed by faculty and trained peer tutors. It is available to all FLC students at no charge.

School of Business Administration Faculty

Professors Leonard D. Atencio, John E. Cave, James P. Clay, Jeremy J. Coleman, Joseph C. Colgan, Roy A. Cook, Lawrence S. Corman, William B. Dodds, Robert Dolphin, Jr., J. Larry Goff, Vernon E. Lynch, Jr., Reed H. McKnight, Iqbal A. Memon and Richard A. Podlesnik;

Associate Professors Wen Hai, Robert P. Harrington, Kenneth A. Hunt, Dale E. Lehman,

Randall K. Serrett, Carol L. Smith, Charles O. Tustin;

Assistant Professors Frederick H. Mull, Nancy A. Oppenheim, Herbert Snyder and Bradley W. Wagner

MISSION

The School of Business Administration's faculty works as a team to

provide innovative undergraduate business and professional education that challenges traditional pedagogical models and integrates the business and liberal arts disciplines to prepare students for a dynamic, globally competitive business environment.

VALUES

We provide high quality undergraduate programs with a commitment to developing a liberally educated and professionally competent student. We reach out to attract and serve a culturally diverse community of scholars and students to help them achieve their full potential. We help students gain a maturity of commitment, a sense of social responsibility, and integrity. Our success depends upon maintaining a quality faculty dedicated to teaching and scholarship, a critical mass of committed students, a sense of community focused on our common goals, and adequate funding from public and private sources.

Realizing the need for quality and continuous improvement in all that we do, we strive to maintain a dedicated team of teacher-scholars with concern for our students, for the quality of our faculty, and for the success of our graduates. Additionally, we strive to prepare our students and faculty to meet the needs of organizations and communities operating in a globally competitive environment with diverse economic systems.

Goals and Objectives

TEACHING

To be leaders in learning, pedagogy, curriculum, and student-oriented service-delivery systems, we position ourselves as a distinguished value-added undergraduate school by focusing attention on enhancing student's use of information as a competitive tool through life-long learning, knowledge of business content, tools skills and applications. Achievement of these goals will include developing analytical, computer and decision making skills; leadership/interpersonal, communication, planning and organizing skills; risk taking, experimentation, and complex-systems-thinking proficiency. Further, we will develop students with responsible/ethical attitudes and actions; and international/multicultural/gender sensitivity.

VISIBILITY AND REPUTATION

To enhance the School's regional and national visibility and reputation for exceptional value-added undergraduate business and professional

education and service, we facilitate student employment opportunities, improve graduate school admission opportunities and provide community/regional service. Achievement of these goals and objectives requires continuing research and publication. We will maintain AACSB accreditation.

RESOURCE SUPPORT

To provide adequate resources to support the mission, goals and objectives of the School, we seek and maintain sources of both internal and external funding. Achievement of these goals and objectives requires us to be efficient stewards of society's resources.

COMMITMENT TO EXCELLENCE

To support our goals and objectives we are committed to developing and maintaining a curriculum that is responsive to society's needs and to increasing learning both inside and outside the classroom. This requires more emphasis on interdisciplinary/industry-focused curricula, creating a more effective physical environment for learning, and focusing our efforts on pedagogical innovations.

The School of Business Administration degree programs are designed to provide a balanced combination of the arts and sciences and professional business education. The more specific objectives of the Bachelor of Arts degree programs offered by the School of Business Administration are:

To provide, as a base, a general understanding of the principles of modern business and organizational practices.

To develop balanced thinking and understanding of the economic, political, and social environments in which modern business and government are conducted.

To ensure that students are skilled in the use of analytical tools and techniques for decision making.

To develop the capacity for critical thought, leadership and the ability to work with others.

To enhance each student's appreciation for international customs and cultural values, and for one's responsibilities in modern society.

The School is characterized by its professional attitude, the diversity of its largely work-experienced faculty and its close student-faculty relationship. In addition to concern for good classroom instruction, the faculty believe that much learning takes place through personal and informal contacts with and among students. The Business Club, Students in Free Enterprise, American Indian Business Leaders, Beta Alpha Psi, the accounting professional fraternity, and Beta Gamma Sigma, the national honorary business fraternity, are active campus groups which promote such interactions.

Degree Programs and Options

The curricula offered by the School lead to the Bachelor of Arts degree with a major in Accounting, Economics or Business Administration. Within the Business Administration major, options are offered in Agricultural Business, Business Administration, Engineering Management, Finance, International Business, Management, Marketing, Operations Management, and Tourism and Resort Management.

Acceptance of Transfer Credits

It is recommended that students planning to transfer into the Fort Lewis College School of Business Administration do so by the end of their sophomore year. Students must complete their final 28 credit hours in residence at Fort Lewis College.

Students taking their first two years of work at a junior or community college or at another four-year institution should take only those business courses that are offered at the freshman or sophomore level at Fort Lewis College. To be exempt from the School of Business Administration sophomore-level writing requirement, students should take a business writing or business communications course at their junior or community college. Business courses taught at junior or community colleges may not be used to satisfy upper-division course requirements (courses at the 300- and 400-level) of the School of Business Administration.

Prerequisite Requirement

Students who enroll in a business course without having satisfactorily completed the required prerequisite(s), or received consent of the instructor, are subject to administrative withdrawal from the course.

Non-Business Students

Students who are not working toward a baccalaureate degree in business are prohibited from taking business credits which will exceed 25 percent of their total program. This provision is in accordance with the accreditation standards of the American Assembly of Collegiate Schools of Business.

Trimester Abroad

The Trimester Abroad courses are taught by an FLC Business School faculty member in Europe during the winter trimester. The schedule provides for two five-week sessions with two courses offered during each session. Spring Break provides the opportunity to travel in Britain or the Continent, or take advantage of a Spring Break short course. The trimester ends around the first week in April, allowing about three weeks of independent travel for those who wish to take advantage of that opportunity before the summer trimester begins at FLC in Durango.

Generally, the course offerings include at least two junior-level core business courses, as well as an international business course and either a third core course or an upper-division business elective for a total of 12-14 credit hours. There are additional opportunities to earn credit through Independent Study and Non-Scheduled courses and the Spring Break course.

Costs of this program are kept low through the use of FLC faculty and the minimal cost of facilities in Europe. While the program costs for any given year are a function of airline fares, the exchange rate and room and board charges, in past years, it has cost students an additional \$1,600 including airfare, room and board for the trimester. This does not include the student's personal spending, nor costs of travel during Spring Break or at the conclusion of the course. Details for any given year regarding location, cost, climate, travel arrangements, etc., may be obtained from the International Program Coordinator or the JTA faculty.

Students who are interested in this program should contact the Assistant Dean of the School before taking any upper-division SOBA courses to design trimester schedules so they don't conflict with the JTA program of study.

Trimesters in France, Spain, Germany and Norway

The College has exchange agreements with École Supérieure de Commerce de La Rochelle (SupDeCo), Amsterdam School of Business (HES), Ecole Supérieure des Sciences Commercial (ESSCA),

Fachhochschule Regensburg (FSR), and the Norwegian School of Management (BI), University of Orebro (Sweden), University of Northumbria (Newcastle, England), University of Southern Denmark, University of Savoie (Chambery, France), and Universidad de Cordoba (Spain). While the studies are completed at the partner school, credit and grades are awarded by FLC so there is no problem of transferability. FLC tuition and fees are charged so the only additional cost is that associated with travel to host institution and whatever additional living expenses which might be incurred.

In addition, the School of Business Administration offers trimesters abroad in France, Germany and China.

The "4 + 1" BA/MBA Programs

Fort Lewis College graduates with a Bachelor of Arts degree in Accounting, Business Administration or Economics, and who meet the entrance requirements of the respective institution, may earn an MBA (normally a two-year program) in one year. This opportunity is available from Colorado State University, and Northern Arizona University.

Accounting/Business/Economics/Marketing Minors

Requirements for minors in Accounting, Business Administration, Economics and Marketing are given at the end of the School of Business Administration section of this catalog.

THE CURRICULUM

The School of Business Administration offers Bachelor of Arts degree's in Accounting, Business Administration and Economics. The Business Administration degree offers options in Agricultural Business, Business Administration, Engineering Management, Finance, International Business, Management, Marketing, and Tourism and Resort Management. These majors provide excellent education in business within the broad context of a liberal arts curriculum. The programs offer a concentration of courses in which the students take a cross section of "Common Requirement" courses and 15 to 25 credit hours in a concentration in one of the areas of business. These programs are designed to meet the needs of students wishing to continue their education in graduate school or to work in their chosen professional area.

Minors in accounting, business administration, economics or marketing

are available for students majoring in other disciplines. Requirements for minors are listed at the end of this section.

A student who majors in one of the Bachelor of Arts degree programs in the School of Business Administration must complete:

Credits

General Studies.....41

Accounting, Business Administration or Economics majors may not take Business or Economics courses to satisfy General Studies group A, B, C, D, or E requirements.

Common Requirements:

Acc 225 Introduction to Financial Accounting.....4

Acc 226 Introduction to Managerial Accounting4

Econ 266D Principles of Economics.....4

BA 221 Writing in the Business World3

BA 253B Business Statistics.....4

BA 260D Legal Environment of Business.....3

BA 301D Management and Organizational Behavior4

BA 340 Marketing.....4

BA 353 Operations Management.....4

BA 380 Financial Management.....4

BA 496 Senior Seminar in Administrative Strategy.....4

Quantitative Reasoning Requirement:

Complete one of the following quantitative courses: (These courses satisfy other requirements in the major or in General Distribution and need not add additional required hours.)

BA 446 Marketing Research.....	4
BA 485 Investments and Portfolio Management.....	4
Econ 361 Managerial Economics.....	4
Math 210B Calculus for Business and the Biological Sciences.....	4
Math 221B Calculus I.....	4
Math 345B Data Analysis.....	4
Math 360B Introduction to Operations Research.....	4
Auxiliary Requirement outside the School of Business Administration:	
CSIS 322 Management Information Systems.....	4
TOTAL COMMON REQUIREMENTS.....	50-51

Each candidate for graduation must complete a minimum of 128 credits, **with at least a minimum cumulative grade point average of 2.0 and a minimum grade point average of 2.0 for those courses accepted to meet the requirements for the major course of study.** For majors in Accounting, Business Administration and Economics, a minimum of C- must be earned in 300- and 400-level Accounting, Business Administration or Economics courses to count towards graduation. It is the responsibility of the student to know and complete all graduation requirements.

At least 50% of the business credit hours for a School of Business major must be earned at Fort Lewis College.

Additional requirements are listed on the following pages under each major or option.

Sufficient elective credits to bring the student's total credits to 128 (the minimum number required for graduation). At least 50 percent of the student's total credits must be taken outside of the School of Business Administration.

Group W Requirement

To complete the college Group W requirement, Accounting, Business Administration and Economics majors must take one of the Group W courses designated for the major or option. Some majors and options have designated only one course as fulfilling the Group W requirement; other majors and options have designated multiple courses of which students should choose at least one. In all cases the Group W courses satisfy other requirements in the major and need not add additional required hours. BA 221 Writing in the Business World is a prerequisite for all Group W writing courses in the School of Business Administration.

Prerequisite Statement:

Acc 225, Acc 226, Econ 266D, and Comp 150 are prerequisites for 300- and 400-level courses offered by the School of Business Administration. Students with majors offered by the School of Business Administration should complete these courses BEFORE the start of the junior year or substantial delay in graduation may result. These students may not enroll in 300- or 400-level business courses until Comp 150 and BA 221 have been completed and the student has attained junior standing (60 or more credit hours completed). Any exceptions require the written approval of the School of Business Administration Dean or Assistant Dean.

[Return to Top](#)

Accounting

Course Listings

The accounting major prepares students to embark immediately upon a career as a public, industrial or governmental accountant and provides a foundation in accounting and business administration that will enable them to pursue graduate study. Graduates can expect to work in such areas as income tax preparation, general accounting, cost accounting, budgeting and management advisory services.

In addition to the College's General Requirements, the Common Requirements of the School of Business Administration and Auxiliary Requirements outside of the School of Business Administration, a student studying accounting must complete the following requirements:

*

Accounting Core

Acc 323 Intermediate Accounting I.....	4
Acc 324 Intermediate Accounting II.....	4
Acc 327 Cost/Managerial Accounting.....	4
CSIS 425W Accounting Information Systems.....	4
Accounting Elective**.....	7-8
Total.....	23-24*

Accounting Electives**

Acc 430 Income Tax Accounting.....	4
Acc 431 Advanced Income Tax Accounting.....	3
Acc 432 Tax Planning & Research.....	3
Acc 434 Advanced Accounting.....	4
Acc 435 Survey of Accounting Theory Trends.....	4
Acc 436 Auditing - Theory & Practice.....	4
Acc 470 Governmental/Not-For-Profit Accounting.....	4
BA 402 Electronic Commerce.....	4
CSIS Any 4 Credit Upper Division Class.....	4
BA 481W Cases in Financial Management.....	4

***The credits used to satisfy the accounting major may not be used to satisfy any other major, minor or option within the School of Business Administration.**

****Select at least 2 of which at least 1 must have an Acc prefix and at least 1 must be a W course**

Most states have enacted a 150-hour requirement. In Colorado, this means that candidates taking the CPA examination for the first time after 2001 need to have completed 150 semester hours of education. The Fort Lewis College accounting program allows students to meet that requirement. You can choose from several options to meet the requirements and fit your personal needs to enhance your future career as a successful accountant and business leader.

Fort Lewis College and Colorado State University have teamed up to offer you maximum flexibility in customizing your accounting education. If you are anxious to get started on your career, you may choose the traditional 128-hour degree. If one of your goals is to become a Certified Public Accountant(CPA) as soon as possible, then you may choose the Fort Lewis college 150-hour program or the Master

of Science degree in accounting from Colorado State University. A graduate from Fort Lewis College's 128-hour accounting major, who is accepted into the Colorado State University program, can earn a master's degree at Colorado State University by completing eleven more courses, of which as many as five may be completed at Fort Lewis College.

150-Hour Accounting Program

The 128-hour accounting major by itself is not sufficient preparation for professional exams such as the CPA(certified public accountant). Preparing for professional exams requires additional courses in accounting and law. Sitting for the CPA exam requires at least 150 credits.

According to the Rules of the Colorado State Board of Accountancy, effective 1/01/2002, to sit for the CPA exam, you must successfully complete at least 150 semester credits of which at least 30 must be in accounting. Of the 30, at least 24 must be in upper division accounting courses, and at least 3 must be in auditing. "To receive credit for accounting related coursework, transcripts must indicate an accounting program code or the applicant must furnish other information to demonstrate an accounting related course." Also, you must have at least 24 credits of other business classes in at least 4 other areas of business. Note: these requirements may be different in other states.

Your success on professional exams requires a significant commitment of time to your academic studies. In addition to your college courses, you are strongly encouraged to complete a quality CPA review course prior to sitting for the exam. By working closely with your accounting advisor to clarify requirements, you should progress toward successful completion of your program.

In addition to the courses required for the 128-hour accounting major, you must complete at least 22 additional credits which include all of the following classes:

Acc 430 Income Tax Accounting.....	4
Acc 431 Advanced Income Tax Accounting.....	3
Acc 434 Advanced Accounting*.....	4
Acc 436 Auditing - Theory & Practice.....	4
Acc 470 Governmental/Not-For-Profit Accounting.....	4
BA 311 Business Law I.....	3
BA 312 Business Law II.....	3

*Prerequisite: Acc 436 Auditing- Theory & Practice.

[Return to Top](#)

Agricultural Business

(See [Business Administrations Course Listings](#))

The agricultural business option integrates agriculture, economics, and business administration to prepare students for professional careers in the agribusiness sector. These include positions in agricultural finance, product development, marketing and distribution, and agribusiness management. Flexibility within this option allows students to concentrate in a specific area of study, including general agriculture, animal science or agronomy.

In addition to the College's General Requirements, the Common Requirements of the School of Business

Administration and the Auxiliary Requirements outside the School of Business Administration, a student studying agricultural business must complete the following requirements:

Required:

Ag 101B Introductory Animal Science.....4
 Ag 102B Principles of Crop Production..... 4
 Ag 346 Agricultural Marketing.....3
 Ag 350 Agricultural Law.....3

Econ 364W Macroeconomics.....4

Plus 12 credits from the list below (at least two courses must be taken from each category):

Agriculture:

Ag 150 Farm Records and Accounts..... 3
 Ag 202 Integrated Pest Management/ Weed Control.....4
 Ag 204 Forage Production and Management..... 3
 Ag 235 Soils and Soil Fertility.....4
 Ag 240 Principles of Animal Nutrition.....4
 Ag 300D Agricultural Issues in Society.....3
 Ag 301 Range Management.....4

Ag 325 Beef Science.....3
 Ag 390 Special Topics.....3

Economics/Business Administration:

Econ 330 Production Economics and Agribusiness..... 4
 Econ 361 Managerial Economics.....4
 Econ 390 Special Topics.....4
 BA 387 Real Estate.....4
 BA 401W Entrepreneurship and Small Business Management
 **3
 BA 437 Internship in Business.....3
 Econ 335 Environmental Economics.....4

 Total.....26*

***The 26 credits used to satisfy an option in Agricultural Business may not be used to satisfy any other major, minor or option.**

****Completion of one of these courses fulfills the Group W requirement for students in the agricultural business option.**

Business Administration

Course Listings

The business administration program, sometimes referred to as general business, provides a broad base of knowledge for beginning a business career. It enables maximum flexibility in career choice and change throughout one's career. Students are expected to develop a basic understanding of the social, legal and economic environments of business, including an introduction to international business, organizational behavior, the principles of leadership and organization theory, the quantitative tools of decision making and the functional areas of the firm.

Students work with assigned advisors to select elective courses that enhance their particular interest. Emphasis is placed on developing a general background with a well-balanced understanding of business. This program, then, provides a sound undergraduate education for

entrance in a professional career or into graduate school.

In addition to the College's General Requirements and the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside of the School of Business Administration, a student studying business administration must complete the following requirements:

One 300- or 400-level Economics course**4

A minimum of 15 credits of business administration courses at the 300- or 400-level, with at least one course from each group.*

Group A: MARKETING

BA 240 Business Creativity and Innovation.....	2

****Completion of Econ 472W, BA 302W, BA 401W or BA 407W fulfills the Group W requirement for students in the business administration option.**

[Return to Top](#)

Economics

Course Listings

The School of Business Administration offers two degree options for students pursuing studies in Economics. Both Economics options prepare students for graduate studies in economics as well as employment in business and finance. The study of economics also provides a good background for students who want to prepare for a career in law. Economics majors may also be certified to teach in the broad area of social studies at the secondary level. To obtain the

requirements for certification, students need to contact the Department of Teacher Education. These programs lead to a degree in either Business Economics or Economics.

Business Economics Option:

The Business Economics option is designed to provide students with an understanding of economic principles underlying the business world. The option shows the relationships between the study of economics and basic business decision-making both from the standpoint of the individual firm and from the standpoint of business operating in the national and global economy. Students majoring in business economics will be prepared to continue graduate study in economics and for employment in government and business.

In addition to the College's General Requirements, the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside of the School of Business Administration, a student majoring in business economics must complete the following departmental requirements:*

Specific Major Requirements:

Econ 356 Microeconomic Theory.....4
 Econ 364W Macroeconomic Theory.....4

Total.....8

Other Major Requirements:

Any three of the following courses:

Econ 305 Economic Geography.....4
 Econ 310C Economic History of the United States.....4
 Econ 330 Economics of Agribusiness.....4
 Econ 335D Environmental Economics.....4
 Econ 361 Managerial Economics.....4
 Econ 369D Public Finance.....4
 Econ 371D International Economics.....4
 Econ 381D Economics of the Health Care Industry.....4
 BA 382/Econ 382 Financial Institutions.....4
 Econ 390/391 Special Topics in Economics.....4
 Econ 407C Evolution of Economic Thought.....4
 Econ 410D Economics, A Radical Perspective.....4

Total.....12

***Departmental requirement courses used to satisfy the Business Economics option may not be used to satisfy any other major, minor or option within the School of Business Administration.**

Economics Option:

The Economics option focuses mainly on economics and is designed to provide students with an understanding of the present economic system and how economics relates to other disciplines and fields of study. The major is designed for students who desire to study economics but do not wish to take all of the common requirements courses prescribed for Business Administration majors. Students majoring in Economics will have the flexibility to pursue minors in other areas as well as preparing for teaching certification.

In addition to the College's General Requirements, students majoring in the Economics option must complete the following departmental requirements:

Departmental Requirements:

Econ 266D Principles of Economics.....4
 Econ 361 Managerial Economics.....4
 Econ 356 Microeconomic Theory.....4
 Econ 364W Macroeconomic Theory.....4
 BA 499 Independent Study.....2

Total.....18

Any three of the following courses:

Econ 305D Economic Geography.....4
 Econ 310C Economic History of the United States.....4
 Econ 330 Economics of Agribusiness.....4
 Econ 335D Environmental Economics.....4
 Econ 369D Public Finance.....4
 Econ 371D International Economics.....4
 Econ 381D Economics of Health Care Industry.....4
 Econ 382/BA 382 Financial Institutions.....4
 Econ 390/391 Special Topics in Economics.....4
 (As approved by the Department)
 Econ 407C Evolution of Economic Thought.....4

Econ 410D Economics, A Radical Perspective.....4

major, minor or option.

****Completion of this course fulfills the Group W requirement for students in the engineering management option.**

[Return to Top](#)

Finance

(See [Business Administrations Course Listings](#))

The finance option focuses on those financial activities that affect business, government and non-profit organizations. Students will be introduced to financial planning and management as they pertain to organizations, to the function of both capital and money markets, and to fund raising in these markets.

Financial theory and practice have changed rapidly in the past 20 years and will probably continue to change at least as rapidly in the immediate future. Therefore, students will be introduced to the rapidly evolving theory of finance so that they will be able to evaluate the effectiveness of a firm's financing decisions and investments. Students also will become familiar with the analytical techniques that can be used to seek solutions to a wide range of financial problems.

In addition to the College's General Requirements and the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside of the School of Business Administration, a student studying finance must complete the following requirements:

One Upper-Division Economics course.....4

Required:

BA 481W Cases in Financial Management***.....4

BA 485 Investments and Portfolio Management.....4

Plus a minimum of seven (7) credits from the following, with no more than one course from the Economics area:

BA 382 Financial Institutions.....4

BA 386 Insurance.....4

BA 387 Real Estate.....	4
BA 389 International Finance.....	4
BA 390 Special Topics in Finance.....	4
BA 437 Internship in Business - Finance Related.....	3
Econ 369D Public Finance**	4
Econ 371D International Economics**	4
Econ 364W Macroeconomic Theory.....	4
 Total.....	15-16*

***The 15 credits used to satisfy an option in Finance may not be used to satisfy any other major, minor or option within the School of Business Administration.**

****May not be used to fulfill the 300- or 400-level Economics course requirement and the Finance option requirement simultaneously.**

*****Completion of this course fulfills the Group W requirement for students in the finance option.**

[Return to Top](#)

International Business

(See [Business Administrations Course Listings](#))

The international business option has been designed to prepare students to enter the exciting and rapidly growing world of international business. Increasingly businesses find that suppliers and customers may come from anywhere in the world. To better prepare students for a future career in business that will likely require some international proficiency, students in this option take courses to gain competency in at least one foreign language, a cultural and political understanding of the region of the world where that language is dominant, and those special business skills needed to operate effectively in the international environment.

The option is strongly interdisciplinary. In addition to the College's General Requirements not satisfied below and the Common Requirements of the School of Business Administration, a student studying international business must complete the following requirements:

General Studies (not satisfied below).....	20-22
Business Administration Requirements.....	39
Quantitative Reasoning Requirements.....	3-5
Auxiliary Requirements CSIS 322 Management Information Systems.....	4
Total.....	4

I.

a. Required:

BA 271D Principles of International Business.....	2
---	---

Plus two of the following:

BA 309W International Management***	3
BA 349W Global Marketing***	4
BA 389 International Finance.....	4

b. Two (2) additional courses from the following electives:

BA 315 International Business Law.....	3
BA 370 Topics in International Business.....	3

Group 2:

Area Emphasis:

Two (2) courses focused on one of the following areas: Africa, Asia, Europe or Latin American (selected from Group 1 above, not used to satisfy Group 1 requirements).

Total.....6-8

Alternative Study Program:

The requirement of the two (2) additional courses from I and II, Group 2 may be satisfied by successful completion of a semester of study abroad in an approved SOBA study abroad program (not including the Semester Abroad Program in England). The completion of an additional semester will meet the requirements of II, Group 1.

Group 3:

Modern Language:

Two years of one modern language or one year each of two modern languages if one of two languages is Japanese.

III. Total Free Electives.....16-18

TOTAL REQUIRED FOR GRADUATION**128

***The 15-16 credits used to satisfy an option in International Business may not be used to satisfy any other major, minor or option.**

****In addition to the above course requirements, a student studying International Business must complete an International Experience. This requirement can be met in several ways: (1) Participation in a Semester Abroad program such as those described under Special Academic Programs in this catalog (the Japan Program, programs**

in Mexico, and the Junior Trimester Abroad offered through the School of Business Administration). Other programs of this type are offered through other colleges and universities. (2) Participation in an international exchange program in any discipline; (3) Participation in any summer Innovative Month program which includes an international experience. (4) Residence abroad - minimum of three months; or (5) Extensive individual travel abroad. Each method requires documentation, and need approval of the dean on a case by case basis.

*****Completion of either BA 309W or BA 349W fulfills the Group W requirement for students in the international business option.**

[Return to Top](#)

Management

(See [Business Administrations Course Listings](#))

The management option prepares students for responsible supervisory and management positions in all types of organizations: business, government and non-profit. Students become familiar with the opportunities and processes of management as they develop skills in planning, organizing, leading and controlling.

Students in management are introduced to the process of acquiring and using financial, human and physical resources in the pursuit of organizational objectives. Interpersonal relations, leadership and decision-making are emphasized.

In addition to the College's General Requirements, the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside of the School of Business Administration, a student studying management must complete the following requirements:

One 300- or 400-level Economics course***.....4

A minimum of 15 credits from the following courses:*

BA 271 Fundamentals of International Business.....2

BA 302W Human Resource Management****.....4

BA 308 Office Management.....	3
BA 309 International Management.....	3
BA 313C Ethical Issues in Business.....	3
BA 330 Tourism and Resort Management.....	4
BA 357 Studies in Operations Management.....	4
BA 360 Introduction to Management Science.....	3
BA 370 Topics in International Business.....	3

BA 407W Management Consulting***	4
BA 415 Management in Action.....	3
BA 437 Internship in Business - Management.....	3
BA 439 Marketing and Management of Services.....	4
 Total.....	 15*

***The 15 credits used to satisfy an option in Management may not be used to satisfy any other major, minor or option within the School of Business Administration.**

****May not be used to fulfill the 300- or 400-level Economics course requirement and the management option requirement simultaneously.**

*****Completion of Econ 472W, BA 302W, BA 401W or BA 407W fulfills the Group W requirement for students in the management option.**

******Conceived by Psychology Professor Marilyn Leftwich and developed in cooperation with Mark Goldfarb with the Counseling Center and Associate Director of Assessment Laura Godfrey, the class is designed to help new students successfully make the transition from high school to college life**

[Return to Top](#)

Marketing

(See [Business Administrations Course Listings](#))

The marketing option emphasizes the performance of business activities

designed to plan, price, promote, and distribute goods and services to satisfy consumer needs and wants. The study of marketing recognizes the large proportion of the consumer dollar allocated to marketing, thus creating vast opportunities for graduates in this field.

Careers in marketing may be pursued in industry, government, and non-profit organizations, in such areas as retailing, purchasing, marketing research, sales, advertising, sales promotion, product management, public relations, physical distribution and consumer affairs.

In addition to the College's General Requirements, the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside of the School of Business Administration, a student studying marketing must complete the following requirements:*

One 300- or 400-level Economics course.....4

Required:

BA 445W Marketing Strategy and Policy**.....4

BA 446 Marketing Research.....4

A minimum of 7 credits from the following courses:

BA 240 Business Creativity and Innovation.....2

BA 339 Selling.....4

BA 342 Retailing.....3

BA 344 Advertising.....3

BA 346 Managing Customer Value.....4

BA 347 Consumer Behavior.....3

BA 348 Public Relations.....3

BA 349 Global Marketing.....4

BA 390 Special Topics in Marketing 1-4

BA 437 Internship in Business - Marketing.....3

BA 439 Marketing and Management of Services.....4

Total.....15*

***The 15 credits used to satisfy an option in Marketing may not be used to satisfy any other major, minor or option within the School of Business Administration.**

****Completion of this course fulfills the Group W requirement for students in the marketing option.**

[Return to Top](#)

Tourism and Resort Management

(See [Business Administrations Course Listings](#))

Recent decades have witnessed the phenomenal growth of service industries. The service sector of the economy now accounts for most of the job opportunities. In this region of the country the leading service industry is the tourism industry, a major portion of this industry is located in growing year-round resorts. This industry will continue to grow and serve national and international markets. As it does, it will need future leaders and managers with better education and broader perspectives. The tourism and resort option addresses this need.

This option provides a general understanding of the management challenges and organizational practices of a complex and diverse industry. The use of analytical tools and techniques for decision making, the development of the capacity for critical thought and leadership, and the ability to work with others will be significantly improved by interaction with regional companies through field projects in most courses and a required work experience.

In addition to the College's General Requirements and the Common Requirements of the School of Business Administration, and Auxiliary Requirements outside the School of Business Administration, a student studying tourism and resort management must complete the following requirements:

One 300- or 400-level Economics course.....4

Required:

BA 330 Tourism and Resort Management.....4

BA 437 Internship in Business.....3

(With approved industry work experience, an additional BA elective from the list below may be substituted for BA 437.)

BA 439 Marketing and Management of Services.....4

Plus one additional course from the following:

BA 302W Human Resource Management**	4
BA 357 Studies in Operations Management	4
BA 407W Management Consulting**	4
BA 446 Marketing Research	4
 Total	 15*

***These 15 credits used to satisfy an option in Tourism and Resort Management may not be used to satisfy any other major, minor or option within the School of Business Administration.**

****Completion of either BA 302W or BA 407W fulfills the Group W requirement for students in the tourism and resort management option.**

STUDENT SERVICES**Housing****Counseling and Student Development Services****Services for Students with Disabilities****Program for Academic Advancement****Career Services Office****Health Services****Student Health Insurance****College Union Building****Alumni Association****STUDENT LIFE****Union and Activities Office****Prevention Program****Associated Students of Fort Lewis College****Outdoor Pursuits****Student Media****Environmental Center****Athletics and Recreation****Motor Vehicles****Identification Cards****Guns and Weapons Policy****Student Conduct Codes and Disciplinary Action****STUDENT SERVICES**

Fort Lewis College provides the best possible social and physical environment to foster the academic, cultural and personal development of each student. The Office of the Vice President of Student Affairs is responsible for the coordination of various student-services programs.

Student Housing and Conference Services

About one-third of the College's student population lives on-campus in one of seven residence halls, the Centennial and Anasazi Apartments, and North Complex, all of which provide a pleasant physical environment for student life.

An important goal of the campus Residence Life System is to provide environments which support the values inherent in academic achievement, as well as gender, ethnic and cultural diversity. In addition, Residence Life provides opportunities for social and recreational needs, coupled with opportunities to learn developmental skills to promote good citizenship.

In keeping with these goals and tenants of student development theory, the College requires first-time freshmen, men and women, to live in campus residence halls as space is available for two academic trimesters. Housing assignments are made on a first-come, first-serve basis. Freshmen who are married/divorced, 21 years of age or older, veterans, or students who will live with parents or relatives in the Four Corners area may petition the Student Housing Office for exemption to the residency requirement.

New applicants for campus housing are assigned to a residence hall or apartment according to date of application (with required deposit). Students who cannot be accommodated on-campus can be assisted in finding off-campus housing through the Off-Campus Housing Office.

Students who wish to continue living on-campus the next academic year must reapply for housing. Spaces will be assigned on a first-come, first-served basis. Students may request roommates and room location from those available. Detailed information regarding this procedure is available in the Student Housing and Conference Services Office.

To Apply for Housing

When students receive their Permit to Register or acceptance by the College, they should then apply for campus housing. A \$100 deposit is required with the appropriate application. The Housing Agreement covers both the fall and winter trimesters of an academic year (8 months).

Fort Lewis College has a traditional approach to residence-hall living. Resident students receive keys that permit them entrance to their halls and rooms. Residents are expected to live by the rules and regulations as

outlined in the Housing Agreement, the Guide to Residence Living and the FLC Student Conduct Code.

The residence hall/apartments are staffed by Residence Directors, Assistant Residence Directors and Resident Assistants (RAs), who are there to promote a pleasant living environment conducive to study. They are an added resource for students as they adjust to the collegiate community. The Student Services staff also provides social and educational activities on and off campus to foster personal growth and development.

All campus living is a learning experience, and the Fort Lewis College Residence Hall program is predicated on this principle. Our mission is carried out in an educationally responsible manner and is dedicated to providing healthy and relaxed places for all resident students. Fort Lewis College does not believe that such principles are best served through completely non-directive, open residence facilities.

Off-Campus Housing

Off-campus housing information is available through the FLC Information Desk. This service maintains a bulletin board in the CUB Lobby with up-to-date listings of rooms, houses, apartments and mobile homes available for rent.

[Return to Top](#)

Counseling and Student Development

Counseling services at Fort Lewis College are based on the philosophy that personal/emotional development is an integral part of a student's intellectual development. The Counseling Center has a professional staff of counselors committed to implementing this philosophy. The primary goals of the Counseling Center are to provide:

An academic support system to help students overcome obstacles in their academic programs.

A counseling service to help students cope with crises or other immediate needs in their lives.

An educational service to promote positive personal development.

And finally, a support and information/referral service.

Personal counseling is confidential and is offered through individual and small group counseling. It is intended to be supportive to assist students in solving their problems of a short-term nature. Services are free to students on a short-term basis. There is a charge for therapy after a set number of sessions and for testing services. Substance abuse evaluation and educational services are available through the counseling center on a fee basis. If additional services are needed, students can be referred to the Health Center, appropriate mental health agencies or practicing professionals in the community.

[Return to Top](#)

Services for Students With Disabilities

Fort Lewis College provides access, accommodation and advocacy for students with disabilities. Reasonable accommodations are made on an individual basis for students with documented disabilities. It is the responsibility of the student to contact this office and to submit current documentation to verify the disability. Outlines of Fort Lewis College eligibility requirements that are necessary to document various disabilities and a copy of the Policy and Procedures for this service are available through this office.

Please contact Services for Students with Disabilities to find out more about the service. All documentation is housed in this office and kept confidential.

Students desiring accommodations are advised to contact Services for Students with Disabilities as early as possible, after being admitted, so that services may be arranged in a timely matter.

Services Offered

Some of the services offered include letters of accommodation, liaison with faculty and staff, academic counseling, access to taped texts and notetakers, access to assistive technology, readers, extended time on tests, and priority snowplowing.

Policies and procedures regarding the arrangement of appropriate accommodations for a disability are available by contacting this office.

A campus accessibility map showing locations of ramps, restrooms, elevators and handicapped parking spaces is also available.

For additional information contact: Services for Students with

Disabilities Email: sugnet_c@fortlewis.edu

[Return to Top](#)

Program for Academic Advancement

The federally funded Program for Academic Advancement (a TRIO program) provides eligible students with the help and guidance they need to succeed at Fort Lewis College. See Page 51 for more information.

[Return to Top](#)

Career Services

The Career Services Office at Fort Lewis College offers many services and programs to students. Students are encouraged to begin using the services during their freshman year. The services range from career counseling such as selecting a major, developing self-awareness: values, interests and skills, to job search skills such as résumé development, interview techniques, letters in the job search, and how to conduct an effective job search.

In addition, vocational assessment inventories are available to help the students gain knowledge of career patterns. There is a computer program called FOCUS, which allows students to work at their own pace while exploring career issues.

Information about graduate schools can be obtained through graduate directories. Brochures for registering to take graduate school exams are available to students in the Career Resource Center.

The Career Resource Center is open to all students to use during regular hours. Vacancies throughout the country and world, salary information, career guidance, employer and occupational information is readily available in the Resource Center.

Students seeking part-time internships, volunteer experiences, professional positions or local positions can receive help in the Career Services Office. Many employers contact the office to announce openings.

Students obtain services by scheduling an appointment with a trained career counselor, by attending workshops, or by exploring resources on

their own. Many self-help materials are available.

[Return to Top](#)

Health Services

The goal of the Student Health Center, an outpatient medical center, is to provide comprehensive health care to students, health promotion and education, and confidentiality for all clients. The Health Center is staffed by a physician's assistant, who also serves as director, nurses and part-time practice physicians.

The Student Health Center provides:

Complete general medical , minor surgical, nursing, first aid, and emergency care for most illnesses and injuries.

Annual female GYN exam and Pap.

Intercollegiate sports physicals.

Assistance in securing appointments with physicians, dentists and other practitioners.

Routine physicals for jobs or other schools

Minor surgical procedures, i.e. wart/mole removal, stitches, etc.

Colposcopy

Ear irrigation

IV therapy for dehydration

Complete laboratory services: blood tests, strep tests, chlamydia, yeast, Pap smears, HIV, mono test, pregnancy tests, urinalysis, tuberculin tests.

Birth Control Services: birth control: pills, condoms, Depo-Provera injections, diaphragm fitting, emergency contraception and spermicide.

Immunizations: MMR as required by FLC for registration, Tetanus, Hepatitis B, Hepatitis A, Typhoid, Polio, Meningitis and Flu vaccine.

Counseling and medication management of psychological conditions.

Allergy antigen administration-patient supplies own antigen as prescribed by a personal doctor.

Travel education and immunizations.

Health promotion education and natural herbal and vitamin medications.

Smoking cessation education and support.

Assistance with student health insurance claims.

State of Colorado law and Fort Lewis College require that all students born after Jan. 1, 1957, provide proof of ***TWO Measles, Mumps, and Rubella (MMR)*** immunizations after their first birthday. This immunization can be received at the Health Center for a small fee.

[Return to Top](#)

Student Health Insurance

Student Health Insurance is available through an independent carrier, at group rates. Insurance may be purchased at the beginning of each trimester. Students are encouraged to carry some medical/accident insurance, either through the Fort Lewis insurance program or a private program. The Health Center staff will assist with insurance claims.

[Return to Top](#)

College Union Building (CUB)

The College Union Building (CUB) located on the southeast corner of the campus, is the central meeting area for students, offering lounges, meeting rooms, food services and student services offices. The CUB is more than just a place, it is the central location for co-curricular learning, socializing and just relaxing. Union and Activities, ASFLC (student government), Prevention Program, KDUR-FM radio, Independent newspaper, Outdoor Pursuits, Post Office, Bookstore, Environmental Center, Campus Dining Services, Facilities Scheduling and SPOT all have offices in the CUB.

FLC Information Desk

The FLC Information Desk is the headquarters for the campus lost and found, general information, campus maps, SPOT ticket sales, "Lift" bus stickers, course schedules, printing of academic schedules, club and organization forms, and more.

Bookstore

Besides stocking required course textbooks, the bookstore offers a wide selection of leisure reading books, magazines, school supplies, art materials, clothing, gift items and snack foods. Macintosh/Apple computer hardware and software is also for sale. The store is open from 7:30 a.m. to 4:30 p.m., Monday through Friday, with special extended hours during the first week of the fall and winter trimesters.

Postal Service

Fort Lewis College operates a full-service U.S. Post Office in the College Union Building. Students living on campus receive their mail and UPS parcels at the Post Office via assigned mailboxes. FAX service is available to students for a minimal fee. Students living off-campus may rent a mailbox for a small annual fee.

[Return to Top](#)

Alumni Association

The Alumni Association of Fort Lewis College is becoming increasingly more active both as a service organization and as a means of helping former students enjoy memories of their college days. The Association supports the College in many areas, such as providing scholarships, funding special programs, and assisting with graduate placement.

Regularly published newsletters contain information about former classmates, activities and projects that help the College. Among these are sponsorship of admission activities, social-functions and athletic events; placement assistance; and financial support.

STUDENT LIFE

Union and Activities Office

The Union and Activities Office provides assistance to the ASFLC

(student government), SPOT (student program board), KDUR, Outdoor Pursuits, Environmental Center, Prevention Program and all other student clubs and organizations regarding the development of co-curricular programs. One goal of the office is to empower and assist students as they actively create the character of Fort Lewis College. By helping students coordinate lectures, concerts, films, special events, fundraisers, theme weeks, and much more, the Union and Activities Office strives to maintain close contact with students and to help them achieve their goals. The office is also involved with several campuswide events, such as Student Orientation, Parents Weekend, Homecoming and Commencement Ceremonies.

[Return to Top](#)

Prevention Program

The goal of the Prevention Program is to provide students with healthy lifestyle options. Students interested in being a peer educator, volunteering in the community, or organizing programs such as dances, coffeehouses, educational workshops and social issues awareness weeks, should get involved with the Prevention Program. The coordinator is located in the Programming Office, 19 CUB.

[Return to Top](#)

Associated Students of Fort Lewis College (ASFLC)

The ASFLC was established to assure Fort Lewis students a representative system to help meet their social, political and economic needs. By representing FLC students, the ASFLC president, vice president and Senate assist with issues of administrative, academic, legislative, cultural and social nature. The ASFLC Senate also advocates the autonomy of student organizations, promotes education through constructive dialogue and allocates student fees in the most responsible and effective manner possible. The ASFLC Senate allocates the student activity fee money to support the following programs and activities: Outdoor Pursuits, SPOT, Environmental Center, Independent, KDUR, Wanbli Ota, Intramurals, Images, clubs and organizations, Legal Aid, Fourth Wall Productions, and more!

The ASFLC president, vice president and 15 senators are elected by the student body. The senate is divided into the following committees: Budget, Constitution, Elections, Legislative Affairs, Line Item Audit and Student Services. Numerous student-at-large appointments are made by the ASFLC to various campus committees. All Senate

meetings are open to FLC students, and students are encouraged to attend or stop by the ASFLC offices in the CUB.

SPOT (Student Program Board)

SPOT (student program board) is a group of students who determine what films, lectures, concerts, comedians and special events are brought to campus. SPOT is made up of students who positively contribute to the campus climate by bringing diverse quality programming to FLC.

[Return to Top](#)

Outdoor Pursuits

The Outdoor Pursuits program offers a wide range of outdoor recreation and skill building activities for students. Two professional staff members guide trips such as rock climbing, kayaking, cross country skiing, backpacking, avalanche safety training and mountain biking. Unlimited use of equipment is available by reservation for a yearly \$10 fee. The staff can also assist you with plans for your own adventure by providing maps, expert advice and reading material. The primary goal of the Outdoor Pursuits program is to provide students with an opportunity to experience the wonders of the Four Corners region.

[Return to Top](#)

Campus Radio Station

KDUR-FM is the FLC campus radio station operated by a professional station manager, Board of Directors and a host of student and Durango community volunteers. Students can earn academic credit for most positions held at the station or they can simply volunteer their time to be a director - news, traffic, music, underwriting, promotion, production - or a disk jockey. The station reflects the diversity of the campus and Durango community through the alternative and progressive programs, news and music it broadcasts. KDUR is an affiliate of Public Radio International and Pacifica Radio. Tune in to 91.9 FM in Durango or 93.9 FM in surrounding areas for a truly eclectic listening experience.

Student Newspaper

The Independent is the student-managed newspaper published every Friday during the fall and winter trimesters. Students can earn credit and valuable job experience by working on the "Indy" staff as writers, photographers, editors, artists, advertising salespersons and production workers. The Independent covers campus, local and national news,

sports, entertainment and other special events which effect students and the campus community. If you thrive on deadlines, beats and late-breaking news, the "Indy" is the place for you.

[Return to Top](#)

Environmental Center

The Environmental Center (EC) at Fort Lewis College is a resource for social and ecological awareness, dialogue and activism in the college community and surrounding region. Student staff, volunteers and interns operate the center under the direction of a full-time Coordinator. A student majority Board of Directors, including faculty, staff and a community representative, governs the center. EC projects include coordinating sponsoring events like Earth Week, publishing a newsletter, maintaining a resource library, coordinating campus recycling education, and supporting student projects on all kinds of environmental issues. The EC networks with other environmnetal organizations, faculty and community groups to provide research opportunities as well as hands-on learning experiences on and off campus.

[Return to Top](#)

Athletics and Recreation

Fort Lewis College has a comprehensive intercollegiate athletic program. The College fields women's teams in basketball, cross country, soccer, softball and volleyball. Men's teams include basketball, cross country, football, golf and soccer. The Skyhawks compete against four-year colleges and universities from Colorado and the western region. Fort Lewis is a member of the National Collegiate Athletics Association (Division II) and the Rocky Mountain Athletic Conference.

Club sports that compete intercollegiately include skiing, lacrosse and cycling.

Campus Athletic Facilities

Facilities include tennis courts, softball fields, gymnasium, football stadium, track, weight room, volleyball courts, swimming pool, and a 900-square-foot climbing wall. Located adjacent to campus are a municipal golf course and a ski hill.

The athletics facilities are also available to students during the evenings

and on weekends for informal recreation activities such as swimming, basketball, weight training and volleyball.

An excellent intramural and recreation program is also offered. There are opportunities for competition in basketball, volleyball, softball, wrestling, soccer, tennis, swimming and many other selected activities.

[Return to Top](#)

Motor Vehicles

Students are permitted to have their cars on campus; however, freshmen often find that the ready availability of a car is a contributing factor to a poor academic record.

Students and all Fort Lewis College personnel must register their vehicles and pay the scheduled parking fees during the official registration period. Campus traffic and parking regulations are distributed at the time of registration.

The registration fee contributes to the construction and maintenance of parking areas, since it is the policy of the State of Colorado not to build parking lots with state funds. All parking sticker permits are prorated monthly. Special decals may be issued to students or college personnel who have disabling handicaps.

[Return to Top](#)

Identification Cards

An FLC identification card is required of all students. This card is necessary for access to the library and dining facilities and is important in helping a student establish identification for all financial transactions and for admission to many campus events and facilities. It should be carried at all times and presented when requested by college officials. The ID office is located in Miller Student Center, Room 104.

[Return to Top](#)

Guns and Weapons

Weapons of any kind (functional or not), ammunition, explosive substances or chemicals, or any other incendiary devices are expressly prohibited at all times on the Fort Lewis College campus. Items specifically prohibited include, but are not limited to, the following:

explosive or incendiary devices, sheath knives, stilettos, switch-blades, dirks, daggers, or pocket knives with blades over three and one-half inches in length, and firearms of any description, BB or pellet guns, bows and arrows, crossbows, any device capable of propelling a projectile, and any other item or object deemed potentially harmful by the Fort Lewis College Public Safety Department. When in doubt, contact the FLC Public Safety Department.

[Return to Top](#)

Student Conduct Code and Disciplinary Action

Students at Fort Lewis College must accept their responsibilities for the maintenance of the educational environment. Students are expected at all times to exhibit standards of personal conduct which demonstrate maturity, good judgment, and respect for persons, property, rights of others, and self-discipline. Behavior that threatens the safety or violates the basic mission of the College community will not be tolerated.

The Student Conduct Code supports the educational mission and is published annually in the Fort Lewis College Student Handbook. It is the responsibility of every student to be familiar with and abide by the Student Conduct Code.

Violations of the Student Conduct Code will result in disciplinary action. Possible consequence of disciplinary action may include probation, suspension or dismissal from Fort Lewis College.

FORT LEWIS COLLEGE DEGREE CHECKLIST
RECORDS OFFICE
970-247-7350

NAME _____ ID# _____ CATALOG YEAR _____

MAJOR 1 _____ OPTION _____ CONCENTRATION(S) _____

MAJOR 2 _____ OPTION _____ CONCENTRATION(S) _____

THIS DEGREE CHECKLIST INCLUDES COURSES COMPLETED THROUGH THE _____ TERM.

CURRENT DATE _____ CHECKLIST COMPLETED BY _____

This check list is made up of four parts: total hours earned, General Studies Requirements, major requirements and auxiliary requirements. **All four parts must be met to complete degree requirements.** Also included is a part for minor requirements if you declare a minor. If you declare a minor, all minor requirements must be met at the same time as degree requirements.

 Courses and requirements marked with double asterisks (**) show what courses and requirements you have left to complete.

PLEASE NOTE: THIS IS A CHECKLIST ONLY. THE LISTING AND EXPLANATION OF REQUIREMENTS FOR ANY AND ALL DEGREE PROGRAMS ARE IN THE FORT LEWIS COLLEGE CATALOG.

PART 1 – TOTAL HOURS EARNED

A minimum of 128 credit hours are required for the Bachelor of Arts or the Bachelor of Science degree. Within that 128 semester credits hours a minimum of 50 semester credit hours must be upper division credits. The minimum cumulative grade point average must be 2.00. The minimum grade point average in major courses is a 2.00.

_____ is the number of semester credit hours you have earned.

_____ is the number of upper division semester credit hours you have earned.

_____ is your cumulative grade point average.

_____ is your major courses grade point average.

**_____ is the number of semester credit hours you need to meet the minimum of 128 semester credit hours.

**_____ is the number of upper division credit hours you need to meet the minimum of 50 semester credit hours upper division credits.

**_____ This is checked if you must raise your cumulative grade point average to 2.00.

**_____ This is checked if you must raise your major grade point average to 2.00.

PART II – GENERAL STUDIES REQUIREMENTS

Courses used to meet Group A, B, C, D and E requirements must be at least 2 semester credits.

Courses used to meet Group A, B, C, D and E requirements will have the designation A1, A2, B, C, D or E. Any one course may only meet one General Studies requirement.

[Accounting](#) | [Agriculture](#) | [Anthropology](#) | [Art](#) | [Biology](#) | [Business Administration](#) | [Chemistry](#) | [Communications](#) | [Composition \(Writing Program\)](#) | [Computer Science Information Systems \(CSIS\)](#) | [Cooperative Education](#)

Accounting

Acc 225 INTRODUCTION TO FINANCIAL ACCOUNTING (4-0) 4

Concepts related to the preparation of financial statements and reports for parties external to the firm, such as stockholders, creditors and labor unions will be introduced. Understanding the information presented in the financial statements, the balance sheet, the income statement, and the statements of changes in financial position will be the major emphasis of the course. Fall, winter and summer terms.

Acc 226 INTRODUCTION TO MANAGERIAL ACCOUNTING (4-0) 4

Concepts related to the preparation of reports useful to management in planning and controlling the operations of a business will be introduced. The primary emphasis in this course will be on using accounting information for management planning, control and decision making. Topics include: behavior of costs, budgeting and planning, cost-volume-profit analyses and analysis of financial statements. Fall, winter and summer terms.

Prerequisite: Acc 225, Comp 150 or concurrent enrollment.

Acc 232 PREPARATION OF YOUR INCOME TAX RETURN (3-0) 3

A non-technical approach to the fundamental concepts and mechanics of preparation of federal income tax returns. All classes of individual returns and commonly encountered business forms are covered. Offered on demand.

Acc 319 MANAGERIAL ACCOUNTING (3-0) 3

The application of accounting information for the principal purpose of making managerial decisions is stressed. Topics include: the analysis and interpretation of financial statements; budgeting for planning and control; cost behavior (cost-volume-profit relationships); relevant cost analysis for making long- and short-range capital expenditure decisions; and the impact of income taxes on management planning. This course is not available to students who have over 14 semester credits in accounting. Offered on demand.

Prerequisites: Junior standing and Acc 226.

Acc 323 INTERMEDIATE ACCOUNTING I (4-0) 4

The fundamental process of accounting is analyzed. The proper treatment of business transactions in the recording and analyzing phases is reviewed. Financial accounting theory and problems are studied along with financial statement presentation. Fall and summer terms.

Prerequisites: Junior standing and Acc 226.

Acc 324 INTERMEDIATE ACCOUNTING II (4-0) 4

Continuation of financial accounting theory and problems. In addition, partnership accounting and an introduction to business combinations are covered. Winter and summer terms.

Prerequisite: Acc 323.

Acc 327 COST/MANAGERIAL ACCOUNTING (4-0) 4

Emphasis on standard costs, analyses for decision making and other special cost and analysis problems. Fall and summer terms.

Prerequisites: Junior standing and Acc 226.

Acc 430W INCOME TAX ACCOUNTING (4-0) 4

A brief history of the income tax, income tax accounting and a study of current federal income tax provisions are presented. Winter term.

Prerequisite: BA 221 and Acc 323 or consent of instructor.

Acc 431 ADVANCED INCOME TAX ACCOUNTING (3-0) 3

An introduction to tax research and planning, federal income tax treatment of taxpayers other than individuals (corporations, subchapter S corporations, partnerships, trusts and estates), the treatment of property transfers subject to federal and state gift and death taxes. The student will learn and use methodology of tax research. Offered on demand.

Prerequisite: Acc 330.

Acc 432 TAX PLANNING AND RESEARCH (3-0) 3

This course covers tax research and planning. Students learn to analyze tax problems and communicate a solution in written and oral format. Computer-based research techniques are used. Fall term.

Prerequisite: Acc 330.

Acc 434 ADVANCED ACCOUNTING (4-0) 4

This course has two major components. The first component covers auditing topics including transaction cycles, internal control, statistical procedures, and auditing of electronic data systems. The second component develops basic principles relating to business combinations, consolidated statements, partnerships and international accounting.

Prerequisite: Acc 324.

Acc 435 SURVEY OF ACCOUNTING THEORY TRENDS (4-0) 4

The origin and development of accounting; a review of the ideas of leading accounting theoreticians; an examination of current accounting theory; a look at accounting theory as it relates to the CPA examination. Offered on demand.

Prerequisite: Acc 324.

Acc 436 AUDITING - THEORY AND PRACTICE (4-0) 4

Functions of the independent public accountant are stressed. The course includes audit reports and options, account analysis, audit programs, working paper content and form, professional ethics, applications of accounting and auditing standards, SEC stock exchange regulations, investigations for purchase and financing, and current literature on auditing. Fall term.

Prerequisites: BA 221, Acc 323, and Acc 327 or consent of instructor.

Acc 470 GOVERNMENTAL/NOT-FOR-PROFIT ACCOUNTING (4-0) 4

This course covers accounting standards and principles applicable to local and state governments and other not-for-profit entities. Fall term.

Prerequisites: Acc 323 or permission of instructor.

BA 499 INDEPENDENT STUDY

Individual research is conducted under the supervision of a faculty member. Fall and winter terms.

Prerequisite: Approval of the Dean of the School of Business Administration.

[Return to List](#)

Agriculture

Ag 101B INTRODUCTORY ANIMAL SCIENCE (3-3) 4

Basic introduction to the aspects of animal science, concentrating on products, reproduction, genetics, anatomy, basic production in cattle, sheep, swine and dairy. Fall term.

Ag 102B PRINCIPLES OF CROP PRODUCTION (3-3) 4

Basic principles of crop production, concentrating on growth, development, management, utilization and cultural practices dealing mainly with the crops of Colorado. Winter term.

Ag 150 FARM RECORDS AND ACCOUNTS (3-0) 3

This course is designed to give proficiency in keeping farm records for income tax and management purposes. Fall term.

Ag 180 SUSTAINABLE AGRICULTURE (3-0) 3

This course will provide students with an introduction to the general topic of sustainable agriculture. The major topics of discussion will include current issues in sustainable agriculture, sustaining soil fertility, environmentally friendly pest control, economics of sustainable agriculture, and case studies in sustainable agriculture.

Ag 202 INTEGRATED PEST MANAGEMENT/ WEED CONTROL (3-3) 4

Principles and practices of weed control and integrated pest management. The recognition of important weed and insect pests. Fall term.

Ag 203 INTRODUCTION TO MEDICINAL CROPS (3-0) 3

An introduction to the topic of medicinal crops. A study of selected medicinal crops with regard to their production, medical usage, and scientific basis for reported benefits.

Ag 204 FORAGE PRODUCTION AND MANAGEMENT (3-0) 3

Principles and practices of forage production and management in the United States. Fall term.

Prerequisite: Ag 102B or consent of instructor.

Ag 235 SOILS AND SOIL FERTILITY (3-3) 4

A basic course dealing with soil formation, physical and chemical properties, fertility, management and conservation. Winter term.

Prerequisite: Chem 150B.

Ag 240 PRINCIPLES OF ANIMAL NUTRITION (3-3) 4

Nutrient sources and requirements of livestock, including ration balancing and laboratory analysis of feedstuffs. Winter term.

Prerequisite: Ag 101B or consent of instructor.

Ag 300D AGRICULTURAL ISSUES IN SOCIETY (3-0) 3

The human population relies on agriculture to provide food and fiber for its very existence. As consumers we sometimes fail to recognize the inherent environmental, economic, and social problems created as a direct result of our demands for a safe and abundant supply of agricultural products. This course will explore some of the problem areas directly and indirectly associated with production, distribution, and consumption of agricultural commodities. Students will have the opportunity to examine and openly discuss numerous controversial agricultural issues of our time in an attempt to separate fact from fiction and reality from sensationalism. Winter term of even-numbered years.

Prerequisite: Comp 150 and LIB 150.

Ag 301 RANGE MANAGEMENT (3-3) 4

Application of range science principles in managing rangelands emphasizing range history, ecology, multiple-use, grazing systems, range improvements and identification, physiology and utilization of important range plants. Fall term.

Prerequisites: Bio 111B.

Ag 325 BEEF SCIENCE (3-0) 3

A comprehensive course in beef cattle production, including topics in breeding and selection, reproduction, nutrition, herd health and marketing. Commercial beef cattle production enterprises will be emphasized. Winter term.

Prerequisite: Ag 101B.

Ag 346 AGRICULTURAL MARKETING (3-0) 3

An introduction to agricultural grain and livestock marketing in the U.S. Basic marketing principles and practical marketing strategies will be discussed. Winter term.

Prerequisite: Recommended BA 340.

Ag 350 AGRICULTURAL LAW (3-0) 3

An overview of the U.S. judicial system and a study of various laws, regulations and case decisions which directly pertain to the agricultural production sector. Fall term.

Ag 370 INTERNSHIP IN AGRICULTURE 3

Directed work experience in agricultural production and agribusiness. Minimum requirements are that students maintain a detailed journal and complete a term paper. Requires at least 125 hours of directed experience.

Prerequisite: Agriculture or biology major and consent of supervising faculty member.

Ag 380W EVOLUTION AND PATTERNS OF BIOLOGICAL THOUGHT (4-0) 4

This course will address the critical issues of writing in the Biological and/or Agricultural Sciences using the topics of Evolution and Patterns of Biological Thought as a basis for writing, reading and discussion. Many aspects of evolution in a variety of subdisciplines of Biology and Agriculture will be covered. This course is the same as Bio 380W.

Prerequisites: Comp 150, LIB 150, junior standing, Bio 206, Bio 207, Chem 150B and Chem 151.

[Return to List](#)

Anthropology

Anth 151C INTRODUCTION TO ANTHROPOLOGY (4-0) 4

A comprehensive study of general anthropology covering the four major subfields (archaeology, biological anthropology, linguistic anthropology, and ethnology). This course is recommended as a beginning course for students who have had no previous background in anthropology. Fall and winter terms.

Anth 171C WORLD ARCHAEOLOGY (4-0) 4

This course serves as an introduction to the great multiplicity of cultures of the past. In reviewing world archaeology, students are introduced not only to the great range of archaeological techniques, but also to how Western perception of other peoples' pasts have colored our

interpretations. Offered on demand.

Anth 201C INTRODUCTION TO ARCHAEOLOGY (4-0) 4

This course is designed to introduce the beginning student to the basic techniques, concepts, and theories of archaeology and its relation to the wider field of anthropology. Fall and winter terms.

Anth 208C INTRODUCTION TO ETHNOSCIENCE (4-0) 4

Students in this course will be introduced to the field of ethnoscience, the study of how cultures construct and classify reality by identifying and labeling cultural criteria. After learning the development of the field of ethnoscience within anthropology, students will be introduced to the ways in which different cultures organize and categorize domains of knowledge such as those of plants, animals and kin. Fall term.

Anth 210C INTRODUCTION TO SOCIOCULTURAL ANTHROPOLOGY (4-0) 4

Sociocultural anthropology (also known as ethnology) deals with the relationship of culture to society and the individual. This course is designed for the beginning student and introduces the basic concepts, theories, and methods of this broad field. It also looks at the application of ethnological thought to the consideration of modern human realities and problems. Fall and winter terms.

Anth 213CE PEASANT SOCIETIES (4-0) 4

A study of agricultural societies throughout the world and the position of these societies within more complex systems. The instructor may select a specific area for in-depth study to complement a more general perspective on world peasantries. Winter term.

Anth 215CE MAGIC AND RELIGION (3-0) 3

This course provides an inquiry into the forms that spiritual and religious beliefs take cross-culturally and investigates the various practices and symbols through which these beliefs are expressed and enacted in public life. Offered during summer sessions.

Anth 217C CULTURAL IMAGES OF WOMEN AND MEN (4-0) 4

This course examines the images of gender and sexuality that permeate

primarily North American society and that contribute to the definition and delimitation of identity and autonomy. Special attention is given to examining social hierarchies that underlay and are modified by the discourse surrounding and representations of male and female behavior. Any and all cultural products will be our objects of inquiry and analysis, from film and advertising to autobiography and other self-portraits, but our goal is to arrive at a coherent understanding of the relationship of images to social power, equality, and inequality. Offered on demand.

Anth 220C COLORADO ARCHAEOLOGY (4-0) 4

This course covers the prehistoric and historic archaeology of Colorado. It examines the historical development of archaeology in the state, our current state of knowledge, and how Colorado archaeology has developed in relationship to the wider goals of archaeology. Offered on demand.

Anth 259 FIELD TRAINING IN ARCHAEOLOGY 4-8

Actual on-site training in the techniques of archaeological survey and excavation. Students spend full days, five days a week in the field for seven weeks. They receive intensive instruction in field survey, remote sensing, all aspects of excavation, recording, mapping, photography, artifact classification, field laboratory techniques, and site interpretation. A written description of the field school for each year will be furnished to prospective students. Summer term.

Anth 300 PROSEMINAR IN ANTHROPOLOGY (2-0) 2

This course provides the opportunity for majors, minors, and prospective majors to engage in a critical examination of the subfields of anthropology and the possible directions they might take in pursuing one or more of these subfields both during and subsequent to their undergraduate career. The course will prepare students to think seriously about anthropology as part of a liberal arts education, as a vocation, and as a rich context for the pursuit of research questions about the human condition.

Anth 301 BIOLOGICAL ANTHROPOLOGY (3-3) 4

A study of the biological development of humankind. Topics include population genetics, the human skeleton, and primate and hominid evolution. Fall and winter terms.

Prerequisite: Junior standing.

Anth 303W ANTHROPOLOGICAL DEBATES (4-0) 4

This course fulfills the anthropology major's Group W composition requirement. It is organized around a controversial theme and debate within the discipline. The student will enter into this debate by reading, writing, and speaking. Course debate themes will alternate and vary from semester to semester. Examples of course themes include the "race" concept, indigenous rights, ethics, repatriation, and writing culture, among others. Fall and winter terms.

Prerequisites: Comp 150.

Anth 306C PLAINS ARCHAEOLOGY (4-0) 4

This course examines the prehistoric and historic cultures of the Plains of North America. Particular emphasis is placed on how recent archaeological theory can contribute to a deeper understanding of past cultural dynamics. Winter term.

Anth 309C ARCHAEOLOGY OF BRITAIN (4-0) 4

A survey of the cultural history of the British Isles from the Paleolithic to the Medieval period as seen from the archaeological record. Alternates with Anth 308C and Anth 341C.

Anth 316 INTERNSHIP IN ANTHROPOLOGY 1-6

This course offers practical experience for upper-division students' work in discipline-related governmental and non-governmental agency projects. Interns will be involved in effective public service in order to promote student understanding of complex social, political, economic, scientific, and philosophical issues. Internship examples include, but are not limited to, work in archaeology, museum, public health, and social work contexts. Course credit is based on 1) satisfactory performance of 30 hours of work for each credit earned; 2) fulfillment of a learning contract with a faculty sponsor; and 3) the satisfactory completion of a final project, usually a paper.

Prerequisite: Consent of instructor.

Anth 330C ARCHAEOLOGY OF THE SOUTHWEST (4-0) 4

A comprehensive survey of the major archaeological traditions of the

prehistoric Southwestern United States, and the environmental and cultural influences that made them distinct. Fall term.

Prerequisite: Anth 201C or consent of instructor.

Anth 340C ANCIENT EGYPT (3-0) 3

Using archaeological data, this course examines the development of a major civilization and its relationship to both the earlier civilizations of Mesopotamia and the later developing civilizations of the Mediterranean. Summer and on demand.

Anth 341C PREHISTORY OF EUROPE (4-0) 4

A survey of early cultures of Europe from the earliest evidence of humans until the development of civilizations. Alternates with Anth 308C and Anth 309C.

Anth 348C NORTH AMERICAN ARCHAEOLOGY (4-0) 4

This course traces the development of the aboriginal cultures of North America. Emphasis is placed on evaluating the degree to which our understanding of the past is influenced by both the discipline of anthropology and by contemporary Western values. Fall term.

Prerequisite: Anth 201C or consent of instructor.

Anth 350CE ETHNOLOGY OF MESOAMERICA (4-0) 4

This course provides a comparative study of major cultural topics concerning contemporary ethnic groups of central Mexico and northern Central America. Geography, demography, ecology, and prehistory will be touched upon, while social, economic, and political systems will be studied in more depth. Alternate winter terms.

Anth 351CE ETHNOLOGY OF ANDEAN SOUTH AMERICA (4-0) 4

Indigenous peoples and peoples of mixed descent are studied in terms of their past and present cultural and political-economic experiences. Particular emphasis is given to understanding the ways that the North American and Andean worlds intersect, as well as to the ways that Andean studies reflect and influence trends in anthropological thought. Alternate years.

Anth 353CE ETHNOLOGY OF INDIA (4-0) 4

While we are overwhelmed by the cultural diversity of the Indian subcontinent, this course focuses on the unity of cultures in the area. Topics include the caste system, contemporary economic and political systems, and a brief look at geography, demography, ecology, and prehistory. Tribal peoples will be studied in addition to peasantries. Alternate fall terms.

Anth 355C ANTHROPOLOGY OF GENDER (4-0) 4

An in-depth, cross-disciplinary analysis of the nature and origins of gender concepts cross-culturally, particularly as they relate to explaining gender hierarchy. Topics to be covered include the contributions of feminist thought to social scientific theories, the cultural construction of gender categories, and the relationship of gender to power. Same as WS 355C. Credit will not be given for more than one of these courses. Alternate winter terms.

Prerequisite: Anth 210C, WS 101D, or consent of instructor.

Anth 356C ECOLOGICAL ANTHROPOLOGY (4-0) 4

The comparative study of human populations in ecosystems, stressing the relations between culture and the biophysical environment with the focus on cultural adaptations. Implications for antopological theory, sociocultural evolution, and contemporary problems will be investigated. Alternate winter terms.

Prerequisite: Anth 210C or junior standing.

Anth 357CE MEDICAL ANTHROPOLOGY (4-0) 4

The medical systems of indigenous peoples are analyzed cross-culturally from the perspectives of epidemiology, symbolism, history, and political economy. Topics will include the development of medical antopology, the medical traditions of Ayurvedic, humoral, shamanic, and biomedical practitioners, theories of cause and cure, and applied practice. This course is recommended for pre-health and social science majors.

Prerequisite: Anth 210C or junior standing.

Anth 360C LEGAL AND ETHICAL ISSUES IN ARCHAEOLOGY

(4-0) 4

This course examines in depth the current ethical issues confronting archaeologists and those whose past they interpret. The legal foundations of those issues are studied in detail to prepare students for an understanding of the tenants of cultural resource management and conservation archaeology, and the manner in which these fields relate to interpreting the pasts of Native peoples.

Prerequisite: Anth 201C or consent of the instructor.

Anth 361CE NORTH AMERICAN INDIANS (3-0) 3

Archaeological, ethnological and linguistic relationships of the aboriginal peoples of North America. Offered on demand.

Anth 371CE ETHNOLOGY OF AMAZONIAN SOUTH AMERICA (3-0) 3

The unique cultures of the Amazon region are studied in this ethnological survey, which is designed to complement Anth 351CE. The course opens with consideration of the ways that the region and peoples of the Amazon have played a large role in European acts of global expansion and fantasies of Utopia. The major focus of the course, however, is on the relationship of Amazonian peoples to their ecosystem and the ways they have struggled to achieve autonomy over their teatened territories and ways of life.

Anth 388CE ETHNOLOGY OF THE SOUTHWEST (4-0) 4

This course provides a comparative overview of selected American Indian cultures of the American Southwest in terms of their history, social organization, belief systems, oral traditions, political economy, and responses to change as they intersect with non-Indian people. Fall term.

Anth 395C HISTORY OF ANTHROPOLOGICAL THOUGHT (4-0) 4

A critical survey of the major schools of antopological thought from a historical perspective. This course serves as a prerequisite to Anth 496, but may be taken by anyone interested in the development of social scientific thought.

Prerequisites: Anth 201C and Anth 210C, or consent of instructor.

Anth 402 ADVANCED ARCHAEOLOGICAL LABORATORY TECHNIQUES (2-4) 4

This course covers laboratory techniques and analysis of prehistoric artifacts, with special emphasis on lithic, ceramic, and bone technologies, and on the preparation of technical reports. Fall term.

Prerequisite: Anth 259 or consent of instructor.

Anth 403 ADVANCED ARCHAEOLOGICAL FIELD TECHNIQUES 4-8

Advanced training in the techniques of archaeological survey and excavation. Students spend full days, five days a week in the field, for seven weeks. In addition to intensive instruction in all aspects of field survey and excavation, training includes research design preparation; hypothesis generation; field test propositions; and excavation sampling design. Students may serve as crew chiefs, and direct field laboratory sessions. A written description of the field school for each year will be furnished to prospective students. Summer term.

Prerequisite: Anth 259 or equivalent, or consent of instructor.

Anth 406C ETHNOBOTANY OF THE SOUTHWEST (3-3) 4

This class will offer students the opportunity to learn traditional plant knowledge from the various cultures of the Greater Southwest. Students will become familiar with plant knowledge unique to the cultures of this area as well as with the important and useful plants endemic to the region. Winter term.

Anth 430 ADVANCED STUDIES IN SOUTHWESTERN ARCHAEOLOGY (4-0) 4

Detailed study and research on current topics in the archaeology of the Southwestern United States, with special emphasis on the theoretical and empirical contributions of major archaeologists and archaeological projects. Individual research will focus on current topics in archaeology. Winter term.

Prerequisite: Anth 330C or consent of instructor.

Anth 450 ADVANCED RESEARCH IN LATIN AMERICAN ANTHROPOLOGY (2-0) 2

Students will work all term on a focused research project that requires previous knowledge and expertise in Latin American sociocultural systems. Common course readings and discussions will center around research methods appropriate to work in the broad region of Latin America, to ethical implications for such research, and to possible applications of research. Formulation of research for possible post-BA Fulbright grant requests will be emphasized, as well.

Prerequisites: Consent of instructor.

Anth 455 ADVANCED RESEARCH IN THE ANTHROPOLOGY OF GENDER (2-0) 2

Students will work all term on a focused research project that required familiarity with gender research in the social sciences. Common course readings and discussions will center around feminist research methods, and the ethical implications and applications of such research. Students who wish to rework their research into a proposal for post-BA fellowships (e.g., Fulbright) will be given guidance.

Prerequisites: Consent of instructor.

Anth 496 SENIOR CAPSTONE SEMINAR IN ANTHROPOLOGY (2-0) 2

Advanced reading, writing and seminar discussion centered on integrating the undergraduate anthropological career and on thinking about and working towards incorporating an anthropological focus in the student's life beyond college. As a capstone course, the Senior Seminar provides a rich opportunity to reflect upon and synthesize, through various written and oral projects, the many dimensions of the anthropological intellectual experience.

Prerequisites: Consent of instructor.

Anth 499 INDEPENDENT STUDY 1-3

Original individual research is conducted under the supervision of a faculty member. This course fulfills the requirement for research-based. Offered on demand.

Prerequisites: Anth 210C, Anth 201C and consent of department chair.

[Return to List](#)

Art

Art 101A2 DRAWING (1-6) 4

Introduces students to the fundamentals of drawing. Includes traditional representational and imaginative drawing problems, perspective, spatial illusion, and composition.

Art 109A2 BASIC DESIGN (1-6) 4

Introduces design principles and color theory. Two and three-dimensional design problems are explored.

Art 154A2 INDIAN ARTS/CRAFTS I (0-6) 3

A course which may include basketry, pottery, weaving, dying and other craft media. Whenever possible, the projects are started with the raw material. Fall and winter terms. This course is the same as SW 154A2.

Art 162A2 ART IN THE HUMANITIES (3-0) 3

Art in the Humanities examines art from diverse cultures and time periods, focusing on how human endeavors in the visual arts arise from and are related to broader historical and cultural contexts. **Note:** This course does not count toward the art degree.

Art 201 FIGURE DRAWING (0-6) 3

A studio experience designed to allow an in-depth study of the human figure in drawing. Live models will be used exclusively. May be repeated once for an additional 3 credits.

Prerequisites: Art 101A2 and 109A2 and consent of instructor.

Art 210 GRAPHIC DESIGN - DESKTOP (0-6) 3

An introduction to Graphic Design and desktop publishing with the computer, using software such as Quark for page layout and Adobe Photoshop and Adobe Illustrator for graphics. Emphasis will be placed

on creating print-ready documents.

Prerequisite: Art 109A2.

Art 213 BASIC SCULPTURE (0-6) 3

A course in three-dimensional and two-dimensional (bas-relief) sculpture. Consists of modeling, carving and shaping rigid and pliable material. Some work will use the human form.

Prerequisites: Open to non-art majors without prerequisite. Art 101A2 and 109A2 are prerequisites for art majors.

Art 224A2 BASIC PAINTING (0-6) 3

Instruction in various painting media. Students will concentrate on compositional and color problems while working from still life, landscape and figures. (Coursework in this area offered at the beginning and advanced levels.)

Prerequisites: Art 101A2 and 109A2.

Art 226 WATERCOLOR PAINTING (0-6) 3

This course deals with traditional and contemporary watercolor techniques as they relate to the area of Fine Arts. Subject matter will be landscape and still life. Instruction in the various types and uses of papers, tools, techniques, brushes and paints will be given. Winter term.

Prerequisites: Suggested - Art 101A2 and 109A2.

Art 227 BEGINNING MURAL PAINTING (0-6) 3

Mural design and execution will be experienced on an actual location in or near Durango. The processes and problems relating to scale and enlargement will be employed. All paint, brushes and supplies are furnished by the business or client contacted for the mural site. May be repeated once for an additional 3 credits. On demand.

Art 231A2 INTRODUCTION TO PRINTMAKING (0-6) 3

A studio experience exploring the materials and methods basic to making prints. Relief, etching, calligraphic and silk-screen techniques will be emphasized.

Prerequisites: Art 101A2 and 109A2.

Art 243A2 BASIC PHOTOGRAPHY (0-6) 3

A basic studio course supplemented with lectures presenting an overview of photography. A creative approach designed to introduce students to shooting and printing techniques with silver and non-silver media.

Prerequisites: Open to non-art majors without prerequisite. Art 101A2 and 109A2 are prerequisites for art majors.

Art 250A2 CERAMICS (0-6) 3

Individual projects and forming of pottery of varied styles. Emphasis will be placed on expressive forms. Practice in ceramic procedures and use of materials: towing, slab, molding, glazing and firing. Fall and winter terms.

Prerequisites: Open to non-art majors without prerequisite. Art 101A2 and 109A2 are prerequisites for art majors.

Art 262A2 ART HISTORY TO THE RENAISSANCE (4-0) 4

History and appreciation of painting, sculpture and architecture in a Western and non-western society. These forms will be studied through their relationships to each other and to the societies which produced them. Fall term.

Art 263A2 ART HISTORY FROM THE RENAISSANCE (4-0) 4

A continuation of Art 262A2. Winter term.

Art 264A2 ART AND CULTURE (4-0) 4

Art and culture is a comparative art course linked to the Human Heritage courses via shared historical and multicultural perspectives and themes. It focuses on Chinese, Native American, and Western artistic traditions and how they arise from, shape, reveal, and transmit broader cultural values.

Prerequisite: Human Heritage I; or Prerequisite or corequisite Human Heritage II.

Art 265A2 ART HISTORY OF THE SOUTHWEST (3-0) 3

A comprehensive study of the art forms developed in the Southwest, starting with Mesoamerica and ending with contemporary Southwest artists. The course emphasizes the cultural impact upon design transitions as it traces contemporary designs to their roots. This course is the same as SW 265A2.

Art 273 ART FOR ELEMENTARY TEACHERS (2-2) 3

Contemporary concepts, practices, materials and methods used in the elementary school art program.

Art 301 ADVANCED FIGURE DRAWING (0-6) 3

A continuation of Art 201. May be repeated once for an additional 3 credits.

Prerequisites: 6 semester hours of Art 201. Consent of instructor required.

Art 312 ADVANCED DESIGN (0-6) 3

Problems and theory of design topics.

Prerequisite: Art 210 or consent of instructor.

Art 313 ADVANCED SCULPTURE I (0-6) 3

A continuation of Art 213. May be repeated once for an additional 3 credits.

Prerequisite: Art 213.

Art 314 ELECTRONIC IMAGING FOR ARTISTS AND PHOTOGRAPHERS (0-6) 3

Beginning and advanced techniques with Adobe Photoshop. Special effects projects will include photo retouching, scanning, special texturing effects, digital photo capture, and other electronic printing technologies. Course may be repeated once for an additional 3 credits.

Prerequisites: Art 101A2 and Art 109A2.

Art 315 GALLERY MANAGEMENT INTERNSHIP 2-4

This course/internship is designed to introduce students who have a strong interest in and commitment to art to the fundamentals of gallery management. Students will gain an understanding of gallery management through course activities which include assigned readings, seminars and practical hands-on experience. Students will study how social, political, historical, and institutional dimensions shape exhibitions and reflect or challenge societal perceptions. In addition, students will learn about the complexities of directing and managing the daily operation of an ambitious exhibition schedule. Student experiences will be varied to include facets of gallery organization from public relations, publicity, to mounting an exhibition with emphasis on design and installation.

Prerequisite: Consent of instructor.

Art 324 ADVANCED PAINTING I (0-6) 3

Students will continue to develop their technical knowledge and skills. They will concentrate on color and compositional problems while working with their choice of subject matter. The primary teaching concern will be directed toward the discovery and selection of meaningful individualized subject matter. May be repeated once for an additional 3 credits.

Prerequisite: Art 224.

Art 326 ADVANCED WATERCOLOR PAINTING (0-6) 3

Continuation of Art 226. Winter term. May be repeated once for an additional 3 credits.

Prerequisite: Art 226 or consent of instructor.

Art 327 ADVANCED MURAL PAINTING (0-6) 3

Continuation of Art 227. On demand.

Prerequisite: Art 227 or consent of instructor.

Art 331 ADVANCED PRINTMAKING I (0-6) 3

Advanced development of printmaking skills with opportunity to do specialized work in one or more areas. May be repeated once for an additional 3 credits.

Prerequisite: Art 231A2.

Art 343 PHOTOGRAPHIC DESIGN (0-6) 3

A creative approach to photography generated in basic design principles. A studio course allowing for individual specialization and refinement of basic skills. Experimentation in both black-and-white and color media will be introduced. May be repeated once for an additional 3 credits.

Prerequisite: Art 243A2.

Art 350 ADVANCED CERAMICS I (0-6) 3

A continuation of Art 250A2. Fall and winter terms. May be repeated once for an additional 3 credits.

Prerequisite: Art 250A2.

Art 363A2 MODERN PAINTING AND SCULPTURE - 1890 TO 1945 (4-0) 4

This course examines the modern art movements reflected in painting and sculpture by developing an understanding and appreciation of the stylistic, historic and cultural background of the modern period.

Art 364A2 MODERN PAINTING AND SCULPTURE - 1945 TO 1970 (4-0) 4

This course examines the modern art movements reflected in painting and sculpture by developing an understanding and appreciation of the stylistic, historic and cultural background of the modern period.

Prerequisite: Art 363A1.

Art 365A2E MESOAMERICAN ART HISTORY (3-0) 3

Mesoamerican Art History is an overview of the prehistoric civilizations of Mesoamerica. It examines in detail culture, art and architecture of the area, including Maya, Olmec, Mixtec, Zapotec, Haustec, Colima and

Aztec. Winter term.

Art 385W CONTEMPORARY ART PROCESS, THEORY, AND CRITICISM: READING, WRITING AND

MAKING (4-0) 4

This course will engage students in the contemporary dialogue about art. Reading, class discussion, and writing will focus on contemporary art process, theory, and criticism. Offered only in Fall.

Prerequisites: Junior standing, Art 101 and Art 109, 2 art history courses, Comp 150, LIB 150.

Art 401 INTERPRETIVE DRAWING (0-6) 3

A class of interpretive drawing, using skills acquired in previous drawing classes, based on a concept approach to drawing. All media and materials used. May be repeated once for an additional 3 credits.

Prerequisite: 6 hours of Art 201.

Art 413 ADVANCED SCULPTURE II (0-6) 3

Continuation of Art 313. May be repeated once for an additional 3 credits.

Prerequisite: Art 313.

Art 424 ADVANCED PAINTING II (0-6) 3

Continuation of Art 324. May be repeated once for an additional 3 credits.

Prerequisite: Art 324.

Art 425 ADVANCED PAINTING, PORTRAIT AND FIGURE (0-6) 3

Advanced studies in painting as related to the human portrait and figure. Traditional and contemporary philosophies will be explored. Models will be used. May be repeated once for an additional 3 credits.

Prerequisites: Art 224 and 201 or consent of instructor.

Art 431 ADVANCED PRINTMAKING II (0-6) 3

Continuation of Art 331. May be repeated once for an additional 3 credits.

Prerequisites: Art 231A2 and 331.

Art 443 ADVANCED PHOTOGRAPHIC DESIGN (0-6) 3

Continuation of Art 343. May be repeated once for an additional 3 credits.

Prerequisite: Art 343.

Art 450 ADVANCED CERAMICS II (0-6) 3

Continuation of Art 350. Fall and winter terms. May be repeated once for an additional 3 credits.

Prerequisite: Art 350.

Art 473 ART METHODS FOR SECONDARY TEACHERS (3-0) 3

Introduces and expands on materials for teaching studio art, art history, criticism and aesthetics in the secondary schools. Includes experiences in developing sequential semester plans in a variety of courses that integrate studio, art history and other areas. Teaching techniques will be included. On demand.

Prerequisite: Consent of instructor or senior standing.

Art 496 SENIOR SEMINAR (3-0) 3

Advanced study and research in selected topics. Completion of senior portfolio and statement.

Prerequisite: Senior Standing.

Art 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

Prerequisite: Junior or senior standing and consent of instructor.

[Return to List](#)

Biology

Bio 100BL LABORATORY EXPERIENCES IN BIOLOGY (0-3) 1

This course is designed to accompany Bio 110B. Fall, winter and summer terms.

Bio 105B BIOLOGY AND CONTEMPORARY SOCIAL ISSUES (3-0) 3

The purpose of this Freshman General Education course is to help non-science majors understand how issues in the Biological Sciences will affect their lives. By exploring issues, this course will improve the student's understanding of Biology as a human endeavor, as a mechanistic way of understanding the natural world. Biological evolution, medical and environmental ethics, and quantitative thinking and analysis will be dominant themes.

Bio 110B SURVEY OF LIFE SCIENCES (3-0) 3

An introductory biology course providing the non-science major with a comprehensive view of modern biology, especially how it affects man. Concepts of scientific method will be covered in this course to give the non-major a feeling for processes that are carried out in biological research. This course is designed for non-science majors. Credit cannot be earned for both Bio 110B and 111B. Fall, winter and summer terms.

Bio 112B INTRODUCTORY BIOLOGY I (3-1) 4

This course consists of three hours of lecture and one hour of small group recitation per week. The lecture covers the nature of biological inquiry, basic ecology, Mendelian genetics, basic evolution theory, and a survey of the five kingdoms. The recitation covers reading and interpreting the biological literature, hypothesis testing, data analysis, and current social and ethical issues surrounding biology.

Bio 113B INTRODUCTORY BIOLOGY II (3-3) 4

This course covers basic biochemistry, energetics, cell biology, cellular reproduction, basic genetic mechanisms, and plant and animal

physiology. The laboratory will include experiments on water quality, basic cell fractionation, Mendelian and molecular genetics, enzymology, and osmosis/diffusion. This term will culminate in a guided, student-designed experiment.

Bio 120B ENVIRONMENTAL CONSERVATION (3-0) 3

A study of natural resources in a global context. Attention is given to public policies and programs which affect the long-range availability and use of these resources. Winter term.

Bio 121B HUMAN ANATOMY & PHYSIOLOGY (2-3) 3

An introduction to the structure and function of the human body. Fall and winter terms.

Bio 132B HUMAN SEXUALITY (3-0) 3

Biological aspects of human reproduction, supplemented by discussion of medical, societal, psychological and ethical issues. Credit not applicable to the biology major. Winter term.

Bio 206 GENERAL BOTANY (3-3) 4

This course has two parts. Part one addresses the structure, development and physiology of vascular plants. Part two presents a survey of the structure, reproduction, evolution and the relation to humans of the fungi, algae, bryophytes, ferns, gymnosperms and angiosperms. Fall and winter terms.

Prerequisites: Bio 113B.

Bio 207 GENERAL ZOOLOGY (3-3) 4

A survey of the field of zoology and its major subdivisions. It includes an overview of the evolutionary relationships of animal groups from protozoa to vertebrates. Fall and winter terms.

Prerequisites: Bio 113B.

Bio 220 FUNDAMENTALS OF ECOLOGY (3-3) 4

A study of the fundamental relationships among organisms and their environments. Lab will include an introduction to field methods,

sampling, analyses of data and problem solving in ecology. One all-day Saturday field trip is required. Fall and winter terms.

Prerequisites: Bio 206 or 207, Math 121B and Math 201B or Psych 241B.

Bio 300B PLANTS AND HUMAN AFFAIRS (3-3) 4

This course reviews the way humans have used plants for food, fiber, drugs, building products, etc., as well as how plants in turn have affected the human race. This course is designed for non-science majors. Credit not applicable to the biology major. Winter term, even-numbered years.

Prerequisite: Comp 150 and LIB 150.

Bio 301 VASCULAR PLANT MORPHOLOGY (3-3) 4

The course is a comparative evolutionary survey of the vegetative and reproductive morphology of living and fossil vascular plants.

Prerequisite: Bio 206.

Bio 302 SYSTEMATIC BOTANY (2-6) 4

A study of the identification, classification, and relationships of the vascular plants with emphasis on temperate flowering plant families. Major emphasis will be given to the origin of flowering plants and especially the nature of species as revealed by modern techniques. Laboratory work will focus on the use of keys and terminology, the identification of species and the recognition of family characteristics. Fall term.

Prerequisite: Bio 206.

Bio 303 HISTOLOGY (3-3) 4

Study of the microscopic anatomy of the vertebrate body. Fall term.

Prerequisite: Bio 207.

Bio 304 FIELD ZOOLOGY (4-3) 5

A study of vertebrate animals with emphasis on taxonomic and

ecological relationships. Laboratory work includes collection, identification and museum preparation. Summer term.

Prerequisite: Bio 207.

Bio 305 ENTOMOLOGY (2-6) 4

A study of insect anatomy, physiology, identification, ecology and behavior. Laboratories will emphasize field work and insect family identification.

Prerequisite: Bio 207.

Bio 310 POLLINATION BIOLOGY (3-3) 4

A study of the principles of pollination biology, including abiotic and biotic syndromes. Topics will cover primary and secondary attractants of plants, adaptations of pollinators, effect of pollination systems on plant population structure, competition among plant species for pollinators and pollination strategies of agricultural crops. Winter term of even-numbered years.

Prerequisite: Bio 206 or Bio 207.

Bio 321 GENERAL PHYSIOLOGY (3-3) 4

Emphasis is on comparative animal physiology, covering respiration, gas transport, energy metabolism, temperature regulation, osmotic regulation, movement, and hormonal and nervous integration. Fall and winter terms.

Prerequisites: Bio 206, 207, Chem 303, 304, and Math 201B.

Bio 322 RADIATION BIOLOGY (3-3) 4

An introduction to the theory of radioactivity and the application of isotopes in medicine, physiology and research. Animals and plants will be used to demonstrate tracer techniques and results will be evaluated by use of scaler-counters and liquid scintillation. Offered on demand.

Prerequisites: Bio 111B, 206, 207, 321 and consent of instructor.

Bio 324 MAMMALOGY (3-3) 4

The course will examine the zoology (i.e., characteristics, origin, evolution, zoogeography, systematics, ecology, behavior, physiology, and conservation) of mammals (Class Mammalia). These topics will be covered by emphasizing both classical (or historical studies) and recent (or contemporary) research. Laboratory work will involve both field identification of mammals from field trips and laboratory work concerning taxonomic and morphological studies.

Prerequisite: Bio 207.

Bio 331 MICROBIOLOGY (3-3) 4

A survey of the microbial world with emphasis on ecology, physiology and genetics of prokaryotes. Laboratory activities emphasize staining, culturing and identification techniques as well as experimental exercises with bacteria of medical, economic and agricultural importance. Fall and winter terms.

Prerequisites: Bio 111B, 206, 207 and Chem 150B, 151 and 303.

Bio 332 IMMUNOLOGY (3-3) 4

An introduction to the structures and biochemical activities of antibodies and the mechanisms of the immune response. The laboratory will emphasize analytical methods of measuring antibody-antigen reactions. Fall term of odd-numbered years.

Prerequisite: Bio 331.

Bio 334 ORNITHOLOGY (3-3) 4

This course will investigate the scientific study of birds (Class Aves). That is, it will examine the behavior, ecology, morphology, origin, evolution, zoogeography, systematics, physiology, and conservation of birds. These topics will be covered by emphasizing both classical (or historical studies) and recent (or contemporary) research. Laboratory work will involve both field identification of birds from field trips and laboratory work concerning taxonomic and morphological studies.

Prerequisite: Bio 207.

Bio 341 VERTEBRATE COMPARATIVE ANATOMY (2-6) 4

A comparative study of the morphology of representative vertebrates

with the objectives of understanding their evolutionary relationships and the functional basis of their variations on a common plan. Fall, even years.

Prerequisite: Bio 207.

Bio 342 EMBRYOLOGY & DEVELOPMENTAL BIOLOGY OF THE VERTEBRATES (2-6) 4

A detailed study of reproduction and development in representative vertebrates. The laboratory work explores the anatomy of development in depth, and the lecture correlates this development with and explains it on the basis of cellular and molecular events during ontogeny. Winter term.

Prerequisite: Bio 207.

Bio 350 MYCOLOGY (3-3) 4

A survey of the Kingdom Fungi covering classification, physiology, development, genetics and environmental relationships peculiar to the fungi. Fall term of odd-numbered years.

Prerequisites: Bio 206 and Chem 150B, 151.

Bio 360 BRYOPHYTES AND LICHENS (3-3) 4

A course treating the taxonomy, morphology, ecology, reproduction and evolution of the Bryophytes and Lichens. Winter term of odd-numbered years.

Prerequisite: Bio 206.

Bio 370 GENETICS LABORATORY (0-3) 1

An introduction to the organisms and methodology used in genetic research. This course is designed to accompany Bio 371 for those students requiring a genetics laboratory component.

Prerequisite: 20 hours of biology or consent of instructor.

Bio 371 GENERAL GENETICS (3-0) 2

A survey of basic transmission and quantitative genetics. First two-

thirds of fall and winter terms.

Prerequisite: 20 hours of biology or consent of instructor.

Bio 372 EVOLUTIONARY GENETICS (3-0) 1

A survey of the evidence for and principles and mechanisms of evolution. Last third of fall and winter terms.

Prerequisite: Bio 371.

Bio 373 MOLECULAR GENETICS (3-0) 1

A survey of modern molecular genetics, including the mechanics and regulation of transcription and translation. Last third of fall and winter terms.

Prerequisites: Chem 303, Bio 371.

Bio 380W ISSUES IN EVOLUTION AND BIOLOGICAL THOUGHT (4-0) 4

This course will address the critical issues of writing in the Biological and/or Agricultural Sciences using the topics of Evolution and Patterns of Biological Thought as a basis for writing, reading and discussion. Many aspects of evolution in a variety of subdisciplines of Biology and Agriculture will be covered. This course is the same as Ag 380W.

Prerequisites: Junior standing.

Bio 385 DESERT BIOLOGY (3-0) 3

This course covers all aspects of desert biology - ecology, physiology, organismic biology, etc. - of all deserts around the world, with a special emphasis on adaptations and natural history of organisms in North American deserts.

Prerequisites: Bio 206, Bio 207, Chem 150, Chem151.

Bio 400 PLANT PHYSIOLOGY (3-3) 4

A study of plant-water relations, nutrition, metabolism and adaptations to different environments. Offered on demand.

Prerequisites: Bio 206, Chem 303 and Math 201B. Previous or concurrent enrollment in Chem 304, 311 and Bio 220 (or For 218) recommended.

Bio 407 EVOLUTION (3-0) 3

A survey of the current explanations of evolutionary mechanisms. Winter term of even-numbered years.

Prerequisite: Bio 371.

Bio 433 BACTERIAL PHYSIOLOGY (3-3) 4

Unique characteristics of metabolic pathways in bacteria will be studied. Major laboratory emphasis is placed on the interrelationships of bacteria, viruses and immune response, and their effects on human physiology. Offered on demand.

Prerequisites: Bio 321, 331 and Chem 304.

Bio 455 CELLULAR AND MOLECULAR BIOLOGY (3-3) 4

Examination of the metabolic processes of the cell with respect to organelle compartmentalization. Emphasis will be placed on bioenergetics, intermediary metabolism and the biology of the gene. Fall term.

Prerequisites: Chem 304, Bio 321 or 433. Biochemistry is strongly recommended.

Bio 456 CELL PHYSIOLOGY (3-3) 4

Examination of cell and organelle function. Topics may include cellular communication mechanisms, receptor/ligand interactions, and cell signaling and regulatory mechanisms. Laboratory may involve the use of tissues from live animals. Winter term.

Prerequisites: Bio 321, Bio 455 and Chem 304 or 311, or consent of instructor.

Bio 471 FIELD ECOLOGY 5

An advanced ecology course that emphasizes sampling methods, description of local plant and animal communities, and techniques of

environmental monitoring in terrestrial and aquatic ecosystems.
Summer term.

Prerequisites: Bio 220, 302, 304, and Math 201B or Psych 241B.

Bio 477 BIOGEOGRAPHY (3-3) 4

A study of current hypotheses explaining past and present distribution of plants and animals. The emphasis is on seed plants and vertebrate animals. Winter term of odd-numbered years.

Prerequisite: Consent of instructor.

Bio 480 INTERNSHIP IN BIOLOGY 3

Directed work experience in the biological sciences. Minimum requirements are that students maintain a detailed journal and complete a term paper. Requires at least 125 hours of directed experience.

Prerequisites: Biology major and consent of supervising faculty member.

Bio 496 SENIOR SEMINAR (1-0) 2

Advanced study and individual field/lab research in a topic of the student's choosing. This course must be taken fall trimester and in sequence with Bio 497 in the following winter trimester.

Prerequisites: Second trimester junior or senior standing.

Bio 497 SENIOR SEMINAR (1-3) 2

Advanced study and individual field/lab research in a topic of the student's choosing. This winter term course is a continuation of Bio 496.

Prerequisite: Bio 496.

Bio 499 INDEPENDENT STUDY 1-3

Individual research under the supervision of a faculty member. Offered on demand. Study and proposal should begin in junior year.

Prerequisite: Approval of department chair.

[Return to List](#)

Business Administration

BA 101D BUSINESS IN THE MODERN WORLD (4-0) 4

This course introduces students to the world of business and how this world of business is influenced by the dynamically changing world. It will show how individuals operating within the business environment are impacted by society, politics and the economy. It will also show how business has and is likely to impact society, politics, and the economy. **FRESHMEN AND SOPHOMORES ONLY!** Fall and winter terms.

BA 205 NEW BUSINESS VENTURING (3-0) 3

This course introduces students to starting and operating a business. At the macro level, students are exposed to how business interacts with government, financial institutions and society. At the micor level, students are exposed to customer psychology, basic economics, data analysis and interpretation. Individual research and writing a business plan are required. Other topics covered include franchising, home-based business and e-commerce.

BA 220 SPEAKING IN THE BUSINESS WORLD (1-2) 2

This course introduces students to the principles of speech communications with an emphasis on application to organizational contexts. Selectively addressed are the literatures of team communication, interpersonal communication, and public speaking.

Prerequisite: Comp 150, LIB 150.

BA 221 WRITING IN THE BUSINESS WORLD (3-0) 3

This course orients students to the writing practices of business professionals. Students will examine the different kinds of writing required in the decision-making process, and how that writing relates to the intellectual practices, values, and social relationships of business professionals. Although the course addresses issues of conceptualization, inquiry, and reasoning in decision-making, the emphasis of the course is on learning the language conventions for administrative writing analyses and persuasive communications. Fall, winter and summer terms.

Prerequisite: Comp 150, LIB 150, Acc 225 or concurrent enrollment.

BA 240 BUSINESS CREATIVITY AND INNOVATION (2-0) 2

The business person's secret for creating value in the market place is applying creativity and innovation to solve problems and to make use of opportunities that people face every day. Course objectives are to (1) develop skills in generating new and original ideas, (2) increase ability to move ideas into action and success, and (3) increase knowledge and skill in creative problem solving as applied to business settings. The course is a "hands-on" experiential format where students learn through "doing" the concepts.

BA 253B BUSINESS STATISTICS (4-0) 4

An introductory course covering the collection and analysis of numerical data for decision-making purposes. Topics to be covered include descriptive statistics, measures of central tendency and dispersion, probability, sampling distributions, estimation, hypothesis testing, and regression and correlation. Credit toward graduation will be given for only one of the following courses: BA 253B, Psych 241B and Math 201B. Fall, winter and summer terms.

Prerequisite: Math 110B or Math 121B or FLC math placement score in Math 210B or Math 221B and Comp 150 and Lib 150.

BA 255 STATISTICAL INFERENCE AND COMPUTER APPLICATIONS (1-0) 1

This course is designed as a follow up to a three-hour basic statistics course from another school. The course, coupled with a three hour basic statistics course, will meet the requirements of BA 253B - Business Statistics. Course content includes topics in hypothesis testing and regression, as well as application of computer programs to statistical inference. This course may not be taken for credit by students who have received credit for BA 253B. Offered on demand.

Prerequisites: Consent of instructor.

BA 260D LEGAL ENVIRONMENT OF BUSINESS (3-0) 3

An examination of the primary lawmaking and adjudicatory processes, with a substantial emphasis upon the role that economic, social, political and ethical forces play upon the shaping of domestic and international

legal rules. Fall, winter and summer terms.

Prerequisites: Comp 150, LIB 150, or consent of instructor.

BA 271 PRINCIPLES OF INTERNATIONAL BUSINESS (2-0) 2

An introductory course addressing the fundamental aspects of conducting business outside the U.S. Topics covered include the nature of international business, theories of trade, trade patterns and agreements, the basics of the international monetary system and the foreign exchange markets, and basic cultural issues. Enrollment of non-SOBA majors is encouraged. Fall and winter terms.

Prerequisites: Econ 266D, concurrent enrollment or consent of instructor.

BA 301D MANAGEMENT AND ORGANIZATIONAL BEHAVIOR (4-0) 4

A study of the principles, practices and processes of administration: the organization of a system, the behavior of people in the organization, and the development of organizational effectiveness. Both domestic and international aspects of management theory and practice will be considered. Fall, winter and summer terms.

Prerequisites: Junior standing.

BA 302W HUMAN RESOURCE MANAGEMENT (4-0) 4

Human resource system makeup within an organization. Topics include but are not limited to, recruitment and selection, training and development, performance appraisal, wage and salary administration, discipline, labor relations, union-management relations, and the role of government in human resource administration. Winter term.

Prerequisite: BA 301D and BA 221.

BA 308 OFFICE MANAGEMENT (3-0) 3

The principles of office management and office management technology. The responsibilities of managing office services, layout and space utilization, office furniture and equipment, machines and appliances, personnel issues, controlling costs, and office methods and procedures are included. Individual research required. Offered summers

and on demand.

Prerequisites: Junior standing and BA 221.

BA 309W INTERNATIONAL MANAGEMENT (3-0) 3

An introduction to the unique issues, challenges and opportunities confronting managers in an international environment. The relationship of socio-cultural forces to performance of management functions is emphasized. Topics will include issues such as international competitiveness, comparative management styles, corporate/government relations, entry strategies, transfer of technology, logistics and international human resource management. Winter term.

Prerequisites: BA 301D and BA 271.

BA 311 BUSINESS LAW I (3-0) 3

Basic principles of law as applied to business transactions. Study of the law of contracts, sale of goods, warranties and negotiable instruments, and secured transactions. These topics are tested on the Business Law portion of the C.P.A. exam. The interactions between social, political and economic factors with law are considered. Fall term.

Prerequisites: BA 260D, junior standing and BA 221.

BA 312 BUSINESS LAW II (3-0) 3

Study of the law of agencies, business associations, bankruptcy, property, employment law, and environmental regulatory law are examined. These topics are tested on the Business Law portion of the C. P.A. exam. Winter term.

Prerequisites: BA 260D, junior standing and BA 221.

BA 313C ETHICAL ISSUES IN BUSINESS (3-0) 3

This course will examine ethical issues which arise and are unique to managerial decision-making in business settings. The course will proceed developmentally with ethical systems commonly used in business, personal ethics, and, finally, ethics in business tough case studies. Fall and winter terms.

Prerequisites: Junior standing.

BA 315 INTERNATIONAL BUSINESS LAW (3-0) 3

An introduction to public international law with emphasis on international commerce and an examination of national laws and practices that states apply to international commercial transactions. Offered on demand.

Prerequisites: BA 260D, junior standing and BA 221.

BA 330 TOURISM AND RESORT MANAGEMENT (4-0) 4

An introductory course covering the scope, organization and environment of the domestic and international tourism and resort industry. Topics to be covered include industry components, supply and demand, motivation and sociology, economics, public policy and environmental issues, and current leadership and management challenges facing the industry. Fall term.

Prerequisite: Junior standing.

BA 339 SELLING (3-0) 3

This course focuses on the relationship between buyer and seller, the selling process, buyer behavior, negotiations, and the communication process. Winter term.

Prerequisite: BA 340.

BA 340 MARKETING (4-0) 4

The course stresses marketing activities from a managerial perspective. It includes the marketing of goods and services and ideas in both business and non-business organizations. There is an emphasis on concepts of marketing and application of these concepts in decision-making and managing marketing variables in a dynamic domestic and international environment. Marketing principles are applied in a computerized industry game and/or cases. Fall, winter and summer terms.

Prerequisites: Junior standing.

BA 342 RETAILING (3-0) 3

An introduction to retailing from the management point of view: study of retail policies and organization, the operation of the buying and selling functions, merchandise control, store systems, personnel management, retail accounting and expense control. Fall term.

Prerequisite: BA 340.

BA 344 ADVERTISING (3-0) 3

This is an introduction to advertising that covers the structure and role of advertising agencies and the interaction between client and agency. The process of creating and placing advertising is explored including: advertising, objectives, budgeting, media planning and mix, creative objectives and strategies, copy execution, production, and testing. This course presents a basic understanding for those students pursuing a career in advertising and enables those pursuing other career paths to effectively evaluate and use the services provided by advertising specialists. Fall and winter term.

Prerequisite: BA 340.

BA 346 MANAGING CUSTOMER VALUE (4-0) 4

This course establishes the strategic marketing structure for a firm's ability to combine and manage the dimensions of product/service quality, customer service, and price in a way to create an enduring competitive advantage. The course uses lectures, discussions, cases, and spreadsheet analyses to achieve its objective. Fall term.

Prerequisites: BA 340.

BA 347 CONSUMER BEHAVIOR (3-0) 3

This course explores behavioral theory as it relates to consumer and industrial decision processes. Relevant concepts and recent research findings are drawn from the fields of marketing, psychology, sociology, and communications. Applications of these ideas is directed toward improving marketing management and decision-making. Winter term.

Prerequisites: BA 340.

BA 348 PUBLIC RELATIONS (3-0) 3

This course will introduce students to the marketing and managerial

functions of public relations, the public relations process, and techniques of message preparation for a variety of media. Winter term.

Prerequisites: BA 340.

BA 349W GLOBAL MARKETING (4-0) 4

This course encompasses the study of marketing activities in the global marketplace by examining strategies that work and that don't work. A special emphasis is placed on the need to consider cultural markets, as opposed to focusing on political boundaries by examining the impact of cultural similarities, as well as differences. Fall term.

Prerequisites: BA 340 and BA 271.

BA 353 OPERATIONS MANAGEMENT (3-2) 4

Concepts and methods for economical planning and control of activities required for transforming a set of inputs into specified goods or services. Emphasis is given to forecasting, decision analysis, cost analysis, design of production systems, production/marketing relationships, operations planning and control, and the importance of global competitiveness. Fall, winter and summer terms.

Prerequisites: Either BA 253B, Psych 241B or Math 201B and BA 221 and BA 301D, or CSIS 110B.

BA 357 STUDIES IN OPERATION MANAGEMENT (3-2) 4

A study of selected topics in operations management. This course's content will vary. Students may take this course more than once, provided the subject is different on each occasion. Some examples of different subjects are: Computer Applications in Decision-making; Quality and Productivity; Transportation and Logistics; Purchasing; Project Management; Forecasting. Offered on demand.

Prerequisite: BA 301D.

BA 360B INTRODUCTION TO OPERATIONS RESEARCH (4-0) 4

Overview of optimization techniques used in operations research. Topics include linear programming, network flow, transportation problems, queuing theory, inventory models, PERT and CPM, dynamic

programming, use of statistical computer packages. Winter term of odd-numbered years. (This course is the same as Math 360B.)

Prerequisite: Math 210B or Math 221B.

BA 370 TOPICS IN INTERNATIONAL BUSINESS 1-6

An examination of selected topics and issues pertaining to the international marketplace. Students may take this course one or more times for credit, provided the subject is different on each occasion. Offered on demand.

Prerequisites: Junior standing or consent of instructor.

BA 375 STUDIES IN EUROPEAN BUSINESS 3-18

This course provides appropriate credit for studies completed in one of SOBA's Trimester Abroad programs with European partner schools. It may be repeated once for credit. The exact number of credit hours awarded will be determined by the Dean after review of the study program completed.

Prerequisite: Consent of instructor.

BA 380 FINANCIAL MANAGEMENT (4-0) 4

An introductory course focusing on financial analysis and decision-making, including time value of money, valuation of stocks, bonds, and other securities, investment risk management, capital budgeting, cost of capital, and long and short-term financing for firms competing in a global business environment. Fall, winter and summer terms.

Prerequisites: Junior standing, Acc 226, BA 221, and Econ 266D.

BA 382 FINANCIAL INSTITUTIONS (4-0) 4

Provides a descriptive and analytical understanding of the structure and operation of financial institutions and markets using both historical and international perspectives. Topics examined include the major categories, the role of the central bank, and interest and exchange rate theories. This course is the same as Econ 382. Credit will not be awarded for both BA 382 and Econ 382. Winter term.

Prerequisite: BA 380.

BA 386 INSURANCE (4-0) 4

A study of the types of coverage, buying strategies, and various types of insurance companies. Emphasis is placed on insurance contracts, risk management programs, fire, marine, casualty, business property and liability, life, and other type of insurance. Offered on demand.

Prerequisite: BA 380.

BA 387 REAL ESTATE (4-0) 4

An introductory course providing a foundation for those interested in real estate as a professional career, an investment mechanism, or simply as home ownership. Topics covered include legal considerations for listing, sale and transfer of real property rights, the regulation, practices and legal ethics of real estate agents, and the appraisal, investment analysis and financing techniques of real property. Offered on demand.

BA 389 INTERNATIONAL FINANCE (4-0) 4

This course is concerned with the financial management of a multinational corporation. Special consideration is given to foreign exchange risk management, investment analysis, capital budgeting, capital structure and working capital management. Fall term.

Prerequisites: BA 380 and BA 271.

BA 401W ENTREPRENEURSHIP AND SMALL BUSINESS MANAGEMENT (3-0) 3

How to conceive, initiate, organize, manage and operate a small business. Winter term.

Prerequisites: BA 221, BA 340, 353 and 380, senior standing or consent of instructor.

BA 402 ELECTRONIC COMMERCE (4-0) 4

This course introduces the student to the technical and business considerations for creating a business web site. Technical considerations include web site design and structure strategies, web security, EDI and payment system implementation and development of business strategy and digital nervous systems within the business environment. This

course is best suited to upper level business or computer science majors.

Prerequisite: BA 322 MIS

BA 407W MANAGEMENT CONSULTING (2-4) 4

The study of the concepts and models of management consulting and their application in business organizations. Emphasis is on practical application and the use of relevant tools and techniques. Students are required to engage in consulting services. Fall and winter terms.

Prerequisites: BA 221, BA 340, 353 and 380, senior standing and consent of instructor.

BA 415 MANAGEMENT IN ACTION 3-6

The study of management principles and their application through research, plant visits and on-site interviews with top management personnel. Offered on demand during summer term.

Prerequisites: BA 301D and consent of instructor.

BA 437 INTERNSHIP IN BUSINESS 3

Directed experience working in a business organization performing professional duties and responsibilities. Specific requirements will depend on the supervising college faculty member but include, as a minimum, the keeping of a detailed journal and the completion of a term paper. A minimum of 150 hours of directed experience will be required, however, normally students complete 200-300 hours. The student's performance will be evaluated by his/her supervisor in the business organization as well as the assigned college faculty member. Fall, winter and summer terms.

Prerequisites: Business majors having completed 80 semester hours and consent of instructor.

BA 439 MARKETING AND MANAGEMENT OF SERVICES (4-0) 4

The integration and application of relevant business theories, techniques, and skills to industry issues and problems through lectures, cases and a major project. Areas of emphasis will include the strategic service vision, operational strategies and operations management, law,

service delivery systems, marketing, people and the service culture, quality control, management accounting, financial management, as well as the global implications of services management. Fall and winter terms.

Prerequisites: Senior standing, BA 340 and BA 353.

BA 445W MARKETING STRATEGY AND POLICY (4-0) 4

An integrated course in marketing strategy and policy, employing comprehensive case problems in the formulation of marketing action programs and business policy. Heavy emphasis is placed on the writing and presentation of marketing plans. Fall term.

Prerequisites: BA 340, BA 380 and senior standing.

BA 446 MARKETING RESEARCH (3-2) 4

This course provides students with a knowledge base and skills for planning and conducting a research project as the basis of making efficient, effective and ethical marketing decisions. A special emphasis is placed on the marketing research process to study behavior in the marketplace via exploratory approaches such as focus groups and more systematic approaches such as surveys. Fall and winter terms.

Prerequisites: BA 253B and BA 340.

BA 481W CASES IN FINANCIAL MANAGEMENT (4-0) 4

This course will apply the tools learned in BA 380 to a variety of business problems and cases. Areas of analysis will not be confined to finance but will include decision making in marketing, management, etc., realizing the interdisciplinary reality of business. Fall term.

Prerequisite: BA 221 and BA 380.

BA 485 INVESTMENTS AND PORTFOLIO MANAGEMENT (4-0) 4

Analysis of various investment theories is accompanied by a study of the securities markets. Areas of emphasis would include analysis and valuation of stocks, and derivative securities, implications of diversification for return and risk of a portfolio, and strategies for the management of portfolio risk. Winter term.

Prerequisites: BA 380.

BA 496 SENIOR SEMINAR IN ADMINISTRATIVE STRATEGY (4-0) 4

The integration of managerial theories, techniques and skills, provides vicarious experiences and research in administrative decision making, policy, strategy and tactics. Emphasis is on the total organization and its internal and external relationships and responsibilities. Cases analyzing firms ranging from small to large, local to international and profit to not-for-profit are covered. An appropriate term paper is required. Fall, winter and summer terms.

Prerequisites: Senior standing and completion of Acc 225, Acc 226, Econ 266D, BA 221, BA 253B, BA 260D, BA301D, BA 340, BA 353, BA 380, and BA 446W or Econ 361 or Math 210B or Math 221B or Math 350B or Math 360B.

BA 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

Prerequisite: Approval of the Dean of the School of Business Administration.

[Return to List](#)

Chemistry

Chem 123B CHEMISTRY FOR CONSUMERS (3-0) 3

Topics of interest to the consumer, with focus on making personal choices of everyday chemicals. Topics include food additives and nutrition, cosmetics, drugs, pesticides, fertilizers, soaps, detergents, fabrics and plastics. The course presents basic principles leading to a practical understanding. This is a "humane" chemistry course for people afraid of science and mathematics. Credit will not be given for both Chemistry 123B and 323B. Fall and winter terms.

Chem 124BL CHEMISTRY FOR CONSUMERS LAB (0-3) 1-1/2

A laboratory course to follow or accompany "Chemistry for

Consumers." Laboratory work includes experiments involving different classes of consumer products, providing a basis for the science behind the products. (Prior or concurrent enrollment in Chemistry for Consumer lecture.) Not currently offered.

Chem 150B FUNDAMENTALS OF CHEMISTRY (4-3) 5-1/2

A conceptual approach to fundamental principles of chemistry including electronic structure of atoms and molecules, stoichiometry, solutions and states of matter, metallic and non-metallic properties, chemical thermodynamics and equilibrium, acids and bases, reaction kinetics, nuclear chemistry and electrochemistry. This is the recommended beginning course for all science majors. Fall, winter and summer terms.

Prerequisite: Either two years of high school mathematics, satisfactory performance on ACT/SAT examination or concurrent enrollment in Math 121B or 221B.

Chem 151 FUNDAMENTALS OF CHEMISTRY (4-3) 5-1/2

Continuation of Chemistry 150B. Fall, winter and summer terms.

Prerequisite: Chem 150B or consent of instructor.

Chem 300W AT THE FOREFRONT OF CHEMICAL RESEARCH (3-0) 3

Survey of the chemical and biochemical literature to become familiar with the newest and most exciting research topics. Papers from the secondary scientific literature on these topics will be selected for discussion and for critical analysis of ideas, writing styles and conventions. Further investigation of topics through the use of electronic bibliographic tools will extend these topics into research projects reaching to their roots in the primary research literature. Students will write extensively and give well-organized oral presentations on chemical topics.

Prerequisite: Comp 150 and LIB 150.

Chem 301 SCIENTIFIC GLASSBLOWING (0-3) 1

Basic skills of glassblowing. The properties and uses of different types of glass will be considered. Simple laboratory apparatus will be designed and built.

Chem 303 ORGANIC CHEMISTRY (4-3) 5

Nomenclature, structure, stereochemistry, and reactions of aliphatic and aromatic halides, alkenes, alkynes and alcohols. Unifying principles of reaction mechanisms are introduced and applied to nucleophilic substitution and elimination and electrophilic addition reactions. The laboratory introduces techniques in separation, purification, kinetic studies and synthesis. Fall term.

Prerequisite: Chem 151 or consent of instructor.

Chem 304 ORGANIC CHEMISTRY (4-3) 5

Nomenclature, structure, spectroscopy and reactions of the major functional group classes including alcohols, ketones, aldehydes, acids, esters, amides, amines and aromatics. The chemistry of biological compounds is introduced with studies of carbohydrates and amino acids. Laboratory emphasis is on synthesis and identification of organic compounds using spectroscopic methods. Winter term.

Prerequisite: Chem 303.

Chem 305 NATURAL PRODUCTS FROM PLANTS (1-6) 3

A comprehensive study of the biologically active constituents of plants of the Southwest and elsewhere. Medicinal compounds and poisons are emphasized. Chemical structures, physiological activity, plant sources and biosynthetic pathways are discussed. Lab work includes field gathering, isolation and identification of compounds. First summer session.

Prerequisite: Chem 303.

Chem 311 GENERAL BIOCHEMISTRY I (3-0) 3

The basic principles of biochemistry. Emphasis is on the structure and function of proteins and lipids and the metabolic processes occurring within living organisms. Fall term.

Prerequisite: Chem 304.

Chem 312 GENERAL BIOCHEMISTRY LAB (0-3) 1

Basic biochemical techniques. Fall term.

Prerequisite: Chem 311 concurrent.

Chem 313 GENERAL BIOCHEMISTRY II (3-0) 3

The basic principles of biochemistry. Emphasis is on nucleic acid chemistry, carbohydrates, and immune response. Winter term.

Prerequisite: Chem 311.

Chem 323B CHEMISTRY FOR CONSUMERS (3-0) 3

Topics of interest to the consumer, with focus on making personal choices about the use of everyday chemicals. Topics include food additives and nutrition, cosmetics, drugs, pesticides, fertilizers, soaps, detergents, fabrics and plastics. For upper division credit, this course will require extensive writing exercises culminating in a major research paper on a consumer topic. Credit will not be given for both Chemistry 123B and 323B. Fall and winter terms.

Chem 351 PHARMACOLOGY (3-0) 3

Studies of the effects produced by drugs and of their administration, absorption, distribution and excretion. Special emphasis is placed on the theories of the mechanism of action of drugs. First summer session when offered.

Prerequisite: Chem 303.

Chem 358 PHYSICAL CHEMISTRY (3-0) 3

An introduction to thermodynamics and its application to chemical processes. The course explores why chemical reactions occur, the nature of chemical equilibrium, the factors determining the speed of reactions, and the role of temperature in reactions and equilibria. Includes elementary kinetic gas theory and the Boltzman distribution, energy, entropy, free energy and equilibrium, ideal solutions, and reaction rate theory. Fall term.

Prerequisites: Chem 151, Phys 217B or (201B), concurrent enrollment in Math 222.

Chem 359 PHYSICAL CHEMISTRY (3-0) 3

A study of the quantum theory of atoms and molecules. Includes fundamentals of quantum mechanics, electronic structure of atoms and molecules, molecular symmetry, molecular and reaction dynamics, and the interaction of matter with light. Winter term.

Prerequisite: Chem 358.

Chem 360 PHYSICAL MEASUREMENTS (0-6) 2

Instruction in design of experiments to measure physical properties and the analysis of data. These general techniques are applied in studies of kinetics, thermochemistry, electrochemistry, spectroscopy and molecular structure. Winter term.

Prerequisite: Concurrent enrollment in Chem 359 or consent of instructor.

Chem 364 INORGANIC CHEMISTRY (2-0) 2

Occurrence, metallurgy, properties, uses of selected elements, compounds and alloys. Also included are aspects of inorganic environmental chemistry, crystal structure, stereochemistry of non-transition elements, coordination compounds, acidity and basicity, energy and chemical change, solution chemistry, solid-liquid phase equilibria, periodic relationships and organometallic compounds. Fall term.

Prerequisite: Chem 151.

Chem 365 ANALYTICAL CHEMISTRY (3-3) 4

Introduction to quantitative analytical chemistry. A rigorous development of the theory of chemical equilibria is presented to guide the development of laboratory skills, the rational design of experimental methodologies, and the use of instruments. Major topics include chemical and chromatographic separations, spectroscopic analysis and electrochemical methods.

Prerequisites: Chem 151.

Chem 380 INTRODUCTION TO CHEMICAL RESEARCH (1-0) 1

This course consists of undertaking a project of an advanced nature. As

a class, all aspects of the project will be discussed, including choosing an appropriate project, performing a literature search, defining a project, setting goals, planning experiments, and reporting results. Individually, each member of the class will be working on their project, once that project has been selected in consultation with the instructor.

Prerequisite: Consent of instructor.

Chem 381 INTRODUCTION TO CHEMICAL RESEARCH LABORATORY 1-3

This is the laboratory to accompany Chem 380, Introduction to Chemical Research. This course must be taken along with Chem 380. Repeatable for credit up to a maximum of 15 hours.

Chem 411 ADVANCED BIOCHEMISTRY (3-0) 3

Advanced studies of basic biochemical concepts. Emphasis is placed on protein and carbohydrate structure, enzyme kinetics, membrane properties, biochemical reaction mechanisms, thermodynamic relationships in biochemical systems and nucleic acid chemistry. A problem-solving approach is taken to these topics. On demand.

Prerequisites: Chem 313 and 358 or consent of instructor.

Chem 431 ADVANCED ORGANIC CHEMISTRY (3-0) 3

Advanced studies of organic reactions and reaction mechanisms. Strategies of stereoselective synthesis of complex organic molecules will be studied. Winter term.

Prerequisite: Chem 304.

Chem 454 ADVANCED TOPICS IN CHEMISTRY 1-4

Examples of offerings include FT NMR techniques, bio-organic and bio-inorganic chemistry and advanced topics in analytical, physical and organometallic chemistry. On demand.

Prerequisite: The 300-level course in the specific area.

Chem 460 SYNTHESIS TECHNIQUES (1-6) 3

Laboratory instruction in standard advanced synthesis techniques

including high and low temperatures, high pressures, photochemical syntheses, Schlenk-line manipulations and chromatographic methods. Organic, inorganic and organometallic compounds will be synthesized. The synthesis literature and spectroscopic methods of structure determination will also be studied. Winter term.

Prerequisite: Chem 304.

Chem 464 ADVANCED INORGANIC CHEMISTRY (3-0) 3

Atomic structure and periodic table, magnetic properties, modern bonding theories, chemistry of selected transition and non-transition elements, reaction mechanisms, solid state, organometallic and bioinorganic chemistry. Winter term.

Prerequisites: Chem 364, 358 or consent of instructor.

Chem 465 INSTRUMENTAL ANALYTICAL CHEMISTRY (3-3) 4

Advanced instruction in state-of-the-art instrumental analysis, including separations methods, spectroscopic analysis and electrochemical methods of detection. Emphasis is placed upon analytical decision-making, instrumental design, and analysis of "real world" samples. Technical report writing is emphasized. Aspects of environmental analysis, pharmaceutical analysis, and bioanalytical chemistry are also included.

Prerequisites: Chem 300W, 360 and 365.

Chem 496 SENIOR SEMINAR (1-0) 1

Preparation of library thesis on significant research topic from recent primary literature. Includes chemical abstracts instruction, on-line literature searching, advanced library techniques and advanced technical writing and presentations. Also career preparation activities and participation in seminars by visiting scientists. Fall term.

Prerequisite: Junior or senior standing and Chem 300W.

Chem 497 SENIOR SEMINAR (1-0) 1

Continuation of Chem 496 with emphasis upon presentation of senior thesis to the chemistry community. Winter term.

Prerequisite: Chem 496 or consent of instructor.

Chem 499 INDEPENDENT STUDY 1-3

Laboratory work on a current research problem under the direction of a faculty member. Students present oral and written papers based on this research. On demand.

Prerequisites: Junior or senior standing and consent of instructor.

[Return to List](#)

Composition

Comp 125 READING IN COLLEGE (INTENSIVE) (4-0) 4

This course introduces students to the purposes and practices of scholarship, with an intensive emphasis on the interplay of reading and writing in academic work. Students learn how to read scholarly articles from a rhetorical perspective and how to write in response to such readings. This course (and its companion, Comp 126) are designed for students who need a more closely guided and intensive introduction to academic reading and writing. Comp 125 and Comp 126 are college-level courses; students who need remedial instruction should complete TRST 91 before enrolling in Comp 125. Completion of Comp 125 and Comp 126 will fulfill the academic writing requirement; a student may not receive credit for Comp 150 if s/he has received credit for Comp 125 and Comp 126.

Prerequisite: Placement into Comp 125 or completion of TRST 91.

Comp 126 WRITING IN COLLEGE (INTENSIVE) (4-0) 4

In this course students analyze a variety of academic texts in different research literatures and complete an intensive series of writing assignments to teach them how to interpret arguments, identify

constraints and bias, organize and present evidence and compose their own contributions to intellectual dialogues. This course (and its companion, Comp 125) are designed for students who need a more closely guided and intensive introduction to academic writing. Completion of Comp 125 and Comp 126 will fulfill the academic writing requirement; a student may not receive credit for Comp 150 if s/he has received credit for Comp 125 and Comp 126.

Prerequisite: Comp 125.

COMP 150 READING AND WRITING IN COLLEGE (4-0) 4

This course emphasizes the interplay of reading and writing in an academic environment. Students will analyze a variety of academic texts and complete a series of writing assignments designed to teach them how to interpret arguments, identify constraints and bias, organize and present evidence, and compose their own contribution to intellectual dialogues.

Prerequisite: Placement into Comp 150.

LIB 150 INFORMATION LITERACY: INTRODUCTION TO RESEARCH METHODS (1-0) 1

This course examines the role information plays in daily life, how information is generated, and how it is organized. Emphasis will be on accessing and critically evaluating information, especially within the context of conducting research in an academic library.

Prerequisite: 12 hours of college credit. Must be taken in conjunction with Comp 150 Reading and Writing in College.

[Return to List](#)

Computer Science Information Systems (CSIS)

INTRODUCTORY PROGRAMMING COURSE:

Students with previous programming experience or a strong mathematical background should enroll in CSIS 110B (for computer science majors) or Engr 104B (for engineering students). Other students should select CSIS 106B (Visual Basic Programming).

CSIS 105 THE COMPUTER AS A TOOL (3-2) 4

Introduction to personal computer productivity tools using Microsoft (MS) Windows and the MS Office software suite (MS Word, MS Excel, MS Powerpoint, MS Access), creation of documents which require the integration of applications using multi-tasking and object linking and embedding, accessing information on the Internet and World Wide Web, prototyping user interfaces using MS Visual Basic. Fall Term.

Prerequisite: Computer Science major or consent of instructor.

CSIS 106B INTRODUCTION TO PROGRAMMING IN VISUAL BASIC (3-2) 4

Point-and-click methods will be combined with elementary programming concepts to develop Windows applications with a graphical user interface. Topics include input and output tools, control structures, debugging techniques, library functions, file manipulation, graphics programming. Fall and winter terms.

Prerequisite: Second-year high school algebra or Math 110B.

CSIS 110B INTRODUCTION TO PROGRAMMING (C++) (3-2) 4

Introduction to programming in C++, problem-solving methods, algorithm development, program design, testing, debugging and documentation. This course is required for students who wish to pursue further study in computer science. Fall and winter terms.

Prerequisite: Math 110B or equivalent.

CSIS 150B INTRODUCTION TO PROGRAMMING (FORTRAN) (3-0) 3

Introduction to programming, using the FORTRAN language, problem-solving methods, algorithm development, program design, debugging, documentation, and computer solution to mathematical/ scientific problems. Fall and winter terms.

Prerequisite: Math 121B or equivalent.

CSIS 230 OBJECT-ORIENTED PROGRAMMING IN C++ (3-2) 4

Introduction to object-oriented software development. Topics include objects and classes, operator overloading, inheritance, pointers, files and

streams, virtual functions, templates, applications to graphics programming. Group programming projects. Fall and winter terms.

Prerequisite: CSIS 110B.

CSIS 238 COMPUTER LOGIC DESIGN (3-3) 4

Introduction to the building blocks of digital computer design. Application of Boolean algebra to the synthesis of logic circuits from logic elements. The design and implementation of combinational and sequential circuits. Understanding of hardware operations in a simple computer in terms of register transfer language. Same as Engr 238. Winter term of odd-numbered years.

Prerequisite: A course in computer programming.

CSIS 240 ADVANCED PROGRAMMING (COBOL) (3-2) 4

Advanced file organization and processing. Sort and merge features. Subprograms. Advanced table handling. Team programming of projects. Winter term.

Prerequisite: CSIS 110B.

CSIS 310 DATA STRUCTURES (3-2) 4

Design and implementation of classic data structures such as stacks, queues, lists, trees and graphs. Application of these data structures to searching, sorting, memory management and other problem domains. Recursion and algorithm complexity analysis are also emphasized. Winter term.

Prerequisite: CSIS 230. Prerequisite or co-requisite, Math 305B.

CSIS 320 ASSEMBLY LANGUAGE PROGRAMMING (3-2) 4

This course uses assembly language programming as a tool to study the Intel 80x86's architecture. Topics include integer arithmetic, branching, memory segmentation, memory models, program translation and linkage, parameter passing mechanisms, interrupts, terminate-and stay-resident routines, math coprocessor, extended memory. Fall term.

Prerequisite: CSIS 230 or 240.

CSIS 321 COMPUTER ARCHITECTURE AND ORGANIZATION (4-0) 4

Organization of computer systems, including operating characteristics of and interfaces between processors, control units, busses and memory. Studies and comparisons among modern computer architectures including the Intel and Motorola families of microprocessors. Additional topics include Boolean Algebra and Digital Logic Circuits, RISC machines and Parallel Architectures. Winter term of even-numbered years.

Prerequisite: CSIS 230 or CSIS 240.

CSIS 322 MANAGEMENT INFORMATION SYSTEMS (4-0) 4

A study of information processing, the systems concept, the analysis and design of information systems, and data-base technology as they apply to producing information to be used in business decision-making. Advanced applications of word processing, spreadsheet and database software will be included. Fall and winter terms. **NOTE: This course does not count for credit toward the CSIS major.**

Prerequisite: BA 301D and BA 340.

CSIS 330 WINDOWS PROGRAMMING IN C++ (3-2) 4

Creating Windows applications using object-oriented programming and predefined hierarchies of window classes. Topics include menus, dialog boxes, toolbars and toolboxes, bitmaps and Windows graphics, child windows and MDI applications, dynamic link libraries. Offered on demand.

Prerequisite: CSIS 230.

CSIS 340 COMPARATIVE PROGRAMMING LANGUAGES (4-0) 4

Basic notions of syntax (BNF grammars, derivation trees) and semantics (data types, control structures, parameter passing mechanisms, scope and lifetime of names) of programming languages. Comparison of logic, functional, object-oriented and procedural languages. Programming projects using the Ada and/or Java programming languages. Fall term of odd-numbered years.

Prerequisite: CSIS 230 or CSIS 240.

CSIS 350 DATABASE MANAGEMENT SYSTEMS (4-0) 4

A study of the basic concepts, models, internal mechanisms and language aspects of Database Management Systems. The primary emphasis is on the definition, organization and manipulation of data at the logical level. Topics, include: conceptual modeling, the relational model, transformation of conceptual to relational models, normalization, physical database design, SQL and GUI query languages, recovery, concurrency, security and integrity, distributed databases, client/server databases, database administration and feature analysis of DBMS. Students will design and implement relational database applications. Fall term of even-numbered years.

Prerequisite: CSIS 230 or CSIS 240.

CSIS 360 SOFTWARE ENGINEERING I: SYSTEMS ANALYSIS (4-0) 4

This is the first course in a recommended fall/winter sequence (with CSIS 370). Topics include software life cycle models, human factors, feasibility analysis, project scheduling, requirements analysis methodologies, preparing systems proposals, CASE, software project management, and software quality assurance (technical reviews and inspections). This is a project-intensive course. The student's performance in a team environment is a major component of the final grade. Fall term of even-numbered years.

Prerequisite: CSIS 230 or CSIS 240 or consent of instructor.

CSIS 361W COMPUTERS AND HUMAN ISSUES (4-0) 4

A study of the broad social, political, ethical, and philosophical issues raised by the existence and use of the computer. Topics can include artificial intelligence, human-computer interaction, computer interface issues, computer ethics, ergonomics, and the Internet. The course is conducted in a seminar approach with discussion and analysis of articles which pertain to the previously mentioned topics. Students will become familiar with the various forms of writing used within the discipline of Computer Science (scientific technical writing, software documentation and help screens, progress reports, proposals, journal articles). Student will use presentation software, internet publishing tools and state of the art word processing software in comprehensive writing exercises. Hands-on experience with the Internet and related components is also

an integral part of this course.

Prerequisite: Comp 150 and LIB 150 and CSIS 230 or CSIS 240.

CSIS 370 SOFTWARE ENGINEERING II: SYSTEMS DESIGN AND IMPLEMENTATION 4-0) 4

This is the second course in a recommended fall/winter sequence (with CSIS 360). Topics include systems design methodologies, implementation technologies, selection of hardware and software, CASE, software configuration management, software project management, software quality assurance (inspections and testing). This is a project-intensive course. The student's performance in a team environment is a major component of the final grade. Winter term of odd-numbered years.

Prerequisite: CSIS 360 or consent of instructor.

CSIS 380 COMPUTER GRAPHICS (3-2) 4

Concepts relating to the graphical display of data. Techniques in two- and three-dimensional displays. Hardware and software of graphics systems will be discussed with hands-on experience using available tools. Fall term of odd-numbered years.

Prerequisite: CSIS 230 or consent of instructor.

CSIS 402 ELECTRONIC COMMERCE (4-0) 4

This course introduces the student to the technical and business considerations for creating a business web site. Technical considerations include web site design and structure strategies, web security, EDI and payment system implementation and development of business strategy and digital nervous systems within the business environment. This course is best suited to upper level business or computer science majors.

Prerequisite: BA 322 MIS

CSIS 421 OPERATING SYSTEMS (3-2) 4

A study of basic concepts of operating system design. Topics include process management, memory management, file systems, protection and security, process coordination, interprocess communication, distributed systems. Programming assignments leading to the

construction of a simple operating system. Winter term of odd-numbered years.

Prerequisite: CSIS 230 and CSIS 320.

CSIS 425 ACCOUNTING INFORMATION SYSTEMS (4-0) 4

An analysis of the effects of information technology on the control and maintenance of accounting information systems. Included is the application of contemporary accounting/business software tools in accounting information systems. Fall term of odd-numbered years.

NOTE: This course does not count for credit toward the CSIS major.

Prerequisites: CSIS 420 and Acc 323W.

CSIS 430 DATA COMMUNICATIONS (3-2) 4

Analysis and design of distributed computing systems. Topics include communications media, transmission modes, protocols, data security and integrity, local and wide area networks. Laboratory project consisting of writing the software for a simple computer network. Winter term of even-numbered years.

Prerequisite: CSIS 230 and 320.

CSIS 450 PARALLEL PROGRAMMING (3-2) 4

Algorithm and program evaluation and development for computer architectures with multiple processors. Topics include multi-computer and multi-processor architectures and programming languages which support parallelism on such architectures. Fall term of even-numbered years.

Prerequisite: CSIS 310 or consent of instructor.

CSIS 495 INTERNSHIP IN COMPUTER SCIENCE (3-0) 3

Detailed experience working in an organization performing professional duties and responsibilities related to Computer Science. Specific requirements will vary according to the student's work assignment, but include, as a minimum, the keeping of a detailed journal regarding the student's work experience. A minimum of 140 hours (10 hours per week) of professional duties will be required. The student's performance will be evaluated by his/her supervisor in the organization as well as the

Computer Science Coordinator. On demand. **NOTE: This course does not count toward credit in the CSIS Electives section of the CSIS major. Credit is given only as a General (Free) Elective.**

Prerequisites: Junior or senior computer science major and approval by the Computer Science Coordinator.

CSIS 496 SENIOR SEMINAR (2-0) 2

Advanced study and research in selected topics. Winter term.

Prerequisite: Senior standing.

CSIS 499 INDEPENDENT STUDY 1-3

Individual study conducted under the supervision of a faculty member.

[Return to List](#)

Cooperative Education

COOP ED 200 COOPERATIVE EDUCATION 1-10

A first-time cooperative education work experience by underclassmen.

COOP ED 300 COOPERATIVE EDUCATION 1-10

A cooperative education work experience by upperclassmen. A maximum number of credits is allowed toward a degree.

COOP ED 400 COOPERATIVE EDUCATION 1-10

An advanced cooperative education work experience by upperclassmen who have completed one or more Co-op terms. A maximum number of credits is allowed toward a degree.

Economics

Econ 170D CURRENT ECONOMIC ISSUES (4-0) 4

Explores current economic issues in society by developing a set of basic tools of economic analysis and then applying those tools to contemporary economic questions. Issues to be covered will include topics such as inflation, unemployment, the farm problem, U.S. economic leadership, poverty, environmental standards, our financial system and worldwide economic growth. Recommended for **NON-BUSINESS MAJORS** who are interested in taking only one course in economics. Fall and winter terms.

Econ 201B PERSONAL FINANCE (3-0) 3

Managing personal finances including budgeting, insurance, taxes, home ownership, investments, retirement and estate planning. This course is designed for majors outside the School of Business Administration. Offered on demand primarily in summer.

Econ 262 PRINCIPLES OF ECONOMICS - MICRO (2-0) 2

An introductory course in price theory. Topics include opportunity cost, demand, supply, markets, elasticities and the organization of markets. This is a half semester course for which credit is earned by completing the first half of Econ 266D. For transfer students who have only had macro. Consent of instructor.

Econ 266D PRINCIPLES OF ECONOMICS (4-0) 4

An introductory course covering microeconomics and macroeconomics. The micro section includes opportunity cost, demand and supply analysis, elasticities, market behavior, market structures and international trade theory. The macro section includes national income theory, income flows, macroeconomic equilibrium and how these concepts are applied to examine economic growth, inflation, unemployment, monetary and fiscal policy, deficits and the national debt and the balance of payments. Fall, winter and summer terms.

Econ 272 PRINCIPLES OF ECONOMICS - MACRO (2-0) 2

An introductory course on national income analysis. Included are income flows, macro-economic equilibrium, monetary and fiscal policy and balance of payments. This is a half semester course for which credit is earned by completing the second half of Econ 266D. For transfer students who have only had micro. Consent of instructor.

Econ 305D ECONOMIC GEOGRAPHY (4-0) 4

A course that uses Microeconomic and Macroeconomic analyses to offer theoretical and empirical evidence for the location of economic activity at specific places, how that economic activity leads to relationships within places, how and why movement of resources occurs and what factors can be used to define regions.

Econ 310C ECONOMIC HISTORY OF THE UNITED STATES (4-0) 4

A study of the origin and development of the economic institutions of the United States from Colonial times to the present. U.S. economic development is considered in relation to theories of economic growth and development. Fall term.

Econ 330 ECONOMICS OF AGRIBUSINESS (4-0) 4

An application of economic principles to problems in agriculture and the analysis of the agricultural enterprise as a business. Topics include supply and demand analysis, an analysis of agricultural production, industrial organization as it applies to agriculture, the use of management tools and decision making processes in farm and ranch management. Fall term of odd-numbered years.

Prerequisite: Econ 266D.

Econ 335D ENVIRONMENTAL ECONOMICS (4-0) 4

This course presents the application of economic theory and analytical tools to a variety of environmental and resource problems. Economic reasoning is used to gain insights into the causes of, consequences of, and ways of dealing with environmental problems. The economic tools of cost/benefit analysis are developed and applied to environmental costs and benefits associated with a variety of private and public projects/policies. The ethical implications of these tools is also considered. Students will be expected to conduct an economic analysis of some proposed project/policy. Fall term.

Econ 356 MICROECONOMICS THEORY (4-0) 4

This course deals with the price system as it directs resources to more efficient use. It deals with pricing under the various degrees of competition and stresses demand analysis. The principles of production economics are explored. Fall term.

Prerequisite: Junior standing.

Econ 364W MACROECONOMICS THEORY (4-0) 4

A course that examines the economy as a whole. Included are an analysis of national income accounting, consumption, investment, government spending, the level of employment, monetary theory, monetary and fiscal policy, and international economic policy. Winter term.

Prerequisites: Junior standing.

Econ 361 MANAGERIAL ECONOMICS (4-0) 4

A course designed to connect economic theory with business decision-making. The course deals with the application of economic models to business decisions, quantitative methods for decision-making, cost-benefit and cost-effectiveness analysis. Fall and winter terms.

Prerequisites: BA 253B and Econ 266D.

Econ 369D PUBLIC FINANCE (4-0) 4

An analysis of the financing of federal, state and local units of government. Emphasis given to problems of taxation, expenditures and

debt management. Winter term of even-numbered years.

Prerequisites: Junior standing.

Econ 370 TOPICS IN INTERNATIONAL ECONOMICS 1-6

An examination of selected topics in the area of international economics. Students may take this course one or more times for credit provided the subject is different on each occasion.

Prerequisite: Econ 266D or concurrent enrollment, or permission of instructor.

Econ 371D INTERNATIONAL ECONOMICS (4-0) 4

Classical, neoclassical and modern trade theory. Comparative analysis of marketing functions, institutions and structures in different national environments. Exchange rates, import/export monopolies, quotas, tariffs and other foreign fiscal policies. Winter term.

Prerequisites: Junior standing.

Econ 381D ECONOMICS OF THE HEALTH CARE

INDUSTRY (4-0) 4

A survey of the issues in the field of health care economics. Health insurance, health care costs, and the financing and delivery of personal medical services are studied as is the role of government in the provision of health and medical care. This course is intended for students interested in issues concerning the health care industry. Prior knowledge of economics is not required. Fall term of odd-numbered years.

Prerequisite: Junior standing or consent of instructor.

Econ 382 FINANCIAL INSTITUTIONS (4-0) 4

This course is the same as BA 382. See BA 382 for description. Credit cannot be awarded for both BA 382 and Econ 382.

Econ 407C EVOLUTION OF ECONOMIC THOUGHT (4-0) 4

Traces the evolution of economic thought from the 1600s to the present.

Each major school of thought, e.g., Mercantilist, Classical, Marxist, Keynesian, etc., will be analyzed to see how it met the conditions of its time, which concepts were only relevant to that period, and which have had enduring relevance. Winter term of odd-numbered years.

Prerequisites: Junior standing or consent of instructor.

Econ 410D ECONOMICS, A RADICAL PERSPECTIVE (4-0) 4

A course that examines the process of resource allocation from the perspective that draws its analysis from Neoclassical Economic theory, Institutional Economics and Marxian Economics. Topics that are examined are power as it arises from the ownership of resources and how power is then transformed into control of institutions, class as a natural consequence of the capitalist system, sexism and racism as they arise from the existence of power and class. Also included are topics that address worker dislocation due to structural change in the economy and work issues related to the post-industrial society.

Prerequisites: Junior standing or consent of instructor.

BA 499 INDEPENDENT STUDY 1-4

Individual research is conducted under the supervision of a faculty member. Fall and winter terms.

Prerequisite: Approval of School of Business Administration Dean.

Education

Please see the [Teacher Education Web Site](#) for the most recent additions to the course listings to meet state-mandated changes.

[Return to List](#)

Engineering

Engr 103 COMPUTER AIDED DRAFTING (3-0) 3

A basic course in engineering graphics, including geometric constructions, orthographic projection, sectional views, dimensioning,

layout, working drawings and elementary descriptive geometry. The primary drafting tool for this course will be the computer.

Engr 104B COMPUTER PROGRAMMING FOR SCIENTISTS AND ENGINEERS (2-2) 3

Introduction to programming, problem-solving methods, algorithm development, program design, debugging, documentation and computer solution to mathematical/engineering problems.

Prerequisite: Math 121B or equivalent.

Engr 105 ENGINEERING PRINCIPLES (3-0) 3

Solution of fundamental engineering and design problems using digital computation and graphical techniques. Topics include graphical and numerical mathematics, engineering statistics and computer graphics.

Prerequisites: Math 221B and Engr 104B.

Engr 201 ELECTRIC NETWORKS I (4-0) 4

An introduction to engineering circuit analysis. Topics include the study of linear circuit elements (resistors, capacitors, inductors, operational amplifiers), linear circuits, Kirchoff's laws, methods of analysis, RL, RC, and RLC circuits, phasors, sinusoidal steady state response, average value RMS values and power in AC circuits.

Prerequisite: Math 222.

Engr 202 ELECTRIC NETWORKS II (3-2) 4

Topics include polyphase circuits, complex frequency and frequency response of linear networks, magnetically coupled circuits, two-port networks, Fourier analysis, Laplace transform techniques, operational amplifiers.

Prerequisite: Engr 201.

Engr 205 SURVEYING I (2-4) 4

Plane surveying methods in engineering: taping, leveling, traversing, topographic mapping, associate computation. Use and care of instruments. Sources and evaluation of errors.

Prerequisite: Math 121B or equivalent.

Engr 217 STATICS (3-0) 3

Vectors, forces and moments. Static equilibrium of particles and rigid bodies. Trusses, frames and machines. Internal forces, shear and bending moment diagrams. Centroids, moment of inertia, friction and virtual work.

Prerequisite: Math 221B.

Engr 221 DYNAMICS (3-0) 3

Kinematics and kinetics of particles and rigid bodies. Includes the applications of Newton's laws, work-energy, and impulse-momentum, and their applications to determine the motion of rigid bodies in two and three dimensions.

Prerequisite: Engr 217.

Engr 238 DIGITAL LOGIC DESIGN (3-3) 4

Introduction to the building blocks of digital computer design. Application of Boolean algebra to the synthesis of logic circuits from logic elements. The design and implementation of combinational and sequential circuits. Understanding of hardware operations in a simple computer. Winter term of odd-numbered years.

Prerequisites: Engr 104B or equivalent math and programming experience.

Engr 270 ENGINEERING THERMODYNAMICS (3-0) 3

Fundamental concepts and basic theory of classical thermodynamics including study of the first and second laws of thermodynamics, properties of pure substances, thermodynamic states and functions, applications to engineering.

Prerequisites: Phys 217B.

Engr 305 SURVEYING II (2-4) 4

Topics include the Public Land Survey system, coordinate systems and

control surveys, photogrammetry, astronomic observations and route surveys.

Prerequisites: Engr 205 and Math 221B.

Engr 317 MECHANICS OF MATERIALS (3-0) 3

Stresses and deformations in structural members and machine elements, combined stresses and stress transformations. Deflection by integration, superpositions and moment area method. Strain energy concept, impact loading and column design.

Prerequisite: Engr 217.

Engr 321 FLUID MECHANICS (3-0) 3

Fluid properties, statics, kinematics, and kinetics of fluids including gravitational and viscous effects. Differential analysis of fluid motion. Incompressible inviscid flow, dimensional analysis and similitude. Flow measurements, boundary layers, flow about immersed bodies and flow in open channels.

Prerequisite: Engr 221.

Engr 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

[Return to List](#)

English

All courses with an A or E suffix fulfill Group A or E distribution requirements. A and E courses are open to non-majors. Communications majors may take either one A or one E course for general distribution requirements, but not both.

Engl 116A1 INTRODUCTION TO MASS COMMUNICATIONS (4-0) 4

An examination of the history of the mass media in terms of technological advancements and their impact culturally, politically and economically on the citizens of this country and others. In addition to

the seven mass media - books, newspapers, magazines, radio, recordings, motion pictures and television - this course addresses public relations and advertising, emerging technologies and current issues in media scholarship and criticism. Fall, winter and summer terms.

Engl 126A1 THE BIBLE AS LITERATURE (THE HEBREW BIBLE) (2-0) 2

A study of the Hebrew Bible as literature, together with its mythological, historical and archaeological backgrounds. Winter term.

Engl 127A1 THE BIBLE AS LITERATURE (THE CISTIAN TESTAMENT) (2-0) 2

A study of the Cistian Testament as literature, together with its mythological, historical and archaeological background. Winter term.

Engl 173E 20TH CENTURY ASIAN AND AFRICAN LITERATURE (4-0) 4

A study of selected 20th century novels from Asia and Africa. This course is designed to examine the appropriation of the novel form and issues of hybridity and authority. Fall term.

Engl 174A1 AFRICAN-AMERICAN LITERATURE (4-0) 4

A study of selected 19th and 20th century works by African-American writers. Winter term.

Engl 175A1 WOMEN'S LITERATURE (4-0) 4

A study of literature by and about women. Fall and winter terms.

Engl 215 NEWS MEDIA WRITING (4-0) 4

A practical course that introduces students to news gathering and news writing. The course uses print as the medium to apply concepts and learn skills, but also makes clear the parallels between print and the electronic media. The course also addresses ethical and legal principles. Fall and winter terms.

Engl 221A1 CLASSICAL LITERATURE (4-0) 4

A study of ancient Greek and Roman literature. Winter term, alternate

years.

Engl 230A1 SURVEY OF BRITISH LITERATURE (4-0) 4

An overview of representative British writing from its beginnings to the present. Fall and winter terms.

Engl 240A1 SURVEY OF AMERICAN LITERATURE (4-0) 4

An overview of representative American writing from its beginnings to the present. Fall and winter terms.

Engl 250 PRACTICUM -- NEWSPAPER 1-6

Directed experience for lower-division students in newspaper work on the *Independent* or other newspapers. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 250 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 251 PRACTICUM -- RADIO 1-6

Directed experience for lower-division students in radio broadcasting on KDUR. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 251 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 252 PRACTICUM -- TV 1-4

Directed experience for lower-division students producing, shooting, scripting and editing. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 252 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, Engl 215, Engl 304 and consent of instructor.

NOTE: Engl 252 has an extra fee of \$50.

Engl 258 PRACTICUM-SERVICE LEARNING 1-6

Directed experience for lower-division students in service learning with placements in local schools or community organizations. Credit is based on the ratio of 30 hours of service for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 258 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 265A1 SEMANTICS (2-0) 2

A study of the meaning of language, emphasizing its social and psychological uses and abuses. Fall and winter terms.

Engl 267A1 PERSUASION: HISTORY, THEORY, AND PRACTICE (4-0) 4

An in-depth study of selected texts representing Western and/or non-Western rhetorical theory and practice, which will help students broaden their understanding of the presence of rhetoric in intellectual and institutional histories and as a shaping force in contemporary intellectual, academic, political and professional domains. Fall term.

Prerequisite: COMP 150, LIB 150.

Engl 268W READING TEXTS/WRITING TEXTS (4-0) 4

This course, which includes a brief introduction to the Western rhetorical tradition, as well as an exploration of various forms of textual and critical analysis, introduces students to ways in which reading and writing are used in literary and media studies. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, or consent of instructor.

Engl 270A1 HISTORY OF THE FILM (2-2) 4

An overview of the history of international and Hollywood narrative film. Students will be expected to attend scheduled film screenings each week. Fall, winter and summer term.

Engl 273A1 INTRODUCTION TO LITERARY TYPES (2-0) 2

This course will focus on a type or genre of literature, such as poetry, fiction, the short story or the essay. Fall and winter terms.

Engl 280A1 LITERATURE OF THE SOUTHWEST (4-0) 4

The American Southwest seen through fiction, poetry, biography, and other works by European Americans, Native Americans and Chicanos/as. Fall and winter terms.

Engl 304 VIDEO PRODUCTION (4-0) 4

A practical course that introduces students to the technical aspects, conventions and aesthetics of small format video field production and editing. Fall and winter terms.

Prerequisite: Consent of instructor.

Note: Engl 304 has an extra fee of \$50.

Engl 306 RADIO BROADCASTING (4-0) 4

An introduction to radio broadcasting through its history, economics, industry, programming and legal issues, with considerable emphasis on production. Fall and winter terms.

Prerequisite: Consent of instructor.

Note: Engl 306 has an extra fee of \$50.

Engl 315 MEDIA WRITING: TOPICS (4-0) 4

An advanced writing course that builds on the writing students have been exposed to in News Media Writing and may have been exposed to in Video Production, Radio Broadcasting and the practica. Topics will include, but are not restricted to: magazine writing, long-form journalism, editorial writing, and screenwriting. Fall and winter terms.

Prerequisite: Any Group W course or consent of instructor.

Engl 317 MASS COMMUNICATIONS: TOPICS (4-0) 4

An advanced-level course that addresses in depth a topic essential for communication students as they move into industry or academe. Topics include, but are not limited to: representations in the media and media law and ethics. Fall and winter terms.

Prerequisite: Any Group W course or consent of instructor.

Engl 320A1 THE NOVEL (4-0) 4

An in-depth study of selected European, British and American novels. Fall and winter terms.

Prerequisite: Comp 150 and LIB 150.

Engl 330A1 CONTINENTAL LITERATURE: TOPICS (4-0) 4

An in-depth study of selected Biblical, classical or European texts. Fall term, alternate years.

Prerequisites: Engl 230A1 or Engl 240A1.

Engl 336 BRITISH RENAISSANCE LITERATURE: TOPICS (4-0) 4

An in-depth study of selected British writings from about 1500 to 1660. The specific course content will vary. Students may repeat the course for credit, provided the subject is different on each occasion. Fall term, alternate years.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 337 18TH CENTURY BRITISH LITERATURE: TOPICS (4-0) 4

An in-depth study of selected British writings from the "long" 18th century (about 1660 to 1798). The specific course content will vary. Students may repeat the course for credit, provided the subject is different on each occasion. Winter term, alternate years.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 340 19TH CENTURY BRITISH LITERATURE: TOPICS (4-0) 4

An in-depth study of British literature from the Romantic and/or Victorian periods. Students may repeat the course for credit, provided the subject is different on each occasion. Fall and winter terms.

Prerequisites: Engl 230A1 or Engl 240A1.

Engl 345 AMERICAN LITERATURE: TOPICS I (4-0) 4

An in-depth study of selected American writings from the beginnings to about 1865. The specific course content will vary. Students may repeat the course for credit, provided that the subject is different on each occasion. Fall term.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 346 AMERICAN LITERATURE: TOPICS II (4-0) 4

An in-depth study of selected American writings from 1865 to the present. The specific course content will vary. Students may repeat the course for credit, provided that the subject is different on each occasion. Winter term.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 350 PRACTICUM -- NEWSPAPER 1-6

Directed experience for upper-division students in newspaper work on the *Independent* or other newspapers. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 350 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 250, and consent of instructor.

Engl 351 PRACTICUM -- RADIO 1-6

Directed experience for upper-division students in radio broadcasting on KDUR. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 351 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 251, and consent of instructor.

Engl 352 PRACTICUM -- TV 1-4

Directed experience for upper-division students producing, shooting, scripting and editing. Credit is based on the ratio of 30 hours of work

for each credit earned. Students will be directed by a professor who will assign, monitor and evaluate their work. Engl 352 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, Engl 215, Engl 252, Engl 304, and consent of instructor.

NOTE: Engl 352 has an extra fee of \$50.

Engl 358 PRACTICUM-SERVICE LEARNING 1-6

Directed experience for upper-division students in service learning with placements in local schools or community organizations. Credit is based on the ratio of 30 hours of service for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 358 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 258 and consent of instructor.

Engl 363 ADVANCED COMPOSITION (4-0) 4

An advanced writing course in which students can produce writing in particular genres -- non-fiction essays, argument, literary journalism, etc. Fall and winter terms.

Prerequisite: Comp 150, LIB 150 and any Group W course.

Engl 366 TEACHING WRITING (4-0) 4

In this course, students will study writing from a theoretical/disciplinary perspective. We will examine the history of writing instruction, differing philosophies currently at play, the research and assumptions from whence these philosophies derive, and practical classroom strategies resulting from these philosophies. Students will be required to write, both formally and informally, for a variety of purposes in this course. Winter term.

Prerequisites: Comp 150, LIB 150 and Engl 268W.

Engl 378A1 YOUNG ADULT LITERATURE (4-0) 4

This course is a study of all types of literature for adolescents and young adults. Evaluative criteria for book selection will be considered.

Emphasis on minority and ethnic literature. Fall term.

Engl 380E NATIVE AMERICAN LITERATURE: TOPICS (4-0) 4

A study of traditional and contemporary Native American expression as seen through oration, tales and legends, chants and songs, poetry, drama, autobiography and the novel. Fall and winter terms.

Prerequisite: Comp 150, LIB 150

Engl 416A1 MEDIA THEORY AND CRITICISM (4-0) 4

An examination of major contemporary theories in mass media research, supplemented by an overview of the history of thought in the discipline. The course includes analysis of primary texts. Fall and winter terms.

Engl 417 MEDIA THEORY: TOPICS (4-0) 4

An advanced-level research course that develops and expands upon a selected theory or set of theories on mass communications. The course uses the topic as a vehicle for student research projects. Fall term.

Prerequisite: Any Group W course.

Engl 420E WORLD LITERARY TRADITIONS: TOPICS (4-0) 4

An in-depth study of a specific non-Western tradition in literature. Course content will vary. Students may repeat the course for credit provided the subject matter is different on each occasion. Winter term, alternate years.

Engl 423 GENRES: TOPICS (4-0) 4

An in-depth study of a specific genre of literature. Course content will vary. Students may repeat the course for credit, provided the subject matter is different on each occasion. On demand.

Engl 430 MEDIEVAL LITERATURE AND CHAUCER: TOPICS (4-0) 4

An in-depth study of selected British writings from the beginnings to about 1500. The specific course content will vary. Students may repeat the course for credit, provided the subject matter is different on each

occasion. Winter term, alternate years.

Prerequisite: Engl 230A1 or consent of instructor.

Engl 432A1 SHAKESPEARE (4-0) 4

A study of Shakespearean drama. Fall and winter terms.

Prerequisite: Engl 230A1 or consent of instructor.

Engl 450 INTERNSHIP IN NEWSPAPER 1-6

Directed experience working on newspapers, performing professional duties and responsibilities. Specific requirements will vary but include, as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving written goals. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 451 INTERNSHIP IN RADIO 1-6

Directed experience working at radio stations, performing professional duties and responsibilities. Specific requirements will vary but include, as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving written goals. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 452 INTERNSHIP IN TELEVISION 1-6

Directed experience working in television, performing professional duties and responsibilities. Specific requirements will vary but include,

as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving the goals in a written contract signed by the student, the supervisor, and the practicum instructor, on the journal and on the analytic paper. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, 80 hours of work toward graduation, and completed internship arrangements.

Engl 453 INTERNSHIP IN COMMUNICATIONS 1-6

Directed experience in media writing/production which does not directly involve newspaper, radio or television. The internship will be described in ways appropriate to the work, such as "Public Relations," "World Wide Web," "Advertising," "Layout and Design," "Magazine," "Newsletter," "Video Production." Credit and evaluation are based on achieving the goals in a written contract signed by the student, the supervisor, and the practicum instructor, on a journal documenting at least 100 hours of directed experience, and on a 15-page analytic paper. On demand

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 460 HISTORICAL ANALYSIS OF LANGUAGE (1-0) 1

Additional study in language history. Must be taken concurrently with Engl 461A1. Winter term.

Engl 461A1 HISTORY OF THE ENGLISH LANGUAGE (3-0) 3

A study of the development of English from Indo-European sources to the present. Winter term.

Engl 462A1 LINGUISTICS (3-0) 3

A scientific analysis of language, examining the nature and development of the unique human facility with language, a facility which depends on employing and combining a limited number of

sounds in predictable ways to create a limitless number of words and sentences. While the focus of the course will be on English, those features and principles shared by all languages will be emphasized. Fall and winter terms.

Engl 463 LINGUISTIC ANALYSIS (1-0) 1

A course in sentence analysis, applying principles learned in English Linguistics. Must be taken concurrently with Engl 462A1. Fall and winter terms.

Engl 464A1 CREATIVE WRITING (4-0) 4

An advanced writing course with concentrations in poetry and short fiction. Students may repeat the course for credit, but may apply it only once toward the major. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, and consent of instructor.

Engl 477 20TH CENTURY LITERATURE: TOPICS (4-0) 4

An analysis of selected European, British or American writings from the 20th century. Course content may vary. Students may repeat the course for credit, provided the subject matter is different on each occasion. Winter term.

Engl 483 MATERIALS OF INSTRUCTION IN TEACHING HIGH SCHOOL ENGLISH (4-0) 4

Introduces and expands on materials for teaching literature, language and composition in the secondary schools. Includes principles for the selection of literature for high school students and the relationship of language and composition to the total secondary program. Teaching techniques are a point of emphasis. To be taken in the fall trimester, prior to student teaching.

Prerequisite: Consent of instructor or completion of 90 credits.

Engl 496 SENIOR SEMINAR (4-0) 4

Advanced study and research in selected topics. Fall and winter terms.

Prerequisites: At least two overview courses and at least two topics courses and any Group W course, or consent of instructor.

Engl 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. On demand.

Prerequisite: Consent of instructor.

[Return to List](#)

Environmental Policy Minor

(See "[Environmental Policy Minor](#)" in the School of Arts and Sciences section of this catalog.)

[Return to List](#)

Exercise Science

ES 100 FITNESS AND WELLNESS (1-0) 1

A 7 1/2 week course that examines the basic physiological principles of exercise and nutrition. Students will acquire strategies for the development of a personal fitness plan, effective weight management, stress management, and how to make healthy lifestyle choices. Fall and winter terms.

ES 130 MOTOR SKILLS FOR PROFESSIONALS

(Softball/Volleyball) (0-2) 1

This course is designed to improve motor skills in the team sports of volleyball and softball. Rules and strategies will be included. Fall and winter terms.

ES 131 MOTOR SKILLS FOR PROFESSIONALS

(Soccer/Basketball) (0-2) 1

A course in motor skill development in the team activities of soccer and basketball. Fall and winter terms.

ES 132 MOTOR SKILLS FOR PROFESSIONALS

(Tumbling and Stunts/Fundamental Motor Skills) (0-2) 1

A course designed to improve fundamental motor skills and to develop tumbling skills. Fall and winter terms.

ES 133 MOTOR SKILLS FOR PROFESSIONALS

(Badminton/Tennis) (0-2) 1

A course for skill development in the racquet games of badminton and tennis. Fall and winter terms.

ES 134 MOTOR SKILLS FOR PROFESSIONALS

(Dance/Aquatics) (0-2) 1

A course for skill development in the physical activities of dance and aquatics. Fall and winter terms.

ES 135 MOTOR SKILLS FOR PROFESSIONALS

(Fitness/Outdoor Leisure Pursuits) (0-2) 1

An introduction to and development of skills related to outdoor leisure and fitness activities. Fall and winter terms.

ES 150 SOCIOCULTURAL FOUNDATIONS OF HUMAN MOVEMENT (3-0) 3

An introductory study of the historical, cultural, sociological and philosophical aspects of exercise, sport and human movement. Fall and winter terms.

ES 165 COMMUNITY FIRST AID AND SAFETY (2-0) 2

Study and practice of American Red Cross first aid/CPR procedures in handling common injuries, accidents and medical emergencies. Fall and winter terms.

ES 185 INTRODUCTION TO COACHING - (ASEP) (2-0) 2

This introductory course is the American Sport Education Program's Sport Science Coaching Course. It covers the areas of Coaching

Philosophy, Sport Psychology, Sport Pedagogy, Sport Physiology, Sport Management and Sport Specific Planning. The course covers what is important for a coach to know and presents the material in a manner that is of practical value to a coach. A series of videotapes helps create an atmosphere of discussion which gives students practical ways of handling coach/player relationships and situations. The student who passes the ASEP exam will receive ASEP certification which is rapidly becoming the required coaching certification. Fall and winter terms.

ES 186 PHYSICAL CONDITIONING (0-2) 1

This course introduces the student to method and techniques in the area of Physical Conditioning. It will emphasize the major areas: power development, speed enhancement and aerobic/anaerobic conditioning. Emphasis will be placed on the student's ability to instruct in these areas. Fall and winter terms.

ES 220 CLINICAL IN BASIC ATHLETIC TRAINING (0-2) 1

This course is designed to provide the student with an introduction to the clinical aspects of the athletic training profession. The student will observe athletic training in the college, high school and private clinical settings. Students will be instructed in common taping applications and training room management. (Includes a minimum of 50 hour clinical component.) Fall and winter terms.

Prerequisites: ES 224 and ES 165 or concurrent enrollment in both courses.

ES 224 BASIC PRINCIPLES OF ATHLETIC TRAINING (3-0) 3

An introduction to the field of athletic training. Professional opportunities in this field are discussed. Students will develop a basic understanding of athletic injuries as they relate to prevention, nature and causes. Fall and winter terms

Prerequisite: Bio 121B.

ES 225 TECHNIQUES OF COACHING FOOTBALL (2-0) 2

Classroom instruction directed toward the various phases of American football; history, defensive theory, strategy, personnel, offensive theory, the kicking game, practice organization, relationship and influence of teachers, parents, booster clubs and news media. Winter term.

ES 226 TECHNIQUES OF COACHING VOLLEYBALL (2-0) 2

The study of history, strategies, rules, methods, and organization involved in coaching volleyball. Both theoretical and practical applications will be developed. Winter term.

ES 227 TECHNIQUES OF COACHING BASKETBALL (2-0) 2

The analysis of the game of basketball in theory and application with special emphasis upon teaching and coaching the game. Development of offense, defense, and special situations for both prospective coaches and enthusiasts. Fall term.

ES 230 TECHNIQUES OF COACHING SOFTBALL (2-0) 2

Study of principles, methods, techniques and strategies involved in coaching of softball. Offered on demand.

ES 231 TECHNIQUES OF COACHING SOCCER (2-0) 2

The study of principles, methods, techniques and strategies involved in coaching soccer. Offered on demand.

ES 233 OFFICIATING OF FOOTBALL (1-0) 1

Designed to provide individuals with the rules, skills and mechanics of officiating. Includes rules of the National Federation of High Schools, National Association of Intercollegiate Athletics and National Collegiate Athletic Association. Fall term.

ES 234 OFFICIATING OF VOLLEYBALL (1-0) 1

Instruction in the rules and practice of the mechanics and skills of officiating volleyball at the high school and college levels. Fall term, alternate years.

ES 235 OFFICIATING OF BASKETBALL (1-0) 1

Designed to teach the student the rules, skills and mechanics of officiating basketball. Winter term.

ES 237 OFFICIATING OF SOFTBALL (1-0) 1

Designed to provide students with the rules, skills and mechanics for umpiring in softball. Offered on demand.

ES 238 OFFICIATING OF SOCCER (1-0)1

Designed to provide students with the rules, skills and mechanics for officiating soccer. Offered on demand.

ES 240 CLINICAL IN MANUAL MUSCLE TESTING (0-2) 1

This course will provide the student with the necessary vocabulary and professional writing skills necessary to document and comprehend a complete muscular evaluation. The student will learn and demonstrate actual muscle testing including origins, insertions, actions and specific tests. (Includes a 200 hour minimum clinical component.)

Prerequisites: ES 224, ES 283, or concurrent enrollment, and consent of instructor.

ES 243 PERSONAL HEALTH (3-0) 3

This course is a study of personal health and wellness. Every effort will be made to create a practical approach toward developing awareness, education, and growth that will allow for enhanced personal wellness. The foundation of this course is based on self-responsibility as it applies to the various dimensions of health that integrate body, mind, and spirit. Fall and winter terms.

ES 260 LIFEGUARD TRAINING (AMERICAN RED CROSS) (1-2) 2

Students will learn American Red Cross professional lifeguard skills and gain knowledge needed to prevent and respond to aquatic emergencies.

Prerequisite: Students must successfully pass a swimming skills test in order to remain enrolled in the course.

ES 261 WATER SAFETY INSTRUCTOR (1-2) 2

Water safety instructors course designed to train and certify (Red Cross) teachers of swimming. Fall term.

ES 262 LIFEGUARD TRAINING INSTRUCTOR (1-2) 2

This course will train and certify instructors to teach American Red Cross Lifeguard Training, CPR for the professional rescuer, community water safety, lifeguarding instructor aid and other water safety courses.

Prerequisite: ES 260.

ES 283 EVALUATION OF ATHLETIC INJURIES (3-0) 3

This course will present the student with the techniques required to provide a thorough evaluation of athletic injuries. A standard model for evaluation will be presented. The cognitive aspects of evaluation will be discussed and the psychomotor tasks practiced. Winter term.

Prerequisite: ES 224, and BIO 121 or concurrent enrollment.

ES 300 SPORTS IN FILM (2-0) 2

This course will take a conceptual and sociological look at sport through its films both contemporary and classic. Viewings, discussions, debates, critical reviews and writings will be used to explore the themes, issues and methods used in selected films and the interrelationships of sport, human movement, society and film.

ES 301W CURRENT ISSUES IN SPORT (3-0) 3

This course will address critical issues in writing in exercise science using issues in sport as a basis for writing, reading, and discussion. Special emphasis is placed on developing skills necessary for becoming successful writers in the field. Instruction and evaluation focuses on the writing of research papers, poster presentations, journal article reviews, laboratory reports, essays and oral presentations.

Prerequisites: Comp 150, LIB 150, junior standing.

ES 302W ISSUES IN HEALTH AND WELL-BEING (3-0) 3

This course will address issues in writing in exercise science using the topics of Health and Well-Being as a basis for writing, reading and discussion. Students will explore and critically analyze these topics and share their perspectives through discourse mediums used by professionals in the fields of Health and Exercise Science, such as research papers, poster presentations, journal article reviews and proposals, computer/video presentations and oral presentations.

Prerequisites: Comp 150, LIB 150, junior standing.

ES 312 ADMINISTRATION OF INTRAMURAL PROGRAMS (1-2) 2

The course will give the student information in all pertinent areas of intramural administration. In addition, each student will have "hands on" experience working in the Fort Lewis College Intramural and Recreation Program. Offered on demand.

ES 320 CLINICAL IN MANUAL THERAPY (0-2) 1

This course will provide the athletic training student with the skills necessary to adequately perform therapeutic massage, joint mobilization and manipulation and therapeutic exercise. The physiologic effects of massage, connective tissue massage and various techniques of application will be discussed and practiced. The theory and principles of joint mobilization and manipulation will also be discussed and practiced. (Includes a 200 hour minimum clinical component.) Fall term.

Prerequisite: ES 224 and consent of instructor.

ES 330 ANATOMICAL KINESIOLOGY (3-0) 3

An in-depth study of the basic body movements; osteology, applied myology, spatial relations of muscles to joints, aggregate muscle action, kinesiology constructs of summation of internal forces, aerodynamics and hydrodynamics, techniques for cinematographic and noncinematographic analysis of sport skills. Fall and winter terms.

Prerequisite: Bio 121B.

ES 332 BIOMECHANICAL ANALYSIS AND APPLICATION (2-0) 2

The study of methods, mechanics and analysis of movement as applied to the structure and function of the human organism. Fall and winter terms.

Prerequisite: ES 330.

ES 340 MOTOR LEARNING AND CONTROL (3-0) 3

Concepts involved in learning motor skills, the individual variables which affect this learning, and the practice and techniques for improving motor performance. Fall and winter terms.

Prerequisite: Psych 157D and junior standing.

ES 350 MEASUREMENT AND EVALUATION (3-0) 3

Basic statistical procedures necessary to analyze and interpret data collected from tests in exercise science. The selection and administration of testing instruments that measure objectives from the tee domains of human performance. Fall and winter terms.

Prerequisite: Junior standing and consent of instructor.

ES 353 NUTRITION FOR FITNESS AND SPORT (2-0) 2

A study of the principles of nutrition as a science, with special emphasis on the importance of nutritional decisions for the physically active individual. Food choices, energy sources, nutritional analysis, body weight and composition, weight maintenance and optimal nutrition for physical performance are topics to be discussed. Fall and winter terms.

Prerequisite: Bio 121B or consent of instructor.

ES 354 ADAPTED EXERCISE (2-2) 3

Course includes an overview of the legislation impacting adapted exercise programs; exceptional conditions and disabilities affecting individuals in exercise programs, assessment tests and diagnostic instruments. It includes practical experience in teaching exceptional students in diverse exercise settings, and arranging and prescribing a program to meet the needs of students with specific disabilities. Fall and winter terms.

ES 360 EXERCISE PHYSIOLOGY (4-0) 4

This course deals with the physiological principles underlying specific aspects of physical fitness and human exercise performance. Emphasis is placed on the nature of the metabolic, muscular, cardiovascular and pulmonary responses to various forms of short- and long-term workouts as well as specific adaptations to exercise training. Where possible, the potential health-related aspects of exercise training will be explored. Fall and winter terms.

Prerequisite: Bio 121B.

**ES 363 COMPUTER APPLICATIONS IN EXERCISE SCIENCE
(2-2) 3**

This course is designed to provide students with a general introduction to computer use in Exercise Science including hands-on experience. Fall and winter terms.

Prerequisite: Exercise Science major.

**ES 370 METHODS OF TEACHING PHYSICAL EDUCATION IN
THE ELEMENTARY SCHOOLS (3-0) 3**

Emphasis will be upon values, principles, objectives, growth and development characteristics, curriculum construction, and general methods of organizing and teaching physical education in grades K-6. Fall and winter terms.

Prerequisite: Ed 307, Ed 308 or Ed 309 and junior standing.

ES 375 PSYCHOLOGY OF SPORT (2-0) 2

A study of various psychological phenomena that influence sport and exercise performance, *i.e.*, personality traits, anxiety, stress, motivation, aggression, group dynamics (cohesion). Fall and winter term.

Prerequisite: Psych 157D.

**ES 380 METHODS OF TEACHING PHYSICAL EDUCATION IN
SECONDARY SCHOOLS (2-0) 2**

A teacher candidate course designed to familiarize the student with methods and materials for successful teaching at the junior high and senior high levels. Emphasis is upon planning objectives, growth and development characteristics, curriculum construction, organization, and today's issues and current trends. Fall and winter terms.

Prerequisite: Ed 309 and junior standing.

ES 385 THERAPEUTIC MODALITIES (2-0) 2

The theoretical basis of therapeutic modalities will be explored as well

as the clinical application of those modalities in the treatment of athletic injuries. Winter term, alternate years.

Prerequisite: ES 283.

ES 387 RECONDITIONING OF ATHLETIC INJURIES (3-0) 3

Students will examine the theory and physiological basis of rehabilitating athletic injuries. Practical experience in a clinical-type setting will be used to help students develop skills of exercise testing, manual testing, PNF, goniometry and program planning. Winter term, alternate years.

Prerequisite: ES 224, Bio 121B and ES 324.

ES 420 CAPSTONE CLINICAL IN ATHLETIC TRAINING (0-2) 1

This course will function to prepare the student for the National Athletic Trainers' Board of Certification Exam by "bringing it all together." Students will be given practice in all aspects of the Certification Examination. (Includes a 200 hour minimum clinical component.) Winter term.

Prerequisite: Consent of instructor.

ES 424 ADVANCED ATHLETIC TRAINING ((3-0) 3

This course is designed to address a variety of topics as they relate specifically to athletic training. Topics covered will include, but not limited to, Psychology of Injury, Organization and Administration of Athletic Training programs, Pharmacology, Drug Testing, Counseling the Injured Athlete, Disease and Illness and its Effects on Athletic Performance. Fall term.

Prerequisite: Senior standing.

ES 425 CLINICAL IN MEDICAL SCIENCE (0-2) 1

This course will provide the athletic training student with the skills and clinical proficiencies necessary to recognize the signs, symptoms and predisposing conditions associated with disease and the utilization of pharmaceutical products. The course focuses on identifying and documenting medications commonly prescribed to athletes and others

involved in physical activity. The course also provides the students practice in identification of common medical conditions.

ES 450 INTERNSHIP IN FITNESS/LEISURE 3

Directed experiences performing professional duties in a fitness, health promotion or leisure organization setting. Specific requirements will depend upon the supervising college faculty member. The intern's performance will be evaluated by both the organization's supervisor and the assigned college faculty member. Fall and winter terms.

Prerequisites: Senior standing and declared Fitness/Leisure Concentration. Must have approval of Department Chair.

ES 480 ADMINISTRATION OF PROGRAMS IN EXERCISE SCIENCE (3-0) 3

Relationships, procedures and problem-solving approaches in effective organization and administration of exercise, fitness and sport programs. Budget, use of facilities and equipment, legal responsibilities, public relations, policy development and supervision are analyzed. Fall and winter terms.

Prerequisite: Junior standing.

ES 496 SENIOR SEMINAR AND RESEARCH IN EXERCISE SCIENCE (2-0) 2

Discussions and inquiries dealing with contemporary issues, trends and problems in exercise science. An individual student research project is required. Fall and winter terms.

Prerequisite: ES 350 and senior standing.

ES 499 INDEPENDENT STUDY 1-3

Opportunity to investigate a significant problem through laboratory or library research under the supervision of a faculty member. Fall and winter terms.

Prerequisites: Senior standing and approval of department chair and instructor after presentation of a problem outline.

[Return to List](#)

Forestry

For 218 FUNDAMENTALS OF ECOLOGY (3-3) 4

A study of the fundamental relationships among organisms and their environments. One all-day Saturday field trip is required. Same as Bio 220. Fall and winter terms.

Prerequisites: Bio 206 or 207, Math 121B, and Math 201B or Psych 241B.

[Return to List](#)

French

ML 147 ELEMENTARY FRENCH I (4-0) 4

A course in grammar, prose composition, reading and conversation.

ML 148A1 ELEMENTARY FRENCH II (4-0) 4

Further study of French with emphasis on reading, composition and conversation.

Prerequisite: ML 147 or consent of instructor.

ML 247A1 INTERMEDIATE FRENCH I (3-0) 3

A course in second-year French with emphasis on grammar review, reading, writing and conversation.

Prerequisite: ML 148 or consent of instructor.

ML 248A1 INTERMEDIATE FRENCH II (3-0) 3

Continuation of ML 247.

Prerequisite: ML 247 or consent of instructor.

ML 301A1 FRENCH COMPOSITION AND SYNTAX (3-0) 3

Emphasis on advanced reading, grammar and composition.

Prerequisite: ML 248 or consent of instructor.

ML 303A1 FRENCH CONVERSATION (3-0) 3

Emphasis on speaking everyday French to increase students' abilities in maintaining ordinary conversations concerning current events and French Culture.

Prerequisite: ML 248 or consent of instructor.

ML 305A1 SURVEY OF FRENCH LITERATURE (3-0) 3

An historical and literary survey of the principal French works of literature from the Middle Ages to the 20th century.

Prerequisite: ML 248 or consent of instructor.

ML 308A1 TOPICS IN FRENCH LITERATURE (3-0) 3

Topics will vary; the course may be repeated for a different topic. Offered on demand.

Prerequisite: ML 248 or consent of instructor.

ML 309A1 BUSINESS FRENCH (3-0) 3

The goal of this course is to familiarize students with the forms and vocabulary of the French business world such as: economics, accounting, manufacturing, tourism, business correspondence, reports, marketing and transportation.

Prerequisite: ML 301 or consent of instructor.

ML 405A1 SEMINAR IN FRENCH (3-0) 3

Advanced reading and research in selected areas of French Studies.

Prerequisite: ML 301 or consent of instructor.

[Return to List](#)

GnSc 251B SURVEY OF CHEMISTRY AND BIOLOGY (3-2) 4

This course surveys the great ideas of modern biology and modern chemistry. The historical development of science is discussed along with the importance of the ideas in the context of our modern technological society. Modern topics at the interface of biology and chemistry are discussed with particular emphasis on biomedical issues. This course is especially useful for non-science students intending to seek teaching certification, or who wish to fulfill their science requirements with a moderately rigorous but brief survey of these two sciences. It would also be a fundamental introduction to biology and chemistry for students considering biomedical studies but who have insufficient preparation in basic biology and basic chemistry.

Prerequisite: Comp 150 and LIB 150.

[Return to List](#)

General Studies

General Studies courses are focused on topics that are from the perspective of more than one discipline. These courses do not fit an academic area represented by a single department or program.

GENERAL STUDIES 101 and 102**Human Heritage I and II (4-0) 4**

This two-term course is a study of Western, Chinese and Native American intellectual traditions. The course is designed to help students understand how our cultural traditions influence our ways of looking at the world and how studying cultures other than our own expands and challenges our frame of reference. The course emphasizes intellectual, artistic, political, scientific, religious, and economic aspects of the cultures from selected periods in history. Human Heritage II is a continuation of Human Heritage I. Students must complete both courses to fulfill designated distribution requirements (A1, C, and E). This course transfers to all Colorado colleges and universities in fulfillment of general education requirements.

GENERAL STUDIES 151 (14-11) 16**INTEGRATED LEARNING PROGRAM**

This course integrates the humanities, the social sciences, and the sciences around broad topics of academic interest. The particular categories of general education courses that this course satisfies are given below. Particular topics may differ each year.

Group A: Language and the Arts

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human expression through literature and language with special emphasis on developing aesthetic sensitivity and creativity. The works of literature considered will vary each year.

Group B: Quantitative and Natural Sciences

The Integrated Learning Program awards the equivalent of one course with lab which provides an understanding of the physical world and some of the formal, theoretical and empirical methods by which it is studied.

Group C: Foundations of Culture

The Integrated Learning Program awards the equivalent of one course which provides an understanding of fundamental values of world views through the study of human society's past, its formative ideas, and its alternative cultural expressions.

Group D: Social Structure and Behavior

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human beings, both as individuals and as socially, politically and economically related groups.

GENERAL STUDIES 375 EUROPEAN STUDIES ON EXCHANGE (3-18)

This course provides appropriate credit for studies completed in one of FLC exchange programs with European Postsecondary schools. It may be repeated once for credit. The exact number of credit hours will be determined by the appropriate Dean after review of the study program completed.

GENERAL STUDIES 495 Environmental Colloquium (4-0) 4

This course which is a capstone course for the Environmental Policy

Minor, involves conducting and reporting on an integrative project in weekly meetings involving several faculty members from across the academic disciplines. The project can involve research, assessment or analysis of ongoing programs, policy or proposals for action. This student-conducted project provides a Service Learning opportunity for students.

Prerequisite: Junior standing, Psych 241B or Math 201B or BA 253B and consent of instructor.

GENERAL STUDIES 496

Interdisciplinary Senior Seminar (2-4)

An interdisciplinary seminar for graduating seniors, this course provides a capstone experience of broad intellectual inquiry, including a focus on critical reading and thinking, problem solving, and the written expressions of ideas.

Prerequisite: Senior standing.

[Return to List](#)

Geography

Geog 250 CARTOGRAPHY: THE SCIENCE AND ART OF MAPMAKING (3-3) 4

An introduction to the principles of cartography including map use, cartographic communication, geographic visualization, and map production. Laboratory exercises will stress map construction and interpretation using PC-based computer mapping software.

Prerequisite: Sophomore standing.

Geog 271D WORLD GEOGRAPHY (3-0) 3

This course will introduce the student to the physical, cultural, political, psychological and resource factors of geography and how they affect the various peoples of the world. Fall, winter and first summer session.

Geog 300 INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS (2-2) 3

An introduction to the basic concepts, technologies, and applications of Geographic Information Systems (GIS). Course and lab focus on vector-based GIS and its applications in the physical sciences, social sciences, and business.

Prerequisites: Geog 250 or consent of instructor.

Geog 320B NATURAL REGIONS OF NORTH AMERICA (3-0) 3

A survey of the origin and nature of the landscapes of North America. Emphasis is placed upon the relationships between natural resources, topography, geology, climate and soils. Map work is required.

Prerequisite: Geol 113B or 110B.

Geog 400 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (2-6) 4

Advanced study of concepts and applications of Geographic Information Systems (GIS). Course and lab focus on raster-based GIS and its applications in the physical sciences, social sciences, and business. Two weekly lab sessions include both independent work by the student and work on GIS exercises introduced by the instructor.

Prerequisite: Geog 300 or consent of instructor.

Geog 495 GIS COLLOQUIUM (2-2) 3

A colloquium and seminar for students completing the GIS minor. Emphasis is on conducting and reporting on a GIS analysis in the student's area of expertise.

Prerequisite: Geog 400.

[Return to List](#)

Geology

Geol 110B EARTH SCIENCE (3-0) 3

A review of the earth sciences, including geology, oceanography, meteorology and astronomy. Course intended for non-science majors. Fall and winter terms.

Geol 111B ANCIENT LIFE (3-0) 3

An examination of Earth's ancient life, its origin, the record in the rocks, and the processes and mechanisms that have transformed it through time. Winter term.

Geol 113B PHYSICAL GEOLOGY (3-3) 4

The study of geologic processes and materials within the Earth's interior and on the Earth's surface. Laboratory work on minerals, rocks and maps. Field trips. Fall, winter and summer terms.

Geol 114B HISTORICAL GEOLOGY (3-3) 4

The geologic history and development of life on Earth. Laboratory work on rocks, fossils and maps. Field trips. Winter term.

Prerequisite: Geol 113B.

Geol 120 GEOLOGIC FIELD EXCURSIONS (0-3) 1

This is a field lab. We will visit and discuss various geologic points of interest in the Durango and Four Corners region. There will be at least one weekend field trip. There is a field trip fee. Fall and winter terms.

Prerequisite: Geol 110B or Geol 113B or Geol 150B, or concurrent enrollment in one of these courses.

Geol 150B GEOLOGY OF THE SOUTHWEST (3-0) 3

A survey of the historical, economic and structural geology and geomorphology of the Southern Rockies, Colorado Plateau, and the Basin and Range Provinces. Emphasis is on classic geologic areas, national parks, natural resource development and problems associated with human activity in this delicate environment. Fall and winter terms.

Geol 180B INTRODUCTION TO OCEANOGRAPHY (3-0) 3

All of Earth's residents, even those of us in landlocked Colorado, are profoundly influenced by the world's oceans. Using a multidisciplinary science approach, this course looks at the physical aspects of oceans, their aquatic life and environmental pressures on the oceans affecting us all. Fall term.

Geol 202 GEOLOGIC METHODS (1-3) 2

An introduction to basic field and computer techniques used in geology. Fall term and first summer session.

Prerequisite: Geol 113B.

Geol 207 MINERALOGY (2-3) 3

The elements of crystallography and the classification and identification of minerals. Fall term.

Prerequisites: Geol 113B and completion of, or concurrent enrollment, in Chem 150B.

Geol 208 OPTICAL MINERALOGY (2-6) 4

Procedures for identification of minerals in thin section, with emphasis on the optical determination of rock-forming minerals. Winter term.

Prerequisite: Geol 207.

Geol 210 PETROLOGY (2-3) 3

The megascopic study of igneous, sedimentary and metamorphic rocks with emphasis on the physical and chemical conditions governing the origins, occurrences and associations of various rock types. Winter term.

Prerequisite: Geol 207.

Geol 323 GEOMORPHOLOGY (3-3) 4

The classification, description, nature, origin and development of present landforms and their relationships to underlying structures. Field trips. Fall term.

Prerequisite: Geol 202.

Geol 325 INTRODUCTION TO REMOTE SENSING (2-3) 3

Introduction to the principles of remote sensing. Includes the study of the electromagnetic spectrum and the geologic interpretation of visible, infrared and microwave imagery from airborne as well as spaceborne

platforms. Winter term. Alternates with Geol 430.

Prerequisites: Geol 113B, Math 110B, and junior standing.

Geol 332 PLATE TECTONICS (3-0) 3

An introduction to crustal plates, their boundaries and their interactions given in terms of classic geological settings throughout the world. Fall term.

Prerequisites: Geol 113B, Math 121B.

Geol 333 INTRODUCTORY PALEONTOLOGY (3-3) 4

The systematic study of fossils, primarily invertebrate fossils, used in the identification and correlation of geologic formations. Winter term, alternate years.

Prerequisite: Geol 114B or consent of instructor.

Geol 337 STRUCTURAL GEOLOGY (3-3) 4

The geometric, kinematic and dynamic analysis of structural features in the Earth's crust. Techniques in field mapping will be emphasized throughout the course. Fall term.

Prerequisites: Math 121B, Geol 113B and 202.

Geol 361 STRATIGRAPHY AND SEDIMENTATION (2-3) 3

Sediments and sedimentary rocks - their characteristics and classification; sedimentary processes, tectonics and sedimentation. Stratigraphy - its history, stratigraphic nomenclature, facies relationships and correlation. Fall term.

Prerequisites: Geol 207 and 210.

Geol 363 SEDIMENTARY PETROLOGY (3-2) 4

The origin, occurrence and classification of sedimentary rocks. Winter term. Alternates with Geol 364.

Prerequisites: Geol 208, 210 and 361.

Geol 364 IGNEOUS AND METAMORPHIC PETROLOGY (3-3) 4

The origin, occurrence, classification and petrography of igneous and metamorphic rocks. Winter term. Alternates with Geol 363.

Prerequisites: Geol 208 and 210.

Geol 371 INTRODUCTION TO GEOPHYSICS (3-3) 4

The fundamentals of geophysics, particularly gravitational, magnetic and seismic methods. Fall term. Alternates with Geol 332.

Prerequisites: Geol 113B, Math 121B.

Geol 380W TECHNICAL WRITING IN GEOLOGY (3-0) 3

Technical writing in the geological sciences will focus on the preparation of geological reports, analysis of data, resumes, proposals and bibliographic documentations. Winter term.

Prerequisites: Comp 150, LIB 150 and junior standing.

Geol 401B NATURAL RESOURCES AND THE ENVIRONMENT (3-0) 3

A critical study of the need for development of fossil fuel and industrial mineral deposits and the need to preserve regions in their natural state. Fall term.

Prerequisite: Geol 113B or consent of instructor and junior standing.

Geol 405 GEOLOGIC DATA ANALYSIS AND MODELING BY COMPUTER (2-6) 4

Use of the computer to help transform geologic data into information. Covers computer fundamentals, univariate and multivariate statistics, contouring/mapping algorithms, trend surface analysis, variograms and kriging. Fall term.

Prerequisites: Geol 202 and junior or senior standing.

Geol 409 ECONOMIC MINERAL DEPOSITS (3-3) 4

Principles of ore genesis; geologic occurrence of uranium and metallic mineral deposits; mine tours. Winter term. Alternates with Geol 410.

Prerequisites: Geol 337, 364 and 420, or consent of instructor.

Geol 410 PETROLEUM GEOLOGY (2-3) 3

The origin, migration and entrapment of petroleum, and the methods employed in exploration and development of petroleum occurrences. Winter term. Alternates with Geol 409.

Prerequisites: Geol 337 and 363, or consent of instructor.

Geol 415 REGIONAL GEOLOGY OF THE UNITED STATES (3-0) 3

An examination of the stratigraphy, tectonic setting and geologic evolution of the major physiographic units of the United States. Fall term. Alternates with Geol 461.

Prerequisites: Geol 337 and 361.

Geol 420 INTRODUCTION TO GEOCHEMISTRY (3-0) 3

Behavior of the common rock-forming oxides in endogenic and exogenic processes; isotope geochemistry; geochemical exploration. Winter term. Alternates with Geol 435.

Prerequisites: Geol 207, 210 and 405, or consent of instructor.

Geol 430 ENGINEERING GEOLOGY (3-0) 3

Application of geological sciences to the location, design, construction, operation and maintenance of engineering works. Winter term. Alternates with Geol 325.

Prerequisites: Geol 210, Math 121B.

Geol 435 GROUNDWATER GEOLOGY (3-0) 3

The qualitative and quantitative aspects of the occurrence of water in the ground. Winter term. Alternates with Geol 420.

Prerequisite: Geol 361.

Geol 441 FIELD GEOLOGY 6

The fundamental procedures and practices in geologic mapping. Summer term.

Prerequisites: Geol 114B, 202, 210 and 337, or consent of instructor.

Geol 442 FIELD STUDIES 5

Intensive field work on various geological problems emphasizing interpretation of petrologic and structural relationships. Summer term.

Prerequisite: Senior standing in geology or consent of instructor.

Geol 461 DEPOSITIONAL SYSTEMS (2-3) 3

Modeling of sedimentary deposits with respect to time and the development of stratigraphic sequences. Fall term. Alternates with Geol 415.

Prerequisite: Geol 361.

Geol 496 SENIOR SEMINAR (2-0) 2

Emphasis is on the preparation, writing, and public presentation of the senior thesis project. Field research is commonly central to the project and must be initiated, in consultation with department faculty, prior to the course. One credit hour of independent study credit (Geol 499) will probably be necessary to prepare for the seminar. Career preparation activities are also part of the seminar. Fall and winter terms.

Prerequisite: Geol 380W, senior standing or consent of instructor.

Geol 499 INDEPENDENT STUDY 1-3

Individual research under the supervision of a faculty member. Offered on demand.

Prerequisite: Consent of department chair.

German

ML 123 ELEMENTARY GERMAN I (4-0) 4

A course in grammar, pronunciation, reading and conversation. Fall term.

ML 124A1 ELEMENTARY GERMAN II (4-0) 4

Continuation of ML 123. Winter term.

Prerequisite: ML 123 or consent of instructor.

ML 128 CONVERSATION I - GERMAN (1-0) 1

Instruction in everyday conversation. Optional.

Prerequisite: Students must be enrolled in ML 123 Elementary German I, or obtain consent of instructor.

ML 129 CONVERSATION II - GERMAN (1-0) 1

Continuation of ML 128. Optional.

Prerequisite: Students must be enrolled in ML 124A1 Elementary German II, or obtain consent of instructor.

ML 223A1 INTERMEDIATE GERMAN I (3-0) 3

Second-year German with emphasis on reading, composition and conversation. Fall term.

Prerequisite: ML 124 or consent of instructor.

ML 224A1 INTERMEDIATE GERMAN II (3-0) 3

Continuation of ML 223. Winter term.

Prerequisite: ML 223 or consent of instructor.

ML 332C GERMAN CULTURE (3-0) 3

German Culture is an inquiry course exploring the question of German

national identity through an examination of German culture. The course includes a historical overview of important trends in German culture and politics, but concentrates on present-day unified Germany. The language of instruction is German.

Prerequisite: Sophomore standing.

ML 333A1 ADVANCED GERMAN COMPOSITION AND CONVERSATION (3-0) 3

Emphasis on advanced reading and conversation as well as on grammar and composition.

Prerequisite: ML 224 or consent of instructor.

ML 334A1 TOPICS IN GERMAN LITERATURE (3-0) 3

Topics will vary; may be repeated for a different topic. Offered on demand.

Prerequisite: ML 224 or consent of instructor.

ML 335A1 SEMINAR IN GERMAN (3-0) 3

Advanced reading and research in selected areas of German Studies.

Prerequisite: ML 224 or consent of instructor.

History

Hist 140CE SURVEY OF AFRICAN HISTORY I (3-0) 3

An overview of important historical trends in Africa from A.D. 1000 to the 19th century. Themes of technological innovation, social change, state and empire building, the spread of Islam, international commerce, and the slave trade receive emphasis. Fall term.

Hist 141CE SURVEY OF AFRICAN HISTORY II (3-0) 3

A study of 19th and 20th century Africa. Special attention is paid to the growing importance of Africa in world affairs and to links with the peoples of African descent in the Americas. Winter term.

Hist 160C SURVEY OF WESTERN CIVILIZATION I (3-0) 3

Examines the origins of the institutions and beliefs of western civilization from the earliest civilizations in Mesopotamia and Egypt, tracing the development of these beliefs and institutions through Greece and Rome and their preservation and enhancement in the early medieval period of European history. Fall and winter terms.

Hist 170CE SURVEY OF EAST ASIAN CIVILIZATION I (3-0) 3

This course surveys the history of East Asia (China, Japan and Korea) from ancient times to the mid-nineteenth century. It includes an introduction to Asian philosophies, religions, cultures, politics, and

societies. Students will gain a general understanding of a region that is the longest surviving human civilization still in existence. Fall term.

Hist 171CE SURVEY OF EAST ASIAN CIVILIZATION II (3-0) 3

This course studies modern East Asia from the mid-19th century to the present. It examines the interactions between Western power and influence and Asian nationalism. An important theme is to discover why Japan and China took different paths in modern times. Winter term.

Hist 175CE INTRODUCTION TO LATIN AMERICAN HISTORY (3-0) 3

A broad survey of key issues essential to an understanding of Latin American history from the 15th century unto the present: the conquest, ethnic relations, African slavery, creole nationalism, mercantilism, scholasticism, the Church, the Bourbon reforms, political independence, liberalism, caudillaje, the military, economic dependency, revolutionary movements, and inter-American relations. The course is designed as an introduction to Latin America for both those who intend to continue to study the subject and those who want a general knowledge of the history of the region. Fall term.

Hist 181C U.S. ENVIRONMENTAL HISTORY (3-0) 3

This course explores the environmental history of the U.S. from pre-European contact tough today. The course will look at how the land and culture(s) interacted to reorganize and redefine one another, the relationship between environmental and cultural change, and how the present is linked to past. Fall term.

Hist 261C WESTERN CIVILIZATION II, 1350 TO PRESENT (3-0) 3

A study of the transition of European society from medieval times tough the Renaissance to the modern era, noting the profound economic, social and political changes which are expressed in cultural, political and intellectual revolutions, dominance of Europe and America in the world, and devastating war on a scale unknown before. Fall and winter terms.

Hist 270CE COLONIAL LATIN AMERICA (3-0) 3

An overview of important historical trends in the Spanish and

Portuguese empires in the Americas. The course will focus on the cultural developments that resulted from the contact and integration of the European and American civilizations in the 16th century, and it will give particular emphasis to those sectors of colonial society that have continued to play a vital role unto the present, thus setting the stage for an examination of the events and conditions that led to the movements for independence in the early 19th century and the formation of the modern nations of the region. Recommended as a foundation course in Latin American history. Fall term.

Hist 271CE LATIN AMERICA SINCE INDEPENDENCE (3-0) 3

An examination of the major cultural and political developments in Latin America from the late 18th century to the present. The course will focus by necessity on the larger and more influential countries of the region in an attempt to identify and understand historical patterns common to all areas. Recommended as a foundation course in 19th and 20th century Latin American history. Recommended preparation: Hist 270CE. Winter term.

Hist 280C SURVEY OF U. S. HISTORY, 1600-1877 (3-0) 3

A survey of topics in American history from the founding of the first successful English colony through Reconstruction. The course will explore the European settlement of North America, the Revolution, the creation of the republic, the reforms and cultural renaissance of the 1840s, the Civil War, Reconstruction, and the Indian wars of the 1860s and 1870s. Fall and winter terms.

Hist 281C SURVEY OF U. S. HISTORY, 1877 TO THE PRESENT (3-0) 3

A survey of American History from the age of enterprise to the present. The topics covered include the modernization of the economy, the development of American foreign policy, the evolution of the liberal state, and the emergence of modern conservatism, and the cultural and social movements that have shaped contemporary America. Fall and winter terms.

Hist 305CE MESOPOTAMIAN MYTH/RELIGION (3-0) 3

A study of ancient Near Eastern myth/religion from the beginning of written history in Sumer (Mesopotamia) around 3000 B.C. into the early post-exilic period of the Hebrew Bible (Old Testament) in Israel around 500 B.C. Interconnections, influences, and innovations will be explored.

Summer term.

Prerequisite: Hist 160C or consent of instructor.

Hist 306C ANCIENT WOMEN'S RELIGIONS (4-0) 4

A study of ancient women's religious practices and beliefs from Neolithic Europe, Sumer and the ancient Near East, the Greco-Roman world and early Christianity. Fall term.

Prerequisite: Hist 160C or consent of instructor.

Hist 308C RISE OF CHRISTIANITY (4-0) 4

A study of the historical Jesus of Nazareth, Judaism, and first century Jewish Palestine under Roman domination. The development of Christianity and the struggle between orthodox and gnostic Christians culminating in the final orthodox victory around 400 A.D. will be studied in depth. Winter term.

Hist 311C COLONIAL AND REVOLUTIONARY AMERICA: 1492-1789 (4-0) 4

The course focuses on Colonial America from European exploration to the ratification of the United States Constitution. The course will look at the ways in which Colonial American pattern of conflict and cohesion took shape, how those structures created a distinctly American people, led to an era of Revolution, the consequences of the American Revolutionary era, and the establishment of the United States. Fall term, alternate years.

Hist 314C INVENTING AMERICA, 1789-1850 (4-0) 4

This course will explore the economic, political, social, religious, cultural and environmental changes that made this such a period of transformation, and how this foundational era gave shape to the rise of modern America. Winter term, alternate years.

Hist 315C IRISH, CATHOLIC, AMERICAN (4-0) 4

This course will use the Irish experience in America to highlight the general course of United States history, and the complex way in which ethnic and religious identity both shaped the American landscape while being in turn shaped by the American environment. The course will

consequently explore immigration, political, religious, educational, women, family and urban history, and grapple with important issues like nativism, acculturation, cultural maintenance, and identity. Summer session.

Hist 316C CIVIL WAR AMERICA (4-0) 4

The 20 years that changed America, 1848-1868. The causes, campaigns, people, and significance of the Civil War era. Taught once a year.

Hist 318C EMERGENCE OF MODERN AMERICA 1893-1939 (4-0) 4

In these colorful and sometimes desperate decades, modern America was forged. The topics covered will include the Populist and Progressive movements, World War I, the cultural tumult of the 1920s, the Great Depression and the New Deal. Fall term.

Hist 320C WESTERN AMERICAN HISTORY (4-0) 4

This course will focus on the 19th century American west. Using the theme of expansionism, the course will look at the interaction between cultures and people in the West, the forces that produced a unique section of the country, the creation of the mythic West and its enduring legacy, and how the present is linked to the past in the trans-Mississippi West. Winter term, alternate years.

Hist 322C WESTERN AMERICAN MINING (4-0) 4

Starting with the Spanish explorations, the course sketches the history of the industry and its impact on the region and people through the early 20th century. Winter term, alternate years.

Hist 324C COLORADO HISTORY (3-0) 3

This course traces the story of Colorado and its people from the Anasazi to the present day. Same as SW 481C. Fall and winter terms.

Hist 326C BASEBALL AND THE AMERICAN DREAM (4-0) 4

Examines the impact of baseball on such varied topics as urbanization, literature, business, and racial relations. Baseball from the inside and outside. Winter term.

Hist 328C CISTIANITY IN U.S. HISTORY (4-0) 4

This course covers the role of Cistianity in United States history from the nation's creation until today. The class will look at how mainline Cistian denominations have shaped U.S. history and been in turn shaped by the American experience. Within this broad historical sweep of linking the past to the present important issues like the separation between church and state, and how the nation has gone from Protestant establishment to secularism as well as how law and politics have come to impact religion, will be examined. Fall term, alternate years.

Hist 332C WOMEN IN AMERICAN HISTORY (4-0) 4

An analysis of women's experience from the colonial period to the present. Focusing on the way gender has been defined and redefined, the course considers such issues as work, friendship and marriage, reproduction, the struggles for equality, and women's culture. The influence of class, race and ethnicity on women's experiences will also be considered. Fall term.

Hist 333C AMERICA SINCE 1945 (4-0) 4

An exploration of the forces that have shaped America since the end of World War II. Topics include the history of the cold war from the dropping of the atomic bomb and the war in Vietnam to the uncertain interventions of today, the contest between liberals and conservatives over the national identity and the role of government, the Civil Rights movement, the Women's movement and environmentalism. Winter term.

Hist 334C THE UNITED STATES AND VIETNAM (4-0) 4

No conflict so dramatizes the contradictions of the cold war or so exposes the dynamics of government policy-making as the United States' involvement in the conflict in Southeast Asia. The course analyzes the history of America's intervention, the struggle of the Vietnamese people for control of their land, and the domestic turmoil that was an essential accompaniment to this war. Winter term, alternating with Hist 337C Cultural and Intellectual History.

Hist 337C CULTURAL AND INTELLECTUAL HISTORY OF AMERICA IN THE 20TH CENTURY (4-0) 4

This course explores the shifting currents of American thought and belief from pragmatism to postmodernism. Topics include the

Darwinian revolution, the culture and cult of science, literary and political radicalism, the culture and crisis of capitalism, feminist theory, and postmodernism. Winter term, alternating with Hist 334CE The United States and Vietnam.

Hist 338C THE MODERN WOMEN'S MOVEMENT (3-0) 3

This course provides an in-depth exploration of the "second wave" of the women's movement from the late 1950s to present. We will study the reasons for the emergence of the "second wave," the lives and ideas of the women who shaped its agenda, the practical work of modern feminists, and the contemporary debate on the future of feminism. Summer session.

Hist 339C WOMEN AND THE "WEST" (3-0) 3

Women experienced the American "West" as a place of beauty and personal possibilities as well as a place of hardship. Through art, autobiography, fiction and historical narrative, the course explores the ways Native American, Hispanic and Anglo women lived, worked and perceived the land beyond the 100th Meridian. Summer session.

Hist 340CE CONTEMPORARY AFRICA (4-0) 4

Trends and issues in African society, politics and economy since decolonialization (around 1960). Winter term, alternate years.

Hist 342CE WEST AFRICA (4-0) 4

Basic trends and selected issues in the history of the region bounded by the Sahara and the Atlantic seaboard. Themes include commercial networks and urbanization, the influence of Islam, slavery and the slave trade, European colonization, nationalism, the environmental crisis. Fall term, alternate years.

Hist 343CE ANCIENT NILE VALLEY (4-0) 4

Survey of developments in Ancient Egypt and Nubia from the origins of agriculture through the Pyramid Age, Egyptian imperialism, Nubia's golden era, the impact of Hellenism, and down to the extinction of the last outpost of Pharaonic civilization at Meroe. Winter term, alternate years.

Hist 344CE NORTHEAST AFRICA (4-0) 4

Historical trends and questions affecting the Nile Basin and the Horn, with emphasis on the period since 1800. Topics include the shaping of ideologies (nationalism, socialism, Islamic fundamentalism), the Ethiopian Revolution, hydropolitics, the roots of famine, social change, the Somali civil war. Fall term, alternate years.

Hist 346CE SOUTH AFRICA (4-0) 4

A survey of the present Republic of South Africa from Iron Age culture through European settlement, the 19th-century Mfecane upheaval, the gold rush, and apartheid, to the election of 1994. Winter term, alternate years.

Hist 348CE AFRICANS IN THE AMERICAS (4-0) 4

The dispersion of Africans to the Americas during the slave trade and the subsequent history of people of African descent in the Western Hemisphere, with particular reference to cultural developments and to the Pan-African movement. Winter term, alternate years.

Hist 349CE ISLAM IN HISTORY (4-0) 4

The emergence of the Islamic religion in 7th century Arabia, the development of Islamic institutions and civilization in Asia and Africa, and the significance of Islamic cultures in the history of sciences, arts, literature, technology and historiography. Fall term, alternate years.

Hist 351CE U.S. - EAST ASIAN RELATIONS (4-0) 4

This course examines the ever-changing relationship between the United States and East Asia. It analyzes American motivations and policies toward East Asia and explains the purposes and actions taken by East Asian nations in their efforts to deal with the United States. Fall term.

Hist 352CE MODERN CHINA (3-0) 3

This course concentrates on 20th century China. It explores the social issues that led to the rise of Chinese Nationalism and Communism. It analyzes the current changes that are making China a world economic power. Summer term.

Hist 353CE PACIFIC WAR (4-0) 4

This course provides in-depth analyses of the war that made a great impact on both sides of the Pacific. It explains Japan's decisions to invade China and to fight against the United States. It highlights the significance of the China Theater of war in the battle against Japanese fascism. It reveals how the United States was able to force Japan into unconditional surrender. Winter term.

Hist 357C WORLD SINCE 1945 (4-0) 4

This course examines world history since 1945 including the impact of World War II, the end of Western colonialism, and the rise of Third World nationalism. The historical roots of contemporary events are emphasized. This course provides good preparation for a variety of other upper-level courses in modern history. Winter term.

Hist 359C MEDIEVAL EUROPE (4-0) 4

An examination of culture, society, politics, religion and gender in the historical development of medieval Europe using both primary and secondary written source material with reference to the art, music and philosophy of the period as well. Fall term, alternate years.

Hist 360C RENAISSANCE EUROPE (4-0) 4

Using the history of Europe from 1400-1600 as a framework, students of Renaissance Europe will consider the further development of western society through the examination of primary written source material with reference to the art, music and philosophy of the period as well. Fall term, alternate years.

Hist 361CE RUSSIA IN REVOLUTION TO 1924 (4-0) 4

A study of the Russian past in order to understand from a historical perspective the events, personalities, ideas, and significance of the Russian revolutions and the Soviet Regime to 1924. Fall term.

Hist 362CE SOVIET UNION: STALIN TO GORBACHEV (4-0) 4

A study of the Soviet Union seeking an understanding of why and how it arose, and ultimately collapsed, the nature of the state and society of the Soviet Union, and its relationship with the rest of the world. Winter term.

Hist 363CE COLLAPSE OF THE SOVIET UNION (3-0) 3

An exploration of the collapse of the Soviet Union and of how the ethnic groups of the old Soviet Union, particularly Russians, are seeking to establish themselves as new states within a federation, the Commonwealth of Independent States. Summer session.

Hist 364C GERMANY, ROMAN TIMES TO 1919 (4-0) 4

A study of the German past focusing particularly on the efforts of Germans and others to define Germany: who are Germans, where is Germany, and what is Germany politically and culturally. Fall term.

Hist 365C GERMANY, 1919 TO PRESENT (4-0) 4

Study of German history seeking an appreciation of German achievements and an understanding of the disaster of German politics in the first half of the 20th century.

Hist 366C HITLER AND THE HOLOCAUST (3-0) 3

A study of the racial ideology of National Socialism and how it became state policy in Germany, 1933-45, and resulted in the Holocaust. Usually offered as a summer course.

Hist 367C MEDIEVAL ENGLAND AND IRELAND (3-0) 3

Beginning with the Celtic culture and concluding with the demise of the Plantagenet queens and kings, this course investigates the individuals and issues that shaped the formation of one of the most powerful kingdoms in all of Medieval Europe. Summer session.

Hist 368C MEDIEVAL WOMEN (4-0) 4

This course explores the frustrations as well as the power women had in Western Europe between the 6th and 14th centuries. Fall term.

Hist 371CE HISTORY OF CENTRAL AMERICA (4-0) 4

A close examination of important historical trends in the areas known today as Belize, Guatemala, El Salvador, Nicaragua, Honduras, and Costa Rica since the late 15th century. Some time will be spent on the pre-conquest period, but most of the course will focus on those aspects of colonial society that have remained vital unto the present, the aftermath of political independence from Spain, the prominent role of

British and North American interests in the region, the unique economic developments within each country, and the revolutionary turmoil of the late 20th century. Winter term.

Hist 372CE UNITED STATES - LATIN AMERICAN RELATIONS (4-0) 4

An overview and analysis of the historical development of political and economic relationships between the United States and Latin America since the late 18th century. The course focuses on United States policy toward the rest of the western hemisphere and the reactions of various countries and regions of those policies. Particular emphasis is given to the Latin American movements for independence, United States-British rivalry in the Caribbean, the Mexican War, United States economic expansion in the late 19th century, the Spanish American War, the Panama Canal, United States involvement in the Mexican and Cuban revolutions, and the effects of the Cold War on relationships among the countries of the Americas. Fall term.

Hist 373CE HISTORY OF MEXICO (4-0) 4

An analysis of important trends in the history of Mexico since the late 15th century. Although some time is spent on the pre-conquest era, the bulk of the class focuses on those aspects of colonial society that have remained significant unto the present, the peculiar development of Mexican independence, the disastrous clash between Liberals and Conservatives in the 19th century, the Mexican revolution, and the turbulent years after the Second World War. Winter term.

Hist 381C FRANCE AND SPAIN FROM THE MIDDLE AGES TO THE MODERN PERIOD 4-0) 4

An examination of culture, society, politics, religion and gender in France and Spain from 800-1650 C.E. using both primary and secondary written sources with reference to language, literature, music and art as well. Winter term, alternate years.

Hist 382C REFORMATION EUROPE AND THE WARS OF RELIGION (4-0) 4

An examination of culture, society, politics, religion and gender in the historical development of 16th and 17th century Europe using primary written source material with reference to the art, music and philosophy of the period as well. Winter term, alternate years.

Hist 396W PHILOSOPHY AND METHODS (4-0) 4

An introduction to the study of history, this course serves as the Writing Course for the History Department. The course explores the ways historians, past and present, think about and practice the craft of writing history. It introduces students to new fields of historical research and multi-disciplinary approaches to the past. Special emphasis is placed on developing skills necessary for becoming successful writers in the field. This course is required for all majors and should be taken in the second term of the sophomore year or during the junior year. Fall and winter terms.

Hist 440CE ADVANCED STUDIES IN AFRICAN HISTORY (3-0) 3

A consideration of fundamental themes in African history through the study of primary and secondary written sources, oral accounts and other types of evidence, and the application of different historiographical approaches. Offered every second or third year depending on student demand.

Hist 446CE ANCIENT ISRAEL AND JUDAH (3-0) 3

This seminar covers ancient Israel from its beginnings around 1250 B. C. to the execution of Jesus of Nazareth around 35 A.D. Major topics include the origins of Israel and Judah, biblical composition and authors, relations with Egypt and Assyria, the Dead Sea Scrolls, and Jesus in Jewish historical context. An historiographical approach is emphasized. Winter term.

Hist 450CE ADVANCED STUDIES IN EAST ASIAN HISTORY (3-0) 3

An examination of selected historical topics and issues pertaining to the East Asian world. A senior-level research paper will be required. Offered every second or third year depending on student demand.

Hist 465C ADVANCED STUDIES IN EUROPEAN HISTORY (3-0) 3

A research seminar that examines topics in European history. The seminar will explore historiographical issues and research strategies. Students will write a research paper. Topics will vary. Students may not take courses under this number more than once. Topics include The

Reformation and Modern Europe. Offered every year as needed.

Hist 475CE ADVANCED STUDIES IN LATIN AMERICAN HISTORY (3-0) 3

A research seminar that examines selected topics in Latin American history and may include "Spanish Frontier in North America" or "Colonial New Mexico." The seminar will explore historiographical issues and research strategies. Student will write a research paper. Topics will vary. Students may not take courses under this number more than once. Offered every second or third year as needed.

Hist 482C TOPICS IN COLORADO HISTORY (3-0) 3

A research and reading seminar designed to prepare students for Senior Research Seminar. Discussion, readings, book reports and a research paper on various topics in Colorado history. Offered every second or third year as needed.

Hist 485C ADVANCED STUDIES IN UNITED STATES HISTORY (3-0) 3

A research seminar that examines selected topics in United States history. The seminar will explore historiographical issues and research strategies. Students will write a research paper. Students may not take courses under this number more than once. Topics may include America Since 1945, Western/Southwestern history and Colorado history. Offered every year.

Hist 496 SENIOR RESEARCH SEMINAR (4-0) 4

A capstone course in the preparation of a senior history research paper with a public presentation and defense. Fall and winter terms.

Prerequisite: Hist 396 and senior standing in history, or humanities with primary history concentration.

Hist 499 INDEPENDENT STUDY 1-3

Research project conducted under the supervision of a faculty member. Offered on demand.

Honors

HONORS 220 HONORS FORUM (1-0) 1

The purpose of this course is to facilitate critical evaluation and discussion of selected works having broad intellectual importance and accessibility to students of varied academic interests and backgrounds. Grading is on a pass-fail basis. Course is repeatable for credit for freshman and sophomore level students.

Prerequisites: Prior acceptance into Honors Program, Comp 150 and LIB 150 and consent of instructor.

HONORS 420 HONORS FORUM (1-0) 1

This course continues the series of Honors Forums required for John F. Reed Honors students. Grading is on a pass-fail basis. Course is repeatable for credit for junior and senior level students.

Prerequisites: Prior acceptance into Honors Program, Comp 150 and LIB 150 and consent of instructor.

HONORS 499 HONORS THESIS 1-2

The Honors Thesis is the result of an independent study project undertaken during the senior year. The topic of the thesis must draw significantly on at least two academic disciplines. The student should choose a topic for the thesis in consultation with a faculty advisor, a reader from the second discipline, and the Honors Coordinator. At the end of the first term, the student must submit evidence of substantial work accomplished. During the second term, the student will complete the thesis and make a public presentation of the results.

Independent Study

INDEPENDENT STUDY 499 1-3

All major fields require either independent study or a seminar at the senior level. Independent study may be undertaken in a field other than the student's major. To do so, the student must have the approval of his or her advisor, department chair, the department chair in whose area the study will be made, and the professor who will supervise the study. However, independent study in the field outside the student's major cannot be substituted for the requirement of independent study or seminar in his or her major field.

[Return to List](#)

Individualized Study

INDIVIDUALIZED STUDY 299 1-3

Independent study for lower-division or non-major students. Available in most disciplines.

[Return to List](#)

Japanese

ML 135 INTRODUCTORY JAPANESE I (4-0) 4

An introduction to the Japanese language. Fall term.

ML 136A1 INTRODUCTORY JAPANESE II (4-0) 4

Continuation of ML 135. Winter term.

Prerequisite: ML 135 or consent of instructor.

[Return to List](#)

Latin

ML 109 INTRODUCTORY LATIN I (4-0) 4

An introduction to the Latin language. Fall term.

ML 110A1 INTRODUCTORY LATIN II (4-0) 4

Continuation of ML 109. Winter term.

Prerequisite: ML 109 or equivalent.

[Return to List](#)

Mathematics

Mathematics Examination and Placement Policy

Students must take the FLC Mathematics Placement Examination prior to enrolling at Fort Lewis College unless they have mathematics transfer credit from another college or university. This exam is normally taken during the new-student orientation sessions. Students may also arrange to take, or retake, the exam at any time by contacting the Learning Assistance Center, Room 280 Noble Hall, 970-247-7383.

A prerequisite course must be completed with a grade of C- or better, or the student must have the consent of the instructor to take the course. Students will not receive credit for a mathematics course that is a prerequisite for a previously completed course.

Most mathematics courses require the student to have a graphing calculator. For advice on which model to buy, contact the course instructor or the Chair of the Department. At the present, the TI-83 is commonly used.

Math 110B COLLEGE ALGEBRA (3-2) 4

This course covers the topics in algebra necessary for students who plan to enroll in Math 210B, Calculus for Business and the Biological Sciences or Math 121B Precalculus. The use of technology to aid in problem solving is an integral part of the course. Specific topics covered are: simplification of algebraic expressions, complex numbers, solutions of equations (including systems of linear equations) and inequalities, and functions, including polynomial, root, rational, exponential and

logarithmic. The course includes a laboratory which allows for consideration of extended problems. Fall, winter and summer terms.

Prerequisites: Two years of high school algebra, one year of geometry and placement into Math 110B through the Mathematics Placement Examination or successful completion of TRST 92.

Math 121B PRE-CALCULUS (5-0) 5

This course covers the topics in algebra and trigonometry necessary for students who plan on enrolling in Math 221B, Calculus I. Technological methods, in addition to symbolic methods are essential in solving problems. The course will include an in-depth analysis of the topics covered in Math 110B, with additional emphasis on symbolic methods. In addition, other topics include trigonometric functions, vectors, polar coordinates, parametric equations, and the conic sections. The concept of function, with its multiple representations, will be emphasized. Fall, winter and summer.

Prerequisite: Two years of high school algebra, one year of geometry and placement into Math 121B through the Mathematics Placement Examination or successful completion of Math 110B.

Math 130B MATHEMATICS FOR LIBERAL ARTS (3-0) 3

This course contains an introductory survey of a variety of topics such as theory and history of mathematics, logic, problem solving, number theory, consumer applications and probability. Fall and winter terms.

Math 201B ELEMENTARY STATISTICS (4-0) 4

An introduction to basic ideas in statistics including descriptive statistics, measures of central tendency and dispersion, probability, sampling distributions, estimation, hypothesis testing, regression and correlation, and statistical software applications. Credit will be given for only one of BA 253B, Psych 241B or Math 201B. Fall and winter terms.

Prerequisite: Math 110B or consent of instructor.

Math 210B CALCULUS FOR BUSINESS AND THE BIOLOGICAL SCIENCES (4-0) 4

An introductory calculus course intended for students majoring in

business administration, economics, or the biological sciences. Topics include limits, differential and integral calculus of one variable and an introduction to calculus of two variables. Fall and winter terms.

Prerequisite: Math 110B or placement into Math 210B through the Mathematics Placement Examination.

Math 215B MATHEMATICS FOR THE ELEMENTARY SCHOOL TEACHER I (2-2) 3

This course is designed primarily for the elementary school teacher. It includes a study of sets, set operations, construction of numeration systems, whole and integer and rational number arithmetic, ratio and proportion, decimals, percent, selected topics in geometry, the metric system, and an introduction to the real number system. Fall and winter and summer terms.

Prerequisite: Must have sophomore standing.

Math 221B CALCULUS I (4-0) 4

Limits, continuity, derivatives and integrals of functions of one variable including polynomial, root, rational, exponential, logarithmic, trigonometric and inverse trigonometric functions. Applications of Calculus are included. Fall and winter terms.

Prerequisites: Math 121B or placement into Math 221B by the Mathematics Placement Examination.

Math 222 CALCULUS II (4-0) 4

A continuation of Math 221B. Techniques and applications of integration, introduction to differential equations and applications, sequences and series, applications using polar and parametric coordinate systems.

Prerequisite: Math 221B.

Math 223 CALCULUS III (4-0) 4

Vectors and multivariable calculus with applications. Fall and winter terms.

Prerequisite: Math 222.

Math 300W WRITING IN MATHEMATICS (3-0) 3

Writing and interpretation associated with problem statements and solutions, proof structures, modeling experiments, exposition and technical reports. Winter term.

Prerequisite: Math 221B, Comp 150, Lib 150.

Math 301B FOUNDATIONS FOR ADVANCED MATHEMATICS (4-0) 4

A study of mathematical systems and the forms and techniques of proofs. Included are logic, set theory, and an introduction to elementary number theory. These are studied in some depth and with careful attention to forms of proofs. This course is a prerequisite for most upper-division courses in mathematics. It is often taken concurrently with Math 222 or 223. Fall term.

Prerequisite: Math 221B.

Math 305B DISCRETE MATHEMATICAL STRUCTURES (3-2) 4

A study of sets, graphs, trees, combinatorics, probability, recursion, algorithms, mathematical reasoning and modeling computation with applications to computer science. Winter term.

Prerequisites: Math 221B or Math 210B, CSIS 110B, or consent of instructor.

Math 310 METHODS OF TEACHING MATHEMATICS IN THE SECONDARY SCHOOL (3-0) 3

This class will explore elementary concepts in algebra and geometry, and will include methods for teaching these concepts at the secondary level. Students will make several short in-class presentations. Fall term.

Prerequisite: Ed 309.

Math 311B MATRICES AND LINEAR ALGEBRA (4-0) 4

A study of the properties and applications of matrices, including systems of equations, determinants, similarity, and eigenvalues. An introduction to the theory of vector spaces and linear transformations.

Fall term.

Prerequisite: Math 221B.

Math 315B REAL NUMBERS AND GEOMETRY (3-0) 3

This course is intended for those seeking teacher certification at the elementary or junior high school level. Topics will include real numbers, points, lines, planes, the continuum, the role of axioms and proof, and the basic concepts of Euclidean geometry. Fall term of odd-numbered years.

Prerequisite: Math 215B.

Math 316B TOPICS IN NUMBER THEORY (3-0) 3

Some of the topics to be presented in this course are: modular arithmetic, finite fields, basic prime number theorems, congruences, and combinations. Winter term of even-numbered years.

Prerequisite: Math 315B or 221B.

Math 318B MATHEMATICS FOR THE ELEMENTARY SCHOOL TEACHER II (2-2) 3

A continuation of M215B. Topics will include the use of calculators and computers, discrete math, data analysis, and an introduction to algebra. Winter term.

Prerequisite: Math 215B.

Math 320 NUMERICAL ANALYSIS (3-0) 3

An introductory course in developing and using numerical techniques for solving problems in mathematics, the physical sciences, engineering and in other quantitative fields. Topics include approximation of functions by computable functions, zeros of functions, linear algebra and matrix calculations, and difference equations. The use of the computer will be included. Fall term of odd-numbered years.

Prerequisites: Math 222 and one of CSIS 150B or CSIS 110B.

Math 325B HISTORY OF MATHEMATICS (3-0) 3

The development of selected mathematical concepts will be traced from the Greek era. The course will focus on mathematical creation as a human endeavor done within a cultural context. Fall term of even-numbered years.

Prerequisite: Math 121B.

Math 327 DIFFERENTIAL EQUATIONS (4-0) 4

An introduction to ordinary differential equations. Topics will include methods of solving first order nonlinear equations, basic theory and methods of solving n-th order linear equations, including infinite series methods. Further topics will include an introduction to systems of linear ordinary differential equations and the Laplace transform. Applications will be emphasized. Winter term.

Prerequisite: Math 223.

Math 342 MODERN COLLEGE GEOMETRY (3-0) 3

A course in college geometry which includes topics in Euclidean and non-Euclidean geometries. Winter term of odd-numbered years.

Prerequisite: Math 301B.

Math 345B DATA ANALYSIS (4-0) 4

A second course in statistics covering techniques most widely used in the sciences, including multiple regression models, analysis of variance, and non-parametric methods. Emphasis is placed on underlying assumptions, purposes, advantages and disadvantage, valid interpretation and computer software implementation. Fall term.

Prerequisites: Math 201B or BA253B or Psych 241B.

Math 360B INTRODUCTION TO OPERATIONS RESEARCH (4-0) 4

Overview of optimization techniques used in operations research. Topics include linear programming, network flow, transportation problems, queuing theory, inventory models, PERT and CPM, dynamic programming, use of statistical computer packages. Winter term of odd-numbered years. (This course is the same as BA 360B.)

Prerequisites: Math 210B or 221B.

Math 387 ALGEBRAIC STRUCTURES (4-0) 4

A course in abstract algebra including topics from the theories of groups, rings, and fields. Applications will be discussed. Winter term.

Prerequisite: Math 301B.

Math 403 PROBABILITY AND MATHEMATICAL STATISTICS (4-0) 4

Topics include probability functions, conditional probability, independence, random variables, order statistics, expected values, moment generating functions, probability distributions, properties of estimators, maximum likelihood, estimation and hypothesis testing.

Fall term of even-numbered years.

Prerequisite: Math 201B and completion of or concurrent enrollment in Math 222.

Math 424 ADVANCED CALCULUS (4-0) 4

Topics include structure of the real number system and Euclidean spaces, general theory of limits, continuity, derivatives, Riemann integrals, series and sequences, coordinate systems transformations, physical fields, Divergence and Stokes theorem. Fall term.

Prerequisite: Math 223 and Math 301B.

Math 430 COMPLEX VARIABLES (3-0) 3

This course will cover topics in complex numbers, analytic functions, elementary functions and associated mappings, integrals, series, residues and poles, and conformal mappings. Fall term of even-numbered years.

Prerequisite: Math 223.

Math 496 MATHEMATICS SENIOR SEMINAR (3-0) 3

Advanced study and research in selected topics. Will include written and oral presentations of a project involving library research. Activities

relate to various mathematical careers and students participate in seminars given by visiting mathematicians. Winter term.

Prerequisites: Senior standing.

Math 497 MATHEMATICS EDUCATION SENIOR SEMINAR (3-0) 3

Advanced study and research in selected topics. Will include written and oral presentations of a project involving library research. Activities relate to careers in mathematics education. Winter term.

Prerequisites: Senior or junior standing and enrollment in a program of teacher certification.

Math 499 INDEPENDENT STUDY 1-3

Individual research conducted under the supervision of a faculty member. Written and oral presentation of research of research results required if this course is used to satisfy the Math 496/499 graduation requirement. On demand.

Prerequisite: Consent of instructor.

[Return to List](#)

Music

Mu 101A2 THE MUSICAL EXPERIENCE (3-0) 3

A course in music appreciation designed for the general student. The intent of the course is to prepare students for informed and active listening experiences. Fall and winter terms.

Mu 102A2 BLUES/JAZZ/ROCK (3-0) 3

This course is designed to be an introduction to popular music which will lead the student toward intelligent, meaningful listening. It is assumed that listening to and understanding the content and structure of music as an art form will be beneficial in the development of a better understanding of music as part of human cultural heritage. The format of this course is to survey varied examples of popular music while investigating the circumstances surrounding the performers and their compositions. The course is intended to develop those aural skills that

can provide a basis for critical and intelligent listening.

Mu 103 INSTRUMENTAL, VOCAL AND PIANO CLASS INSTRUCTION

(Piano, Voice, Brass, Woodwinds, Percussion, Strings) (0-2) 1

These classes are all designed to provide the student with the basic elements and techniques of performance in each of the media. Piano Class (Mu 103 Piano), is specifically designed for the music major lacking in keyboard skills. Emphases include fluent reading of simple piano music and elementary technique. Successful completion with a grade of A or B satisfies Part I of the Piano Proficiency Requirement. Piano Class is offered fall terms, Voice Class is offered fall term; Brass, Woodwinds, Percussion & Strings Classes are offered alternate years.

Prerequisite: Consent of instructor.

Mu 104 PIANO CLASS INSTRUCTION II (0-2) 1

Continuation of Mu 103 Piano and mandatory for music majors who desire to complete the Piano Proficiency Requirement in this manner. Emphases include performance of easier piano music, scales, triads, sevenths and harmonization of simple melodies. Successful completion with a grade of A or B satisfies Part II of the Piano Proficiency Requirement. Winter term.

Prerequisite: Consent of instructor or MU 103 Piano.

Mu 105A2 CONCERT CHOIR (0-3) 1

Thorough study and performance each trimester of larger choral compositions. Open to all students. Course is repeatable. Fall and winter terms.

Mu 106 CHAMBER CHOIR (0-2) 1

An ensemble specializing in the performance of small scale choral works. By audition only. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in concert choir.

Mu 107 SPECIAL CHOIRS (0-2) 1

Requests for developing special choirs will be considered, upon written

request to the Department of Music, as adjuncts to any on-campus organization. Under competent, organized supervision these choirs may function and receive 1 credit during any one term. Open to all students. Course is repeatable. Fall and winter terms.

**Mu 109, 209, 309, 409 APPLIED MUSIC
(Piano, Voice, Brass, Woodwinds, Percussion, Strings) 1 or 2**

Individual instruction scheduled, at the discretion of the instructor, either privately or in a small class. The course is open to all students. Each of these courses may be repeated once for credit. No student may register for more than two different applied lessons during any one trimester. Students may register for two credit hours only with approval of the music faculty. Two credit hours are required for a Performance Concentration. Students who register for two credit hours will receive longer lessons in proportion to the amount of time spent in preparation.

Prerequisite: Placement audition, enrollment in Band, Concert Choir or Orchestra (the large ensemble appropriate to the applied area) and consent of instructor.

Mu 110A2 BAND (0-3) 1

Designed to provide every student who plays a musical instrument the opportunity to pursue his or her musical interests. A variety of musical literature will be provided as well as the opportunity to perform in concert both on campus and on tour. Open to all students. Course is repeatable. Fall and winter terms.

Mu 111 BRASS ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Literature from the baroque period tough the contemporary period will be studied and performed. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band .

Mu 112 WOODWIND ENSEMBLE (0-2) 1

A survey, tough performance, of the literature composed for woodwind instruments from the Renaissance tough avant-garde schools of composition and including the use of ancient instruments where applicable. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 113 STRING ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Literature from the baroque period tough the contemporary period will be studied and performed. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in symphony orchestra.

Mu 116 ACCOMPANYING (0-2) 1

A course designed to provide ensemble and accompanying experience for piano students.

Prerequisite: Consent of piano instructor.

Mu 117A2 SYMPHONY ORCHESTRA (0-3) 1

Offered in conjunction with the San Juan Symphony Orchestra at no extra fee. This course provides an opportunity for the study and performance of major orchestral works. Two hours of rehearsal are held on Tuesday evenings and the third is arranged at the convenience of the instructor and students. Open to all string students; wind and percussion students by audition only. Course is repeatable. Fall and winter terms.

Mu 118 PERCUSSION ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 119 JAZZ ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 120A2 FUNDAMENTALS OF MUSIC (3-0) 3

Open to all students. A course in musical literacy intended to help

laymen acquire the basic skills necessary to participate fully in musical activities. No prior musical background is assumed. Fall and winter terms.

Mu 128A2 THEORY AND MUSICIANSHIP I (5-0) 5

A course in basic musicianship designed to teach aural, analytical and compositional skills. Daily sight-singing and ear-training activities will supplement study of scales, key, modes, triads, melody, tonality, cadences, functional harmony and basic four-part writing including figured bass. Theory Placement Examination is required for admission. Open to music majors and minors only. Others must have consent of instructor. Fall term.

Mu 129A2 THEORY AND MUSICIANSHIP II (5-0) 5

Continuation of Theory and Musicianship I, expanded to include nonharmonic tones, dominant sevenths, secondary dominants and modulation. Formal analysis will include binary, ternary, rondo, theme and variations, chaconne/passacaglia, fugue and sonata-allegro. Winter term. Open to music majors and minors only. Others must have consent of instructor.

Prerequisite: Mu 128A2.

Mu 203 PIANO CLASS INSTRUCTION III (0-2) 1

Continuation of Mu 104 and mandatory for music majors who desire to complete the Piano Proficiency Requirement in this manner. Emphases include expanded performance of piano literature and elementary sight-reading. Successful completion with a grade of A or B satisfies Part III of the Piano Proficiency Requirement. Fall term.

Prerequisite: Consent of instructor or MU 104 Piano.

Mu 204 PIANO CLASS INSTRUCTION IV (0-2) 1

Continuation of Mu 203 and mandatory for music majors who desire to complete the Piano Proficiency Requirement in this manner. Students will be expected to perform compositions at the level of Clementi: Sonatina, Op. 36 #1; Bach: Two Part Inventions, all scales, arpeggios and cadences. Successful completion with a grade of A or B satisfies Part IV of the Piano Proficiency Requirement. Winter term.

Prerequisite: Consent of instructor or MU 203 Piano.

Mu 207 PRACTICUM - ELEMENTARY COMPOSITION (0-2) 1

Individual instruction in composition scheduled, at the discretion of the instructor, either privately or in a small class. Students will work independently on assigned projects intended to explore a wide variety of compositional mediums and techniques. Course is repeatable for a maximum of 4 credits.

Prerequisite: Mu 129 or consent of instructor.

Mu 228 THEORY AND MUSICIANSHIP III (5-0) 5

Extensive study of chromatically altered chords typical of the 19th century. Harmonic analysis, formal analysis, ear training and compositions incorporating altered chords are primary emphases. Open to music majors and minors only. Others must have consent of instructor. Fall term.

Prerequisite: Mu 129A2.

Mu 229 THEORY AND MUSICIANSHIP IV (5-0) 5

Exploration of 20th century theoretical and compositional techniques. Examples will include derivatives from the end of the 19th century, nationalist influences, serial and aleatoric music, extended techniques, and electronic music. Open to music majors and minors only. Others must have consent of instructor. Winter term.

Prerequisite: Mu 228.

Mu 300 VOCAL ENSEMBLE (0-2) 1

A survey, through performance, of the literature for vocal ensemble. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in Concert Choir.

Mu 305A2 CONCERT CHOIR (0-3) 1

Thorough study and performance of larger choral compositions. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, conductor/managers, or accompanists. Course

is repeatable. Open to all students. Fall and winter terms.

Mu 306 CHAMBER CHOIR (0-2) 1

An ensemble specializing in the performance of small scale choral works. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, conductor/managers, or accompanists. Course is repeatable. By audition only. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in Concert Choir.

Mu 310A2 BAND (0-3) 1

Designed to provide every student who plays a musical instrument the opportunity to pursue his/her musical interests. A variety of musical literature will be provided as well as the opportunity to perform in concert both on campus and on tour. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Mu 311 BRASS ENSEMBLE (0-2)1

A survey, tough performance, of the literature written for this medium. Literature from the baroque period tough the contemporary period will be studied and performed. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 312 WOODWIND ENSEMBLE (0-2) 1

A survey, tough performance, of the literature composed for woodwind instruments from the Renaissance tough avant-garde schools of composition and including the use of ancient instruments where applicable. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 313 STRING ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium.

Literature from the baroque period through the contemporary period will be studied and performed. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in symphony orchestra.

Mu 314 METHODS AND PRINCIPLES OF TEACHING VOCAL MUSIC (3-0) 3

A course designed to provide music majors with contemporary teaching skills and techniques for secondary vocal/choral music, including vocal pedagogy, classroom management, rehearsal preparation, and audition and placement procedures. Fall term of alternate years.

Prerequisite: Admission to teacher education program or consent of instructor.

Mu 315 METHODS AND PRINCIPLES OF TEACHING INSTRUMENTAL MUSIC (3-0) 3

A course designed to provide music majors with contemporary teaching skills and techniques in the teaching of instrumental music in the public schools, including program development, classroom management, rehearsal preparation and use of audio/visual materials. Fall term of alternate years.

Prerequisite: Admission to teacher education program or consent of instructor.

Mu 316 MUSIC IN THE ELEMENTARY SCHOOL (3-0) 3

A course designed for both classroom and music teachers to provide practical skills in pedagogy, lesson planning, folk music, dance/movement, musical literacy and classroom management. Attention will be given to the philosophies of Kodaly, Orff and Dalcroze within a laboratory setting often involving elementary-age children from local schools. Winter term and one summer session.

Prerequisite: Admission to teacher education program or consent of instructor.

Mu 317A2 SYMPHONY ORCHESTRA (0-3) 1

Offered in conjunction with the San Juan Symphony Orchestra at no extra fee. This course provides an opportunity for the study and performance of major orchestral works. Two hours of rehearsal are held on Tuesday evenings and the third is arranged at the convenience of the instructor and students. All string students are invited; wind and percussion students by audition only. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Mu 318 PERCUSSION ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 319 JAZZ ENSEMBLE (0-2) 1

A survey, tough performance, of the literature written for this medium. Students are expected to take responsible roles in the ensemble such as: soloists, section leaders, or conductors/managers. Course is repeatable. Fall and winter terms.

Prerequisite: Consent of instructor and enrollment in band.

Mu 331A2 MUSIC HISTORY I (3-0) 3

Study of the history of music from classical antiquity to 1750. Fall term of alternate years.

Mu 332A2 MUSIC HISTORY II (3-0) 3

Study of the history of music from 1750 tough the 20th century. Winter term of alternate years.

Mu 333 20TH CENTURY MUSIC (2-0) 2

A survey of styles and techniques of contemporary composers, including analysis of representative works.

Prerequisite: Mu 229 or consent of instructor.

Mu 337A2E SURVEY OF NON-WESTERN MUSIC (3-0) 3

This course is designed to acquaint students with the vast amount of music from non-western cultures. Topics include the music of Africa, India, China, Japan, Southeast Asia, South America and the American Indians. Open to all students.

Mu 349 CONDUCTING I (3-0) 2

A course in basic instrumental and choral conducting including baton technique, score reading, and various cueing and rhythmic aspects concerned with ensemble control. Fall term of alternate years.

Prerequisite: Piano Proficiency Requirement.

Mu 350 CONDUCTING II (3-0) 2

Continuation of Conducting I. Conducting techniques in addition to directing larger musical scores and advanced techniques. Winter term of alternate years.

Prerequisite: Mu 349.

Mu 407 PRACTICUM - ADVANCED COMPOSITION (0-2) 2

Like Mu 207, except students must demonstrate advanced proficiency. Students must receive faculty approval before registering for this course. Course is repeatable for a maximum of 8 credits.

Prerequisites: Music 229 and consent of instructor.

Mu 415W LITERATURE AND CONVERSATION: WRITING ABOUT MUSIC (3-0) 3

The purpose of this course is to help students develop an understanding of what constitutes literacy within the discipline of music, and to integrate critical analysis with writing and creative performance. Students will be required to read and discuss examples of scholarly writing which will include program notes, journal articles, grant proposals, and concert reviews. They will then be required to practice and refine their own writing skills using these formal models. The process will include multiple drafts and extensive feedback as well as individual guidance and instruction. This course will fulfill the Group W Writing requirement for music majors.

Mu 423 ORCHESTRATION (2-0) 1

A technology-based course designed to equip music majors with the skills and techniques of arranging for instrumental ensembles. Fall term of alternate years.

Prerequisites: Mu 229 and Piano Proficiency Requirement.

Mu 424 COMPOSITION (2-0) 2

This seminar will explore ideas, problems and possible solutions encountered by students working individually in a creative medium.

Prerequisite: Mu 229 or consent of instructor.

Mu 496 SENIOR SEMINAR (2-0) 2

Advanced study and research in music and musical performance. The student will prepare and perform a senior recital approved by the applied area instructor and the department chair.

Prerequisites: Senior standing and consent of instructor.

Mu 499 INDEPENDENT STUDY 1-3

Individual research conducted under the supervision of a faculty member. Offered on demand.

Prerequisites: Approval of instructor and department chair.

[Return to List](#)

Navajo

ML 100/SW 100 FUNDAMENTALS OF NAVAJO LANGUAGE I (3-0) 3

A course in the basic fundamentals of the Navajo language on the oral-aural approach. A native speaker is the instructor and much use is made of tapes, etc.

ML 101/SW 101A1 NAVAJO LANGUAGE II (3-0) 3

Continuation of Navajo I. Whereas Navajo I emphasized speaking, this course will center on reading and writing the Navajo language.

Prerequisite: ML 100/SW 101 or consent of instructor.

Philosophy

Phil 141C INTRODUCTION TO PHILOSOPHY (4-0) 4

An introduction to the philosophical enterprise through discussion and analysis of representative readings from the history of philosophy. Issues considered include the nature of reality, the relation of mind and body, the possibility of proving that God exists, the nature and origin of morality and of beauty, and the relation of knowledge to experience. Fall and winter terms.

Phil 171C CONTEMPORARY MORAL ISSUES (3-0) 3

An examination of the relation between different ethical points of view and the handling of the personal, social, political, ecological and global problems we face today. On demand.

Phil 231C FILM AND PHILOSOPHY (3-0) 3

An examination of the ways in which philosophy is manifested in the making and content of film. This course will include the viewing of several films which portray philosophical themes on the nature of humor, drama, and fear in contemporary film and attempt to answer questions regarding the nature of voyeuristic emotional catharsis in the making of the human being. Finally, the course hopes to address issues of cultural diversity by looking at the way various western and non-

western cultures address these issues. The course will also include philosophical readings on film and the nature of philosophical problems. Summer terms.

Phil 244E CHINESE PHILOSOPHY (3-0) 3

A study of Confucianism, Taoism, and Buddhism, with consideration of some dissenting views to these dominant schools of Chinese thought, such as Moism and Legalism. We will investigate the theories of human nature, knowledge, and reality embraced by these philosophies, as well as their conceptions of ethics and politics.

Prerequisite: Comp 150, Lib 150 or consent of instructor.

Phil 251C MORAL PHILOSOPHY (4-0) 4

A broad review of the history of attempts since classical Greece to identify morality and to establish standards for making and assessing moral judgments. Alternate winter terms.

Phil 252C ENVIRONMENTAL ETHICS (4-0) 4

This course offers an overview of world environmental problems, focuses on conceptual investigations into their historical, social, political and cultural sources, examines various methods of resource conservation, and finally attempts to envision a philosophy of nature based on a "land ethic." Fall and summer terms.

Phil 261C PHILOSOPHY OF RELIGION (4-0) 4

An examination of different philosophical approaches to problems raised by religion. Readings are selected from sources representing widely differing points of view, e.g., those of phenomenology, feminism and liberation theology. Alternate fall terms.

Phil 271B LOGIC (4-0) 4

A broad treatment of different methods of assessing the validity of deductive and inductive arguments. The course covers syllogistic logic, elementary truth-functional logic, quantification and brief discussions of informal logic and of inductive logic. Fall and winter terms.

Phil 274C EARLY FOUNDATIONS OF PHILOSOPHY (4-0) 4

An examination of the history of philosophy from the origins of scientific thought in Asia Minor through the synthesis of Christianity and Greek philosophy in the thought of St. Augustine and the medieval scholastics. A major emphasis of the course will be the systems of Plato and Aristotle, which provide many of the roots of modern thought. This course is a suitable beginning course in philosophy. Alternate fall terms.

Phil 305W WRITING PHILOSOPHY (4-0) 4

An introduction to the techniques, conventions, and styles of philosophical writing through the critical reading and analysis of selected books and journal articles on a topic central to the field, writing analyses of, and responses to, these readings, and presenting and defending a position on this topic in a carefully researched term paper. Offered on demand.

Prerequisite: Phil 141C and Phil 271C, and Comp 150, LIB 150.

Phil 320E INDIGENOUS WORLDVIEWS (4-0) 4

A survey of selected regional belief systems outside the major religious traditions treated in Phil 321E. Emphasis is on philosophical foundations of religious cultures native to the Americas, Africa, Asia, Australia and Old Europe. Special attention is given to the mythic and other symbolic expressions of archaic consciousness in contemporary societies. Alternate fall and summer terms.

Phil 321E WORLD RELIGIONS (4-0) 4

A study of the nature and history of the major contemporary religions of the world. Alternate fall and summer terms.

Phil 328C PHILOSOPHY OF SCIENCE (4-0) 4

An examination of the scope, structure, methodology and spirit of science with special attention to such topics as the relation between the presuppositions and the conclusions of science, the nature of scientific revolutions and the social responsibilities of the scientist. Alternate fall terms.

Prerequisite: 4 credits in philosophy other than Phil 271B or consent of instructor.

Phil 352C ECOLOGY AND MORALITY (4-0) 4

An in-depth focus on contemporary theories and practices, including myth and ritual, which integrate moral, social, political and cultural philosophies with scientific ecologies. Recent academic efforts by regional thinkers and scholar/activists of color will also be reviewed. Alternate winter terms and summer.

Prerequisite: Phil 252C or consent of instructor.

Phil 361C PHILOSOPHY OF ART (4-0) 4

An examination of the nature and purposes of art through the study of several traditional and contemporary philosophies of art such as those of Plato, Aristotle, Marx, Tolstoy, Collingwood and Merleau-Ponty. Topics include the nature of the art object, the distinction between art and craft, the role of imitation, representation, expression and creativity, the social function and responsibility of the artist, and the nature of aesthetic experience. Alternate winter terms.

Phil 363C PHILOSOPHY OF HISTORY AND CULTURE (4-0) 4

An examination of the nature and methodology of historical knowledge and various conceptions of culture through the study of several traditional and contemporary philosophies of history and culture. Readings will include recent work from Africa and the Americas as well as traditional European perspectives. Alternate winter terms.

Prerequisite: 4 credits of philosophy other than Phil 271B or consent of instructor.

Phil 365C PHILOSOPHY AND FEMINISM (3-0) 3

An examination of gender bias in its various guises, such as androcentrism, gender polarization, and biological essentialism. Explanations of the source and maintenance of sexism are explored through feminist theories: liberal, radical, Marxist, existential, psychoanalytic, and postmodern. Feminist theory itself is critically evaluated.

Prerequisite: Comp 150 and LIB 150 or consent of instructor.

Phil 371C THEORIES OF HUMAN NATURE (4-0) 4

An examination of various theories of the nature of human nature with readings from both classical and contemporary authors. Special

attention will be given to how presuppositions about human nature underlie conceptions of knowledge and theories of education. Alternate winter terms.

Prerequisite: 4 credits of philosophy other than Phil 271B or consent of instructor.

Phil 375C MODERN FOUNDATIONS OF PHILOSOPHY (4-0) 4

An examination of the history of philosophy from the Renaissance through the 20th century. Continental Rationalism and British Empiricism are studied not only on their own terms but in relation to the Kantian synthesis. The Kantian philosophy, in turn, together with much 19th century thought, is shown to be a necessary background for understanding the major philosophical issues of the 20th century. Alternate winter terms.

Prerequisite: 4 credits of philosophy other than Phil 271B or consent of instructor.

Phil 377C CONTEMPORARY EUROPEAN PHILOSOPHY (4-0) 4

An examination of trends and issues in 20th century continental philosophy. Readings will focus on the development of phenomenology and existentialism, and on their contributions to existential Marxism, structuralism and deconstructionism. Winter term.

Prerequisite: 4 credits in philosophy other than Phil 271B or consent of instructor.

Phil 378C CONTEMPORARY ANGLO-AMERICAN PHILOSOPHY (4-0) 4

An examination of trends and issues in 20th century analytic philosophy. Alternate fall terms.

Prerequisite: 4 credits in philosophy other than Phil 271B or consent of instructor.

Phil 381C THEORIES OF REALITY (4-0) 4

An examination of traditional and contemporary attempts to understand the nature of reality. Alternate fall terms.

Prerequisite: 4 credits in philosophy other than Phil 271B or consent of instructor.

Phil 382CE PHILOSOPHIES OF THE SOUTHWEST (3-0) 3

An examination of the various philosophical underpinnings of the dominant cultures of the Southwest. This course will move beyond examining the kinds of differences found amongst the cultures of the Southwest to examine the philosophical assumptions which inform and contribute to the emergence of these differences. The course will also examine the kinds of misunderstandings which can emerge from the interactions of these cultures when cultural philosophical assumptions go unexamined. Summer term.

Phil 451 STUDIES IN GREAT PHILOSOPHERS (4-0) 4

An examination in depth of the writings of a major philosopher such as Plato, Aristotle, Kant, Marx, Heidegger or Sartre. This course may be repeated as long as the topics are different.

Prerequisite: 4 credits in philosophy other than Phil 271B or consent of instructor.

Phil 480CDW CONTEMPORARY POLITICAL THOUGHT (4-0) 4

An examination of the philosophical and political origins of the political formation of the self, interactions between dominant and minority cultures, and legitimation and consensus in a post-Marxist, post-Capitalist, and post-Colonial world. Focuses on 20th century thinkers such as Foucault, Deleuze and Guattari, Said, Lyotard, Braidotti and others. PS 387D recommended. Same as PS 480CDW.

Phil 496 SENIOR SEMINAR (4-0) 4

Advanced study and research in selected topics. Alternate winter terms, even years.

Prerequisite: Senior standing and consent of instructor.

Phil 499 INDEPENDENT STUDY 1-4

Individual research is conducted under the supervision of a faculty member. Offered on demand.

Prerequisite: 12 credits in philosophy and approval of instructor.

[Return to List](#)

Physical Education

PE PHYSICAL ACTIVITY (0-2) 1

Seasonal physical activities during each trimester for men or women. Activities include aquatics, dance, fitness, outdoor education, sport skills and varsity sports. Up to a maximum of six credits can be counted toward graduation. No physical activity at the same level can be repeated for credit. Offered each term.

[Return to List](#)

Physical Science

PhySc 100BL PHYSICAL SCIENCE LABORATORY (0-2) 1

Work covers experiments in the fields of physics, chemistry, meteorology, geology and astronomy. Laboratory techniques and scientific processes are emphasized. Fall and winter terms.

PhySc 105B THE PHYSICAL SCIENCES (3-0) 3

History, processes and methods of science. Study is made of the development of some of the most important concepts of science, modern developments, problems in science, and problems from science. Fall and winter terms.

PhySc 200BL INTRODUCTORY ASTRONOMY LABORATORY (0-2) 1

Work is aimed toward a greater appreciation of the universe through selected observational laboratory experiments in astronomy. Fall and winter terms.

Prerequisite: PhySc 205B taken concurrently (or GnSc 205B for those who may have already taken it).

PhySc 205B INTRODUCTORY ASTRONOMY FOR THE LIBERAL ARTS (3-0) 3

A course designed for students interested in elementary astronomy. A survey of modern observations of astronomy including the moon, planets, stars and their formations. A short history of astronomy is also included. Fall and winter terms.

PhySc 405 COSMIC TIME PLACE (3-0) 3

Modern science has or will profoundly alter our view of ourselves and our place and time in physical reality. This course describes in non-technical terms the recent developments in cosmology, quantum physics, pre-biotic evolution, and artificial intelligence -- these seem likely to have the largest impact on human world views. Format, readings from some lay expositional works and class discussion.

Prerequisites: Junior standing or instructor permission.

[Return to List](#)

Physics

Phys 201B COLLEGE PHYSICS (non Calculus) I (4-2) 5

An introductory course in physics covering the basic concepts of mechanics (motion, energy, fluids, materials), heat and thermodynamics, wave motion and sound. Calculus is not used. The course is intended to meet college physics requirements and also satisfy the curiosity of all students whose major interest is not in engineering, physical science or mathematics. Students who take Physics 217B will not receive credit toward graduation for Phys 201B. This course includes an introductory physics laboratory with experiments in mechanics, heat and sound. Fall and winter terms.

Prerequisites: High school algebra and trigonometry.

Phys 202B COLLEGE PHYSICS (non Calculus) II (4-2) 5

An introductory course in physics covering the basic concepts of electricity, magnetism and optics. Calculus is not used. Students who take Phys 218B will not receive credit toward graduation for Phys 202B. This course includes an introductory physics laboratory with experiments in optics, electricity, electronics and magnetism. Fall and winter terms.

Prerequisite: Phys 201B.

Phys 217B PHYSICS FOR SCIENCE AND ENGINEERING I (4-2) 5

An introductory course in physics covering the basic concepts of classical mechanics (motion, energy, fluids, materials), heat and thermodynamics, wave motion and sound. Differential and integral calculus is used throughout the course. Phys 217B is required of engineering students and strongly recommended to all general science majors. This course includes an introductory physics laboratory with experiments in mechanics, heat and sound. Fall and winter terms.

Prerequisite: Math 221B.

Phys 218B PHYSICS FOR SCIENCE AND ENGINEERING II (4-2) 5

An introductory course in physics covering the basic concepts of electricity, magnetism and optics. Phys 218B is required of engineering students and strongly recommended to all general science majors. This course includes an introductory physics laboratory with experiments in optics, electricity, electronics and magnetism. Fall and winter terms.

Prerequisites: Phys 217B and Math 222B.

Phys 301 INTRODUCTION TO ELECTRONICS (2-2) 3

A survey course of the theory and design of various electronic circuits and devices used in scientific instrumentation. Winter term, alternate years.

Prerequisite: Phys 218B.

Phys 320 MODERN PHYSICS (3-0) 3

A study in the modern theories of atomic and nuclear physics that have developed since 1900. An introduction to special relativity and elementary quantum mechanics is included. Fall term, alternate years.

Prerequisites: Phys 202B or 218B and Math 222.

Phys 340 OPTICS (3-3) 4

A study of classical and modern theories of geometrical and physical optics including matrix methods for optical systems, diffraction theory, and an introduction to Fourier optics. Fall term, alternate years.

Prerequisites: Phys 202B or 218B and Math 222.

Phys 354 THEORETICAL MECHANICS (3-0) 3

The theoretical formulation of the kinematics and dynamics of particles and rigid bodies with an introduction to Lagrangian and Hamiltonian mechanics. An introduction to vector and tensor analysis is also included. Winter term, alternate years.

Prerequisites: Phys 202B or 218B and Math 223.

Phys 361 PRINCIPLES OF ELECTRICITY AND MAGNETISM (4-0) 4

The mathematical theory of static electric and magnetic fields, time-dependent fields and electromagnetic radiation. Offered on demand.

Prerequisites: Phys 202B or 218B with Math 327 taken concurrently.

Phys 370 HEAT AND THERMODYNAMICS (3-0) 3

A study of classical thermodynamics which includes the first and second laws of thermodynamics and their application in energy conversion. On demand.

Prerequisites: Phys 201B or 217B and Math 223.

Phys 380 ADVANCED PHYSICS LABORATORY I (0-3) 1

Work will stress experiments in modern physics with emphasis on electronic instrumentation and subsequent data analysis. Offered on demand.

Prerequisite: Phys 320 taken concurrently or equivalent.

Phys 381 ADVANCED PHYSICS LABORATORY II (0-3) 1

Work will stress experiments in electricity and magnetism with emphasis on data collection and analysis. Offered on demand.

Prerequisite: Phys 361 or concurrent enrollment.

Phys 395W WRITING TECHNIQUES IN PHYSICS I (2-0) 2

Advanced study, research, and writing in selected topics. Designed to train students to write proposals, research reports, and semi-technical description in the field of physics. Offered on demand.

Prerequisites: Junior standing or consent of instructor.

Phys 400 SCIENCE AND HUMAN VALUES (2-0) 2

A course designed to investigate the interaction between science and the world community. The course will be conducted on a seminar basis with interdisciplinary instructors and/or invited instructors from other areas of the College. Scientific, social and human values will be discussed. Offered on demand.

Prerequisite: At least 6 credits in the natural sciences.

Phys 420 QUANTUM MECHANICS I (3-0) 3

An introduction to Scodinger's formulation of wave mechanics including potential wells, harmonic oscillators, and energy and momentum operators. Offered on demand.

Prerequisites: Phys 202B or 218B and Math 223.

Phys 421 QUANTUM MECHANICS II (3-0) 3

A continuation of the study of quantum systems via approximation techniques, theory of many electron atoms, identical particles and spin. Offered on demand.

Prerequisite: Phys 420.

Phys 454 ADVANCED TOPICS IN PHYSICS 1-4

Advanced material in various areas of physics at the senior level. The course will treat one area of physics, such as nuclear physics, thermal physics, statistical physics or solid state physics. Class schedules will indicate the area. Offered on demand. This course may be repeated for credit if topics are different.

Prerequisite: Advanced standing in physics.

Phys 495W WRITING TECHNIQUES IN PHYSICS II (2-0) 2

Advanced study, research, and writing in selected topics. Designed to train students to write proposals, research reports, and semi-technical descriptions in the field of physics. A continuation of Physics 395W. Offered on demand.

Prerequisite: Phys 395W.

Phys 496 SENIOR SEMINAR (2-0) 2

Advanced study and research in selected topics. Offered on demand.

Prerequisites: Senior standing and consent of instructor.

Phys 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member.

Prerequisite: Consent of instructor.

[Return to List](#)

Political Science

PS 101D INTRODUCTION TO POLITICAL SCIENCE (4-0) 4

An introduction to the study of politics; an examination of the relationship of society and government; and a study of the nature of the state, of the forms of rule evolved from the past, and of contemporary political systems. Fall and winter terms.

PS 110D U.S. NATIONAL GOVERNMENT (4-0) 4

A study of the policies, procedures, politics and problems of the U.S. national government. Fall and winter terms.

PS 120D STATE AND LOCAL GOVERNMENT (4-0) 4

A study of the history, nature, organization and operation of state and

local government in the United States. Fall and winter terms.

PS 140D INTRODUCTION TO LAW AND LEGAL SYSTEMS (4-0) 4

An introduction to legal systems' treatment of disputes between citizens, citizens and business, and citizens and government, with special emphasis on disputing in the legal system of the United States. Consideration given to the influence of legal systems on competition for a society's benefit. Fall term, even years.

PS 241D INTRODUCTION TO CRIMINAL JUSTICE SYSTEMS (4-0) 4

The nature of crime, the role of police, attorneys, courts and corrections in our criminal justice system. Fall, winter and summer terms.

PS 250W INTRODUCTION TO POLITICAL ANALYSIS (4-0) 4

Analysis of contemporary behavioral theories and research methods of politics and preparation for critical reading of professional literature. Writing intensive course. Fall term.

Prerequisite: PS 101D, Comp 150, LIB 150.

PS 251W ADVANCED RESEARCH METHODS (4-0) 4

An advanced course in the methods and tools of research including both qualitative and quantitative approaches. Emphasis is on the design of political research, data collection techniques, statistical analysis and interpretation. Writing intensive course. Winter term.

Prerequisite: PS 250W.

PS 280DE INTRODUCTION TO COMPARATIVE POLITICS (4-0) 4

A comparative study of the political systems of selected modern states. An emphasis is placed on the historical, cultural, social and economic environments as well as on political structures, participation, policymaking and evaluating the effectiveness of political action. Winter term, even years.

PS 300DE RELIGION AND POLITICS (4-0) 4

A comparative exploration of dominant and minority political interactions in social and cultural settings. This course examines how, and with what consequences religion and politics interact as frameworks for freedom and oppression in Central America, Asia, and the United States. Winter term, odd years.

PS 301 LOCAL GOVERNMENT INTERNSHIP 8-16

Practical half-time or full-time work at the regional, county or municipal government level. Requires a detailed journal and completion of a research paper on a local government topic. May be repeated once for a total of 16 credits provided that the internship is taken with different agencies. Fall, winter and summer terms, on demand.

Prerequisites: Tee courses selected from PS 101D, 110D, 120D, 241D, 310D, 330D and consent of instructor.

PS 305DE ENVIRONMENTAL POLITICS (3-0) 3

An introduction to a wide range of global environmental issues. Global warming, overpopulation, natural resource depletion, deforestation in Latin America, Africa and Asia, potable water crises in Asia, and desertification in Africa are all indicators of ongoing major environmental changes. Global environmental change raises profound moral, political and economic questions with which society has only begun to grapple. This course addresses regional and international environmental problems and proposed solutions. Summer term.

PS 310D AMERICAN POLITICAL BEHAVIOR (4-0) 4

An empirical inquiry into the dynamics of political activity in the United States, with emphasis on the electorate and the roles of political parties, the news media, public opinion and political interest groups. Fall term, even years.

PS 320D INTERNATIONAL POLITICS (4-0) 4

An examination of the international struggle for power, with special emphasis on nationalism, economic objectives, armaments, multinational corporations and North-South issues. Fall term.

Prerequisite: PS 101D.

PS 322DE INTERNATIONAL POLITICAL ECONOMY (4-0) 4

A study of the interplay of economics and politics in the world arena. The course covers a wide range of political and economic issues and concepts, and introduces students to the many players at the international level (financial institutions, multinational organizations, nation-states, etc.) The course also provides a theoretical background to issues of political and economic interaction at the international level. PS 320D recommended. Winter term, even years.

PS 325DE MIDDLE EAST POLITICS (4-0) 4

An examination of the forces shaping the governments and politics of modern Arab states in North Africa and Southwest Asia, with emphasis on Islam, Islamist politics, regional geopolitics and current economic, natural resource and social issues affecting the Arab world. Fall term, odd years.

PS 330D PUBLIC ADMINISTRATION (4-0) 4

Role of administration in government policymaking and implementation. Course uses case study method from a variety of policy areas. Winter term, odd years.

PS 337D U.S. FOREIGN POLICY (4-0) 4

A study of the United States' foreign policy from the American Revolution to the present day, with emphasis on current policy and how it is made. Fall term, odd years.

PS 340D CONSTITUTIONAL LAW: BILL OF RIGHTS (4-0) 4

Rights of citizens as elaborated through the Bill of Rights and Fourteenth Amendment to include freedom of speech and press, freedom of religion, privacy, discrimination and criminal rights. Recommended for political science majors and advanced general students. Fall term.

PS 341D CONSTITUTIONAL LAW: FEDERALISM AND THE SEPARATION OF POWERS (4-0) 4

Powers and limitations of the national judiciary, Congress, the presidency, war powers, and the federal relationship of national government and state governments. Winter term, odd years.

PS 350 STATE LEGISLATIVE INTERNSHIP 16

Practical, full-time work in the Colorado General Assembly as a legislative intern. Each student works for a lawmaker in either the State Senate or the State House of Representatives. Requires the keeping of a detailed journal and the completion of a research paper. Winter term.

Prerequisites: PS 101D, 110D, 120D, 310D and consent of instructor.

PS 360DE REVOLUTION AND THE MODERN WORLD (3-0) 3

Analyzes the origins, tactics, ideologies and results of leftist, bourgeois and rightist revolutionary movements, stressing a comparative and historical approach. Summer term.

PS 365DE WOMEN AND DEVELOPMENT (3-0) 3

An overview of the central role women play in the development process in non-Western societies, and of their struggle to gain access to the most basic levels of power and governance around the world. The focus will be on women in developing countries, but reference to women in developed countries will also be made. PS 280DE recommended. Summer term.

PS 370DE LATIN-AMERICAN POLITICS (4-0) 4

An inquiry into specific political problems shared by many nations in contemporary Latin America. Emphasis will be placed on such issues as forms of government, i.e., populism, military dictatorships, bureaucratic-authoritarianism, economic development and social movements. PS 280DE recommended. On demand.

PS 372DE AFRICAN POLITICS AND DEVELOPMENT (4-0) 4

A general survey of the forces shaping the governments and politics of African nations. While the emphasis will be on sub-Saharan Africa, Northern Africa will also be included in the course. Recent attempts at democratization, regional military conflicts, environmental challenges and the AIDS epidemic will all be covered in the course. PS 280DE is recommended. Winter term, odd years.

PS 374DE PACIFIC RIM POLITICS AND ISSUES (4-0) 4

An exploration of the concept of a "Pacific Rim" region. The course

explores the intersection of economic, political, cultural and environmental issues that affect the region. Historical and current relationships between areas as diverse as Seattle, Singapore and Santiago are addressed. PS 280DE recommended. On demand.

PS 380DE COMPARATIVE COMMUNIST SYSTEMS (4-0) 4

A comparative study of the dynamics of communist systems focused on the Soviet Union and People's Republic of China, including dimensions of continuity and change in pre- and post-communist environments. Similarities and differences are analyzed, along with an examination of factors working for and against decentralization. Fall term, odd years.

PS 385CD 20th-CENTURY SOCIALISMS (3-0) 3

An inquiry into the place of modern socialist thought in the western intellectual tradition. Intellectual and historical influences on Marxism are clarified, along with the ambiguities in the legacy left by Marx and Engels. The stillbirth of Marxism is traced from these ambiguities through the major discrepancies in the thought of Lenin, Bernstein, Kautsky and Mao. Summer term.

PS 386D ANCIENT POLITICAL THOUGHT (4-0) 4

A study of western political thought from pre-Socratic Athens to the 16th century. Readings in the works of philosophers including Plato, Aristotle, Machiavelli and others. Fall term.

Prerequisite: PS 101D.

PS 387D MODERN POLITICAL THOUGHT (4-0) 4

An examination of the main currents of western political thought from the 17th century to the present. Readings in the works of philosophers including Hobbes, Locke, Rousseau, Marx and others. Winter term.

Prerequisite: PS 386D.

PS 400DE NATIVE AMERICAN LAW AND POLITICS (4-0) 4

A study of political and legal issues which involve American Indians, both from a historical and contemporary perspective. On demand.

PS 421D THE AMERICAN PRESIDENCY (4-0) 4

Study of the American presidency, including historical development and current structure, organization, behavior, processes and policy implications; examination of executive bureaucracy. Winter term, odd years.

PS 422D LEGISLATIVE PROCESS (4-0) 4

Study of American legislatures at the federal and state level including structural, behavioral and policy implications of the legislative process in contemporary American government. Winter term, even years.

PS 423 NATURE OF LAW AND THE JUDICIAL PROCESS (4-0) 4

Explores the debate about the role of the courts, the nature and limits of law and the meaning of concepts such as justice, liberty, morality, and responsibility in a constitutional republic. The impact of judicial processes on this debate is analyzed. Winter term, even years.

PS 425D PRISONS AND PRISONERS (4-0) 4

An inquiry into imprisonment as a punishment for criminals. Historical perspectives on crime and punishment and contemporary issues facing prisons and prisoners are clarified and analyzed. Fall term.

Prerequisite: PS 241D.

PS 450 NATIONAL GOVERNMENT INTERNSHIP 16

Practical, full-time intern work in Washington, D.C., in the national government. Requires the keeping of a detailed journal and the completion of a research paper. Fall, winter and summer terms, on demand.

Prerequisites: PS 101D, 110D, 422D and consent of instructor.

PS 480CDW CONTEMPORARY POLITICAL THOUGHT (4-0) 4

An examination of the philosophical and political origins of the political formation of the self, interactions between dominant and minority cultures, and legitimation and consensus in a post-Marxist, post-Capitalist, and post Colonial world. Focuses on 20th century thinkers such as Foucault, Deleuze and Guittari, Said, Lyotard, Braidotti and

others. PS 387D recommended. Same as Phil 480CDW. Winter term.

PS 495 PROSEMINAR IN POLITICAL SCIENCE (2-0) 2

This course provides an opportunity to engage in a critical examination of the discipline of political science and its relationship to career opportunities. It encourages students to think seriously about political science as a component of liberal arts education as well as a vocation. It devotes time to preparing an assessment portfolio and identifying a research topic for the senior seminar. Fall term.

Prerequisite: PS 251W.

PS 496 SENIOR SEMINAR (2-0) 2

Advanced study and research in selected topics.

Prerequisites: PS 251W, senior standing and PS 495.

PS 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

Prerequisite: Approval of the instructor and the department chair.

[Return to List](#)

Psychology

Psych 157D INTRODUCTION TO PSYCHOLOGY (3-0) 3

An introduction to the scientific study of behavior, including the concepts of learning, motivation, perception, emotions, personality and sexuality. Abnormal, social, developmental and physiological psychology will also be discussed.

Psych 218 PSYCHOLOGICAL FOUNDATIONS OF EDUCATION (2-0) 2

An introduction to the psychological principles relevant to education. Topics include learning theories, teaching-learning processes, individual differences, human intelligences and issues of educational and cultural diversity. The psychological principles underlying educational practices

(e.g. cooperative learning, testing, performance assessments, etc.) are also discussed. Note: This course last 7 weeks (½) of the trimester.

Prerequisite: Psych 157D.

Psych 233D PERSONALITY (4-0) 4

This course provides an introduction to the major theories of personality, including psychoanalytic, learning, humanistic, biological, cognitive and trait theories. Emphasis will be placed on an understanding of personality structure and the ways that personality is manifested in behavior.

Prerequisite: Psych 157D.

Psych 241B BASIC STATISTICS FOR PSYCHOLOGISTS (4-0) 4

An introduction to the collection, organization and analysis of data from human and animal populations. Methods of sampling, treatment of data and reporting are covered. Descriptive statistics and statistical inference are taught, as are decision factors and error analysis. Students are introduced to the use of statistical computer software. Same as Math 201B and BA 253B.

Psych 254D LIFE SPAN HUMAN DEVELOPMENT (4-0) 4

This course applies psychological principles to human perspectives of development. The first portion of the course is devoted to studying principles, processes, theories and research methodology. The second part applies these concepts to each stage of the human life span from conception through aging and death and dying, with emphasis on child, preadolescent and adolescent development. Community resources are used for field trips, guest speakers, etc., throughout the second part of the course.

Prerequisite: Psych 157D.

Psych 270 PSYCHOLOGY OF GENDER (4-0) 4

An investigation of women's and men's experience of gender as well as the ways that gender influences how people are perceived by others. We will explore a variety of explanations for the similarities and differences between females and males. These will include cultural, social, cognitive, developmental and biological approaches. The application of

psychological theory to current gender issues will be considered. The course will include a critique of psychological theory and research on gender.

Prerequisite: Psych 157D.

Psych 296W PSYCHOLOGICAL RESEARCH METHODS (3-2) 4

Introduction to the basic assumptions, concepts and methodology of experimental and non-experimental psychological research. Includes the study of scientific principles, critical evaluation of published research, and discussion of research ethics. Technical topics such as operational definitions, independent and dependent variables, measurement, techniques of observation and experimental design are presented. The laboratory is designed to provide skill in implementing experiments in a variety of psychological fields. This course also introduces students to the discourse and written conventions of APA-style experimental reports.

Prerequisites: Comp 150, LIB 150, Psych 157D and Psych 241B.

Psych 300 METHODS OF INQUIRY (4-0) 4

This course emphasizes qualitative research skills and methods of inquiry. Topics include case studies, observational methods, interview techniques, questionnaires and surveys. Students will also be exposed to information about self-assessment, creating and maintaining client files, confidentiality, legal concerns, minority and affirmative action issues, demographic trends and actuarial systems, agency policies, advocacy, and interfaces of service agencies with other community resources. Students will learn inquiry and writing skills and hermeneutic research approaches via laboratory experiences, community agency activities, and cross-disciplinary collaborations. Methods of inquiry for use with culturally diverse groups will also be addressed.

Prerequisite: Psych 296W.

Psych 305D PSYCHOLOGY OF INTUITION (4-0) 4

Students will study and write about the psychology and philosophy of intuition. This writing intensive interdisciplinary course applies the methods of psychology, especially cognitive science, and of philosophy to intuition, especially that of writers.

Prerequisite: Psych 157D.

Psych 325 GROUP DYNAMICS (4-0) 4

In this course, we will explore the psychology of groups. Topics will include group structure, interpersonal communication, leadership and group decision making. Students will participate in a variety of group exercises and will relate their experiences to the theory and research of the field of group dynamics.

Prerequisites: Psych 157D.

Psych 327 PHYSIOLOGICAL PSYCHOLOGY (3-2) 4

This course will focus on establishing a basic understanding of physiological mechanisms that influence behavior. Introductory neuroanatomy, neurophysiology, and neuropsychology will be presented. Current findings that emphasize neurotransmitter and endocrine influences on behavior will be discussed. Laboratory experiences will include dissection, Physiological modeling, and experimental demonstration.

Prerequisite: Psych 296W.

Psych 328D INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (4-0) 4

This course explores the ways that psychology can help us to understand the behavior of people in the workplace. It includes study of the motivation and development of the individual employee as well as the group dynamics of the organization in which the employee functions. Equal emphasis will be placed upon understanding relevant psychological theory and learning how to apply psychology in practical situations.

Prerequisite: Comp 150 and Psych 157D.

Psych 330 ANIMAL BEHAVIOR (2-4) 4

This course emphasizes the field of ethology. The course will describe the behavior of a wide range of animal species (including various insects, birds, reptiles, amphibians, and mammals). Human behavior will not be emphasized. The course will require students to understand and implement various behavioral techniques such as estimation,

classification, and analysis. Theoretical orientation will be based on historic ethological and evolutionary perspectives. The lab will require both laboratory and field work.

Prerequisite: Psych 296W.

Psych 333 EXPRESSIVE ARTS THERAPY IN THE COMMUNITY (2-0) 2

This course is for juniors and seniors who are interested in and/or have experience with special needs populations. After training, art, dance and movement processes will be developed with a group of adults with conic mental illness.

Prerequisite: Consent of instructor.

Psych 340D CREATIVITY (4-0) 4

An interdisciplinary inquiry course exploring biopsychosocial expressions of creative process tough study of theory and applications to current social issues. Areas for exploration include the creative brain, paradigm shifts, the creativity of change, and specific student interest in creativity tough movement, visual arts, improvisation, free writing and dialogue.

Prerequisites: Consent of instructor.

Psych 342 PSYCHOLOGICAL TESTING (4-0) 4

A course designed to introduce the student to the area of psychological tests and measurements, providing training in the concepts and applications of intelligence tests, personality inventories, and projective techniques, as well as aptitude and interest scales. Students take, score, interpret and discuss some of the most commonly used psychological tests.

Prerequisite: Psych 241B and Psych 233D.

Psych 354D TOPICS IN CHILD PSYCHOLOGY (4-0) 4

This course offers a more concentrated focus on child psychology than Psych 254D (Life Span Human Development). The course will cover interesting aspects of developmental psychology including biosocial, socioemotional and cognitive growth. Current methods, theories and

empirical findings on child development will be examined. The course explores how factors such as genetics, culture and parenting influence various dimensions of infancy, childhood and adolescence.

Prerequisite: Psych 254D.

Psych 365 PSYCHOLOGY OF LEARNING (3-2) 4

The conditions of learning in animals and humans as found in the experimental literature. Usually offered in the fall term.

Prerequisite: Psych 296W.

Psych 372D LANGUAGE, MIND AND BRAIN (4-0) 4

This interdisciplinary course focuses on the unconscious processes occurring in our minds that allow us to understand and produce language. Topics include animal communication, evolution of language, dyslexia, use of sign language, bilingualism, childhood language acquisition, language comprehension by computers, language disorders caused by brain damage, and hemispheric differences in language processing.

Prerequisites: Psych 157D.

Psych 375D MULTICULTURAL PSYCHOLOGY (4-0) 4

This course will present an overview of multicultural viewpoints in clinical and research psychology. Predominant western European psychological theory will be compared and contrasted with thinking from non-Western constructs and ideology. Multiculturalism as a psychology of people will be explored from a global perspective and from the perspective of various ethnic and minority groups within the United States. Students will attempt to integrate culturally diverse thinking and research to explore ways to increase cultural sensitivity and tolerance of difference in community, workplace and human service contexts.

Prerequisites: Comp 150 and Psych 157D.

Psych 383D HISTORY OF PSYCHOLOGY (4-0) 4

A study of the philosophical and scientific antecedents of modern psychology together with a review of the classical psychological

systems and theories from ancient times to the present.

Prerequisite: Psych 157D.

Psych 387 ABNORMAL PSYCHOLOGY (4-0) 4

A study of historical, cultural, and contemporary approaches to understanding and treating psychopathology. Use of the DSM IV classification system is taught and case studies of psychopathology are analyzed.

Prerequisite: Psych 233D.

Psych 392 FOUNDATIONS OF CLINICAL PSYCHOLOGY (4-0) 4

The course provides a foundation in the applications of psychological theory and research, toward a variety of intra-psychic, interpersonal and organizational problems in our society. Fall term. This course does not count for general distribution.

Prerequisites: Psych 387, junior standing and consent of instructor.

Psych 393D HEALTH PSYCHOLOGY (4-0) 4

A study of the specific educational, scientific, and professional contributions of the discipline of psychology to the promotion and maintenance of health, the prevention and treatment of illness, the identification of diagnostic correlates of health, wellness and illness, and the interaction of personal, interpersonal and community aspects of wellness. Topics covered include the biopsychosocial model, family and community systems, the health care system and alternate methods of health care delivery.

Prerequisites: Psych 157D and junior standing.

Psych 394 FIELD SCHOOL IN CLINICAL PSYCHOLOGY 6

A one-month participation with a psychiatric team at a state hospital for mentally disturbed persons. Experiences include admission interviews, staffings, diagnostic techniques, treatment planning and implementation including occupational and recreational therapy. First summer term.

Prerequisite: Psych 387 and consent of instructor. Recommended, Psych 342.

Psych 395 SEMINAR + PRACTICUM IN CLINICAL PSYCHOLOGY (4-0) 4

The course provides an opportunity for students to engage in a supervised practicum in cooperation with an area health or human service organization. Weekly seminars will deal with professional issues and ethics common to all settings.

Prerequisites: Psych 375, Psych 392 or Psych 393, Psych 420, and consent of instructor.

Psych 420 COUNSELING SKILLS (4-0) 4

This course develops various counseling skills, processes, and abilities in students through academic and applied instruction.

Prerequisites: Psych 387 and consent of the instructor.

Psych 425 SOCIAL PSYCHOLOGY (3-2) 4

This course provides an introduction to the many ways in which our thoughts, emotions and behavior are influenced by the people around us. We will explore topics such as aggression, attitude change, group dynamics, and self-presentation. Emphasis will be placed upon theories of social behavior and the scientific research that supports them.

Prerequisite: Psych 296W.

Psych 426 SENSATION AND PERCEPTION (3-2) 4

This course examines human vision, hearing, smell, taste, and touch. While studying these sensory systems, we also consider the perception of art, music, illusions, speech, and pain. Numerous demonstrations and experiments are included in the lab and lecture so that abstract principles can be applied in meaningful, interesting ways. Usually offered in the fall term.

Prerequisite: Psych 296W.

Psych 441 HUMAN MEMORY AND COGNITION (3-2) 4

An overview of attention, memory, mental imagery, general knowledge, concept formation, problem-solving, language, intelligence, and other

high level mental processes. The laboratory is designed to give students experience in research using standard cognitive psychology paradigms. Usually offered in the winter term.

Prerequisite: Psych 296W.

Psych 496 SENIOR SEMINAR (4-0) 4

Advanced study and research in selected topics. Fall and winter terms.

Prerequisites: Psych 296W, Psych 300 and consent of instructor.

Psych 498 THESIS 1-6

Each student will be involved in the development and completion of a quantitative research project, a qualitative research experience, a comprehensive literature review, or a community-based agency experience. The focus of this course is to provide students with an opportunity to explore and expand their individual interests within the field of psychology under the direct supervision of a member of the psychology faculty. A research proposal may be required prior to receiving professor's consent. This course can be repeated for a maximum of six credit hours.

Prerequisites: Psych 296W, 300, senior standing and consent of instructor.

Psych 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member.

Prerequisite: Consent of instructor.

[Return to List](#)

Religious Studies Minor

RS 261C PHILOSOPHY OF RELIGION (4-0) 4

An examination of different philosophical approaches to problems raised by religion. Readings are selected from sources representing widely differing points of view, e.g., those of phenomenology, feminism and liberation theology. Alternate fall terms. This course is

the same as Phil 261C and credit will only be given for one of these courses.

RS 305CE MESPOTAMIAN MYTH/RELIGION (3-0) 3

A study of ancient Near Eastern myth/religion from the beginning of written history in Sumer(Mesopotamia) around 3000 B.C. into the early post-exilic period of the Hebrew Beble(Old Testament) in Israel around 500 B.C. Interconnections, influences, and innovations will be explored. Summer term. This course is the same as Hist 305CE and credit will only be given for one of these courses.

RS 320E INDIGENOUS WORLDVIEWS (4-0) 4

A survey of selected regional belief systems outside the major religious traditions treated in Phil 321E. Emphasis is on philosophical foundations of religious cultures native to the Americas, Africa, Asia, Australia and Old Europe. Special attention is given to the mythic and other symbolic expressions of archaic consciousness in contemporary societies. Alternate fall and summer terms. This course is the same as Phil 320E and credit will only be given for one of these courses.

RS 321E WORLD RELIGIONS (4-0) 4

A study of the nature and history of the major contemporary religions of the world. Alternate fall and summer terms. This course is the same as Phil 321E and credit will only be given for one of these courses.

RS 328C CHRISTIANITY IN UNITED STATES (4-0) 4

This course covers the role of Christianity in United States history from the nation's creation until today. The class will look at how mainline Christian denominations have shaped U.S. History and been in turn shaped by the American experience. Within this broad sweep of linking the past to the present important issues like the separation between church and state, and how the nation has gone from Protestant establishment to secularism as well as how law and politics have come to impact religion, will be examined. Fall term, alternate years. This course is the same as Hist 328C and credit will only be given for one of these courses.

RS 446CE ANCIENT ISRAEL AND JUDAH (3-0) 3

This seminar covers ancient Israel from its beginnings around 1250 B.

C. to the execution of Jesus of Nazareth around 35 A.D. Major topics include the origins of Israel and Judah, biblical composition and authors, relations with Egypt and Assuria, the Dead Sea Scrolls, and Jesus in Jewish historical context. An historiographical approach is emphasized. This course is the same as Hist 328C and credit will only be given for one of these courses.

Sociology/Human Services

Soc 100D SOCIAL ISSUES (4-0) 4

This introductory course seeks to examine the extent to which the crisis of institutions creates personal problems in our everyday lives. Conversely, it will explore the degree to which our personal troubles foster institutional contradictions. Topics for study may include the workplace, the environment, inequality, sexism, racism, health care, criminal justice, education, alienation and social services. Fall and winter terms, freshman year.

Soc 101 AMERICAN SOCIETY (1-0) 1

This course introduces international students to contemporary American society through a sociological analysis of the changing patterns of family, community, work, gender, and education in the U.S. and Japan. This sociological perspective on U.S. society will deepen students' understanding of the society in which they will be living and attending college. This course is taught in English. This course is repeatable for up to 2 credits.

Prerequisite: Instructor's permission.

Soc 200 SOCIAL CHANGE AND HUMAN SERVICES (4-0) 4

This course is designed to facilitate critical understanding of, and commitment to, processes of social change in modern society. Using historical and theoretical analysis of social change efforts, students are encouraged to embrace and develop models of change that take seriously the personal and social dimensions of human struggle. The role and responsibility of human service agencies in social change/ community development is also considered. Field work is required.

Soc 210W SOCIAL INQUIRY AND RESEARCH METHODS (4-0)

4

An introduction to quantitative methods used in social science this course serves as the Writing Course for the Department of Sociology/ Human Services. The appropriateness and application of various methods will be emphasized. Data collection, reduction, analysis and interpretation will be covered. Emphasis will also focus on interviewing, participant observation and ethnographic approaches to data collection, and the development of descriptions and interpretations of social settings.

Soc 250CE SOCIAL ISSUES IN CONTEMPORARY NATIVE SOCIETIES (4-0) 4

An examination of the social, political, and economic circumstances of both urban and rural native societies worldwide. Emphasis will be on the United States. Topics may include indigenous peoples in cities, tribal councils, environmental racism, criminal justice, social services, youth, international indigenous issues and networks.

Soc 275D FAMILIES, MARRIAGES AND OTHER SEX-ROLE SYSTEMS (4-0) 4

Analysis of changing patterns of family life and sex roles in contemporary society, of the social sources of these changes, and of their societal and individual consequences. Taught every other year.

Soc 279W ETHNICITY, GENDER AND CLASS IN THE SOUTHWEST (4-0) 4

A descriptive analytic inquiry into the historical, social and economic position of the Hispanics, Native Americans and women of the Southwest. This course serves as the Writing Course for Humanities majors seeking a primary concentration in Sociology/Human Services. Fall term.

Prerequisite: Comp 150 and LIB 150.

Soc 280D POPULAR CULTURE AND MASS COMMUNICATION (4-0) 4

An inquiry into both the production and the consumption of popular culture. Attention will be paid to cultural power as a force for domination as well as a condition for collective affirmation and

struggle. Topics include, popular music, radio and television programs, news media, comic strips and pulp fiction. Alternate fall terms.

Soc 300D THEORIES OF SOCIAL AND PERSONAL LIFE (4-0) 4

This course will critically examine the classical and contemporary theories of self and society. The major paradigms of functionalism, Marxism, symbolic interactionism, structuralism, ethnomethodology, critical and feminist theory will be evaluated.

Soc 301DE COMPARATIVE SOCIETIES (4-0) 4

A comparative study of the social structures of selected countries and regions within the first, second and third worlds. Comparisons will be made of societies within selected regions as well as their relationships to U.S. society. Selected countries and regions will include: Cuba and the Caribbean, the Andean countries, China, Japan, etc.

Soc 310D ECOLOGY AND SOCIETY (4-0) 4

This course will examine environmental issues and the natural world from a cultural and socio-economic perspective. It will attempt to study the ideas, conceptions, practices and beliefs that relate people to the land and their collective environment. Finally, it will look at environmental concerns from the perspective of workers, minorities, and rural and urban communities both in America and worldwide.

Soc 311D ECOLOGY AND SOCIETY FIELD SCHOOL 8

This course offers a field experience in the relationship between people and the land. Students will work on farms and in the U.S. National Forest. They will meet with Anglos, Hispanics and Native Americans in rural communities. One week will be spent in the National Forest learning to identify wildlife and its habitat.

Soc 320 COMMUNITY SERVICE PRACTICUM 4-8

This course provides the student with experience in applied sociology. Students will be involved in human services, applied social research or other activities approved by the advisor and practicum coordinator. The emphasis is upon gaining experiential knowledge through active participation in sociological practice and sharing this in a classroom experience. Practicum may be taken for 4 or 8 credits per term and for a maximum of 16 credits. A maximum of 8 credits can be applied toward

the major in sociology.

Prerequisite: Consent of the instructor.

Soc 330D MIND, SELF AND SOCIETY (4-0) 4

An examination into the ways in which society influences the self and the individual produces society. The relationship between consciousness and social structure will be discussed. Theoretical focus may include symbolic interactionism, ethnomethodology and/or a Marxist perspective. Taught every other year.

Soc 340D RELIGION AND SOCIAL LIFE (4-0) 4

An examination of, principally, contemporary religious phenomena from the viewpoint of social science. The course will also examine the significance of religious studies in the development of reasoning about society. Taught every other year.

Soc 345A1 ART AND SOCIETY (4-0) 4

An inquiry into the relationship between any historically specific art and the social setting in which it was created. The idea that art is a way of seeing a world view, or a theoretic will be explored. The focus of the course may be literature, the visual arts, music, theater or film. Taught every other year.

Soc 350D SEARCH FOR INTIMACY (4-0) 4

This course will examine the cultural and institutional obstacles to intimacy. Class, gender, and race as historical categories will play their part in discussion and analysis. The idea that intimacy is something that only applies to romantic relations but not to larger social and community concerns will be examined.

Soc 353D MEDICAL SOCIOLOGY (4-0) 4

A study of the social practices and beliefs which define and constitute the phenomena of health and illness. The current health care delivery system, including professional roles, patient participation, administration, medical education and planning, will be critically reviewed, and alternatives will be explored. This course is recommended for pre-health majors as well as social science majors.

Soc 361D DEVIANCE (4-0) 4

An examination of the traditional versions of deviance followed by modern critiques which emphasize "labeling" and the more phenomenological approaches to understanding human conduct.

Soc 362D CRIMINOLOGY AND CRIMINAL JUSTICE (4-0) 4

An examination of the major "positivist" theories of crime and criminality (individual, familial, subcultural) followed by the modern critique of positivist criminology emphasizing the part played by the administration of criminal justice as an integral part of the characterizing and structuring of crime.

Soc 363D JUVENILE DELINQUENCY (4-0) 4

A review of contemporary thinking about the development of juvenile delinquency and the linkages between juvenile delinquency and the administration of juvenile justice. Taught every other year.

Soc 375D SOCIOLOGY OF EDUCATION (4-0) 4

Study of the organization and practices of educational institutions and of the transformation these institutions are now undergoing. Special attention to the nature of these changes and their impact on the learning process as well as their consequences for the larger society will be explored. Taught every other year.

Soc 376D LANGUAGE AND SOCIAL BEHAVIOR (4-0) 4

A concentrated look at the social function of language use in society. The extent to which languages create social reality will receive scrutiny. Particular topics may include language and social class, language and sex, linguistic politics, language and culture, or language cognition and development. Taught every other year.

Soc 380D WORK AND AUTHORITY IN SOCIETY (4-0) 4

This course will explore the extent to which meaningful work is possible in any society. It will seek to account for the forms of authority in work and describe the impact that hierarchical structures have on the individual. Taught every other year.

Soc 383D WOMEN IN SOCIETY (4-0) 4

This course focuses on where American women in various class and ethnic categories stand in society now, compared not only to men but also to their mothers and grandmothers. It takes into account economic status, educational and job opportunities, family responsibilities, physical well-being and reproductive rights. It includes a significant portion of feminist theory, which serves as the vehicle for an ongoing analysis of the ways in which political, economic and other social structures, as well as psychological factors such as gender attitudes, have effected the status of women, historically.

Soc 421 CONTEMPORARY SOCIAL ANALYSIS IN THE SOUTHWEST (4-0) 4

A seminar in the application of theories of social change, social knowledge, and research into regional issues in the Southwest. Topics may vary but will critically address issues of water, energy, agriculture, urbanization, inequality, public morality, politics, education and community. Taught annually, senior year.

Prerequisite: Soc 320.

Soc 496 SENIOR SEMINAR (4-0) 4

Advanced study and research in selected topics. The student will prepare and submit a senior seminar research paper to qualify for graduation.

Prerequisite: Soc 421 or concurrent registration.

Soc 499 INDEPENDENT STUDY 1-4

Tutorial or individual research conducted in consultation with a member of the sociology/human services faculty. Topic must be clearly defined in a written contract between student and faculty member.

[Return to List](#)

Southwest Studies

SW 100 FUNDAMENTALS OF NAVAJO LANGUAGE I (3-0) 3

A course in the basic fundamentals of the Navajo language on the oral-aural approach. A native speaker is the instructor and much use is made

of tapes, etc.

SW 101A1 NAVAJO LANGUAGE II (3-0) 3

Continuation of Navajo I. Whereas Navajo I emphasized speaking, this course will center on reading and writing the Navajo language.

Prerequisite: SW 100 or consent of instructor.

SW 115 NATIVE AMERICAN NEWSLETTER (3-0) 3

For lower-division students with good writing skills. Students will prepare six stories for publication in the *Intercultural News*, gaining basic skills in newswriting for a specific readership, Macintosh computer format, photo taking and news layout and design. Coursework will include concepts pertinent to contributing to communications in "Indian country." May be taken twice for credit.

SW 123CE AMERICAN INDIAN HISTORY (3-0) 3

The history of Indians of the United States from contact to the present.

SW 125CE HISTORY OF HISPANOS IN THE SOUTHWEST (3-0) 3

A study of the history of the Hispanos in the American Southwest from the period of exploration to the Chicano Movement in the 1960s and 1970s. For the purposes of this course the Southwest is defined as including the geographic area under Spanish and Mexican sovereignty before 1848.

SW 131C SOUTHWEST HISTORY AND CULTURE (3-0) 3

A broad introduction to Southwestern history and cultures with lectures on history, archaeology, literature, art and other related topics.

SW 135E THE SOUTHWEST I (4-0) 4

The course will feature an interdisciplinary approach for examining the uniqueness of the Southwest. Students will examine the geological, biological, historical and cultural diversity of the Southwest. Major problems confronting this region will be explored.

SW 136C THE SOUTHWEST II (4-0) 4

This course concentrates on contemporary practical and conceptual problems and issues such as indigenous land rights, the environment, tourism, economic development, water, racism, the U.S./Mexico border, labor, demographics, among others. Emphasis will also be given to creative problem solving that draws on multicultural and interdisciplinary sources.

SW 154A2 INDIAN ARTS AND CRAFTS I (0-6) 3

This course is the same as Art 154A2. For description of course, see Art. Fall and winter terms.

SW 155A2 INDIAN ARTS AND CRAFTS II (0-6) 3

A course which may include such media as weaving, silversmithing, pottery work, leathercraft, bead work and basketry. Offered on demand. Fall and winter terms.

SW 265A2 ART HISTORY OF THE SOUTHWEST (3-0) 3

This course is the same as Art 265A2. For description of course, see Art.

SW 280DE NATIVE AMERICAN IN THE MODERN WORLD (3-0) 3

An advanced study of contemporary affairs that involve the American Indian. The historical beginnings, development and current significance of issues will be studied.

SW 282CE THE HISPANO CULTURE OF THE SOUTHWEST (3-0) 3

This course examines the culture of the Hispanos in the Southwest. The material is studied from an ethnohistorical perspective i.e., how the culture developed from the Spanish colonial period to the present. Ideal culture and real culture are contrasted in the course in order to understand the dynamics of culture and its constant evolution.

SW 315 NATIVE AMERICAN NEWSWRITING (3-0) 3

For upper-division students with good writing skills. In addition to the requirements for the SW 115 level course, students will work with and

edit stories for students in the 115 class. May be taken twice for credit.

Prerequisite: Comp 150, LIB 150, and consent of instructor.

SW 317A1 HISTORY OF AMERICAN INDIANS IN FILM 3-0) 3

An analysis of the treatment of American Indians in film. It also will relate film images to images in literature and other media.

Prerequisite: Comp 150, LIB 150.

SW 322CE AMERICAN INDIAN PHILOSOPHIES (3-0) 3

The course will look at the various aspects of American Indian philosophies and the manifestations of those philosophies. The course will study both traditional philosophies and those which have been changed tough contact with American society.

Prerequisite: Comp 150, LIB 150.

SW 323CE SOUTHWEST INDIAN HISTORY (3-0) 3

Studies the history and culture of Native American groups in the Southwest.

Prerequisite: Comp 150, LIB 150.

SW 326C WEST AND SOUTHWEST IN FILM AND FICTION (3-0) 3

An analysis of the treatment of the West and Southwest in film and fiction.

Prerequisite: Comp 150, LIB 150.

SW 327CE AMERICAN INDIANS AND THE MASS MEDIA (3-0) 3

The Native Peoples of North America have been the subjects of a virtual war of misinformation since first contacts with Europeans. American Mass media still cast images of Indian people which serve to trivialize their concerns and confound their attempts to remain culturally distinct and sovereign peoples. Students in this course will appraise the process and effects of stereotyping of Indian people in the mass media

and learn of the responses of today's Indian media professionals. Issues of cultural dominance and new media technologies will also be examined. Students will evaluate media materials through written research and oral presentations and produce media products to counter the problems created for Indian people by the mass media.

Prerequisite: Comp 150, LIB 150.

SW 330C COWBOYS, CATTLEMEN AND POPULAR CULTURE (3-0) 3

This course focuses upon the cattle industry in the United States. The approach is interdisciplinary and will include history, folklore, music, art and literature. Contemporary issues such as those related to grazing policies, image of the cowboy, and rodeo will also be included.

Prerequisite: Comp 150, LIB 150.

SW 340 ARCHIVAL THEORY AND PRACTICE (4-0) 4

The tools and approaches taught in this course should be useful to anyone who aims at making a difference in today's information age. In addition to learning organizational principles from the archival profession, students will examine-and implement-effective and efficient ways of storing, accessing, and selectively preserving data. Classes are supplemented by archival work in the Center of Southwest Studies.

SW 341 ORAL HISTORY: THEORY AND PRACTICE (2-0) 2

This course uses interactive listening to provide an understanding of the theory and practice of producing oral histories. It will benefit a budding historian, anthropologist, folklorist, sociologist, or archivist, and anyone wanting to improve listening skills and desiring to preserve an otherwise undocumented aspect of our past. Participants practice oral history interviewing and transcription. The final product is a transcribed oral history interview of sufficient historical research value to warrant inclusion in the Center of Southwest Studies collection.

SW 342 INTERPRETATION OF CULTURAL RESOURCES (3-0) 3

This course is designed to prepare students in the interpretation of cultural resources and to create awareness of Native American perspectives regarding cultural resources.

Prerequisite: Permission of instructor.

SW 355C DEVELOPMENT OF UNITED STATES INDIAN POLICY (3-0) 3

This course traces the development of United States policy towards the American Indians. Beginning with the policies inherited from European colonizers, the federal government developed expedient policies to balance the desires of its own citizens with the Indian peoples' legal rights and hopes for continued tribal survival. The course documents the opposing concepts of assimilation and segregation which have led to the present philosophy of pluralism and self-determination in United States Indian policy.

Prerequisite: Comp 150, LIB 150.

SW 360A2E MESOAMERICAN ART HISTORY (3-0) 3

This course is the same as Art 365A2E. See Art 365A2E for course description.

Prerequisite: Comp 150, LIB 150.

SW 365C HISPANIC CIVILIZATION (3-0) 3

Contributions of Spain and Portugal to the building of western civilization. Topics include: Great Age of Exploration, Golden Age of Spanish-Portuguese Civilization, Masterworks of Literature and History of Ideas. Offered on demand.

Prerequisite: Comp 150, LIB 150.

SW 375 HISPANIC-AMERICAN CIVILIZATION (3-0) 3

The literature, culture, thought, art, anthropology, history, geography and contemporary position of Hispanic-American civilization. Offered on demand.

Prerequisite: Comp 150, LIB 150.

SW 381A1 CHICANO LITERATURE (3-0) 3

This course is the same as ML 331. See ML 331 for course description.

Prerequisite: Comp 150, LIB 150.

SW 383C SOUTHWEST HISTORY TO 1868 (3-0) 3

This course will cover the Spanish, Mexican and early territorial periods in the Southwest, concluding with the end of the Civil War and the Navajo treaty of 1868.

Prerequisite: Comp 150, LIB 150.

SW 384C SOUTHWEST HISTORY, 1868 TO PRESENT (3-0) 3

This course will cover the political, social and economic history of the Southwest from 1868 to the present.

Prerequisite: Comp 150, LIB 150.

SW 402A1orA2 CONTEMPORARY ART AND LITERATURE OF THE SOUTHWEST (3-0) 3

The course will conceptualize the Southwestern artist in terms of spirit and place, or broadly speaking, the effect the landscape has upon art and the artist. In addition the course will focus on critical issues such as marketing of ethnicity, repatriation, looting of archaeological sites and the artifact black market, curating major exhibits, and displaying of and writing about the sacred.

Prerequisite: Comp 150, LIB 150.

SW 481C COLORADO HISTORY (3-0) 3

The history and peoples of Colorado from the preterritorial days to the present.

Prerequisite: Comp 150, LIB 150.

SW 482C MINING IN THE AMERICAN WEST (3-0) 3

From the days of the Spanish to today, a history of mining and its impact, with special emphasis on the Southwest.

Prerequisite: Comp 150, LIB 150.

SW 493 INTERNSHIP IN SOUTHWEST STUDIES 3-6

The internship offers instruction and hands-on experience in museology and archival management.

Prerequisite: Permission of instructor.

SW 496 SENIOR SEMINAR (3-0) 3

Senior seminar in Southwest Studies.

Prerequisite: Comp 150, LIB 150.

SW 499 PROBLEMS IN SOUTHWEST STUDIES 3

A senior-level individual research project based on the needs and interests of the individual. Offered on demand.

Prerequisite: Comp 150, LIB 150 and consent of committee director.

[Return to List](#)

Spanish

ML 100/SW 100 FUNDAMENTALS OF NAVAJO LANGUAGE I (3-0) 3

A course in the basic fundamentals of the Navajo language on the oral-aural approach. A native speaker is the instructor and much use is made of tapes, etc.

ML 101/SW 101A1 NAVAJO LANGUAGE II (3-0) 3

Continuation of Navajo I. Whereas Navajo I emphasized speaking, this course will center on reading and writing the Navajo language.

Prerequisite: ML 100/SW 101 or consent of instructor.

ML 115 ELEMENTARY SPANISH I (4-0) 4

A course in grammar, prose composition, reading and conversation. Beginning Spanish for students with no previous exposure to Spanish. Development of all four language skills, especially listening and

speaking. Fall and winter terms.

ML 116A1 ELEMENTARY SPANISH II (4-0) 4

Continuation of ML 115. Fall and winter terms.

Prerequisite: ML 115 or equivalent.

ML 118A1 SPANISH OF THE SOUTHWEST (4-0) 4

This course will teach Spanish by studying the Spanish language and culture of the Southwest. It is especially appropriate for students who have lived in a Spanish speaking or bilingual environment. Students will be prepared in reading, prose composition, speaking, and grammar.

ML 130 MEXICAN READINGS (4-0) 4

This course is offered as part of the human service program in Mexico which is offered through the Sociology Department. Students read, discuss and write about Mexican literature and poetry as well as newspaper and magazine articles while they live and do human service work in Mexico. Student enroll at the appropriate level.

Prerequisite: ML 116A1.

ML 215A1 INTERMEDIATE SPANISH I (4-0) 4

A course in second-year Spanish with emphasis on grammar review, reading and conversation. Fall and winter terms.

Prerequisite: ML 116A1 or equivalent.

ML 216A1 INTERMEDIATE SPANISH II (4-0) 4

Continuation of ML 215A1, with greater emphasis on reading and writing. Fall and winter terms.

Prerequisite: ML 215A1 or equivalent.

ML 219A1 INTERMEDIATE SPANISH CONVERSATION (4-0) 4

Students will engage in practical every day situations, as well as discussions on current issues and events through interaction. Fall and winter terms.

Prerequisite: ML 215A1 or concurrently with ML 216A1.

ML 318A1E ADVANCED SPANISH OF THE SOUTHWEST (4-0) 4

This course will teach Spanish by studying the Spanish language and culture of the Southwest. It is especially appropriate for students who have lived in a Spanish speaking or bilingual environment. Students will be prepared in reading, prose composition, speaking, and grammar. Students at this level will do extensive reading and writing of literature of the Southwest in Spanish. They will also do oral presentations in Spanish on selected class themes.

ML 319A1 ADVANCED SPANISH CONVERSATION AND COMPOSITION I (4-0) 4

A course designed to develop a higher level of proficiency in spoken Spanish based on critical analysis of literary works, cultural aspects and current issues. Repeatable for credit. Fall and winter terms.

Prerequisite: ML 216A1 and/or ML 219A1.

ML 320W ADVANCED SPANISH CONVERSATION AND COMPOSITION II (4-0) 4

A course designed to improve the student's writing skills in Spanish through the use of original essays, description, composition, letters, and the organization and delivery of research papers. This cannot be taken concurrently with ML 496. Winter term.

Prerequisites: ML 215A1, ML 216A1 and ML 319A1.

ML 330 MEXICAN READINGS (4-0) 4

This course is offered as part of the human service program in Mexico which is offered through the Sociology Department. Students read, discuss and write about Mexican literature and poetry as well as newspaper and magazine articles while they live and do human service work in Mexico. Student enroll at the appropriate level.

Prerequisite: ML 215A1.

ML 331A1E CHICANO LITERATURE (4-0) 4

A course on the essays, novels, poetry and theater of Chicanos in the Southwest. Literature is included from both rural and urban areas with an emphasis on contemporary literature.

Prerequisite: ML 216A1 or consent of instructor.

ML 336A1 SURVEY OF SPANISH LITERATURE (4-0) 4

A survey of Spanish Peninsular literature from the 10th century to the present. Fall term.

Prerequisites: ML 319A1 and ML 320W or consent of instructor.

ML 337A1E SURVEY OF SPANISH AMERICAN LITERATURE (4-0) 4

A course in the literature of Spanish America from the colonial period through Romanticism, Realism, Naturalism, Modernism and 20th century literature with emphasis on the Mexican Revolution and the contemporary Spanish American writers.

Prerequisites: ML 319A1 and ML 320W.

ML 345A1 HISPANIC CULTURE AND CIVILIZATION I: SPAIN (4-0) 4

An integrated, interdisciplinary study in Spanish of the culture of Spain as reflected in its history, language, philosophy, psychology, religions and its arts. This course gives students an appreciation of the ways of life and attitudes of contemporary Hispanic people. Fall term.

Prerequisite: ML 216A1 or consent of instructor.

ML 346A1E HISPANIC CULTURE AND CIVILIZATION II: LATIN AMERICA (4-0) 4

An integrated, interdisciplinary study in Spanish of the cultures of Latin America as reflected in their history, language, philosophy, psychology, and its arts. This course gives students an appreciation of the ways of life and attitudes of contemporary Hispanic American people. Winter term.

Prerequisite: ML 319A1 and ML 320W or consent of instructor.

ML 350A1 SPANISH FOR THE PROFESSIONS: TOPICS (4-0) 4

The goals of this course are to familiarize students with the forms and vocabulary of Spanish for the professions such as Business Spanish, Spanish for Education, Spanish for the Sciences, Spanish for Social Sciences, or other professions. Repeatable under different topics.

Prerequisite: ML 215A1 and ML 216A1 or consent of instructor.

ML 426A1 20TH CENTURY HISPANIC LITERATURE (4-0) 4

A course on contemporary Hispanic authors.

Prerequisites: ML 320W and two literature courses and Spanish proficiency.

ML 427A1E HISPANIC AMERICAN NOVEL AND POETRY (4-0) 4

A course on the contemporary novel, as well as the poetic masterworks of Spanish.

Prerequisites: ML 320W and two literature courses.

ML 429A1E MEXICAN LITERATURE (4-0) 4

A survey of Mexican literature with emphasis on the works of the Revolution of 1910 and contemporary Mexican authors. Alternate years.

Prerequisites: ML 319A1, 320W and two literature courses or consent of instructor.

ML 496 SENIOR SEMINAR IN SPANISH (4-0) 4

Advanced study and research in selected topics. Winter term.

Prerequisites: Two literature courses, ML320W. No exceptions.

ML 499 INDEPENDENT STUDY IN SPANISH, FRENCH OR GERMAN 1-3

Individual research conducted under the supervision of a faculty

member. Offered on demand for seniors only.

Prerequisites: Approval of department chair and senior standing.

Special Topics

SPECIAL TOPICS 190 1-6

This is not a fixed course but is a designation to take advantage of special opportunities and topics. It can be offered in any area with the consent of the school dean and the Vice President for Academic Affairs. From 1 to 6 credits may be earned.

SPECIAL TOPICS 191 3-6

This is not a fixed course but is a designation to take advantage of special opportunities and topics which meet the purpose of one of the groups under the General Studies Program. It can be offered in any area with consent of the school dean, the Vice President for Academic Affairs, and curriculum committee. Credit may vary from 3 to 6 credits.

SPECIAL TOPICS 390 1-6

Same as Special Topics 190 except that this course is taught at the upper-division level.

SPECIAL TOPICS 391 3-6

Same as Special Topics 191 except that this course is taught at the upper-division level.

Theatre

Thea 100 DRAMATIC THEATRE 1-4

This course involves initial participation in theatrical production. It includes limited involvement in various areas of theatre from inception to presentation. Students with little or no theatre experience will gain a working knowledge of performance. Repeatable for up to 12 credits.

Thea 101A2 INTRODUCTION TO THEATRE (4-0) 4

This course offers a general introduction to the theatre and to performance in the human experience. Students view and discuss films and live performances, and perform scenes in class. The course emphasizes an understanding of the processes of creating theatre, and of the role of theatre and performance in the context of cultures and contemporary society. Guest speakers from other disciplines introduce a variety of perspectives on performance as a human activity. There is a strong participatory component to the course. Fall and winter terms.

Thea 121 SPEECH COMMUNICATION (3-0) 3

Tough closely supervised activities in various speech forms, the student develops skills necessary to deal successfully with various speaking situations. Summer term.

Thea 126A2 INTRODUCTION TO THE DANCE (4-0) 4

This course offers an exploration of the historical/theoretical bases of dance and its many variant forms. In addition to gaining a historical and theoretical knowledge of dance, this course includes the practical/technical overview of traditional and contemporary dance forms including African dance, folk dance, ballet, jazz dance, musical theatre, performance art, and dance improvisation. Students will gain a general knowledge of technical skills as well as a broad knowledge and appreciation of the art and history of dance. Fall term.

Thea 135A2 ACTING TECHNIQUES (4-0) 4

This course is the first in the performing sequence (135A2, 236A2 and 336A2). It introduces students to basic performance techniques including: vocal and physical preparation, alignment and posture, movement for stage, improvisational skills, performance of literature, text analysis, and introductory scene work.

Thea 200 THEATRICAL PRODUCTION 1-4

This course constitutes involvement of the intermediate level student in theatrical production. Students with a developing dedication to theatre participate in selected areas including but not limited to dramaturgy, technical theatre, performance administration and performance. Repertoire includes classical, modern, musical theatre, and dance. Repeatable for up to 12 credits.

Thea 230A2 STAGE TECHNOLOGY (3-2) 4

This course provides students with a base working knowledge of the technical aspects of theatre including scenery construction, costume construction, prop construction, lighting equipment and its uses, and sound equipment and its uses. This course also offers an introductory knowledge of the aspects of stage design.

Thea 231 MAKE-UP FOR STAGE (2-0) 2

This hands-on course explores stage make-up techniques including old age, stylized, fantasy, disaster and corrective make-up. In addition to this application, students will also explore make-up design from text to production.

Thea 233 AUDITION TECHNIQUES (2-0) 2

An audition is the actors primary tool for securing employment. This course explores the audition process in terms of text analysis, musical auditions, film auditions, choosing audition materials, and audition trends across the United States. The purpose of this course is to help students compile an audition repertoire in order to be competitive in both the professional and educational world of theatre.

Thea 236A2 STYLES IN ACTING (3-2) 4

This course is the second in the performing sequence (135A2, 236A2 and 336A2). It further develops the student's performance skills through the theory and practice of various systems of acting. At this level the students will focus primarily on styles in acting. Thea 135A2 suggested, but not required. Winter term.

Thea 240A2 ANCIENT AND CLASSICAL THEATRE (4-0) 4

This course is the first in the dramatic literature sequence (240A2, 340W, and 381A2). Students taking this course attain a breadth and depth of foundational knowledge of theatre and dramatic literature by examining the various styles and traditions of actors, playhouses, plays and playwrights from Classical Greece and Asia through the age of enlightenment (1800). Focus is placed on reading and analyzing plays and attaining insight into the thinking and theatre conventions of times and places at a great distance from our own. Time periods covered in this class include: Classical Greek and Roman, classical Asian theatre forms, Medieval drama, Italian Renaissance theatres, Elizabethan

drama, Jacobean and Caroline theatre, Spanish theatre, French Neo-classic theatre, Restoration and Theatre of the Enlightenment. Fall term.

Thea 280A2 INTERDISCIPLINARY STUDIES: (TITLE) (4-0) 4

Students in this course study theatre forms in the context of the perspective of other disciplines, e.g., political science, philosophy, archaeology, sociology, theology, etc. A group of plays or a theatrical movement may be chosen as a point of focus. Significant readings from relevant literature of other fields is used for this study. The plays or the movement and the society and historical period in which they arose will become occasions for study from an interdisciplinary perspective. Suitable "Topics" course for English majors.

Thea 300 THEATRE ENSEMBLE 1-4

This course involves participation in a theatrical production, including various areas of technical theatre and performance. The maturing student is actively involved in theatre production(s) during the semester. Repeatable for up to 12 credits.

Thea 310A2 DESIGN FOR THE THEATRE (4-0) 4

This class provides an in-depth look at design for the stage. Emphasis will be placed on scenery, lighting, properties and sound design. This course includes research in art history, time periods and theatrical styles. Students will present a series of designs and models for those designs.

Prerequisite: Thea 230A2.

Thea 322A2 CREATIVE DRAMATICS (4-0) 4

Creative Drama uses a student's innate ability to "play" in the developmental process of becoming a productive well-adjusted human being. This course focuses on using drama as a teaching tool in multiple disciplines, using drama as a socializing tool for children and adults, and understanding drama as an art form.

Thea 323A2 CHILDREN'S THEATRE (4-0) 4

In this performance-based course, students will explore dramatic literature appropriate for child audiences. Students will travel to area schools and perform for and with Durango area children.

Thea 336A2 CREATING PERFORMANCE: DIRECTING (4-0) 4

This course is the third in the performing sequence (135A2, 236A2 and 336A2). It concentrates on the conceptual and practical application of performance in the form of creating a production from initial concept to closure. Students will develop and use the skills of analysis, strategic planning, directing, creating movement, organization and administration. Thea 135A2, Thea 236A2 and participation in at least two departmental productions are suggested but not required before taking this course.

Thea 340W MODERN THEATRE (4-0) 4

This course, the second in the dramatic literature sequence (330A2, 340W and 350A2), surveys developments in theatre practice and dramatic literature from the beginning of the 19th through the mid-20th century. The development of modern drama and the concurrent philosophical thinking in Western theatre history will be the focus of the course. Will also explore coinciding developments in Asian and African theatre, and intercultural influences. Thea 330A2 suggested but not required before taking this course. May be taken as a "Topics" course for English majors. Winter term.

Prerequisite: Thea 240A2.

Thea 366 DANCE TECHNIQUE: (STYLE OF DANCE) (2-0) 2

This course is specifically dance technique, or the practical application of a specific dance form. In this course the student will be given the opportunity to learn and practice the technique of a specific style while concentrating on personal abilities, awareness and ways to correctly train his or her body. The type of technique taught each session is predetermined by the department and may be chosen from many forms. Students taking this course to satisfy theatre studies electives will be required to take this course twice so as to experience two kinds of dance techniques. Repeatable for up to 12 credits.

Thea 369A2 PLAYWRITING (4-0) 4

In Playwriting students develop their own creativity in theatrical forms. Students examine dramatic plots, characters, dialogue, exposition, setting, theme, new and traditional forms and other elements of drama through a series of exercises and writing practices. They will read a number of contemporary plays and attend local performances. All

students will write a producible one-act play. Fall term.

Thea 381A2 SPECIAL TOPICS IN DRAMATIC LITERATURE (4-0) 4

This course examines a group of plays chosen from the canon of dramatic literature which relates to a specific theme or topic. The theme or topic is changed regularly, e.g., war, women, marriage, the family, work, political change, etc. Suitable "Topics" course for English majors.

Thea 382 AMERICAN INDIAN THEATRE (4-0) 4

This class will review the literature and history of American Indian Playwrights and theatre artists. Students will first examine the history of Euro-American representations of indigenous peoples; reviewing colonial culture will foreground subsequent readings of Native-centered plays, interviews, and criticism. The class will include videos of Native theatre and performances.

Thea 400 PERFORMANCE STUDIES 1-4

This course involves in-depth involvement in theatrical production, performance and technical theatre. The advanced theatre student will have the opportunity to build on his/her theatre skills in areas such as acting, dance, technical theatre, costuming, dramaturgy, and theatre administration in both on and off-campus situations. Repeatable for up to 12 credits.

Thea 496, 497 SENIOR SEMINAR 4

This course gives senior theatre majors the opportunity to demonstrate their abilities in connecting the analytical academic research process to performance. Significant research, on an approved topic, will result in a substantial paper. Each student's research, combined with insightful performance knowledge, problem solving techniques and creative thinking, results in a public presentation. This is a full course and 496 must be taken in the fall, followed by 497 in the winter.

Prerequisite: Thea 340W, Thea 336A2, and senior standing.

Thea 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

Prerequisite: Approval of Theatre Department faculty.

Transitional Studies

TRST - TRANSITIONAL STUDIES

As the title implies, Transitional Studies courses are designed to assist students in their transition from high school to college. The classes, taught by the staff of the Learning Assistance Center, do not give students credit towards graduation, but do carry credit which can be applied to financial aid and housing requirements. With the exception of the English as a Second Language Classes, students receive a grade of S (Satisfactory) or NC (No Credit).

TRST 85 ESL COMPOSITION (3-0) 0

Designed to prepare students for whom English is a second language to write acceptable college essays. Subjects covered include prewriting, thesis development, sentence development, paragraph development, grammar review, punctuation review, logic and vocabulary development.

TRST 86 ESL STUDY SKILLS (3-0) 0

Designed to be taken in conjunction with TRST 85. The course develops in students for whom English is a second language the thought processes, habits and skills necessary to succeed in college. Subjects covered include notetaking, textbook reading, questioning, test taking and classroom etiquette.

TRST 91 THE WRITING PROCESS (3-0) 0

Designed to improve the composition skills of students who have weak backgrounds in writing. The course focuses upon pre-writing, logic, paragraph organization, and essay structure, and includes frequent one-on-one critique sessions with the instructor.

TRST 92 INTERMEDIATE ALGEBRA (2-1) 0

Designed to provide review and instruction in college preparatory mathematics for students with deficiencies in or apprehensions about

required entrance level mathematics courses. The course will cover such topics as algebraic expressions, manipulation of signed numbers, solving equations and inequalities, algebraic fractions, polynomials, exponents, radical expression and graphing. Students who wish to enroll in this course should have successfully completed at least the equivalent of Algebra I.

TRST 95 LEARNING SKILLS (2-0) 0

Designed to develop the thought processes, habits and skills students need in order to succeed in college. Subjects covered include time management, notetaking, concentration, textbook reading, test taking, memory development and college policies.

[Return to List](#)

Women's Studies

WS 101D INTRODUCTION TO WOMEN'S STUDIES (4-0) 4

This course introduces students to the variety of multidisciplinary questions and practical concerns encompassed by Women's Studies. The course provides an introduction to the history of feminism and seeks to establish a fundamental understanding of how and why feminist theoretical critique has occurred.

WS 280 ISSUES IN WOMEN'S HEALTH (4-0) 4

This course will examine women's health throughout the life span. Discussion will focus on the physical and emotional health of the maiden, woman, and crone. The course will also examine social and historical factors that have affected women as health care clients and providers. Though the course materials will concentrate on health in the United States, there will be some comparative readings about women and health in other cultures. Throughout the course particular attention will be paid to the interplay between women's status in society and their role definitions as participants in the health care system.

Prerequisite: WS 101D.

WS 301 FEMINIST STUDIES: THEORIES AND METHODS (4-0) 4

This course provides an overview of the history and development of the

project of feminist studies, and an introduction to the concepts, methods, and discourse of feminist inquiry.

Prerequisite: Comp 150, LIB 150.

WS 320 WOMEN'S STUDIES PRACTICUM 4-8

This course provides students with experience in a community organization that serves the needs of women. Students will be involved in human services, applied feminist research, or other activities approved by the advisor and practicum coordinator. The emphasis is upon gaining experiential knowledge through active participation in feminist practice and analyzing this experience in a classroom setting. Practicum may be taken for 4 or 8 credits per term.

Prerequisite: WS 101D and consent of instructor.

WS 332C WOMEN IN AMERICAN HISTORY (4-0) 4

An analysis of women's experience from the colonial period to the present. Focusing on the way gender has been defined and redefined, the course considers such issues as work, friendship and marriage, reproduction, the struggles for equality, and women's culture. The influence of class, race and ethnicity on women's experiences will also be considered. Same as Hist 332C. Credit will not be given for more than one of these courses. Fall term.

Prerequisites: Hist 280C or Hist 281C or consent of instructor.

WS 351D WOMEN AND WORK: STRATEGIES FOR SUCCESS (4-0) 4

This course is an interdisciplinary exploration of a wide range of issues confronting women and work. A key focus is the impact of the social construction of "women's work" on the experience of women in the workplace. In this course an equal emphasis will be placed on gaining a theoretical understanding of the issues and examining feminists' strategies to effect change.

Prerequisites: WS 101D recommended; Comp 150, LIB 150 required.

WS 355C ANTHROPOLOGY OF GENDER (4-0) 4

An in-depth, cross-disciplinary analysis of the nature and origins of

gender concepts cross-culturally, particularly as they relate to explaining gender hierarchy. Topics to be covered include the contributions of feminist thought to social scientific theories, the cultural construction of gender categories, and the relationship of gender to power. Same as Anth 355C. Credit will not be given for more than one of these courses. Alternate winter terms.

Prerequisite: Anth 210C, WS 101D, or consent of instructor.

WS 365DE WOMEN AND DEVELOPMENT (3-0) 3

An overview of the central role women play in the development process in non-Western societies, and of their struggle to gain access to the most basic levels of power and governance around the world. The focus will be on women in developing countries, but reference to women in developed countries will also be made. Same as PS 365DE.

Recommended: PS 280.

WS 495 CAPSTONE COLLOQUIUM IN WOMEN'S STUDIES (2-0) 2

Advanced reading, writing, and seminar discussion centered on integrating the Women's Studies experience with the student's entire undergraduate educational experience. Emphasis will also be placed on looking beyond the bachelor of arts or bachelor of science degree to incorporating the Women's Studies intellectual experience to practical life arenas.

WS 499 INDEPENDENT STUDY IN WOMEN'S STUDIES 1-4

Individual research is conducted under the supervision of a faculty member.

FEES AND EXPENSES**Tuition and Fees****Payment****Delinquent Accounts****Refunds****Tuition Adjustment for Adding and Dropping Classes****State Residency Classification****Resident Tuition for Active Military Personnel****New Mexico Reciprocal Program****Housing Reservations****Summer Housing****STUDENT FINANCIAL AID****Financial Aid Programs****Federally Funded Programs****State-Funded Programs****Institutionally Funded Programs****Application Procedures****FEES AND EXPENSES**

Costs for Fort Lewis College students will vary according to the number of trimesters they attend. Specific costs are published annually in the Tuition and Fees Schedule for the academic year and in the Tuition and Fees Schedule for the summer trimester. For details, please consult the appropriate Tuition and Fees Schedule, which may be obtained from the Admission Office.

The Fort Lewis College Foundation has established a monthly Prepayment Budget Installment Program for payment of tuition, fees

and on-campus room and board. For additional information, call and ask for Student Alternative Financing at 970-247-7184.

A student, by the act of registration, automatically incurs a financial obligation to the College. This obligation must be satisfied by payment to the College. Those students registering for 8 credits or less will be charged by the credit hour. Students who take over 8 credits, up to and including 18, during either the fall or winter trimester will be charged full tuition and fees. Students registering for more than 18 credits will be assessed an additional charge per credit hour.

Personal expenses such as clothing, travel, social activities, books and supplies, depend on the individual and are in addition to the scheduled expenses. The State Board of Agriculture, governing body for Fort Lewis College, reserves the right to change any fee at any time without formal notice whenever conditions warrant such change.

[Return to Top](#)

TUITION AND FEES

Tuition and Fees Brochures are available from the Admission Office, Financial Aid Office, Cashier's Office and the Accounts Receivable Office.

[Return to Top](#)

PAYMENT OF FEES

The student will receive a bill and is responsible for the payment of all charges, including tuition, room and board. If parents wish to accept this responsibility, then a copy of the bill must be **forwarded by students** to their parents. Similarly, payment of the final bill must reach this office by the published census date. The census date is approximately two weeks after the start of the fall and winter Trimesters and the fifth day of each summer session. Only under special circumstances will a request for delayed payment of any charges be considered.

[Return to Top](#)

DELINQUENT ACCOUNTS

It is College policy that students who fail to pay financial obligations when due are subject to termination of student status at Fort Lewis College. The College will not register a student, nor provide a transcript to any student or former student, with a past-due financial obligation to

the College.

Fort Lewis College is required by the State of Colorado to submit all delinquent accounts to Central Collections at 60 days past due or 30 days past the registration period for the next trimester for current students. Should this become necessary, reasonable collection costs will be added to the amount due and shall be paid by the debtor. If the State of Colorado obtains judgement from a court of competent jurisdiction, the debtor shall be liable for the collection agency fee as well as reasonable court costs and attorney's fees.

[Return to Top](#)

REFUND OF TUITION AND FEES

Students initiating official withdrawals during the fall and winter trimesters will be given a pro-rata refund according to the following Institutional Refund Schedule listed below:

Date of Withdrawal	Amount of Tuition and Fees Refunded
on or before 1st day of class	100%
Week 1	90%
Week 2	90%
Week 3	50%
Week 4	50%
Week 5	25%
Week 6	25%
Week 7	25%
Week 8	25%
Week 9	No Refund

To be eligible to receive the refund according to this schedule, it is essential that the official withdrawal process be completed prior to 5 p. m. on the Friday of the week indicated.

The \$45 matriculation fee is refunded in full only for students withdrawing prior to census day of the first term of attendance. Students who receive financial aid and then withdraw may be required to repay all or a proportionate amount of aid received. Repayment amounts are determined in accordance with federal, state, and institutional regulations and policies. Refunds for all new transfer and first-time freshmen students receiving Title IV pro rata refund schedule.

[Return to Top](#)

TUITION ADJUSTMENT: ADDING AND DROPPING CLASSES

A student is permitted to change course loads by adding or dropping courses with no grade record during a designated period at the beginning of each trimester. A student's tuition and fees will be adjusted according to the net number of credits for which he or she is registered on the final date for adding courses. If an exception is made which allows a student to add or drop classes subsequent to the designated period, tuition and fees will be assessed for the net credits added, but will not be adjusted for the net credits dropped. **The class-drop process may not be used to withdraw from college.** Policies, procedures, fees, and deadline for adding and dropping courses is published in the Schedule of Courses for each term.

[Return to Top](#)

STATE RESIDENCY CLASSIFICATION FOR TUITION PURPOSES

A student is classified as an in-state or out-of-state student for tuition purposes at the time of admission. This classification is based upon information supplied by the student on the application for admission and is made in accordance with the Colorado Tuition Classification Law, CRS Section 23, Article 7, revised May 1995.(1) Institutions of higher education are bound by the provisions of this statute and are not free to make exceptions to the rules set forth.

Once determined, a student's tuition classification status remains unchanged unless satisfactory evidence that a change should be made is presented. A Petition for In-State Tuition Classification should be submitted to the Admission Office for first-time students and to the Records Office for continuing students if a student believes she or he is entitled to in-state status. Students should contact these offices for more information on deadlines and process of petition.

The statute provides that an in-state student is one who has been a legal domiciliary (resident) of Colorado for one year or more immediately preceding the beginning of the term for which the in-state classification is being sought. Persons over 22 years of age or who are emancipated establish their own legal domicile. Those who are under 22 years of age and are unemancipated assume the domicile of their parent or court-appointed legal guardian. An unemancipated minor's parent, therefore, must have a legal domicile in Colorado for one year or more before the minor may be classified as an in-state student for tuition purposes.

*The Colorado Revised Statutes are available in the reference section of the John F. Reed Library at Fort Lewis College.

Domicile is established when one has a permanent place of habitation in Colorado and the intention of making Colorado one's true, fixed and permanent home and place of habitation. The tuition statute places the burden of establishing a Colorado domicile on the person seeking to establish the domicile. The question of intent is one of documentable fact and needs to be shown by substantial connections with the state sufficient to evidence such intent.

Legal domicile in Colorado, **for tuition purposes**, begins the day after connections with Colorado are made sufficient to evidence one's intent. The most common ties with the state are (1) ownership of residential real property in Colorado, (2) permanent employment in Colorado, (3) compliance with laws imposing a mandatory duty on any domiciliary of the state, such as the driver's license law and the vehicle registration law, (4) Colorado voter registration, and (5) most important, payment of Colorado state income taxes as a resident by one whose income is sufficient to be taxed. **Caution:** payment or filing of back taxes **in no way** serves to establish legal domicile retroactive to the time filed.

To qualify for in-state tuition for a given term, the 12-month waiting period (which begins when the legal domicile is established) must be over by the first day of classes for the term in question. If one's 12-month waiting period expires after the beginning of the term, in-state tuition cannot be granted until the next term.

Once the student's tuition classification is established, it remains unchanged unless satisfactory information to the contrary is presented. A student who, due to subsequent events, becomes eligible for a change in classification from resident to non-resident or vice versa must inform the **Registering Authority Officer** within 15 days after such a change occurs. An adult student or emancipated minor who moves outside of Colorado must send written notification to the **Registering Authority Officer** within 15 days of the change.

Once a student is classified as non-resident for tuition purposes, the student must petition for a change in classification. Petitions must be submitted **NO LATER THAN THE FIRST DAY OF CLASSES** of the term for which the student wishes to be classified as a resident. It is preferred that petitions be received 30 days prior to the **beginning of the term**. Late petitions will not be considered until the next term.

The final decision regarding tuition status, within statute stipulation,

*rests with the College. Questions regarding residence (tuition) status should be referred only to the **Registering Authority Officer**. Opinions of other persons are not official or binding upon the College. Additional information (including the "Petition for In-state Classification" forms) is available from the Records Office in 108 Miller Student Center.*

RESIDENT TUITION FOR ACTIVE DUTY MILITARY PERSONNEL

The Colorado Legislature has authorized resident tuition for active duty military personnel on permanent assignment in Colorado and for their dependents (as defined by military regulations). **ELIGIBLE STUDENTS MUST BE CERTIFIED EACH TERM.** Students obtain a completed verification form from the base education officer, and submit the form with their military ID to the Records Office prior to registering for classes. Students who have military certification remain classified as non-residents for tuition purposes and must petition to change their status once they establish permanent ties to Colorado.

[Return to Top](#)

NEW MEXICO RECIPROCAL STUDENT PROGRAM

The Colorado Commission on Higher Education and the New Mexico Board of Educational Finance have signed an agreement allowing a limited number of selected New Mexico resident students, normally from San Juan County, to enroll at Fort Lewis College at the in-state rates. Each year a fixed number of students will be allocated to Fort Lewis College under this program. For details, consult the Admission and Development Office.

[Return to Top](#)

HOUSING RESERVATIONS

Rooms in residence halls and apartments are reserved, if space is available, upon receipt of a signed Housing Agreement and a \$100 security deposit. This deposit and Housing Agreement will reserve accommodations for the fall and winter trimesters of each academic year (eight months), or the remaining portion thereof if the entering date occurs after the opening date of the fall trimester. The \$100 deposit, less any damages or obligations owed the College, will be returned approximately sixty (60) days after the close of the winter trimester unless the student has applied for the following trimester, in which case

the security deposit will be carried over and no additional deposit will be required. For details of the refund policy for room and board charges, consult the Student Housing and Conference Services Office.

Residents living in the apartment complexes will be permitted to remain in their units during official college vacation periods provided they will be continuing residence during the eight-month contract period. College residence halls are closed during official vacation periods. Residents withdrawing from school and terminating occupancy at the end of the fall or winter trimester must vacate residency prior to the last calendar date of the particular trimester.

[Return to Top](#)

SUMMER HOUSING

The College provides on-campus housing in apartments during the summer months. If new to campus housing, a \$100 security deposit is required when making a housing application for the summer months. For more information, contact the On-Campus Student Housing Office.

STUDENT FINANCIAL AID

FINANCIAL AID PROGRAMS

Fort Lewis College offers a complete student financial aid program of scholarships, grants, loans and student employment.

Federally Funded Programs:

1. Federal Pell Grant
2. Federal Perkins Loans
3. Federal Supplemental Educational Opportunity Grant (SEOG)
4. Federal College Work-Study
5. Federal Stafford Loan (subsidized and unsubsidized)
6. Federal PLUS Loan (Parent Loan)
7. Leveraging Educational Assistance Partnership Program (LEAPP)

[Return to Top](#)

State-Funded Programs:

1. Colorado Student Grant (CSG)

2. Colorado Scholars Program
 - a. Presidential Scholarship (entering freshmen only)
 - b. Continuing Student Scholarship (continuing FLC students only)
3. Athletic Award (men and women)
4. Colorado Work-Study Program
5. Colorado Diversity Grant Program
6. Colorado Part-Time Student Grant

[Return to Top](#)

Institutionally Funded Programs:

1. Fort Lewis College Foundation Scholarships and Awards
2. First-Generation College Student Award Program

All financial aid awards, with the exception of Athletic Awards, Presidential Scholarships, Continuing Student Scholarships, the unsubsidized Stafford Loan, the PLUS loan, and some FLC Foundation scholarships/awards, are based on financial need.

Every effort is made to provide the best type of aid or combination of aid to assist students in completing a college education. All financial aid awards, however, are contingent upon availability of funds.

A number of other scholarships are available. Eligibility and selection criteria vary depending on donor instructions. Additional information may be obtained from the Office of Financial Aid.

[Return to Top](#)

APPLICATION PROCEDURE

Students wishing to be considered for all programs of need-based student financial aid are required to complete and submit the federal financial aid application called the Free Application For Federal Student Aid (FAFSA).

The FAFSA may be obtained from the student's high school counselor, from an Office of Financial Aid (OFA) at any local college or university, or from the Office of Financial Aid, Fort Lewis College, Durango, Colorado 81301-3999. The "Title IV" School Code is required on Page 6 of the FAFSA. The Fort Lewis College code number is 001353.

The student's financial aid application for the 2001-02 school year

(Summer 2001, Fall 2001, Winter 2002 and Summer 2002 Trimesters) should be completed and mailed as soon as possible after January 1, 2001, because most of the need-based aid programs are awarded on a highest need, first-come, first-served basis. Once the financial aid application file is complete in all respects, the determination of eligibility for various awards is made. Awards are offered from the various aid programs until all funds have been awarded. In order to allow adequate time for completion of the aid application file, it is strongly advised that the student mail the FAFSA no later than February 15, 2001. Students who complete their application later may still qualify for some need-based financial aid programs (Federal Pell Grant and/or Federal Stafford Loan), but limited campus-based aid, including work-study, will likely not be available.

Eligible students wishing to borrow from the Stafford Loan Program will be sent information about the electronic loan application procedure when they accept the offer. A loan application "Borrower Information Sheet" must then be completed by the student and submitted to the Office of Financial Aid for certification.

Complete consumer information relevant to all student services programs is available upon request. Requests for information should be directed to the appropriate office.

ADMISSION[Application](#)[Admission Criteria \(Chart\)](#)[Transfer of Credits](#)[Articulation Agreement](#)[Transfer Agreements](#)[Transferring to Other Institutions](#)[Transfer Appeals Process](#)[Credit by Examination](#)[Composition Exemptions](#)[Native American Tuition Policy](#)[International Students](#)[Unclassified Students](#)[Veteran Students](#)[Credit for Military Service](#)[Concurrent Students](#)[Student Orientation Advising and Registration \(SOAR\)](#)[Transfer Student Advising and Registration Programs](#)[Withdrawal Procedures](#)**APPLICATION**

Fort Lewis College adheres to the standards established by the Colorado Commission on Higher Education (CCHE).

Students may apply for admission to Fort Lewis College any time after completion of their junior year of high school. An application should be submitted as early as possible.

Application Deadlines**Fall Trimester****August 1**

Winter Trimester	December 1
First Summer Session	April 1
Second Summer Session	May 1
Third Summer Session	June 1

Application deadlines are subject to change

The require application form usually will be available at the office of any Colorado high school counselor. It can always be obtained from the Administration and Development Office, Fort Lewis College. To request an application, call **1-970-247-7184**. The FAX number is **1-970-247-7179**.

Apply for Admission Electronically

You may also apply for admission to Fort Lewis College electronically on the college's World Wide Web page at <http://www.fortlewis.edu>.

Students who wish to live in on-campus housing should early and must accepted by the College before applying for on-campus housing.

STUDENT CLASSIFICATIONS

Freshmen

High school students should:

1. Obtain an application blank from their high school counselor or from Fort Lewis College.
2. Fill out the application for admission and mail it with the \$20 non-refundable application fee to the Admission and Development Office. **Application deadline for the fall trimester is Aug.1, Dec.1 for the winter trimester, and April1, May1 and June 1 for the summer sessions. Deadlines are subject to change.**
3. Request an official transcript from their high school principal or counselor. (This transcript is to be forwarded directly to the College by the high school.)
4. Take the **American College Test (ACT) or Scholastic Aptitude Test (SAT)** and have the results sent to Fort Lewis college. It is suggested that one of these tests be taken in the spring of the junior year of high school. Complete information regarding these tests may be secured from the student's high school counselor or principal, or by writng to: Registration Department, American College Testing Program, P.O. Box 414, Iowa City, IA 52240, or Registration Department, Scholastic

Aptitude Test, Box 592, Princeton, NJ 08541.

The entering freshman class is selected from applicants who, by their records from high school and the American College Test or Scholastic Aptitude Test results, show promise of profiting from, and contributing to, the educational opportunities offered by Fort Lewis College. The Dean of Admission and Development and his advisors base their judgment on the high school record, the rank in class, and the ACT/SAT test results, as well as recommendations and other pertinent information. (See [chart](#))

Those admitted to Fort Lewis College should be high school graduates who have completed 15 acceptable secondary school units with preference being given to students who have followed a strong college preparatory program.

The College recognizes the importance of advising high school students, their counselors and instructors sufficiently early so that potential college students can prepare adequately for a successful college career. Therefore, the College has determined high school coursework most useful to college-bound students. Students should understand, however, that the more nearly their curricula meet the recommendations, the better prepared they will be for college.

The annotated chart presents RECOMMENDED coursework for admission to Fort Lewis College. Both prospective students and their counselors should realize that, while specific courses are important for college preparation, of perhaps even greater importance is the manner in which the courses are presented. Studies indicate that even students who take appropriate college preparatory courses often are unprepared for the quality and quantity of reading and writing expected of them in college. The well-prepared student will be able to read, write and calculate reasonably well before entering college.

Recommended Coursework for Prospective Students

ACADEMIC AREA	NUMBER OF UNITS
English (including Speech)	4
Mathematics	2
Natural Science	2
Social Science	2

Modern Language	Encouraged
Computer Science	Encouraged
Academic Units 3	11
Total Units 3	15

These recommendations are based on four years of high school.

1 The work in English should emphasize both reading and writing. Past experience indicates that college freshmen are unprepared for the quantity of both expected of them.

2 College preparatory math should include algebra and geometry and, when a third year is taken, Algebra II.

3 A unit is accrued when a student takes a course five days a week for one academic year. An academic unit is a unit earned in English, modern languages, mathematics, natural science or social science.

Students who have not graduated from high school but who have satisfactorily completed a GED program with a minimum score of 50 overall and no less than 40 in each subject area may be admitted as degree-pursuing students if appropriate ACT or SAT scores are attained.

Transfer Students

College students wishing to transfer to Fort Lewis College should:

1. Request an application form from the Admission and Development Office.
2. Complete the application and send it to the Admission and Development Office with a \$20 non-refundable application fee. Application deadline for the fall trimester is Aug 1; Dec. 1 for the winter trimester, and April 1, May 1 and June 1 for the summer sessions. Application deadlines are subject to change. Contact the Office of Admission and Development, 970-247-7184, for specific dates. Students applying late may be assessed a late application fee.
3. Request an official transcript from each college or university attended be forwarded to Fort Lewis College to the attention of the Admission and Development Office. Generally, ACT/SAT test results are not required of transfer students who have earned more than 12 semester college credits.
4. If fewer than twelve semester college credits have been

completed, students should also have a high school transcript and ACT or SAT results forwarded to the Admission and Development Office.

Applicants with a cumulative scholastic average of C and honorable separation from other colleges and universities may be admitted at the beginning of any term. College course credits that fulfill the requirements for a degree program at Fort Lewis College ordinarily will be acceptable for transfer if grades are C or better. A student with less than 30 semester credits may be reviewed on the high school record if deemed appropriate.

[Return to Top](#)

TRANSFER OF CREDITS

For courses to transfer to Fort Lewis College from another collegiate institution the transfer institution must be accredited by a regional accrediting association for colleges and universities such as the North Central Association of Colleges and Schools.

Regular academic courses completed with grades of "C-" or better are generally accepted in transfer to Fort Lewis College. Courses with grades of "D+" or lower will not transfer. The transfer grade point average is incorporated into the Fort Lewis cumulative grade point average. All courses attempted will count in the Fort Lewis cumulative grade point average, even courses not accepted in transfer. Credit will be allowed in transfer for academic pass/fail courses in which a passing grade has been received. However, these "pass" courses may not be used to meet major, general studies, or auxiliary requirements for graduation. Fort Lewis does not accept vocational, remedial, developmental, or English as a Second Language courses.

Credits more than 10 years old in the student's declared major or auxiliary requirements will not be automatically accepted. The major department at Fort Lewis College must validate these credits. General Studies credits more than 10 years old may be transferred.

Lower-division credits are freshman and sophomore level credits (courses numbered 100 and 200 respectively at Fort Lewis College). Upper-division credits are junior and senior level credits (courses numbered 300 or 400 respectively at Fort Lewis College). Lower- and upper-division designation is based on the transfer institution's lower- and upper-division designation. Course equivalency may be granted for a lower-division course from another college for an upper-division

course at Fort Lewis College but the course will not be given upper-division credit at Fort Lewis. Credits earned at a two-year college cannot be used to meet Fort Lewis College's credit requirement in upper-division courses.

A maximum of 72 semester credits or equivalent from a community/junior college transfers to Fort Lewis College; however, once a student reaches 72 credits, no further credits can be transferred from a community/junior college. A maximum of 100 semester credits or equivalent from a four-year college transfers to Fort Lewis College; however, once a student reaches 100 credits, no further credits will transfer.

The catalog in effect for graduation requirements for a transfer student is the catalog in effect when the student transfers to Fort Lewis College. The student then follows any subsequent policies governing graduation requirements and effective catalog.

[Return to Top](#)

Articulation Agreement with the Colorado Community College and Occupational Education System:

Fort Lewis College has an articulation agreement with the Colorado Community College and Occupational Education System which includes Aims Community College, Arapahoe Community College, Colorado Mountain College, Colorado Northwestern Community College, Community College of Aurora, Community College of Denver, Front Range Community College, Lamar Community College, Morgan Community College, Northeastern Junior College, Otero Junior College, Pikes Peak Community College, Pueblo Community College, Red Rocks Community College, and Trinidad State Junior College. The transfer of credit from these two-year colleges are the same as listed above under "Transfer of Credit" with the following three exceptions.

(1) Fort Lewis accepts the community/junior college general education common core curriculum toward the general studies requirements at Fort Lewis College if the student is a core completer from one of the Colorado two-year colleges under this articulation agreement. Specific transfer guides are in place with these colleges. Copies of these guides are available in the Reference Section of the Fort Lewis library and at the various two-year colleges in Colorado under this articulation agreement.

(2) When a student has not completed the 33 or 34 credit hours in the

Colorado Community/Junior College General Education Common Core Curriculum prior to transfer, Fort Lewis College will review and accept common core courses on a course-by-course basis after evaluation of those courses in relation to college requirements. The college will be guided by the following principles: (a) Fort Lewis College will count community/junior college courses in the same way that it counts equivalent courses offered on its own campus in the degree programs of native students, and (b) Fort Lewis College will count community/junior college courses as indicated in transfer guides and articulation agreements between community colleges and Fort Lewis College.

(3) The community/junior college transfer student under this agreement can graduate under the requirements of the Fort Lewis College catalog of the year the student entered the Colorado community/junior college provided the student is a core completer or has been awarded the Associate of Art or Associate of Science degree and attendance is continuous at the Colorado community/junior college. If the student is absent from the Colorado community/junior college for two consecutive terms, the student is not considered a continuous student. That student must use the current Fort Lewis College catalog in effect when the student matriculated at Fort Lewis College.

[Return to Top](#)

Transfer Agreements with Colorado state-supported four-year colleges or universities:

Fort Lewis College has transfer agreements with the state-supported four-year colleges or universities which include Adams State College, Colorado School of Mines, Colorado State University, Mesa State College, Metropolitan State College of Denver, University of Colorado at Boulder, University of Colorado at Colorado Springs, University of Colorado at Denver, University of Northern Colorado, University of Southern Colorado and Western State College. Copies of these agreements are available in the Reference Section of the Fort Lewis library and at the various four-year colleges in Colorado. The transfer of credit from these four-year colleges are the same as listed above under "Transfer of Credit" with the following three exceptions.

(1) Fort Lewis College accepts the completion of the total general education core if the student completed all the lower education requirements at another Colorado public higher education institution under this transfer agreement. However, Fort Lewis College does not accept individual courses with grades of "D+" or less even if those courses are part of the general education core. The completion of the total general education core will be honored but total credits will be

evaluated separately. It is the student's responsibility to request documentation from the state-supported four-year college that the student completed the general education core at that state-supported four-year college under this transfer agreement.

2) Fort Lewis College accepts any lower-division course (with a grade of "C-" or better) designated in a state-supported four-year college's catalog as a general education course within a specific content area (e.g. arts and letters, social science, natural science, etc.) to fulfill the credit hour and distribution requirements at Fort Lewis College with the General Studies Requirements listed in this Fort Lewis College catalog. If the state-supported four-year college's catalog does not designate which courses meet general education, it is the student's responsibility to request documentation from the four-year state-supported college that the course(s) meet general education at the Colorado state-supported four-year college under this transfer agreement.

3) The transfer student from a Colorado state-supported four-year college under this agreement can graduate under the requirements of the Fort Lewis College catalog of the year the student entered the Colorado state-supported four-year college provided the student's attendance is continuous at the Colorado state-supported four-year college. If the student is absent from the Colorado state-supported four-year college for two consecutive terms, the student is not considered a continuous student. That student must use the current Fort Lewis College catalog in effect when the student matriculated at Fort Lewis College.

The published transfer guides and agreements state Fort Lewis College's transfer policies in detail.

Transfer Agreements and guides with non-Colorado colleges.

Fort Lewis College also has articulation agreements and transfer guides with San Juan College, New Mexico, and Diné Community College in Arizona. These guides are on file in the Reference Section of Fort Lewis College library and at both two-year colleges. Those published agreements and transfer guides govern transfer policies for those two colleges.

[Return to Top](#)

Transferring from Fort Lewis College to Other Institutions:

In cooperation with Colorado State University, Fort Lewis College offers programs in agriculture, forestry, and engineering. In forestry and

engineering, a student may take two years of work at Fort Lewis. If the student follows the prescribed program and maintains a 2.5 average, the work will be transferred as a block to Colorado State University at the beginning of the junior year. A grade point average of 2.0 is required for students planning to transfer to CSU under the Guaranteed Transfer Program in agriculture. For more information about the above programs, see [Programs of Study](#).

Forestry

A transfer agreement in forestry between Fort Lewis College and Northern Arizona University is also in effect.

Engineering

Engineering agreements also have been established in cooperation with the Colorado School of Mines, the University of New Mexico, the University of Southern Colorado, New Mexico State University and the University of Colorado at Boulder. By taking a prescribed block of courses at Fort Lewis College in the first two years, a student can transfer to any of these institutions with junior standing if all requirements are met. These programs are, of course, transferable to other schools as well, on the basis of a course-by-course evaluation.

In engineering, Fort Lewis also offers a 3-2 cooperative program in which the student spends three years at Fort Lewis followed by two years at Colorado State University. At the conclusion of the program, the student receives a Fort Lewis College degree in mathematics and a degree from Colorado State University in engineering.

[Return to Top](#)

TRANSFER APPEALS PROCESS

The appeals process is explained below. Appeal levels 1, 2 and 3 apply to transfer appeals from Colorado public colleges with which Fort Lewis College has transfer agreements. Appeal levels 1 and 2 apply to transfer appeals from all other accredited colleges.

The student may appeal a decision regarding the transferability of a specific course(s). The student may appeal a decision regarding the placement of a specific course(s). The student may file an appeal regarding Fort Lewis College's failure to provide a transcript evaluation within the designated thirty (30) calendar day period. This thirty (30) calendar day period begins after the date of admission or after all the

official transcripts are received, whichever is later.

1. The Departmental Appeal

The student must file an appeal within 15 days of receiving the transcript evaluation by writing the Assistant Registrar, Records Office, Fort Lewis College, 1000 Rim Drive, Durango, CO 81301-3999. In writing the appeal the student must identify name of the college, the course and department number, and the course title. The student must be specific as to the appeal. The student must state what the reasons are for the appeal. Instead of a letter the student may use the "Transfer Evaluation Appeal Form." The "Transfer Evaluation Appeal Form" is available at the Records Office, 108 Miller Student Center. The decisions made in the transcript evaluation will be binding if the student fails to file an appeal within this time frame.

The student is responsible for supplying course descriptions, general education requirements, major requirements, and any other supporting documentation from the student's transferring college with the appeal.

Any appeals will be first reviewed by the Assistant Registrar. Appeals that cannot be resolved by the assistant registrar will be referred in writing to Academic Department Chairs, Assistant or Associate Academic Deans, or Academic Deans.

Fort Lewis College has thirty (30) calendar days to review the student's appeal and inform the student in writing of the decision on the appeal including the rationale for that decision. This thirty (30) calendar day period begins after the written appeal and all supporting documentation has been submitted to the Assistant Registrar.

In addition, the student shall be informed in writing about the process for appealing the appeal decision should the student feel that reasonable doubt exists. If the college fails to inform the student of the available appeal options, the first appeal decision shall be null and void. The student's request prevails and cannot be overturned by any institutional administrator or committee.

2. The Institutional Appeal

The student may appeal the first appeal decision by writing the Vice President for Academic Affairs, Fort Lewis College, 1000 Rim Drive, Durango CO 81301-3999. The appeal must be filed within fifteen (15) calendar days of the postmark date of the letter notifying the student of the departmental decision. If the student fails to file an appeal within

this time period, the original decision shall be binding.

Fort Lewis College must hear and reach a decision on the appeal within fifteen (15) calendar days after the appeal is filed.

The student will be notified in writing by Fort Lewis College of its decision regarding the transfer appeal and the rationale for the decision. In addition, Fort Lewis College shall inform the student that the student may appeal the decision by writing the governing board.

3. The Governing Board Appeal

The student may appeal the institutional decision by writing the Vice Chancellor for Academic Affairs of the State Board of Agriculture, Colorado State University System, 110 16th Street, Room 640, Denver CO 80202. The appeal must be filed within five (5) calendar days of the postmark date of the letter notifying the student of the institutional decision. If the student fails to file an appeal within this time period, the institutional decision shall be binding.

The State Board of Agriculture Staff shall review and reach a decision on the appeal within five (5) calendar days after the appeal is filed

The student will be notified in writing by the State Board of Agriculture of its decision regarding the transfer appeal and the rationale for the decision. In addition, the institution shall inform the student that the student may appeal the decision by writing the Colorado Commission on Higher Education. The appeal must be filed within five (5) calendar days of the postmark date of letter notifying the student of the State Board of Agriculture's decision.

Former Students

A former student is one who registered for classes at Fort Lewis College at any time in the past but has withdrawn and/or has not been registered during the last two consecutive trimesters. Students in this category must petition to resume studies. Students who have been under academic suspension must also petition to resume studies. If the student has attended other collegiate institutions in the interim, complete transcripts of all work taken must be submitted from each institution attended. Petitions should be submitted to the Office of Admission and Development, according to the deadline on Page 16. Students who apply late may be assessed a late application fee.

[Return to Top](#)

Credit By Examination

Credit for some courses may be earned through special examination. This procedure is limited to regular catalog courses, and may not apply to such courses, as Special Topics or Independent Study.

The student should apply to the appropriate department chair, who may assign a faculty member to administer the exam. The chair will assure that the reasons for the course challenge are legitimate, and, if the course is an advanced one, that the student has the necessary prerequisites.

A student may not take a special exam for a course which he or she has already taken in the regular fashion, regardless of the grade earned previously.

The fee for credit by examination is listed in the current year Tuition and Fee Schedule, and must be paid before the exam is given.

College credit also is awarded for exceptional performance on tests administered by three external testing agencies.

1. Fort Lewis College participates in the Advanced Placement Program of the College Entrance Examination Board. Under this program, outstanding secondary school students may take certain college-level courses in their own high schools. Satisfactory scores on an examination administered and graded by the College Board are forwarded to Fort Lewis and may serve as a basis for credit and/or advanced placement. For additional information students should consult their high school counselor or write to the College Entrance Examination Board, Box 592, Princeton, NJ 08550.
2. Superior scores on the ACT Assessment Battery also serve as a basis for credit and/or advanced placement. The decision of the College is final in awarding credit by examination. For further information, contact the Admission and Development Office at 970-247-7184.
3. Fort Lewis College has adopted a policy whereby up to a maximum of 24 credits may be granted on the basis of appropriate scores on the General Examinations of the College Level Examination Program. Students who obtain at least a standard score of 500 or the 50th percentile in natural sciences, humanities, social sciences, history and mathematics will receive 6 semester credits for each examination provided the following

stipulations are met:

The examinations must be taken prior to the end of the student's first year at college.

No credit will be granted if college coursework has been taken that covers much of the area covered by the examinations.

4. Fort Lewis accepts credits completed through the International Baccalaureate Program. The International Baccalaureate is a comprehensive course of study for academically talented high school students in select high schools throughout the world. For each examination on which a score of four or higher is earned, the College will award credit and appropriate course equivalency. The credit may be used toward the 128 credit minimum for graduation.

Fort Lewis College also grants additional credits on the basis of appropriate results of the Subject Matter Examinations of the College Level Examination Program. Further information may be obtained from the Learning Assistance Center or from C.L.E.P., Box 1821, Princeton, NJ 08540.

[Return to Top](#)

Exemptions (for Comp 150)

Students who demonstrate outstanding writing ability may be exempted from Comp 150, entitled "Reading and Writing in College." Exemptions from Comp 150 may be awarded to students who meet one of the following requirements:

1. A score of 4 or 5 on the Advanced Placement Test for English Composition/Literature.
2. A score of 650 or above on the SAT II Writing Test.

OR

3. A score of 4 or higher on the English Exam of the International Baccalaureate Program.

Students who are exempted from Comp 150 by the Advanced Placement Test will receive six credits; students exempted from Comp 150 by the International Baccalaureate will receive four credits in addition to the exemption because that test is accompanied by a year-

long writing course. Students who are exempted from Comp 150 by the SAT II Writing Test will not receive course credit.

Students who are in the block transfer programs are advised not to accept the Comp 150 exemption, because other colleges or universities may not accept the exemption, thus invalidating the transfer. All students who plan to transfer at any time should be especially careful to check with their advisors before accepting any course exemption.

[Return to Top](#)

Native American Students

Fort Lewis College, offers as a matter of policy and in compliance with state law, Native American students, as defined below, full-tuition waivers to attend the institution.

Fort Lewis College adheres to the following definition: "The term Native American shall include all persons of Native American descent who are members of any recognized Native American tribe now under federal jurisdiction, and all persons who are descendants of such members who were, on June 1, 1934, residing within the present boundaries of any Native American reservation, and shall further include all persons of one-half or more Native American blood. Eskimos and other aboriginal people of Alaska shall be considered Native Americans." (United States Code, 1964 Edition, Vol. 6, Title 25, Chapter 14, Section 479, Page 4, 897.)

The College will review all applications from Native American students to determine if they qualify for the full-tuition waiver. If a Native American qualifies according to an appropriate tribal certification and admission standards, such student will be offered the full-tuition waiver.

[Return to Top](#)

International Students

Fort Lewis College is authorized under federal law to enroll non-immigrant international students. In general, the same qualifications for admission are required for international students as for American applicants. A brief statement concerning the admission policies for foreign applicants may be obtained from the Admission and Development Office.

[Return to Top](#)

Unclassified Students

Under special circumstances students are permitted to register without having been admitted formally to the College. Usually these are adults whose objectives may be realized by taking a few courses rather than by pursuing a degree. The privilege of continuing may be withdrawn at any time when the accomplishments of a student are not deemed satisfactory. Satisfactory performance as an unclassified student may qualify such a student to apply for regular admission. Unclassified students seeking regular admission must contact the Admission and Development Office according to the application deadlines listed on Page 16 as to the procedure for establishing regular status. Unclassified students may need to seek permission from professors to enroll in classes.

[Return to Top](#)

Veteran Students

Fort Lewis College is authorized by the state approving agency according to federal law to educate students receiving benefits through the Veterans Administration. The Veteran's certifying official is located in the Records Office, 970-247-7350.

[Return to Top](#)

Credit for Military Service

Veterans often are allowed credit for previous education. Credit for military experience also may be allowed according to the American Council on Education recommendations. The D.D. 214 form and other relevant information should be submitted to the Records Office at the College. The student must make a written request for an evaluation of credits for military service.

[Return to Top](#)

Concurrent Students

Superior high school juniors and seniors who attend a high school within commuting distance of the campus may be admitted as part-time freshmen to take one or two courses. Concurrent students who wish to be considered for regular admission to the college must meet the same criteria and submit the same application as first-time freshmen students.

Students wishing to participate in this program should obtain further information from the Admission and Development Office or their high school counselor.

[Return to Top](#)

Student Orientation Advising and Registration Programs (SOAR)

During the summer months, Fort Lewis College conducts several freshman orientation programs for new freshmen and their parents. The orientations provide an opportunity to register early, make new friends, and meet faculty and staff. Information regarding these special programs is mailed to all accepted freshmen during the spring.

[Return to Top](#)

Transfer Student Advising and Registration Programs

Transfer students also will have a couple of opportunities during the summer to get advised and register for classes. Information will be mailed to accepted transfer students during the spring.

Withdrawal Procedures

New students who have not yet registered for classes wishing to withdraw or delay their admission need to contact the Admission Office in writing. Please indicate the term which you plan to attend.

Students registered for an upcoming term or a current term need to process a withdrawal based on the following criteria:

Prior to the start of a term, students may withdraw by contacting the Records Office, preferably by mail, informing the college of your intent.

Students who have reserved space in a residence hall need to contact Housing.

Once a term has begun, students who wish to initiate an official withdrawal from the college must contact the Learning Assistance Center, 280 Noble. Withdrawal past census date requires the instructor to assign a grade of "W" or "F" which will become part of the student's official transcript.

COURSE LISTINGS AND DESCRIPTIONS

Fort Lewis College does not offer all the classes listed in this catalog every trimester or every year.

The following pages provide brief descriptions of course offerings open to students to complete minors or degrees in majors or satisfy general requirements. Course listings are subject to change.

Each trimester the college publishes a schedule of courses which provides a detailed list of courses offered and the times and places of instruction. Courses listed in this schedule are subject to change.

EXPLANATORY NOTES

Numbering of courses:

Course numbering is based on the content of material presented in courses.

Courses numbered:

100-299 primarily for freshman and sophomores

300-499 primarily for juniors and seniors

Entry to all courses is limited to students who have completed published prerequisites or to those with instructors consent. Courses numbered below 100 do not count toward graduation. Courses numbered below 300 are called lower-division courses, while those 300 or above are known as upper-division courses.

Prerequisite. A requirement which must be fulfilled before a student can enroll in a particular course. Consent of the instructor for a student to attend a class is implied when the student has met the specified course prerequisites.

Corequisite. A requirement which must be taken concurrently with another course of instruction.

Cancellation of courses. The college reserves the right to cancel courses not selected by an adequate number of students or for which qualified faculty are not obtainable.

Variable credit courses. 1-3 indicates variable credit; the minimum and maximum credit limitations per term are shown. An example:

BA 499 Independent Study 1-3

Individual research is conducted under the supervision of a faculty member.

Prerequisite: Approval of the Dean of the School of Business Administration.

KEYS TO SYMBOLS

Course descriptions include a variety of symbols conveying essential information. The following standard course description with explanation of symbols serves as a model:

BA 407W Management Consulting (2-4) 4

The study of the concepts and models of management consulting and their application in business organizations. Emphasis is on practical application and the use of relevant tools and techniques. Students are required to engage in consulting services. Fall and winter terms.

Prerequisites: BA 340, 353 and 380, senior standing and consent of instructor.

BA - department designator

495 - course number

D - suffix indicates course meets general distribution group requirement. Courses taken in the major will not apply toward groups except for the broad general majors of humanities, general science and Southwest Studies. Courses identified with more than one group letter can be used to satisfy only one group requirement.

Aspects of Business - course title

(3-2) 4 - (clock hours in lecture per week - clock hours in laboratory experiences per week) number of credits

"Integrating prior" - explanation of course content

Prerequisite - requirements which must be fulfilled before enrolling in the course.

Fall, winter, summer - offered fall, winter, and summer terms.

Note: Not all of the above information may be noted in each course.

Additional symbols include:

A1 Suffix indicates course meets group A1 general requirement

A2 Suffix indicates course meets group A2 general requirement

B Suffix indicates course meets group B general requirement

C Suffix indicates course meets group C general requirement

D Suffix indicates course meets group D general requirement

E Suffix indicates course meets group E general requirement

W Suffix indicates course meets group W general requirement

L Suffix indicates lab course

(See "[The Curriculum](#)" in the Academic Programs section.) Courses with two or more letters after the number may qualify for each of the general distribution sections indicated, but only one will count toward the degree.

THE COLLEGE

Fort Lewis College is a four-year, state-assisted undergraduate institution that offers quality baccalaureate degree programs in the arts and sciences and in the professional areas of education and business. Fort Lewis has an enduring commitment to develop and maintain its programs at a level equal to those of other outstanding undergraduate institutions in the nation.

[Return to Top](#)

MISSION

The following mission statement has been adopted by the State Board of Agriculture, the governing body of Fort Lewis College.

The mission of Fort Lewis College is to open minds and kindle thought and action by instilling in students knowledge, a desire to acquire knowledge, the tools for doing so, and an understanding of how knowledge can be put to use for a common good. The experiences

students have here should help them learn to live wisely and should make a significant difference in their futures by enabling them to pursue their own educational goals throughout their lives. They should be able to demonstrate thoughtful scholarship in pursuing and weighing knowledge. They should be able to communicate and cooperate with others. The College should also play an active role in the community and the region as a multifaceted learning resource.

Fort Lewis College has chosen to pursue its mission via its historic role as an undergraduate, public, four-year liberal arts college. Because of the liberal arts focus, we require common general studies courses which include the fine arts, humanities, social sciences, mathematics, and the natural sciences in addition to more specialized junior and senior courses offered through the various majors. Our curriculum is designed both to ensure that students understand the values and assumptions implicit in their major fields of study and to prepare them for a rapidly changing world.

The College's first obligation is to create a personalized learning environment in which faculty and staff are accessible to all of its students. Therefore excellence in classroom teaching is our first priority. We are committed to hiring experienced faculty and professional staff dedicated to teaching and to working directly with students. The College also supports and encourages research, scholarly inquiry and creative performance by its faculty in order to enhance their work with students and the students' own work. We will continue to acquire the resources necessary to fulfill our primary mission.

It is essential to Fort Lewis College's mission that we contribute to the cultural diversity and economic development of the Four Corners region. To play an active role in the community, state and region, we must ensure that our programs fulfill the needs of our student population and the residents of our area. Our ethnic and regional heritage must be reflected in the make-up of our student body, in our special programs, and in our curriculum. Because of terms established in the original charter of the College, we have an honored tradition of providing tuition-free education for American Indian students. The College will continue to enhance educational opportunities for other minority groups, especially those originating in the Southwest. While a large percentage of our students should continue to come from Colorado, the College will encourage enrollment of students from other regions and from abroad in order to provide a diversified student body.

[Return to Top](#)

FORT LEWIS COLLEGE EDUCATIONAL PURPOSES

Fort Lewis College offers a unique educational experience where academic programs link knowledge and practice. Situated at an historical and cultural confluence in the American Southwest, the College is dedicated to undergraduate education that integrates the traditionally separate disciplines of the liberal arts and professional schools.

The academic program is designed to help students develop an informed and critical capacity to meet the challenges of a rapidly changing world. Because individuals define themselves through what they do, the course of study encourages students to cultivate a sense of self through the knowledge, abilities, and values they will carry to a lifetime of meaningful work. The curriculum consists of three essential components: general education, the major, and free electives.

Through general education students confront issues about life and work in a complex global and technical culture. General education emphasizes:

1. an understanding and appreciation of diverse legacies of culture and expression;
2. a recognition of how individuals and institutions function within broader political, economic, and sociocultural systems;
3. the development of skills and critical capacities to make informed use of the technologies that permeate our lives and society; and
4. an understanding of the natural environment and of the responsibility to sustain a balance between natural resources and human needs.

General education complements the academic major, which provides in-depth mastery of a field of study and continued development of higher order literacies including research, writing, speaking, problem solving, and ethical decision-making. Free electives encourage exploration of academic areas outside the major. The College accomplishes these educational purposes through its traditions of teaching excellence and commitment to close student-faculty and student-student interaction. The College promotes life-long learning for faculty and students alike.

In this context, the College recognizes the primary importance of, and provides wide opportunities for, preparation for a career -- whether it be in the arts, in business, in education, in the sciences, or in any of the many ways a student may desire to serve mankind and self.

[Return to Top](#)

ENROLLMENT

Fort Lewis' commitment to providing students with a quality undergraduate education has been acknowledged through the College's steady growth during the past 36 years. In 1962, about 720 students were enrolled at the College. In 1999-00, enrollment was 4,357. The College continues to maintain the personal, quality educational experience that only a small undergraduate school like Fort Lewis can provide.

[Return to Top](#)

HISTORY

Fort Lewis College is named for Fort Lewis, a U.S. Army Post established in 1878 at Pagosa Springs, Colorado. Two years later, the military post moved to Hesperus, Colorado, a location more central to Indian settlements and pioneer communities. The U.S. government abandoned the site as a military post in 1891, and in its stead, established Fort Lewis as a school offering free education to Native American students.

By 1911, Congress had deeded the Hesperus site to the State of Colorado, which then established a high school of agriculture under the supervision of the State Board of Agriculture. The school began to offer some college-level courses in 1925, and in 1933, Fort Lewis began to offer college courses exclusively. In 1948, Fort Lewis was officially designated a junior college with its own president.

Fort Lewis moved to the Durango campus in 1956. The first baccalaureate degrees were granted in 1964. And in 1986, Fort Lewis joined the Colorado State University System under the governance of the State Board of Agriculture. Colorado State University in Fort Collins and the University of Southern Colorado in Pueblo are sister institutions in the system.

Fort Lewis continues to honor its historic commitment to Native Americans by offering tuition scholarships to all qualified American Indians who meet admission requirements. It is the only college in Colorado to do so, as it has for more than 100 years.

[Return to Top](#)

LOCATION

Fort Lewis College sits on a mesa-like terrace overlooking Durango and the 13,000-foot peaks of the La Plata Mountains. With a population of 13,275, Durango is the largest community in Southwest Colorado and serves as a hub of commercial activity for a regional population of more than 60,000. Durango's elevation is 6,500 feet; it's surrounded by the Rocky Mountains, yet it's only 50 miles away from the deserts of the Southwest. Durango is about 350 miles from Denver, 200 miles from Albuquerque and 450 miles from Phoenix.

[Return to Top](#)

THE CAMPUS

The distinctive architecture of custom stonework found on the Fort Lewis campus reflects the heritage of Southwest Colorado's Anasazi Indians, whose ancient pueblo ruins can be found throughout the region. The architecture is set off by the backdrop of the rugged San Juan Mountains, creating a learning environment of incomparable natural beauty.

Academic activities are centered in Hesperus Hall, the Sage Hall, the John F. Reed Library, the Theatre Building, Dan Noble Hall and the academic wing of Berndt Hall. The College Union Building houses a cafeteria, snack bar, post office, bookstore, lounge and meeting rooms, as well as Student Government offices, the student newspaper, public radio station, Outdoor Pursuits and Student Activities.

The on-campus Housing Office, Financial Aid Office, Records Office, Native American Center and Health Center are in Miller Student Center.

About 1,580 students live on campus in one of seven residence halls and three apartment complexes. Physical education and recreation facilities include a large gymnasium, indoor swimming pool, football stadium, tennis courts, softball fields, track, nature trails, and, nearby, cross-country ski tracks in winter and golf course in summer.

[Return to Top](#)

TRIMESTER CALENDAR

Fort Lewis College operates on a modified trimester plan. The fall and winter trimesters are each about 15 weeks long. The third trimester also is 15 weeks long but is divided into three five-week sessions.

The fall trimester generally begins in late August or early September

and ends in mid-December; the winter trimester begins in early January and ends in late April. The three five-week summer sessions extend from about the first of May through early August.

Students who choose to attend all three trimesters can graduate in as few as two and two-thirds calendar years. Those who attend only during the winter and fall trimesters graduate in the traditional four years and often find the long summer a valuable time for employment as well as for a pleasant vacation period.

[Return to Top](#)

THE FACULTY

Fort Lewis recruits its faculty from the best colleges and universities in the country. Of the 168 full-time, tenure-track faculty members on campus during 1999-00, 91 percent held the highest degree attainable (doctorates, masters of fine arts) in their disciplines. Many of the Fort Lewis faculty have developed national reputations for excellence in teaching, research and curriculum development. Because Fort Lewis offers only undergraduate programs, faculty members have the time to concentrate on their teaching and to give their students one-on-one attention when needed.

[Return to Top](#)

SCHOLASTIC HONOR SOCIETIES

Scholastic honor societies maintain chapters at the College to recognize outstanding academic achievement by Fort Lewis students. Among them are the following:

Beta Alpha Psi - Beta Alpha Psi is a national honor society and a scholastic, professional and accounting fraternity. The objectives of Beta Alpha Psi include the recognition of outstanding academic achievements in the field of accounting; the promotion of association among members and practicing accountants; the provision of opportunities for self-development; and the encouragement of a sense of ethical, social and public responsibilities.

Beta Beta Beta - The Tri-Beta Biological Honor Society was established in 1922 with the goal of encouraging scholarly activity in undergraduate biology education. The Fort Lewis College Chapter, Epsilon Upsilon is among the many chapters that are established nationwide. Membership in the society offers students opportunities to

conduct undergraduate research, present findings at local and national meetings, and publish in the Tri-Beta scholarly journal. Tri-Beta activities include trips to scientific laboratories and natural field sites, and well as volunteer work in conservation biology.

Beta Gamma Sigma - The National Honor Society in Business and Management. Founded in 1913, Beta Gamma Sigma encourages and rewards scholarship, promotes advancement of education in business and fosters integrity in the conduct of business operations.

Kappa Mu Epsilon - Mathematics Honor Society. Kappa Mu Epsilon was founded in 1931 to further the interests of mathematics in schools which place their primary interests in undergraduate programs; to educate the undergraduate on the importance mathematics has played in western civilization; to develop an appreciation for mathematics' demand for logical and rigorous thought; to recognize outstanding achievement in mathematics; and to educate members on advances made in the field.

Native American Honor Society - The Fort Lewis College Native American Honor Society was established in 1982 to promote and recognize outstanding scholarship among Native American students on campus. All activities are directed toward public service. Membership is open to junior and senior Native American students with cumulative grade point averages of 3.0 or better.

Phi Alpha Theta - The national history honor society recognizes outstanding scholarship among history students. The Fort Lewis chapter was established in 1964-65 and is the college's oldest, continuously active honor society.

Phi Epsilon Kappa - A national honor society that recognizes outstanding students in Exercise Science. The society is committed to community service as well as providing educational activities for its members. Membership is open to Exercise Science students with a minimum grade point average of a 3.0 within the Exercise Science major.

Phi Kappa Phi - This honor society is the oldest and largest national honor society which recognizes and encourages superior scholarship in all academic disciplines. Established in 1897, Phi Kappa Phi selects members who meet high academic standards from throughout the college community. Fort Lewis College was awarded a chapter of Phi Kappa Phi in 1992, thus recognizing the quality of the college's faculty, students and academic programs.

Phi Sigma Iota (Chapter Chi) - This honor society for foreign language students recognizes outstanding scholarship for those who have at least a 3.0 cumulative grade point average, who have completed at least one junior-level course and who rank in the highest 35 percent of their class in general scholarship.

Psi Chi - The Psychology Honor Society recognizes outstanding scholarship for students majoring in psychology. The society encourages the advancement of psychology through observation, logical thinking and critical - yet tolerant - openmindedness and to continue the effort of understanding human nature.

Sigma Delta Pi (Chapter Kappa Tau) - The Hispanic Honor Society recognizes students majoring in Spanish who have completed at least one junior-level Spanish course and have at least a 3.0 cumulative grade point average in their Spanish courses and overall. Membership in Sigma Delta Pi is the highest academic honor in the field of Spanish studies. The society seeks to develop a better understanding of the language, literature and culture of Spanish-speaking peoples.

Sigma Pi Sigma - Sigma Pi Sigma was founded in 1921 and is the only national physics honor society. It is a fully recognized honor society within the Society of Physics Students, a member of the Association of College Honor Societies, and is an affiliated Society of the American Institute of Physics. Sigma Pi Sigma exists to foster interest in physics at the undergraduate and graduate levels.

Sigma Tau Delta (Chapter Kappa Psi) - The English Honor Society. Its purpose is to honor undergraduates, graduates and scholars in academia, as well as professional writers who have realized accomplishments in linguistics or literary realms of the English language. Fort Lewis College students who are eligible for membership are those who have successfully completed at least 45 hours of course work with a cumulative grade point of at least 3.25.

Sigma Xi - Sigma Xi was founded in 1886 at Cornell University as an honor society for scientists, engineers and mathematicians. It rewards excellence in scientific research and encourages a sense of companionship and cooperation among scientists in all fields.

[Return to Top](#)

ACCREDITATION

The College is accredited by the North Central Association of Colleges and Schools. In addition, the School of Business Administration is accredited by the American Assembly of Collegiate Schools of Business. The Chemistry Department offers a bachelor of science degree which is accredited by the American Chemical Society; and the Music Department is accredited by the National Association of Schools of Music. Fort Lewis College also is a member of the American Council of Learned Societies and the Council of Public Liberal Arts Colleges.

[Return to Top](#)

ASSESSMENT EFFORTS TO ENSURE QUALITY EDUCATION FOR STUDENTS

To improve instruction and prove that it meets its educational goals, the College regularly assesses students' progress. The College assesses the results of collegewide and departmental programs by using surveys, term papers, senior theses, its own instruments, and nationally standardized tests such as Graduate Record Exams to measure the quality and success of its programs. The College requires all freshmen and seniors to participate in assessments to help the College improve its academic programs and teaching methods. Many departments require their seniors to demonstrate their writing, thinking and values as well as expertise in their major.

The faculty has unanimously approved four collegewide goals to be assessed. They are:

Learning as Inquiry -- Living, useful learning, not just rote and regurgitation. It is demonstrated by seniors who exhibit curiosity and openness to evidence and have mastered broad bodies of knowledge.

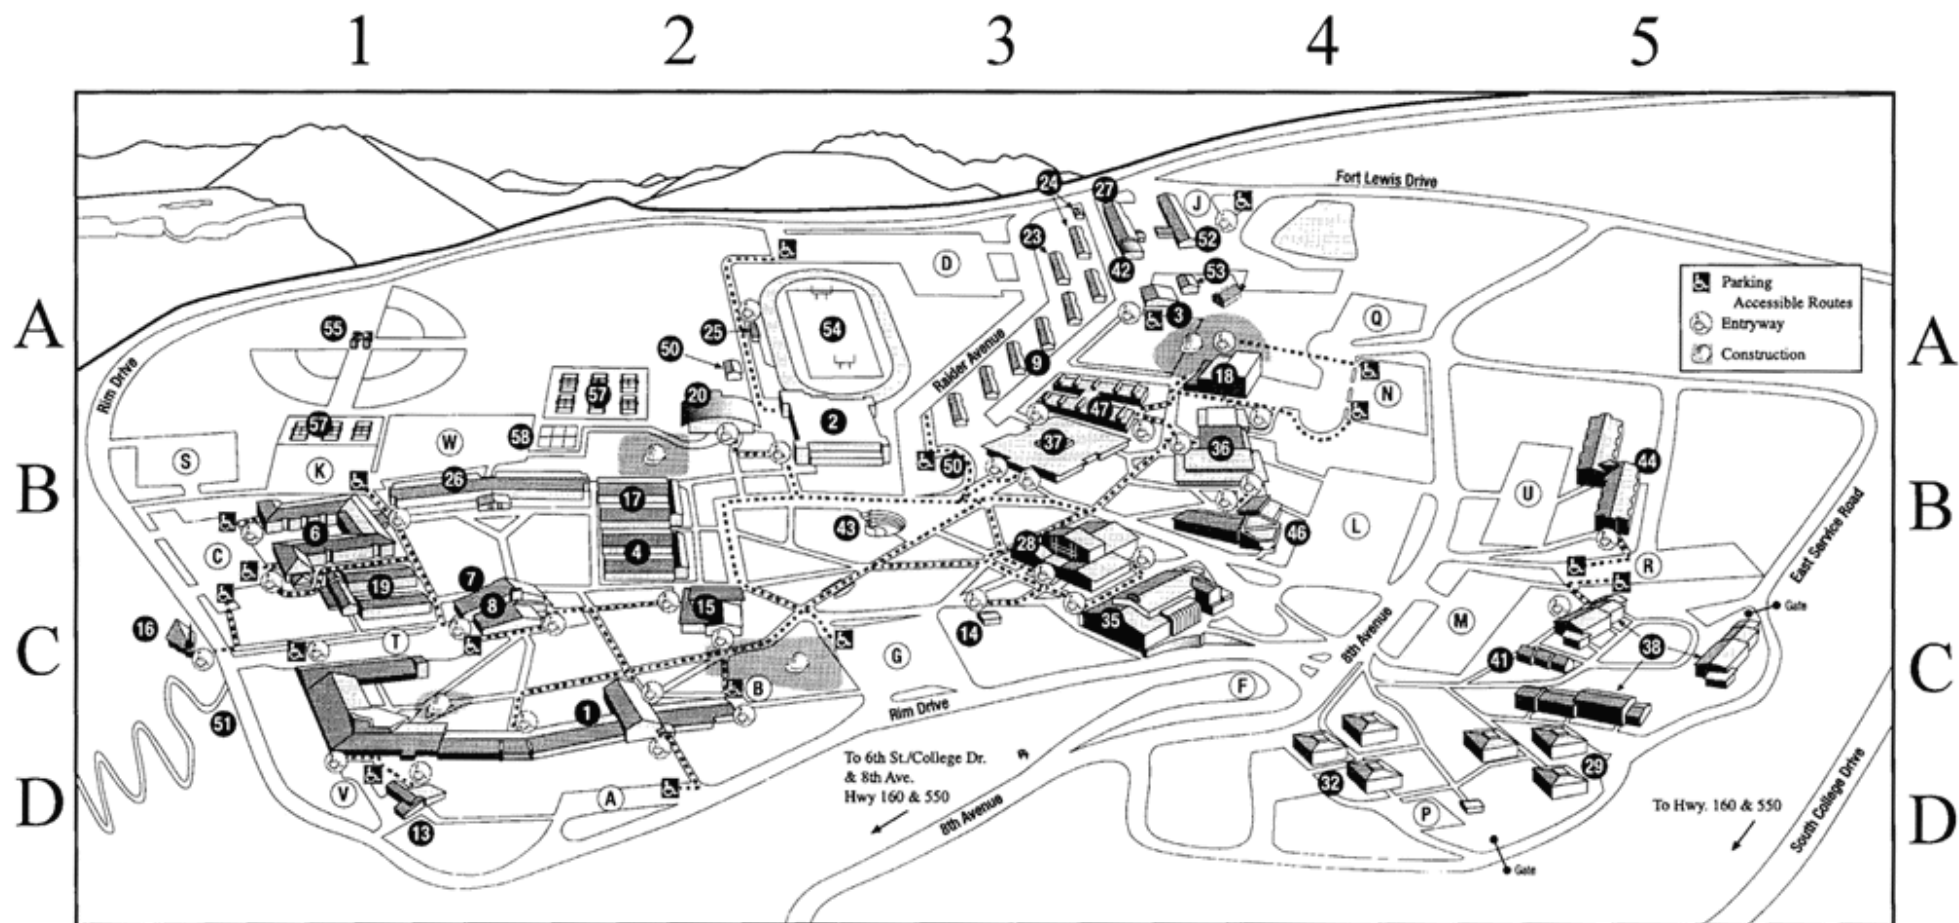

Critical Thinking as Problem Solving --Includes complex evaluative reflection that results in effective decisions, plans and actions in real-world contexts.

Communication as Intellectual Contribution --Telling an audience something they don't already know by balancing complexity and clarity of argument, clear conceptual organization of evidence, and adaptation to context and audience.

Action as Responsible Application of Academic Learning -- Using all of the above to make the world a better place. Such action is characterized by tolerance, respect, and application of academic learning.

The Exercise Science Department team of professors is committed to offering courses and experiences of the highest quality which will broaden the liberal arts education of all undergraduate students at Fort Lewis College by instilling in them a lifelong desire to make fitness, wellness and the joy of efficient human movement an integral part of their daily life - today and in the future - as they assume their role as leaders in our world's diverse cultural society.

Objectives:

1. The professional preparation of skilled teachers of human movement and exercise forms as well as qualified persons in the allied areas of coaching, athletic training, and the field of fitness.
2. A meaningful program (individual, dual and team activities) stressing the lifetime value of activity for all students.
3. Practical extracurricular experiences in health, fitness, exercise, and athletic training.
4. Professional leadership for the intramural, recreational, and fitness activities of the students.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE WITH A MAJOR IN EXERCISE SCIENCE:

Credits

General Studies.....35

Specific Departmental Requirements:

ES 150 Sociocultural Foundations of Human Movement.....3
ES 165 Community First Aid and Safety.....2
ES 224 Basic Principles of Athletic Training.....3
ES 243 Personal Health.....3
ES 301W Current Issues in Sport
or
ES 302W Issues in Health and Well-Being.....3
ES 330 Anatomical Kinesiology.....3
ES 332 Biomechanical Analysis and Application.....2
ES 340 Motor Learning and Control.....3
ES 350 Measurement and Evaluation.....3
ES 360 Exercise Physiology.....4

ES 363 Computer Applications in Exercise Science.....	3
ES 375 Psychology of Sport.....	2
ES 480 Administration of Programs in Exercise Science.....	3
ES 496 Senior Seminar and Research in Exercise Science.....	2

Total.....39

Area of Concentration.....(11-19)

Writing Course Within Discipline: Included in Specific Departmental Requirements above.

Auxiliary Requirements from Other Departments:

Bio 121B Human Anatomy and Physiology.....	3
Psych 157D Introduction to Psychology.....	3

Total.....6

Electives.....48

TOTAL REQUIRED FOR GRADUATION.....128

In addition to the major in Exercise Science, students ***must*** pursue additional studies in at least one concentration by taking the Exercise Science core ***plus***:

1. Teaching Concentration*

ES 130 Motor Skills for Professionals.....1
(Softball/Volleyball)

ES 131 Motor Skills for Professionals.....1
(Soccer/Basketball)

ES 132 Motor Skills for Professionals.....1
(Tumbling/Fundamental Motor Skills)

ES 133 Motor Skills for Professionals.....1
(Badminton/Tennis)

ES 134 Motor Skills for Professionals.....1
(Dance/Aquatics)

ES 135 Motor Skills for Professionals.....1	
(Fitness/Outdoor Leisure Pursuits)	
ES 354 Adapted Exercise.....3	
ES 370 Methods of Teaching Physical Education in	
Elementary Schools.....3	
ES 380 Methods of Teaching Physical Education in	
Secondary School.....2	

Total.....14

***If Teacher Licensing is desired, students must also complete the appropriate K-12 teacher licensure program courses. Teaching concentration is K-12 only.**

2. Athletic Training Concentration

ES 186 Physical Conditioning.....1	
ES 220 Clinical in Basic Athletic Training.....1	
ES 221 Clinical Application of Therapeutic	
Modalities.....1	
ES 240 Manual Muscle Testing.....1	
ES 283 Evaluation of Athletic Injuries.....3	
ES 320 Clinical in Manual Therapy.....1	
ES 353 Nutrition for Fitness and Sport.....2	
ES 385 Therapeutic Modalities.....2	
ES 387 Reconditioning of Athletic Injuries.....3	
ES 420 Capstone Clinical in Athletic Training.....1	
ES 424 Advanced Athletic Training.....3	

Total.....19

Upon completion of ES 224 and ES 220, students wishing to continue in the athletic training concentration must make a formal application and go through a formal interview. Criteria for admission are available from the Athletic Training Program Director and the Head Athletic Trainer.

3. Coaching Concentration

ES 185 Introduction to Coaching.....2	
ES 186 Physical Conditioning.....1	
2 courses in Techniques of Coaching (select	

sport).....4
 2 courses in Officiating (select sport).....2
 ES 353 Nutrition for Fitness and Sport.....2

Psychology

Professors Janet L. Jones, Roger P. Peters and Thomas A. Skurky;

Associate Professors Michael C. Anziano, Alane S. Brown, Beverly R. Chew, Betty J. Dorr, Mukti Khanna and Marilyn S. Leftwich;

Assistant Professor Ziarat Hossain

The psychology major is designed to meet the needs of many students, all of whom have an interest in the scientific study of behavior and its causes, which is the most general definition of modern psychology. Some students may wish to pursue psychology in depth; others may prefer to approach psychology from a more general interdisciplinary perspective within the liberal arts tradition.

The needs of all psychology students are addressed by a major that is demanding, yet flexible; a major that ensures exposure to current thinking and techniques of modern psychology, but at the same time allows students to explore their own interests and set their own goals. As they become more familiar with the field of psychology and more aware of individual interests, students are encouraged to redefine their goals.

REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE

WITH A MAJOR IN PSYCHOLOGY:

Credits

General Studies approximately.....44

Specific Departmental Requirements:

1. Core Program (ALL required. Complete in the order listed).....19

Psych 157D Introduction to Psychology.....3

Psych 241B Basic Statistics for Psychologists.....4

Psych 296W Psychological Research

Methods.....4

Psych 300 Methods of Inquiry.....4

Psych 496 Senior Seminar.....4

2. Psychology Electives.....20

The student must complete an additional 20 credits in psychology. 12 of these 20 credits must be from upper-level courses (those numbered 300 and above). No more than four credits of Independent Study (Psych 229/Psych 499) will be accepted. No more than six credits of off campus coursework or innovative month will be accepted. Students are urged to work closely with their advisor in choosing the most appropriate array of courses for the student's interests and plans.

Total Departmental Requirements.....39

Writing Course Within Discipline: Included in Specific Departmental Requirements above.

The requirements for a Bachelor of Arts degree in Psychology may be summarized as follows:

Credits

General Studies approximately.....44

Core Program in Psychology.....19

Psychology Electives.....20

General Electives.....approximately 45

TOTAL REQUIRED FOR GRADUATION.....128

A minor in psychology is available for students majoring in other disciplines. Requirements for a minor in psychology are described below.

REQUIREMENTS FOR A MINOR IN PSYCHOLOGY:

A minor in psychology consists of at least 20 credits, distributed as follows: Psych 157D, Psych 241B, either Psych 296W or Psych 300, and three additional psychology courses, two of which must be upper-division.

HUMANITIES MAJORS

Humanities majors with a primary concentration in psychology should note that Psych 296W is the writing course in this discipline.

Prerequisites for Psych 296W are Psych 157 and Psych 241. The Senior Seminar, Psych 496, requires the following prerequisites: Psych 157, Psych 241, Psych 296 and Psych 300. No more than a combined total of six credits in psychology from off campus coursework or innovative month or independent study (Psych 299/Psych499) may be counted towards a primary or secondary concentration.

FORT LEWIS COLLEGE

CATALOG FOR THE ACADEMIC YEAR 2000-01

Student Responsibilities

The catalog outlines in detail the course requirements needed to complete the various degree programs offered by Fort Lewis College. If students follow the prescribed courses for a selected major and complete at least 16 credit hours each trimester, they may reasonably expect to complete the degree program within eight trimesters.

To do so, however, students must assume the responsibility to read the catalog, complete a minimum of 128 credits as outlined by the degree program and maintain a minimum grade point average of 2.0 for those courses accepted to meet the requirements for the major.

Students will be assigned an advisor to help them with the appropriate course selections, but students assume the ultimate responsibility to know and complete all graduation requirements.

Right to Alter Course Listings

Course offerings and requirements at all colleges vary with time and demand. The administration of Fort Lewis College reserves the right to alter course listings as necessary without notice.

Office of Admission and Development

Fort Lewis College

1000 Rim Drive

Durango, Colorado 81301-3999

Phone: 970-247-7184

E-mail: steinle_h@fortlewis.edu

World Wide Web: www.fortlewis.edu

As a prospective student to Fort Lewis College, you have a right to request an annual report of campus crime statistics and security practices. This report includes specific crime statistics relating directly to the Fort Lewis College campus, as well as campus security policies on crime prevention and reporting procedures. If you desire a full copy of this report, please notify the Vice President of Students Affairs Office, Fort Lewis College, 1000 Rim Drive, Durango CO 81301-3999.

Fort Lewis College does not discriminate on the basis of age, race, color, sexual orientation, religion, national origin, sex, veteran status or disability in admission or access to, or treatment or employment in, its education programs or activities. Inquiries concerning Title VII, Title IX, Section 504, and Americans With Disabilities Act (ADA), may be referred to the Affirmative Action Director, Fort Lewis College, 970-247-7666 or to the Office for Civil Rights, U.S. Department of Education, 1244 Speer Blvd., Suite 310, Denver, Colorado 80204, 303-844-5695.

Economics

Econ 170D CURRENT ECONOMIC ISSUES (4-0) 4

Explores current economic issues in society by developing a set of basic tools of economic analysis and then applying those tools to contemporary economic questions. Issues to be covered will include topics such as inflation, unemployment, the farm problem, U.S. economic leadership, poverty, environmental standards, our financial system and worldwide economic growth. Recommended for **NON-BUSINESS MAJORS** who are interested in taking only one course in economics. Fall and winter terms.

Econ 201B PERSONAL FINANCE (3-0) 3

Managing personal finances including budgeting, insurance, taxes, home ownership, investments, retirement and estate planning. This course is designed for majors outside the School of Business Administration. Offered on demand primarily in summer.

Econ 262 PRINCIPLES OF ECONOMICS - MICRO (2-0) 2

An introductory course in price theory. Topics include opportunity cost, demand, supply, markets, elasticities and the organization of markets. This is a half semester course for which credit is earned by completing the first half of Econ 266D. For transfer students who have only had macro. Consent of instructor.

Econ 266D PRINCIPLES OF ECONOMICS (4-0) 4

An introductory course covering microeconomics and macroeconomics. The micro section includes opportunity cost, demand and supply analysis, elasticities, market behavior, market structures and international trade theory. The macro section includes national income theory, income flows, macroeconomic equilibrium and how these concepts are applied to examine economic growth, inflation, unemployment, monetary and fiscal policy, deficits and the national debt and the balance of payments. Fall, winter and summer terms.

Econ 272 PRINCIPLES OF ECONOMICS - MACRO (2-0) 2

An introductory course on national income analysis. Included are income flows, macro-economic equilibrium, monetary and fiscal policy and balance of payments. This is a half semester course for which credit is earned by completing the second half of Econ 266D. For transfer students who have only had micro. Consent of instructor.

Econ 305D ECONOMIC GEOGRAPHY (4-0) 4

A course that uses Microeconomic and Macroeconomic analyses to offer theoretical and empirical evidence for the location of economic activity at specific places, how that economic activity leads to relationships within places, how and why movement of resources occurs and what factors can be used to define regions.

Econ 310C ECONOMIC HISTORY OF THE UNITED STATES (4-0) 4

A study of the origin and development of the economic institutions of the United States from Colonial times to the present. U.S. economic development is considered in relation to theories of economic growth and development. Fall term.

Econ 330 ECONOMICS OF AGRIBUSINESS (4-0) 4

An application of economic principles to problems in agriculture and the analysis of the agricultural enterprise as a business. Topics include supply and demand analysis, an analysis of agricultural production, industrial organization as it applies to agriculture, the use of management tools and decision making processes in farm and ranch management. Fall term of odd-numbered years.

Prerequisite: Econ 266D.

Econ 335D ENVIRONMENTAL ECONOMICS (4-0) 4

This course presents the application of economic theory and analytical tools to a variety of environmental and resource problems. Economic reasoning is used to gain insights into the causes of, consequences of, and ways of dealing with environmental problems. The economic tools of cost/benefit analysis are developed and applied to environmental costs and benefits associated with a variety of private and public projects/policies. The ethical implications of these tools is also considered. Students will be expected to conduct an economic analysis of some proposed project/policy. Fall term.

Econ 356 MICROECONOMICS THEORY (4-0) 4

This course deals with the price system as it directs resources to more efficient use. It deals with pricing under the various degrees of competition and stresses demand analysis. The principles of production economics are explored. Fall term.

Prerequisite: Junior standing.

Econ 364W MACROECONOMICS THEORY (4-0) 4

A course that examines the economy as a whole. Included are an analysis of national income accounting, consumption, investment, government spending, the level of employment, monetary theory, monetary and fiscal policy, and international economic policy. Winter term.

Prerequisites: Junior standing.

Econ 361 MANAGERIAL ECONOMICS (4-0) 4

A course designed to connect economic theory with business decision-making. The course deals with the application of economic models to business decisions, quantitative methods for decision-making, cost-benefit and cost-effectiveness analysis. Fall and winter terms.

Prerequisites: BA 253B and Econ 266D.

Econ 369D PUBLIC FINANCE (4-0) 4

An analysis of the financing of federal, state and local units of government. Emphasis given to problems of taxation, expenditures and

debt management. Winter term of even-numbered years.

Prerequisites: Junior standing.

Econ 370 TOPICS IN INTERNATIONAL ECONOMICS 1-6

An examination of selected topics in the area of international economics. Students may take this course one or more times for credit provided the subject is different on each occasion.

Prerequisite: Econ 266D or concurrent enrollment, or permission of instructor.

Econ 371D INTERNATIONAL ECONOMICS (4-0) 4

Classical, neoclassical and modern trade theory. Comparative analysis of marketing functions, institutions and structures in different national environments. Exchange rates, import/export monopolies, quotas, tariffs and other foreign fiscal policies. Winter term.

Prerequisites: Junior standing.

Econ 381D ECONOMICS OF THE HEALTH CARE

INDUSTRY (4-0) 4

A survey of the issues in the field of health care economics. Health insurance, health care costs, and the financing and delivery of personal medical services are studied as is the role of government in the provision of health and medical care. This course is intended for students interested in issues concerning the health care industry. Prior knowledge of economics is not required. Fall term of odd-numbered years.

Prerequisite: Junior standing or consent of instructor.

Econ 382 FINANCIAL INSTITUTIONS (4-0) 4

This course is the same as BA 382. See BA 382 for description. Credit cannot be awarded for both BA 382 and Econ 382.

Econ 407C EVOLUTION OF ECONOMIC THOUGHT (4-0) 4

Traces the evolution of economic thought from the 1600s to the present.

Each major school of thought, e.g., Mercantilist, Classical, Marxist, Keynesian, etc., will be analyzed to see how it met the conditions of its time, which concepts were only relevant to that period, and which have had enduring relevance. Winter term of odd-numbered years.

Prerequisites: Junior standing or consent of instructor.

Econ 410D ECONOMICS, A RADICAL PERSPECTIVE (4-0) 4

A course that examines the process of resource allocation from the perspective that draws its analysis from Neoclassical Economic theory, Institutional Economics and Marxian Economics. Topics that are examined are power as it arises from the ownership of resources and how power is then transformed into control of institutions, class as a natural consequence of the capitalist system, sexism and racism as they arise from the existence of power and class. Also included are topics that address worker dislocation due to structural change in the economy and work issues related to the post-industrial society.

Prerequisites: Junior standing or consent of instructor.

BA 499 INDEPENDENT STUDY 1-4

Individual research is conducted under the supervision of a faculty member. Fall and winter terms.

Prerequisite: Approval of School of Business Administration Dean.

Education

Please see the [Teacher Education Web Site](#) for the most recent additions to the course listings to meet state-mandated changes.

[Return to List](#)

Engineering

Engr 103 COMPUTER AIDED DRAFTING (3-0) 3

A basic course in engineering graphics, including geometric constructions, orthographic projection, sectional views, dimensioning,

layout, working drawings and elementary descriptive geometry. The primary drafting tool for this course will be the computer.

Engr 104B COMPUTER PROGRAMMING FOR SCIENTISTS AND ENGINEERS (2-2) 3

Introduction to programming, problem-solving methods, algorithm development, program design, debugging, documentation and computer solution to mathematical/engineering problems.

Prerequisite: Math 121B or equivalent.

Engr 105 ENGINEERING PRINCIPLES (3-0) 3

Solution of fundamental engineering and design problems using digital computation and graphical techniques. Topics include graphical and numerical mathematics, engineering statistics and computer graphics.

Prerequisites: Math 221B and Engr 104B.

Engr 201 ELECTRIC NETWORKS I (4-0) 4

An introduction to engineering circuit analysis. Topics include the study of linear circuit elements (resistors, capacitors, inductors, operational amplifiers), linear circuits, Kirchoff's laws, methods of analysis, RL, RC, and RLC circuits, phasors, sinusoidal steady state response, average value RMS values and power in AC circuits.

Prerequisite: Math 222.

Engr 202 ELECTRIC NETWORKS II (3-2) 4

Topics include polyphase circuits, complex frequency and frequency response of linear networks, magnetically coupled circuits, two-port networks, Fourier analysis, Laplace transform techniques, operational amplifiers.

Prerequisite: Engr 201.

Engr 205 SURVEYING I (2-4) 4

Plane surveying methods in engineering: taping, leveling, traversing, topographic mapping, associate computation. Use and care of instruments. Sources and evaluation of errors.

Prerequisite: Math 121B or equivalent.

Engr 217 STATICS (3-0) 3

Vectors, forces and moments. Static equilibrium of particles and rigid bodies. Trusses, frames and machines. Internal forces, shear and bending moment diagrams. Centroids, moment of inertia, friction and virtual work.

Prerequisite: Math 221B.

Engr 221 DYNAMICS (3-0) 3

Kinematics and kinetics of particles and rigid bodies. Includes the applications of Newton's laws, work-energy, and impulse-momentum, and their applications to determine the motion of rigid bodies in two and three dimensions.

Prerequisite: Engr 217.

Engr 238 DIGITAL LOGIC DESIGN (3-3) 4

Introduction to the building blocks of digital computer design. Application of Boolean algebra to the synthesis of logic circuits from logic elements. The design and implementation of combinational and sequential circuits. Understanding of hardware operations in a simple computer. Winter term of odd-numbered years.

Prerequisites: Engr 104B or equivalent math and programming experience.

Engr 270 ENGINEERING THERMODYNAMICS (3-0) 3

Fundamental concepts and basic theory of classical thermodynamics including study of the first and second laws of thermodynamics, properties of pure substances, thermodynamic states and functions, applications to engineering.

Prerequisites: Phys 217B.

Engr 305 SURVEYING II (2-4) 4

Topics include the Public Land Survey system, coordinate systems and

control surveys, photogrammetry, astronomic observations and route surveys.

Prerequisites: Engr 205 and Math 221B.

Engr 317 MECHANICS OF MATERIALS (3-0) 3

Stresses and deformations in structural members and machine elements, combined stresses and stress transformations. Deflection by integration, superpositions and moment area method. Strain energy concept, impact loading and column design.

Prerequisite: Engr 217.

Engr 321 FLUID MECHANICS (3-0) 3

Fluid properties, statics, kinematics, and kinetics of fluids including gravitational and viscous effects. Differential analysis of fluid motion. Incompressible inviscid flow, dimensional analysis and similitude. Flow measurements, boundary layers, flow about immersed bodies and flow in open channels.

Prerequisite: Engr 221.

Engr 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. Offered on demand.

[Return to List](#)

English

All courses with an A or E suffix fulfill Group A or E distribution requirements. A and E courses are open to non-majors. Communications majors may take either one A or one E course for general distribution requirements, but not both.

Engl 116A1 INTRODUCTION TO MASS COMMUNICATIONS (4-0) 4

An examination of the history of the mass media in terms of technological advancements and their impact culturally, politically and economically on the citizens of this country and others. In addition to

the seven mass media - books, newspapers, magazines, radio, recordings, motion pictures and television - this course addresses public relations and advertising, emerging technologies and current issues in media scholarship and criticism. Fall, winter and summer terms.

Engl 126A1 THE BIBLE AS LITERATURE (THE HEBREW BIBLE) (2-0) 2

A study of the Hebrew Bible as literature, together with its mythological, historical and archaeological backgrounds. Winter term.

Engl 127A1 THE BIBLE AS LITERATURE (THE CISTIAN TESTAMENT) (2-0) 2

A study of the Cistian Testament as literature, together with its mythological, historical and archaeological background. Winter term.

Engl 173E 20TH CENTURY ASIAN AND AFRICAN LITERATURE (4-0) 4

A study of selected 20th century novels from Asia and Africa. This course is designed to examine the appropriation of the novel form and issues of hybridity and authority. Fall term.

Engl 174A1 AFRICAN-AMERICAN LITERATURE (4-0) 4

A study of selected 19th and 20th century works by African-American writers. Winter term.

Engl 175A1 WOMEN'S LITERATURE (4-0) 4

A study of literature by and about women. Fall and winter terms.

Engl 215 NEWS MEDIA WRITING (4-0) 4

A practical course that introduces students to news gathering and news writing. The course uses print as the medium to apply concepts and learn skills, but also makes clear the parallels between print and the electronic media. The course also addresses ethical and legal principles. Fall and winter terms.

Engl 221A1 CLASSICAL LITERATURE (4-0) 4

A study of ancient Greek and Roman literature. Winter term, alternate

years.

Engl 230A1 SURVEY OF BRITISH LITERATURE (4-0) 4

An overview of representative British writing from its beginnings to the present. Fall and winter terms.

Engl 240A1 SURVEY OF AMERICAN LITERATURE (4-0) 4

An overview of representative American writing from its beginnings to the present. Fall and winter terms.

Engl 250 PRACTICUM -- NEWSPAPER 1-6

Directed experience for lower-division students in newspaper work on the *Independent* or other newspapers. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 250 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 251 PRACTICUM -- RADIO 1-6

Directed experience for lower-division students in radio broadcasting on KDUR. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 251 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 252 PRACTICUM -- TV 1-4

Directed experience for lower-division students producing, shooting, scripting and editing. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 252 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, Engl 215, Engl 304 and consent of instructor.

NOTE: Engl 252 has an extra fee of \$50.

Engl 258 PRACTICUM-SERVICE LEARNING 1-6

Directed experience for lower-division students in service learning with placements in local schools or community organizations. Credit is based on the ratio of 30 hours of service for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 258 is repeatable for a maximum of six credits. Fall and winter terms.

Prerequisite: Consent of instructor.

Engl 265A1 SEMANTICS (2-0) 2

A study of the meaning of language, emphasizing its social and psychological uses and abuses. Fall and winter terms.

Engl 267A1 PERSUASION: HISTORY, THEORY, AND PRACTICE (4-0) 4

An in-depth study of selected texts representing Western and/or non-Western rhetorical theory and practice, which will help students broaden their understanding of the presence of rhetoric in intellectual and institutional histories and as a shaping force in contemporary intellectual, academic, political and professional domains. Fall term.

Prerequisite: COMP 150, LIB 150.

Engl 268W READING TEXTS/WRITING TEXTS (4-0) 4

This course, which includes a brief introduction to the Western rhetorical tradition, as well as an exploration of various forms of textual and critical analysis, introduces students to ways in which reading and writing are used in literary and media studies. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, or consent of instructor.

Engl 270A1 HISTORY OF THE FILM (2-2) 4

An overview of the history of international and Hollywood narrative film. Students will be expected to attend scheduled film screenings each week. Fall, winter and summer term.

Engl 273A1 INTRODUCTION TO LITERARY TYPES (2-0) 2

This course will focus on a type or genre of literature, such as poetry, fiction, the short story or the essay. Fall and winter terms.

Engl 280A1 LITERATURE OF THE SOUTHWEST (4-0) 4

The American Southwest seen through fiction, poetry, biography, and other works by European Americans, Native Americans and Chicanos/as. Fall and winter terms.

Engl 304 VIDEO PRODUCTION (4-0) 4

A practical course that introduces students to the technical aspects, conventions and aesthetics of small format video field production and editing. Fall and winter terms.

Prerequisite: Consent of instructor.

Note: Engl 304 has an extra fee of \$50.

Engl 306 RADIO BROADCASTING (4-0) 4

An introduction to radio broadcasting through its history, economics, industry, programming and legal issues, with considerable emphasis on production. Fall and winter terms.

Prerequisite: Consent of instructor.

Note: Engl 306 has an extra fee of \$50.

Engl 315 MEDIA WRITING: TOPICS (4-0) 4

An advanced writing course that builds on the writing students have been exposed to in News Media Writing and may have been exposed to in Video Production, Radio Broadcasting and the practica. Topics will include, but are not restricted to: magazine writing, long-form journalism, editorial writing, and screenwriting. Fall and winter terms.

Prerequisite: Any Group W course or consent of instructor.

Engl 317 MASS COMMUNICATIONS: TOPICS (4-0) 4

An advanced-level course that addresses in depth a topic essential for communication students as they move into industry or academe. Topics include, but are not limited to: representations in the media and media law and ethics. Fall and winter terms.

Prerequisite: Any Group W course or consent of instructor.

Engl 320A1 THE NOVEL (4-0) 4

An in-depth study of selected European, British and American novels. Fall and winter terms.

Prerequisite: Comp 150 and LIB 150.

Engl 330A1 CONTINENTAL LITERATURE: TOPICS (4-0) 4

An in-depth study of selected Biblical, classical or European texts. Fall term, alternate years.

Prerequisites: Engl 230A1 or Engl 240A1.

Engl 336 BRITISH RENAISSANCE LITERATURE: TOPICS (4-0) 4

An in-depth study of selected British writings from about 1500 to 1660. The specific course content will vary. Students may repeat the course for credit, provided the subject is different on each occasion. Fall term, alternate years.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 337 18TH CENTURY BRITISH LITERATURE: TOPICS (4-0) 4

An in-depth study of selected British writings from the "long" 18th century (about 1660 to 1798). The specific course content will vary. Students may repeat the course for credit, provided the subject is different on each occasion. Winter term, alternate years.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 340 19TH CENTURY BRITISH LITERATURE: TOPICS (4-0) 4

An in-depth study of British literature from the Romantic and/or Victorian periods. Students may repeat the course for credit, provided the subject is different on each occasion. Fall and winter terms.

Prerequisites: Engl 230A1 or Engl 240A1.

Engl 345 AMERICAN LITERATURE: TOPICS I (4-0) 4

An in-depth study of selected American writings from the beginnings to about 1865. The specific course content will vary. Students may repeat the course for credit, provided that the subject is different on each occasion. Fall term.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 346 AMERICAN LITERATURE: TOPICS II (4-0) 4

An in-depth study of selected American writings from 1865 to the present. The specific course content will vary. Students may repeat the course for credit, provided that the subject is different on each occasion. Winter term.

Prerequisite: Engl 230A1 or Engl 240A1.

Engl 350 PRACTICUM -- NEWSPAPER 1-6

Directed experience for upper-division students in newspaper work on the *Independent* or other newspapers. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 350 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 250, and consent of instructor.

Engl 351 PRACTICUM -- RADIO 1-6

Directed experience for upper-division students in radio broadcasting on KDUR. Credit is based on the ratio of 30 hours of work for each credit earned. Students will be directed by the professor who will supervise and evaluate their work. Engl 351 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 251, and consent of instructor.

Engl 352 PRACTICUM -- TV 1-4

Directed experience for upper-division students producing, shooting, scripting and editing. Credit is based on the ratio of 30 hours of work

for each credit earned. Students will be directed by a professor who will assign, monitor and evaluate their work. Engl 352 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, Engl 215, Engl 252, Engl 304, and consent of instructor.

NOTE: Engl 352 has an extra fee of \$50.

Engl 358 PRACTICUM-SERVICE LEARNING 1-6

Directed experience for upper-division students in service learning with placements in local schools or community organizations. Credit is based on the ratio of 30 hours of service for each credit earned. Students will be directed by the professor who will assign, monitor and evaluate their work. Engl 358 is repeatable for a maximum of 12 credits. Fall and winter terms.

Prerequisites: Engl 215, Engl 258 and consent of instructor.

Engl 363 ADVANCED COMPOSITION (4-0) 4

An advanced writing course in which students can produce writing in particular genres -- non-fiction essays, argument, literary journalism, etc. Fall and winter terms.

Prerequisite: Comp 150, LIB 150 and any Group W course.

Engl 366 TEACHING WRITING (4-0) 4

In this course, students will study writing from a theoretical/disciplinary perspective. We will examine the history of writing instruction, differing philosophies currently at play, the research and assumptions from whence these philosophies derive, and practical classroom strategies resulting from these philosophies. Students will be required to write, both formally and informally, for a variety of purposes in this course. Winter term.

Prerequisites: Comp 150, LIB 150 and Engl 268W.

Engl 378A1 YOUNG ADULT LITERATURE (4-0) 4

This course is a study of all types of literature for adolescents and young adults. Evaluative criteria for book selection will be considered.

Emphasis on minority and ethnic literature. Fall term.

Engl 380E NATIVE AMERICAN LITERATURE: TOPICS (4-0) 4

A study of traditional and contemporary Native American expression as seen through oration, tales and legends, chants and songs, poetry, drama, autobiography and the novel. Fall and winter terms.

Prerequisite: Comp 150, LIB 150

Engl 416A1 MEDIA THEORY AND CRITICISM (4-0) 4

An examination of major contemporary theories in mass media research, supplemented by an overview of the history of thought in the discipline. The course includes analysis of primary texts. Fall and winter terms.

Engl 417 MEDIA THEORY: TOPICS (4-0) 4

An advanced-level research course that develops and expands upon a selected theory or set of theories on mass communications. The course uses the topic as a vehicle for student research projects. Fall term.

Prerequisite: Any Group W course.

Engl 420E WORLD LITERARY TRADITIONS: TOPICS (4-0) 4

An in-depth study of a specific non-Western tradition in literature. Course content will vary. Students may repeat the course for credit provided the subject matter is different on each occasion. Winter term, alternate years.

Engl 423 GENRES: TOPICS (4-0) 4

An in-depth study of a specific genre of literature. Course content will vary. Students may repeat the course for credit, provided the subject matter is different on each occasion. On demand.

Engl 430 MEDIEVAL LITERATURE AND CHAUCER: TOPICS (4-0) 4

An in-depth study of selected British writings from the beginnings to about 1500. The specific course content will vary. Students may repeat the course for credit, provided the subject matter is different on each

occasion. Winter term, alternate years.

Prerequisite: Engl 230A1 or consent of instructor.

Engl 432A1 SHAKESPEARE (4-0) 4

A study of Shakespearean drama. Fall and winter terms.

Prerequisite: Engl 230A1 or consent of instructor.

Engl 450 INTERNSHIP IN NEWSPAPER 1-6

Directed experience working on newspapers, performing professional duties and responsibilities. Specific requirements will vary but include, as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving written goals. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 451 INTERNSHIP IN RADIO 1-6

Directed experience working at radio stations, performing professional duties and responsibilities. Specific requirements will vary but include, as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving written goals. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 452 INTERNSHIP IN TELEVISION 1-6

Directed experience working in television, performing professional duties and responsibilities. Specific requirements will vary but include,

as a minimum, keeping a detailed journal and writing a 15-page paper analyzing the organization and what the student learned. A minimum of 100 hours of directed experience must be documented, but interns usually work to complete tasks. Credit and evaluation are normally based on achieving the goals in a written contract signed by the student, the supervisor, and the practicum instructor, on the journal and on the analytic paper. On demand.

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, 80 hours of work toward graduation, and completed internship arrangements.

Engl 453 INTERNSHIP IN COMMUNICATIONS 1-6

Directed experience in media writing/production which does not directly involve newspaper, radio or television. The internship will be described in ways appropriate to the work, such as "Public Relations," "World Wide Web," "Advertising," "Layout and Design," "Magazine," "Newsletter," "Video Production." Credit and evaluation are based on achieving the goals in a written contract signed by the student, the supervisor, and the practicum instructor, on a journal documenting at least 100 hours of directed experience, and on a 15-page analytic paper. On demand

Prerequisites: Consent of instructor. Strongly recommended: substantial communications coursework, a competitive portfolio, 80 hours of work toward graduation, and completed internship arrangements.

Engl 460 HISTORICAL ANALYSIS OF LANGUAGE (1-0) 1

Additional study in language history. Must be taken concurrently with Engl 461A1. Winter term.

Engl 461A1 HISTORY OF THE ENGLISH LANGUAGE (3-0) 3

A study of the development of English from Indo-European sources to the present. Winter term.

Engl 462A1 LINGUISTICS (3-0) 3

A scientific analysis of language, examining the nature and development of the unique human facility with language, a facility which depends on employing and combining a limited number of

sounds in predictable ways to create a limitless number of words and sentences. While the focus of the course will be on English, those features and principles shared by all languages will be emphasized. Fall and winter terms.

Engl 463 LINGUISTIC ANALYSIS (1-0) 1

A course in sentence analysis, applying principles learned in English Linguistics. Must be taken concurrently with Engl 462A1. Fall and winter terms.

Engl 464A1 CREATIVE WRITING (4-0) 4

An advanced writing course with concentrations in poetry and short fiction. Students may repeat the course for credit, but may apply it only once toward the major. Fall and winter terms.

Prerequisites: Comp 150, LIB 150, and consent of instructor.

Engl 477 20TH CENTURY LITERATURE: TOPICS (4-0) 4

An analysis of selected European, British or American writings from the 20th century. Course content may vary. Students may repeat the course for credit, provided the subject matter is different on each occasion. Winter term.

Engl 483 MATERIALS OF INSTRUCTION IN TEACHING HIGH SCHOOL ENGLISH (4-0) 4

Introduces and expands on materials for teaching literature, language and composition in the secondary schools. Includes principles for the selection of literature for high school students and the relationship of language and composition to the total secondary program. Teaching techniques are a point of emphasis. To be taken in the fall trimester, prior to student teaching.

Prerequisite: Consent of instructor or completion of 90 credits.

Engl 496 SENIOR SEMINAR (4-0) 4

Advanced study and research in selected topics. Fall and winter terms.

Prerequisites: At least two overview courses and at least two topics courses and any Group W course, or consent of instructor.

Engl 499 INDEPENDENT STUDY 1-3

Individual research is conducted under the supervision of a faculty member. On demand.

Prerequisite: Consent of instructor.

Environmental Policy Minor

(See "[Environmental Policy Minor](#)" in the School of Arts and Sciences section of this catalog.)

[Return to List](#)

Exercise Science

ES 100 FITNESS AND WELLNESS (1-0) 1

A 7 1/2 week course that examines the basic physiological principles of exercise and nutrition. Students will acquire strategies for the development of a personal fitness plan, effective weight management, stress management, and how to make healthy lifestyle choices. Fall and winter terms.

ES 130 MOTOR SKILLS FOR PROFESSIONALS

(Softball/Volleyball) (0-2) 1

This course is designed to improve motor skills in the team sports of volleyball and softball. Rules and strategies will be included. Fall and winter terms.

ES 131 MOTOR SKILLS FOR PROFESSIONALS

(Soccer/Basketball) (0-2) 1

A course in motor skill development in the team activities of soccer and basketball. Fall and winter terms.

ES 132 MOTOR SKILLS FOR PROFESSIONALS

(Tumbling and Stunts/Fundamental Motor Skills) (0-2) 1

A course designed to improve fundamental motor skills and to develop tumbling skills. Fall and winter terms.

ES 133 MOTOR SKILLS FOR PROFESSIONALS

(Badminton/Tennis) (0-2) 1

A course for skill development in the racquet games of badminton and tennis. Fall and winter terms.

ES 134 MOTOR SKILLS FOR PROFESSIONALS

(Dance/Aquatics) (0-2) 1

A course for skill development in the physical activities of dance and aquatics. Fall and winter terms.

ES 135 MOTOR SKILLS FOR PROFESSIONALS

(Fitness/Outdoor Leisure Pursuits) (0-2) 1

An introduction to and development of skills related to outdoor leisure and fitness activities. Fall and winter terms.

ES 150 SOCIOCULTURAL FOUNDATIONS OF HUMAN MOVEMENT (3-0) 3

An introductory study of the historical, cultural, sociological and philosophical aspects of exercise, sport and human movement. Fall and winter terms.

ES 165 COMMUNITY FIRST AID AND SAFETY (2-0) 2

Study and practice of American Red Cross first aid/CPR procedures in handling common injuries, accidents and medical emergencies. Fall and winter terms.

ES 185 INTRODUCTION TO COACHING - (ASEP) (2-0) 2

This introductory course is the American Sport Education Program's Sport Science Coaching Course. It covers the areas of Coaching

Philosophy, Sport Psychology, Sport Pedagogy, Sport Physiology, Sport Management and Sport Specific Planning. The course covers what is important for a coach to know and presents the material in a manner that is of practical value to a coach. A series of videotapes helps create an atmosphere of discussion which gives students practical ways of handling coach/player relationships and situations. The student who passes the ASEP exam will receive ASEP certification which is rapidly becoming the required coaching certification. Fall and winter terms.

ES 186 PHYSICAL CONDITIONING (0-2) 1

This course introduces the student to method and techniques in the area of Physical Conditioning. It will emphasize the major areas: power development, speed enhancement and aerobic/anaerobic conditioning. Emphasis will be placed on the student's ability to instruct in these areas. Fall and winter terms.

ES 220 CLINICAL IN BASIC ATHLETIC TRAINING (0-2) 1

This course is designed to provide the student with an introduction to the clinical aspects of the athletic training profession. The student will observe athletic training in the college, high school and private clinical settings. Students will be instructed in common taping applications and training room management. (Includes a minimum of 50 hour clinical component.) Fall and winter terms.

Prerequisites: ES 224 and ES 165 or concurrent enrollment in both courses.

ES 224 BASIC PRINCIPLES OF ATHLETIC TRAINING (3-0) 3

An introduction to the field of athletic training. Professional opportunities in this field are discussed. Students will develop a basic understanding of athletic injuries as they relate to prevention, nature and causes. Fall and winter terms

Prerequisite: Bio 121B.

ES 225 TECHNIQUES OF COACHING FOOTBALL (2-0) 2

Classroom instruction directed toward the various phases of American football; history, defensive theory, strategy, personnel, offensive theory, the kicking game, practice organization, relationship and influence of teachers, parents, booster clubs and news media. Winter term.

ES 226 TECHNIQUES OF COACHING VOLLEYBALL (2-0) 2

The study of history, strategies, rules, methods, and organization involved in coaching volleyball. Both theoretical and practical applications will be developed. Winter term.

ES 227 TECHNIQUES OF COACHING BASKETBALL (2-0) 2

The analysis of the game of basketball in theory and application with special emphasis upon teaching and coaching the game. Development of offense, defense, and special situations for both prospective coaches and enthusiasts. Fall term.

ES 230 TECHNIQUES OF COACHING SOFTBALL (2-0) 2

Study of principles, methods, techniques and strategies involved in coaching of softball. Offered on demand.

ES 231 TECHNIQUES OF COACHING SOCCER (2-0) 2

The study of principles, methods, techniques and strategies involved in coaching soccer. Offered on demand.

ES 233 OFFICIATING OF FOOTBALL (1-0) 1

Designed to provide individuals with the rules, skills and mechanics of officiating. Includes rules of the National Federation of High Schools, National Association of Intercollegiate Athletics and National Collegiate Athletic Association. Fall term.

ES 234 OFFICIATING OF VOLLEYBALL (1-0) 1

Instruction in the rules and practice of the mechanics and skills of officiating volleyball at the high school and college levels. Fall term, alternate years.

ES 235 OFFICIATING OF BASKETBALL (1-0) 1

Designed to teach the student the rules, skills and mechanics of officiating basketball. Winter term.

ES 237 OFFICIATING OF SOFTBALL (1-0) 1

Designed to provide students with the rules, skills and mechanics for umpiring in softball. Offered on demand.

ES 238 OFFICIATING OF SOCCER (1-0)1

Designed to provide students with the rules, skills and mechanics for officiating soccer. Offered on demand.

ES 240 CLINICAL IN MANUAL MUSCLE TESTING (0-2) 1

This course will provide the student with the necessary vocabulary and professional writing skills necessary to document and comprehend a complete muscular evaluation. The student will learn and demonstrate actual muscle testing including origins, insertions, actions and specific tests. (Includes a 200 hour minimum clinical component.)

Prerequisites: ES 224, ES 283, or concurrent enrollment, and consent of instructor.

ES 243 PERSONAL HEALTH (3-0) 3

This course is a study of personal health and wellness. Every effort will be made to create a practical approach toward developing awareness, education, and growth that will allow for enhanced personal wellness. The foundation of this course is based on self-responsibility as it applies to the various dimensions of health that integrate body, mind, and spirit. Fall and winter terms.

ES 260 LIFEGUARD TRAINING (AMERICAN RED CROSS) (1-2) 2

Students will learn American Red Cross professional lifeguard skills and gain knowledge needed to prevent and respond to aquatic emergencies.

Prerequisite: Students must successfully pass a swimming skills test in order to remain enrolled in the course.

ES 261 WATER SAFETY INSTRUCTOR (1-2) 2

Water safety instructors course designed to train and certify (Red Cross) teachers of swimming. Fall term.

ES 262 LIFEGUARD TRAINING INSTRUCTOR (1-2) 2

This course will train and certify instructors to teach American Red Cross Lifeguard Training, CPR for the professional rescuer, community water safety, lifeguarding instructor aid and other water safety courses.

Prerequisite: ES 260.

ES 283 EVALUATION OF ATHLETIC INJURIES (3-0) 3

This course will present the student with the techniques required to provide a thorough evaluation of athletic injuries. A standard model for evaluation will be presented. The cognitive aspects of evaluation will be discussed and the psychomotor tasks practiced. Winter term.

Prerequisite: ES 224, and BIO 121 or concurrent enrollment.

ES 300 SPORTS IN FILM (2-0) 2

This course will take a conceptual and sociological look at sport through its films both contemporary and classic. Viewings, discussions, debates, critical reviews and writings will be used to explore the themes, issues and methods used in selected films and the interrelationships of sport, human movement, society and film.

ES 301W CURRENT ISSUES IN SPORT (3-0) 3

This course will address critical issues in writing in exercise science using issues in sport as a basis for writing, reading, and discussion. Special emphasis is placed on developing skills necessary for becoming successful writers in the field. Instruction and evaluation focuses on the writing of research papers, poster presentations, journal article reviews, laboratory reports, essays and oral presentations.

Prerequisites: Comp 150, LIB 150, junior standing.

ES 302W ISSUES IN HEALTH AND WELL-BEING (3-0) 3

This course will address issues in writing in exercise science using the topics of Health and Well-Being as a basis for writing, reading and discussion. Students will explore and critically analyze these topics and share their perspectives through discourse mediums used by professionals in the fields of Health and Exercise Science, such as research papers, poster presentations, journal article reviews and proposals, computer/video presentations and oral presentations.

Prerequisites: Comp 150, LIB 150, junior standing.

ES 312 ADMINISTRATION OF INTRAMURAL PROGRAMS (1-2) 2

The course will give the student information in all pertinent areas of intramural administration. In addition, each student will have "hands on" experience working in the Fort Lewis College Intramural and Recreation Program. Offered on demand.

ES 320 CLINICAL IN MANUAL THERAPY (0-2) 1

This course will provide the athletic training student with the skills necessary to adequately perform therapeutic massage, joint mobilization and manipulation and therapeutic exercise. The physiologic effects of massage, connective tissue massage and various techniques of application will be discussed and practiced. The theory and principles of joint mobilization and manipulation will also be discussed and practiced. (Includes a 200 hour minimum clinical component.) Fall term.

Prerequisite: ES 224 and consent of instructor.

ES 330 ANATOMICAL KINESIOLOGY (3-0) 3

An in-depth study of the basic body movements; osteology, applied myology, spatial relations of muscles to joints, aggregate muscle action, kinesiology constructs of summation of internal forces, aerodynamics and hydrodynamics, techniques for cinematographic and noncinematographic analysis of sport skills. Fall and winter terms.

Prerequisite: Bio 121B.

ES 332 BIOMECHANICAL ANALYSIS AND APPLICATION (2-0) 2

The study of methods, mechanics and analysis of movement as applied to the structure and function of the human organism. Fall and winter terms.

Prerequisite: ES 330.

ES 340 MOTOR LEARNING AND CONTROL (3-0) 3

Concepts involved in learning motor skills, the individual variables which affect this learning, and the practice and techniques for improving motor performance. Fall and winter terms.

Prerequisite: Psych 157D and junior standing.

ES 350 MEASUREMENT AND EVALUATION (3-0) 3

Basic statistical procedures necessary to analyze and interpret data collected from tests in exercise science. The selection and administration of testing instruments that measure objectives from the tee domains of human performance. Fall and winter terms.

Prerequisite: Junior standing and consent of instructor.

ES 353 NUTRITION FOR FITNESS AND SPORT (2-0) 2

A study of the principles of nutrition as a science, with special emphasis on the importance of nutritional decisions for the physically active individual. Food choices, energy sources, nutritional analysis, body weight and composition, weight maintenance and optimal nutrition for physical performance are topics to be discussed. Fall and winter terms.

Prerequisite: Bio 121B or consent of instructor.

ES 354 ADAPTED EXERCISE (2-2) 3

Course includes an overview of the legislation impacting adapted exercise programs; exceptional conditions and disabilities affecting individuals in exercise programs, assessment tests and diagnostic instruments. It includes practical experience in teaching exceptional students in diverse exercise settings, and arranging and prescribing a program to meet the needs of students with specific disabilities. Fall and winter terms.

ES 360 EXERCISE PHYSIOLOGY (4-0) 4

This course deals with the physiological principles underlying specific aspects of physical fitness and human exercise performance. Emphasis is placed on the nature of the metabolic, muscular, cardiovascular and pulmonary responses to various forms of short- and long-term workouts as well as specific adaptations to exercise training. Where possible, the potential health-related aspects of exercise training will be explored. Fall and winter terms.

Prerequisite: Bio 121B.

**ES 363 COMPUTER APPLICATIONS IN EXERCISE SCIENCE
(2-2) 3**

This course is designed to provide students with a general introduction to computer use in Exercise Science including hands-on experience. Fall and winter terms.

Prerequisite: Exercise Science major.

**ES 370 METHODS OF TEACHING PHYSICAL EDUCATION IN
THE ELEMENTARY SCHOOLS (3-0) 3**

Emphasis will be upon values, principles, objectives, growth and development characteristics, curriculum construction, and general methods of organizing and teaching physical education in grades K-6. Fall and winter terms.

Prerequisite: Ed 307, Ed 308 or Ed 309 and junior standing.

ES 375 PSYCHOLOGY OF SPORT (2-0) 2

A study of various psychological phenomena that influence sport and exercise performance, *i.e.*, personality traits, anxiety, stress, motivation, aggression, group dynamics (cohesion). Fall and winter term.

Prerequisite: Psych 157D.

**ES 380 METHODS OF TEACHING PHYSICAL EDUCATION IN
SECONDARY SCHOOLS (2-0) 2**

A teacher candidate course designed to familiarize the student with methods and materials for successful teaching at the junior high and senior high levels. Emphasis is upon planning objectives, growth and development characteristics, curriculum construction, organization, and today's issues and current trends. Fall and winter terms.

Prerequisite: Ed 309 and junior standing.

ES 385 THERAPEUTIC MODALITIES (2-0) 2

The theoretical basis of therapeutic modalities will be explored as well

as the clinical application of those modalities in the treatment of athletic injuries. Winter term, alternate years.

Prerequisite: ES 283.

ES 387 RECONDITIONING OF ATHLETIC INJURIES (3-0) 3

Students will examine the theory and physiological basis of rehabilitating athletic injuries. Practical experience in a clinical-type setting will be used to help students develop skills of exercise testing, manual testing, PNF, goniometry and program planning. Winter term, alternate years.

Prerequisite: ES 224, Bio 121B and ES 324.

ES 420 CAPSTONE CLINICAL IN ATHLETIC TRAINING (0-2) 1

This course will function to prepare the student for the National Athletic Trainers' Board of Certification Exam by "bringing it all together." Students will be given practice in all aspects of the Certification Examination. (Includes a 200 hour minimum clinical component.) Winter term.

Prerequisite: Consent of instructor.

ES 424 ADVANCED ATHLETIC TRAINING ((3-0) 3

This course is designed to address a variety of topics as they relate specifically to athletic training. Topics covered will include, but not limited to, Psychology of Injury, Organization and Administration of Athletic Training programs, Pharmacology, Drug Testing, Counseling the Injured Athlete, Disease and Illness and its Effects on Athletic Performance. Fall term.

Prerequisite: Senior standing.

ES 425 CLINICAL IN MEDICAL SCIENCE (0-2) 1

This course will provide the athletic training student with the skills and clinical proficiencies necessary to recognize the signs, symptoms and predisposing conditions associated with disease and the utilization of pharmaceutical products. The course focuses on identifying and documenting medications commonly prescribed to athletes and others

involved in physical activity. The course also provides the students practice in identification of common medical conditions.

ES 450 INTERNSHIP IN FITNESS/LEISURE 3

Directed experiences performing professional duties in a fitness, health promotion or leisure organization setting. Specific requirements will depend upon the supervising college faculty member. The intern's performance will be evaluated by both the organization's supervisor and the assigned college faculty member. Fall and winter terms.

Prerequisites: Senior standing and declared Fitness/Leisure Concentration. Must have approval of Department Chair.

ES 480 ADMINISTRATION OF PROGRAMS IN EXERCISE SCIENCE (3-0) 3

Relationships, procedures and problem-solving approaches in effective organization and administration of exercise, fitness and sport programs. Budget, use of facilities and equipment, legal responsibilities, public relations, policy development and supervision are analyzed. Fall and winter terms.

Prerequisite: Junior standing.

ES 496 SENIOR SEMINAR AND RESEARCH IN EXERCISE SCIENCE (2-0) 2

Discussions and inquiries dealing with contemporary issues, trends and problems in exercise science. An individual student research project is required. Fall and winter terms.

Prerequisite: ES 350 and senior standing.

ES 499 INDEPENDENT STUDY 1-3

Opportunity to investigate a significant problem through laboratory or library research under the supervision of a faculty member. Fall and winter terms.

Prerequisites: Senior standing and approval of department chair and instructor after presentation of a problem outline.

[Return to List](#)

Forestry

For 218 FUNDAMENTALS OF ECOLOGY (3-3) 4

A study of the fundamental relationships among organisms and their environments. One all-day Saturday field trip is required. Same as Bio 220. Fall and winter terms.

Prerequisites: Bio 206 or 207, Math 121B, and Math 201B or Psych 241B.

[Return to List](#)

French

ML 147 ELEMENTARY FRENCH I (4-0) 4

A course in grammar, prose composition, reading and conversation.

ML 148A1 ELEMENTARY FRENCH II (4-0) 4

Further study of French with emphasis on reading, composition and conversation.

Prerequisite: ML 147 or consent of instructor.

ML 247A1 INTERMEDIATE FRENCH I (3-0) 3

A course in second-year French with emphasis on grammar review, reading, writing and conversation.

Prerequisite: ML 148 or consent of instructor.

ML 248A1 INTERMEDIATE FRENCH II (3-0) 3

Continuation of ML 247.

Prerequisite: ML 247 or consent of instructor.

ML 301A1 FRENCH COMPOSITION AND SYNTAX (3-0) 3

Emphasis on advanced reading, grammar and composition.

Prerequisite: ML 248 or consent of instructor.

ML 303A1 FRENCH CONVERSATION (3-0) 3

Emphasis on speaking everyday French to increase students' abilities in maintaining ordinary conversations concerning current events and French Culture.

Prerequisite: ML 248 or consent of instructor.

ML 305A1 SURVEY OF FRENCH LITERATURE (3-0) 3

An historical and literary survey of the principal French works of literature from the Middle Ages to the 20th century.

Prerequisite: ML 248 or consent of instructor.

ML 308A1 TOPICS IN FRENCH LITERATURE (3-0) 3

Topics will vary; the course may be repeated for a different topic. Offered on demand.

Prerequisite: ML 248 or consent of instructor.

ML 309A1 BUSINESS FRENCH (3-0) 3

The goal of this course is to familiarize students with the forms and vocabulary of the French business world such as: economics, accounting, manufacturing, tourism, business correspondence, reports, marketing and transportation.

Prerequisite: ML 301 or consent of instructor.

ML 405A1 SEMINAR IN FRENCH (3-0) 3

Advanced reading and research in selected areas of French Studies.

Prerequisite: ML 301 or consent of instructor.

[Return to List](#)

GnSc 251B SURVEY OF CHEMISTRY AND BIOLOGY (3-2) 4

This course surveys the great ideas of modern biology and modern chemistry. The historical development of science is discussed along with the importance of the ideas in the context of our modern technological society. Modern topics at the interface of biology and chemistry are discussed with particular emphasis on biomedical issues. This course is especially useful for non-science students intending to seek teaching certification, or who wish to fulfill their science requirements with a moderately rigorous but brief survey of these two sciences. It would also be a fundamental introduction to biology and chemistry for students considering biomedical studies but who have insufficient preparation in basic biology and basic chemistry.

Prerequisite: Comp 150 and LIB 150.

[Return to List](#)

General Studies

General Studies courses are focused on topics that are from the perspective of more than one discipline. These courses do not fit an academic area represented by a single department or program.

GENERAL STUDIES 101 and 102**Human Heritage I and II (4-0) 4**

This two-term course is a study of Western, Chinese and Native American intellectual traditions. The course is designed to help students understand how our cultural traditions influence our ways of looking at the world and how studying cultures other than our own expands and challenges our frame of reference. The course emphasizes intellectual, artistic, political, scientific, religious, and economic aspects of the cultures from selected periods in history. Human Heritage II is a continuation of Human Heritage I. Students must complete both courses to fulfill designated distribution requirements (A1, C, and E). This course transfers to all Colorado colleges and universities in fulfillment of general education requirements.

GENERAL STUDIES 151 (14-11) 16**INTEGRATED LEARNING PROGRAM**

This course integrates the humanities, the social sciences, and the sciences around broad topics of academic interest. The particular categories of general education courses that this course satisfies are given below. Particular topics may differ each year.

Group A: Language and the Arts

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human expression through literature and language with special emphasis on developing aesthetic sensitivity and creativity. The works of literature considered will vary each year.

Group B: Quantitative and Natural Sciences

The Integrated Learning Program awards the equivalent of one course with lab which provides an understanding of the physical world and some of the formal, theoretical and empirical methods by which it is studied.

Group C: Foundations of Culture

The Integrated Learning Program awards the equivalent of one course which provides an understanding of fundamental values of world views through the study of human society's past, its formative ideas, and its alternative cultural expressions.

Group D: Social Structure and Behavior

The Integrated Learning Program awards the equivalent of one course which provides an understanding of human beings, both as individuals and as socially, politically and economically related groups.

GENERAL STUDIES 375 EUROPEAN STUDIES ON EXCHANGE (3-18)

This course provides appropriate credit for studies completed in one of FLC exchange programs with European Postsecondary schools. It may be repeated once for credit. The exact number of credit hours will be determined by the appropriate Dean after review of the study program completed.

GENERAL STUDIES 495 Environmental Colloquium (4-0) 4

This course which is a capstone course for the Environmental Policy

Minor, involves conducting and reporting on an integrative project in weekly meetings involving several faculty members from across the academic disciplines. The project can involve research, assessment or analysis of ongoing programs, policy or proposals for action. This student-conducted project provides a Service Learning opportunity for students.

Prerequisite: Junior standing, Psych 241B or Math 201B or BA 253B and consent of instructor.

GENERAL STUDIES 496

Interdisciplinary Senior Seminar (2-4)

An interdisciplinary seminar for graduating seniors, this course provides a capstone experience of broad intellectual inquiry, including a focus on critical reading and thinking, problem solving, and the written expressions of ideas.

Prerequisite: Senior standing.

[Return to List](#)

Geography

Geog 250 CARTOGRAPHY: THE SCIENCE AND ART OF MAPMAKING (3-3) 4

An introduction to the principles of cartography including map use, cartographic communication, geographic visualization, and map production. Laboratory exercises will stress map construction and interpretation using PC-based computer mapping software.

Prerequisite: Sophomore standing.

Geog 271D WORLD GEOGRAPHY (3-0) 3

This course will introduce the student to the physical, cultural, political, psychological and resource factors of geography and how they affect the various peoples of the world. Fall, winter and first summer session.

Geog 300 INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS (2-2) 3

An introduction to the basic concepts, technologies, and applications of Geographic Information Systems (GIS). Course and lab focus on vector-based GIS and its applications in the physical sciences, social sciences, and business.

Prerequisites: Geog 250 or consent of instructor.

Geog 320B NATURAL REGIONS OF NORTH AMERICA (3-0) 3

A survey of the origin and nature of the landscapes of North America. Emphasis is placed upon the relationships between natural resources, topography, geology, climate and soils. Map work is required.

Prerequisite: Geol 113B or 110B.

Geog 400 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (2-6) 4

Advanced study of concepts and applications of Geographic Information Systems (GIS). Course and lab focus on raster-based GIS and its applications in the physical sciences, social sciences, and business. Two weekly lab sessions include both independent work by the student and work on GIS exercises introduced by the instructor.

Prerequisite: Geog 300 or consent of instructor.

Geog 495 GIS COLLOQUIUM (2-2) 3

A colloquium and seminar for students completing the GIS minor. Emphasis is on conducting and reporting on a GIS analysis in the student's area of expertise.

Prerequisite: Geog 400.

Geology

Geol 110B EARTH SCIENCE (3-0) 3

A review of the earth sciences, including geology, oceanography, meteorology and astronomy. Course intended for non-science majors. Fall and winter terms.

Geol 111B ANCIENT LIFE (3-0) 3

An examination of Earth's ancient life, its origin, the record in the rocks, and the processes and mechanisms that have transformed it through time. Winter term.

Geol 113B PHYSICAL GEOLOGY (3-3) 4

The study of geologic processes and materials within the Earth's interior and on the Earth's surface. Laboratory work on minerals, rocks and maps. Field trips. Fall, winter and summer terms.

Geol 114B HISTORICAL GEOLOGY (3-3) 4

The geologic history and development of life on Earth. Laboratory work on rocks, fossils and maps. Field trips. Winter term.

Prerequisite: Geol 113B.

Geol 120 GEOLOGIC FIELD EXCURSIONS (0-3) 1

This is a field lab. We will visit and discuss various geologic points of interest in the Durango and Four Corners region. There will be at least one weekend field trip. There is a field trip fee. Fall and winter terms.

Prerequisite: Geol 110B or Geol 113B or Geol 150B, or concurrent enrollment in one of these courses.

Geol 150B GEOLOGY OF THE SOUTHWEST (3-0) 3

A survey of the historical, economic and structural geology and geomorphology of the Southern Rockies, Colorado Plateau, and the Basin and Range Provinces. Emphasis is on classic geologic areas, national parks, natural resource development and problems associated with human activity in this delicate environment. Fall and winter terms.

Geol 180B INTRODUCTION TO OCEANOGRAPHY (3-0) 3

All of Earth's residents, even those of us in landlocked Colorado, are profoundly influenced by the world's oceans. Using a multidisciplinary science approach, this course looks at the physical aspects of oceans, their aquatic life and environmental pressures on the oceans affecting us all. Fall term.

Geol 202 GEOLOGIC METHODS (1-3) 2

An introduction to basic field and computer techniques used in geology. Fall term and first summer session.

Prerequisite: Geol 113B.

Geol 207 MINERALOGY (2-3) 3

The elements of crystallography and the classification and identification of minerals. Fall term.

Prerequisites: Geol 113B and completion of, or concurrent enrollment, in Chem 150B.

Geol 208 OPTICAL MINERALOGY (2-6) 4

Procedures for identification of minerals in thin section, with emphasis on the optical determination of rock-forming minerals. Winter term.

Prerequisite: Geol 207.

Geol 210 PETROLOGY (2-3) 3

The megascopic study of igneous, sedimentary and metamorphic rocks with emphasis on the physical and chemical conditions governing the origins, occurrences and associations of various rock types. Winter term.

Prerequisite: Geol 207.

Geol 323 GEOMORPHOLOGY (3-3) 4

The classification, description, nature, origin and development of present landforms and their relationships to underlying structures. Field trips. Fall term.

Prerequisite: Geol 202.

Geol 325 INTRODUCTION TO REMOTE SENSING (2-3) 3

Introduction to the principles of remote sensing. Includes the study of the electromagnetic spectrum and the geologic interpretation of visible, infrared and microwave imagery from airborne as well as spaceborne

platforms. Winter term. Alternates with Geol 430.

Prerequisites: Geol 113B, Math 110B, and junior standing.

Geol 332 PLATE TECTONICS (3-0) 3

An introduction to crustal plates, their boundaries and their interactions given in terms of classic geological settings throughout the world. Fall term.

Prerequisites: Geol 113B, Math 121B.

Geol 333 INTRODUCTORY PALEONTOLOGY (3-3) 4

The systematic study of fossils, primarily invertebrate fossils, used in the identification and correlation of geologic formations. Winter term, alternate years.

Prerequisite: Geol 114B or consent of instructor.

Geol 337 STRUCTURAL GEOLOGY (3-3) 4

The geometric, kinematic and dynamic analysis of structural features in the Earth's crust. Techniques in field mapping will be emphasized throughout the course. Fall term.

Prerequisites: Math 121B, Geol 113B and 202.

Geol 361 STRATIGRAPHY AND SEDIMENTATION (2-3) 3

Sediments and sedimentary rocks - their characteristics and classification; sedimentary processes, tectonics and sedimentation. Stratigraphy - its history, stratigraphic nomenclature, facies relationships and correlation. Fall term.

Prerequisites: Geol 207 and 210.

Geol 363 SEDIMENTARY PETROLOGY (3-2) 4

The origin, occurrence and classification of sedimentary rocks. Winter term. Alternates with Geol 364.

Prerequisites: Geol 208, 210 and 361.

Geol 364 IGNEOUS AND METAMORPHIC PETROLOGY (3-3) 4

The origin, occurrence, classification and petrography of igneous and metamorphic rocks. Winter term. Alternates with Geol 363.

Prerequisites: Geol 208 and 210.

Geol 371 INTRODUCTION TO GEOPHYSICS (3-3) 4

The fundamentals of geophysics, particularly gravitational, magnetic and seismic methods. Fall term. Alternates with Geol 332.

Prerequisites: Geol 113B, Math 121B.

Geol 380W TECHNICAL WRITING IN GEOLOGY (3-0) 3

Technical writing in the geological sciences will focus on the preparation of geological reports, analysis of data, resumes, proposals and bibliographic documentations. Winter term.

Prerequisites: Comp 150, LIB 150 and junior standing.

Geol 401B NATURAL RESOURCES AND THE ENVIRONMENT (3-0) 3

A critical study of the need for development of fossil fuel and industrial mineral deposits and the need to preserve regions in their natural state. Fall term.

Prerequisite: Geol 113B or consent of instructor and junior standing.

Geol 405 GEOLOGIC DATA ANALYSIS AND MODELING BY COMPUTER (2-6) 4

Use of the computer to help transform geologic data into information. Covers computer fundamentals, univariate and multivariate statistics, contouring/mapping algorithms, trend surface analysis, variograms and kriging. Fall term.

Prerequisites: Geol 202 and junior or senior standing.

Geol 409 ECONOMIC MINERAL DEPOSITS (3-3) 4

Principles of ore genesis; geologic occurrence of uranium and metallic mineral deposits; mine tours. Winter term. Alternates with Geol 410.

Prerequisites: Geol 337, 364 and 420, or consent of instructor.

Geol 410 PETROLEUM GEOLOGY (2-3) 3

The origin, migration and entrapment of petroleum, and the methods employed in exploration and development of petroleum occurrences. Winter term. Alternates with Geol 409.

Prerequisites: Geol 337 and 363, or consent of instructor.

Geol 415 REGIONAL GEOLOGY OF THE UNITED STATES (3-0) 3

An examination of the stratigraphy, tectonic setting and geologic evolution of the major physiographic units of the United States. Fall term. Alternates with Geol 461.

Prerequisites: Geol 337 and 361.

Geol 420 INTRODUCTION TO GEOCHEMISTRY (3-0) 3

Behavior of the common rock-forming oxides in endogenic and exogenic processes; isotope geochemistry; geochemical exploration. Winter term. Alternates with Geol 435.

Prerequisites: Geol 207, 210 and 405, or consent of instructor.

Geol 430 ENGINEERING GEOLOGY (3-0) 3

Application of geological sciences to the location, design, construction, operation and maintenance of engineering works. Winter term. Alternates with Geol 325.

Prerequisites: Geol 210, Math 121B.

Geol 435 GROUNDWATER GEOLOGY (3-0) 3

The qualitative and quantitative aspects of the occurrence of water in the ground. Winter term. Alternates with Geol 420.

Prerequisite: Geol 361.

Geol 441 FIELD GEOLOGY 6

The fundamental procedures and practices in geologic mapping. Summer term.

Prerequisites: Geol 114B, 202, 210 and 337, or consent of instructor.

Geol 442 FIELD STUDIES 5

Intensive field work on various geological problems emphasizing interpretation of petrologic and structural relationships. Summer term.

Prerequisite: Senior standing in geology or consent of instructor.

Geol 461 DEPOSITIONAL SYSTEMS (2-3) 3

Modeling of sedimentary deposits with respect to time and the development of stratigraphic sequences. Fall term. Alternates with Geol 415.

Prerequisite: Geol 361.

Geol 496 SENIOR SEMINAR (2-0) 2

Emphasis is on the preparation, writing, and public presentation of the senior thesis project. Field research is commonly central to the project and must be initiated, in consultation with department faculty, prior to the course. One credit hour of independent study credit (Geol 499) will probably be necessary to prepare for the seminar. Career preparation activities are also part of the seminar. Fall and winter terms.

Prerequisite: Geol 380W, senior standing or consent of instructor.

Geol 499 INDEPENDENT STUDY 1-3

Individual research under the supervision of a faculty member. Offered on demand.

Prerequisite: Consent of department chair.

[Return to List](#)

German

ML 123 ELEMENTARY GERMAN I (4-0) 4

A course in grammar, pronunciation, reading and conversation. Fall term.

ML 124A1 ELEMENTARY GERMAN II (4-0) 4

Continuation of ML 123. Winter term.

Prerequisite: ML 123 or consent of instructor.

ML 128 CONVERSATION I - GERMAN (1-0) 1

Instruction in everyday conversation. Optional.

Prerequisite: Students must be enrolled in ML 123 Elementary German I, or obtain consent of instructor.

ML 129 CONVERSATION II - GERMAN (1-0) 1

Continuation of ML 128. Optional.

Prerequisite: Students must be enrolled in ML 124A1 Elementary German II, or obtain consent of instructor.

ML 223A1 INTERMEDIATE GERMAN I (3-0) 3

Second-year German with emphasis on reading, composition and conversation. Fall term.

Prerequisite: ML 124 or consent of instructor.

ML 224A1 INTERMEDIATE GERMAN II (3-0) 3

Continuation of ML 223. Winter term.

Prerequisite: ML 223 or consent of instructor.

ML 332C GERMAN CULTURE (3-0) 3

German Culture is an inquiry course exploring the question of German

national identity through an examination of German culture. The course includes a historical overview of important trends in German culture and politics, but concentrates on present-day unified Germany. The language of instruction is German.

Prerequisite: Sophomore standing.

ML 333A1 ADVANCED GERMAN COMPOSITION AND CONVERSATION (3-0) 3

Emphasis on advanced reading and conversation as well as on grammar and composition.

Prerequisite: ML 224 or consent of instructor.

ML 334A1 TOPICS IN GERMAN LITERATURE (3-0) 3

Topics will vary; may be repeated for a different topic. Offered on demand.

Prerequisite: ML 224 or consent of instructor.

ML 335A1 SEMINAR IN GERMAN (3-0) 3

Advanced reading and research in selected areas of German Studies.

Prerequisite: ML 224 or consent of instructor.
