This course will introduce you to the academic practices of inquiry and research. You will work on critical reading and writing skills as well as conducting more advanced, independent research. You will analyze a variety of texts and work toward a final research project that will produce a piece of scholarship to add to the current body of knowledge on our subject: love. We will examine our subject from a multi-disciplinary lens using a mixture of the hard and soft

					We will explore a spectrum of social, political, economic, and philosophical issues all in the context of one theme-the modern day Civil Rights Movement and its aftermath. The focus of this study of a part of African American history is the struggle of Black Americans for full citizenship, equality and dignity in the United States.

						<p>This section of Comp 250 will partner with local non-profit agencies and work together with them to understand a particular problem and research an identifiable need. This partnership will be mutual, meaning that the research students conduct will benefit the agency as well as allowing students the opportunity to research a self-initiated project that has a real audience. Additionally, this project will foster more investment and ownership since students will be designing a research project collaboratively with their community.</p>

21307	HON	221				Greg Mortenson's Three Cups of Tea	1F	X 2.0	REEDLB	027	01:55pm	03:55pm	F	Hartney	
This course participates in the Mortenson's Three Cups of Tea and Me Learning Community.															
Greg Mortenson, the author of the Fall 2008 Common Reading Experience selection THREE CUPS OF TEA, believes that, "When you educate a man, you educate an individual. When you educate a woman, you educate a community." The course will examine how Mortenson helped to change the paradigm for understanding education within the context of gender discrimination, religious intolerance, ethical concerns, political pressures, and the war on terror in remote Pakistani villages. The course will examine not only what Mortenson did, but why and how he accomplished such a high level of success.

FALL 2008 SCHEDULE OF CLASSES

21309 HON 222	Sex, Culture and Conflict 1F	2.0	REEDLB 019	04:40pm 06:40pm M	Birkby
<p>Louis Henkin, the "father of human rights," has shaped western thought on human rights and international law since World War II. He sees his approach to these concepts in terms of a revolution because he argues that human rights and international law are not just about nations interacting but also how they treat individuals, an idea that is still scandalous in the international law community. The class would begin with basic international law principles and Henkin's idea of human rights (first through his text HOW NATIONS BEHAVE)-what they are (should be) and how (if) the international community protects those rights.</p>					
<p>Jane Goodall's theories about human evolution were initially contradictory to what people wanted to believe about human beings (i.e., we are unique as a species), but has now come full circle. Her work with chimpanzees has shown that we are not all that unique and we are in fact (in surprising ways) pretty similar to chimpanzees (and all primates). Her work has become rather fundamental to some of what we now know regarding our own evolution. We will examine these questions in terms of biology, anthropology, psychology, and theory in general, as well as other possible disciplines that the students would like to bring to the discussions. Some of the texts that will be considered are: Goodall's THROUGH A WINDOW; then, some relatively new texts providing new, possibly foundational, theories: Dale Peterson and Goodall's DEMONIC MALES, and Frans de Waal's work on non-reproductive uses of sex within bonono society.</p>					
21310 HON 223	Human History and Liberal Arts 1F X	2.0	EBH 210	08:00am 10:00am R	Martin
<p>This course participates in the Human History and The Liberal Arts Learning Community. Human history is far more than names and dates. It is anthropology as well as the history of complex society and political processes. If you have ever wondered - Who are we? Where did we come from? Why are things the way they are? -then this learning community is for you. Come study the art AND science of what it means to be human!</p>

<p>Who or what is "Disney"? For some, it symbolizes an adorable cartoon mouse, star of film, TV, his own club, and theme parks. For others it symbolizes a man who created an empire /corporation that is omnipresent in the American public's mind and world corporations. So who or what is "Disney"? This course will present an inquiry into this phenomenon of American business and economics, pop culture, the media, historiography, gender theory, and even literary theory. Can one be a leader? What is leadership? Is there such a thing as leadership? Ontology in general looks at questions of who we are and what is real: the study of the nature of being. Leadership is one such level of "being" that may exist in the world today. And the term "leadership" is a label everybody uses, but no one can define in a valid, intersubjective way. Students will address, evaluate, and attempt to synthesize possible meanings of "leadership". In part, students will inquire into the meaning of leadership by considering several questions, for example: is leadership best thought of as something real, to be discovered as true, or something imaginary, to be invented as useful.</p>

	<p>Are you tired of your voice not being heard? Do you have 'election fever'? Has the election process of 2008 created more questions than answers? In this forum students will learn some election history, be civically engaged and get involved in today's campaigns, all in order to understand the political process as it culminates in the elections in November. For example, how have gender and race become part of the political process, but also how have they impacted how politics are covered in the media, discussed at national and community levels, or just why are they political? How has the segregation of Church and State been reconfigured in recent decades? How did the media become part of the political game, as advocate, critic, but also a pawn of the process? The final weeks of the course will examine and deconstruct the results of the process.</p>
