Moodle 1.9.5
Moodle Policies and Procedures

Information Technology values your suggestions regarding Moodle. Please submit any ideas you have to askIT@fortlewis.edu or contact the Call Center at 970-247-7444. We strive to create a stable environment for all faculty, staff, and students. It is therefore our policy that:

1. Code Changes - No code changes will be implemented. Implementing changes to the base Moodle code presents a sustainability problem for Information Technology. As more and more code changes are implemented the compatibility and testing becomes too burdensome. The best practice is to wait until the change is fully integrated into Moodle.

2. Modules – The request deadline for modules is May 31. Collaborative testing will be completed by IT and the requestor by July 15. At this time a decision will be made to install the module or postpone the installation. IT will make decisions on whether to install the module based on sustainability, security, and quality.
   a. Available modules from the Moodle community may be found at http://moodle.org/mod/data/view.php?id=6009. Please take note of the warning posted on this Moodle module page.
      i. **WARNING:** Please be aware that some of these items have not been reviewed, and the quality and/or suitability for your Moodle site has not been checked. The modules here may have security problems, data-loss problems, interface problems or just plain not work. Please think carefully about maintenance before relying on contributed code in your production site, as some of this code may not work with future versions of Moodle.

For help or to report problems with this document please contact the Call Center at x7444 or email askIT@fortlewis.edu
